Education.—Education is compulsory between the ages of 7 and 14 years. It is non-sectarian and free at all State schools. The total enrolment in 1932 in 3,344 State schools was 384,775, and the average daily attendance 322,859. In addition to the State schools there were in 1932, 746 private colleges and schools, with 94,033 scholars, exclusive of many business and short-hand schools. The University of Sydney, with which 6 colleges are affiliated, including two Women's Colleges, was incorporated in 1850, and

had 3,091 students (2,276 male and 815 female) in 1932. The State expenditure on Education was £4,258,990 in the year ended June 1932. The individual students at State Technical classes numbered 15,549 in 1932, and many attended at the State Agricultural College and Farms.

FINANCE.

The receipts and expenditure of the principal revenue accounts of the State are shown below. Particulars of the business undertakings are shown under "Other," their accounts having been separated from the Consolidated Revenue Account as from July 1, 1928.

A sum of £800,000 contributed from Consolidated Revenue towards losses on developmental railways is duplicated in the figures for 1928-29, and later years being included as receipts and expenditure in both groups "Governmental" and "Other."

In terms of a financial agreement between the Commonwealth and the States, the Commonwealth took over the debts of New South Wales and the other States on July 1, 1929, and assumed the liabilities of the States to bondholders. A national debt sinking fund was established and the Australian Loan Council of representatives of the Commonwealth and the States was constituted to manage the debts and supervise public borrowing. The Commonwealth contributes a certain sum each year towards interest and sinking fund charges. In the latter part of the year 1931 the debts held in Australia were converted under the National Debt Conversion Loan into securities bearing interest at a reduction of 2½ per cent.

Of the loan liability of New South Wales to Commonwealth at June 30, 1932, an amount of £164,977 5s 9d was repayable in London, the annual interest being £7,837 50s 8d at par, and £13,638 13s 7d repayable in New York, interest £650 9s 10d at par. The interest payable in London has been reduced by loans converted in 1932-33. The balance, £127,945 9s 1d, was held in Australia, with an annual interest bill of £5,074 9s 5d.

Banks, &c.—There were (June 30, 1933) 13 banks, with total assets within New South Wales £157,730,862, including advances, &c., and Government securities £139,356,977; coin, bullion, Australian Government Notes and cash with Commonwealth Bank, £12,023,255, and liabilities, £122,394,195, including deposits, £114,175,036. The savings bank deposits on June 30, 1933, amounted to £72,307,685. The amount assured in New South Wales in Life Assurance Societies in 1932 was £116,471,529 Ordinary, and £26,258,678 Industrial. The membership of Friendly Societies

was 225,321, and the funds at June 30, 1932, were £4,135,068. Members of Trade Unions numbered 292,649, the funds of 199 Unions at Dec. 31, 1931, being £359,250.

Co-operative Societies.—There were 375 registered societies in existence at June 30, 1932. During the year ending on that date the sales of 102 rural societies amounted to £12,636,524, and the sales of 46 trading societies amounted to £2,055,464. Building Societies advanced £358,209 to members.

Shipping.—Excluding coastal trade, 2,420 vessels entered ports of N.S.W. during the year ended June 30, 1932. For the year ended June 30, 1933, the shipping entries at Sydney, including State coastal, were 6,315 vessels of 9,360,126 net tonnage. The dock accommodation at Sydney includes four large graving docks, five floating docks, and seven patent slips. At Newcastle there are a floating dock and five patent slips.

Motor Vehicles.—At June 30, 1933, there were 147,647 registrations of motor-cars in force, and 66,213 of other motor vehicles.

Railways.—The railways and tramways of New South Wales, with the exception of a few short lines, representing about 113 miles are controlled by the State. At June 30, 1932, the mileage of the State railways open for traffic was 6,125, the capital cost amounted to £139,657,319, and the net earnings for the year 1932-33 to £3,392,920.† There were also 193 miles of State tramways, the capital cost being £8,336,200, and the net earnings during the year 1932-33 £485,679.‡

Roads and Bridges.—A Main Roads Board, of two engineers with special knowledge of road construction and a president, was constituted in 1924. The Board was abolished on March 22, 1932, and its functions were transferred to a Board of Commissioners appointed to control the land transport services of the State. Municipal councils are assisted in the construction and maintenance of the main highways with the object of developing vacant lands, feeding the railways, and giving primary producers access to markets and providing better facilities for motor traffic. There are 118,775 miles of roads in New South Wales. The total expenditure by the Government on roads, bridges, etc., other than on Sydney Harbour Bridge, in 1931-32 was £1,696,272 (including loan moneys expended by Main Roads Board). The construction of an arch bridge over Sydney Harbour was completed and the bridge opened for traffic in March, 1932. This bridge carries a roadway 57 ft. wide, two footways each 10 ft.

wide, and four lines of railway, of which two are being used as tramways. At mean high water there is a headway of $17\frac{1}{2}$ feet. At June 30, 1933, the Government expenditure in connection with the bridge amounted to £10,557,170. Of this sum £1,339,027 had been expended on assumptions and £2,065,430 on approaches. The cost of the bridge is being defrayed partly by a levy of $\frac{1}{2}$ d. in the £ on the unimproved capital value of properties in adjacent local areas, and partly by charges and tolls in respect of traffic across the bridge.

Posts, Telegraphs and Telephones.—The postal, telegraphic, and telephonic services are administered by the Commonwealth Government. At June 30, 1933, there were 2,488 post offices in New South Wales. The postal matter carried during 1933-34 included 294,126,373 letters, postcards, books, packets and parcels, 64,875,300 newspapers. During the year ended June 30, 1933, 5,190,953 telegrams and cablegrams were transmitted, exclusive of telegrams from other States of the Commonwealth of Australia. The telephone line connections numbered 235,179.

TRADE.

The overseas imports into New South Wales during 1932-33 were valued at £816,238,876 (estimated Australian currency value £A29,814,355). Overseas exports were £A46,723,906 (estimated British currency value £816,373,285, 82s.). Chief exports (in Australian currency) were gold £13,344,888, wool £16,071,953, wheat and flour £6,329,640, butter £1,813,383, meats £2,743,702 and hides and skins £82,514.

PRODUCTION AND INDUSTRY.

Agriculture is one of the principal industries of New South Wales; 5,107,409 acres, excluding 1,505 acres double-cropped, were under cultivation during the year ended Mar. 31, 1933, producing 54,966,000 bushels of wheat, 2,669,580 bushels of maize, 1,526,450 bushels of oats, 1,349,653 bushels of rice, besides other kinds of grain, with 33,709 tons of potatoes, 811,243 tons of hay, and 23,336 cwt. of dried leaf tobacco. Sugar-cane to the extent of 179,153 tons was crushed; and 1,589,707 gallons of wine, 343,427 cases of bananas, and 11,659 cases of pineapples obtained; almost every kind of fruit and vegetable is grown. The total area under wheat in the year 1932-33 was 3,995,187 acres, of which 3,682,945 acres were harvested for grain, and 292,234 acres for hay, and 20,008 acres were fed off. The production of wheat was 54,966,000 bushels of grain and 375,632 tons of hay. It is estimated that 77,000,000 bushels of wheat for grain were produced in 1932-33.

Land Alienation.—The total extent of land alienated and in process of alienation from the Crown on June 30, 1932, was 67,902,875 acres, while the area of land held under lease, &c., from the Crown was 109,459,354 acres, and the balance, 20,675,271 acres, consisted of reserve and other lands neither alienated nor leased; the total area of the State, exclusive of Federal Capital Area (Canberra), being 198,036,500 acres.

Livestock.—The country is admirably adapted for sheep-farming, and several breeds of sheep are depastured, including the celebrated merino, which was introduced in 1797. On Mar. 31, 1933, there were 524,751 horses, 2,150,877 dairy cows, 1,824,709 other cattle, total cattle 2,993,586;

52,986,000 sheep, 385,846 swine, 24,176 goats, and 356 camels. In 1931-32, 503,210,000 lb. (stated as in the grease) of wool were produced, 123,847,198 lb. butter, 6,590,357 lb. cheese, and 20,468,259 lb. bacon and ham. The production of wool in 1932-33 was about 524,000,000 lb., and butter about 129,000,000 lb. During 1932-33 there were 125,451 persons permanently engaged in rural industries, 116,929 being males, and 8,522 females.

Values of Rural Industries.—The agricultural production was valued in 1931-32 at £14,547,000, dairying and farm-yard produce at £11,525,000, and pastoral production at £19,482,000, a total of £45,554,000.

Forests, Fisheries and Trapping.—The value of these industries in 1931-32 was £2,578,000, and 6,003 persons were engaged.

Mining Industry.—The goldfields were opened in 1851. The principal minerals are coal, copper, silver, lead, zinc, tin, iron, opal and platinum. The total value of minerals won during 1932 was £7,163,099, exclusive of Portland cement £350,715, lime £30,745, and coke £103,177, coal accounting for £4,376,453, silver, silver lead and ore £1,566,912, and gold £118,685. The value of the mining plant and machinery was £7,698,492. The mining industry gave employment to 17,721 persons during the year.

Factories.—In 1931-32 there were 7,397 factories. The average number of persons employed during the year was 126,355, of whom 90,667 were males and 35,688 females, the amount of £22,751,073 being paid in salaries and wages. Male workers, exclusive of working proprietors, received on an average an amount of £226 12s. 6d. during the year and females £98 12s. 6d. The capital value of land, buildings and fixtures amounted to £46,462,828, and of plant and machinery £50,277,992. The full capacity of the machinery was 1,499,460 h.p., including steam, 994,728 h.p.; gas, 14,363 h.p.; electricity, 295,083 h.p.; water, 36,200 h.p.; oil, 58,177 h.p. The power actually used was, on the average, 764,688 h.p. The value of output was £114,439,507; materials used, £63,556,702, and fuel consumed (including motive power reituted), £4,229,225; the production, i.e. value added to raw materials, was £46,653,481. There are large iron and steel works at Newcastle, Lithgow and Port Kembla.

The total value of the production of the primary industries in 1932-33 was £53,796,000, making, with factory production, a total for all industries (as far as it is recorded)* of £100,449,000, which is equal to £39 17s. 6d. per head of population.

LOCAL GOVERNMENT.

For purposes of Local Government, with the exception of an area of 125,400 sq. miles in the sparsely-populated western division, the State is divided into 120 municipalities and 138 shires, governed by councils which are elected triennially. The councils are empowered to levy rates on the value of land, to float loans, to acquire land and works, to construct and maintain streets, jetties, wharfs, &c., to make regulations regarding cattle slaughtering, maintenance of public places, traffic, street and road lighting, public health and safety, management of parks, &c.

The basis of rating is mainly on the unimproved capital value of land, which in 1932 was £215,997,245 in municipalities, including the city of Sydney, and £168,739,170 in shires.

The total income of the municipal bodies was £12,840,296, and the expenditure on works and services, &c., £12,449,770.

TOWNS.

SYDNEY, the chief city and capital, stands on the shore of Port Jackson, with a water frontage of 128 miles; the depth of water at the Heads is not less than 80 feet, and at the wharves from 30 to 50 feet. There are extensive plants for loading ships, and for storing and loading grain in bulk; also for replenishing coal and oil bunkers. For 13 miles Sydney Harbour extends inland, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The principal wharves are situated in close proximity to the business centre of the city. The total area of water in the port is 14,284 acres, or about 22 square miles, of which 3,000 acres have a depth of from 35 feet to 160 feet; the rise and fall of the tide is from three to six feet. The city extends four miles north and south by three miles east and west, and contains a population of 109,400 (Dec., 1931); or, including suburbs, a population of 1,256,230. In addition to the Government buildings, there are the University and Colleges, National Art Gallery, museums, botanic gardens, zoological gardens, free public libraries, observatory, conservatorium of music, two cathedrals, numerous churches and some large public hospitals. The parks within the metropolitan area are 92,537 acres in extent, and include the National Park which measures 33,807 acres, Kuring-gai Chase 35,300 acres, Kurnell 248 acres, Centennial Park 474 acres, and Parramatta Park 252 acres. Other towns are Newcastle (with suburbs), 103,700; Broken Hill, 22,050; Lithgow, 15,050; Maitland, E. & W., 11,940; Goulburn, 12,570; Katumba, 9,580; Bathurst, 10,050; Lismore, 10,520; Albury, 9,770; Cessnock, 13,860; Wagga Wagga, 9,100; Liverpool, 6,350; Fairfield, 7,920; Grafton and South Grafton, 6,560; Wollongong, 10,800; Orange, 8,640; Tamworth, 7,790; Armidale, 6,960; Dubbo, 6,350; Glen Innes, 4,250; Forbes, 5,120.

Approximate time in transmission of mails from London to Sydney, 28 days.

DEPENDENCY OF NEW SOUTH WALES.

LORD HOWE ISLAND (436 miles north-east of Sydney). Lat $31^{\circ} 33' 4''$ N., Long. $159^{\circ} 4' 26''$ E. Area, 3,220 acres. Pop., Dec., 1931, 113. The island is of volcanic origin and Mount Gower reaches an altitude of 2,840 feet. The affairs of the Island and the control of the Kentia palm seed industry are vested in a Board of Control. Office, Chief Secretary's Department, Sydney.

II.—VICTORIA.

The State of Victoria comprises the south-east corner of Australia, at that part where its territory projects farthest into the southern latitudes; it lies between the 34th and 39th parallels of South latitude, and the 141st and 150th meridians of East longitude. Its extreme length from east to west is about 420 miles, its greatest breadth is about 250 miles, and its extent of coast-line is about 980 geographical miles, including the length around Port Phillip Bay, Western Port and Corner Inlet, the entire area being 87,884 square miles.

POPULATION.—A census was taken on June 30, 1933. A preliminary count shows that the population was 1,818,080 (902,335 males and 915,745 females).

Increase of the People.

Year	Births	Deaths	Marriages
1928	34,498	17,708	13,186
1929	33,604	16,717	12,935
1930	33,127	15,959	11,641
1931	30,322	17,033	10,122
1932	27,464	16,805	11,744

Vital Statistics.—Annual rate per 1,000 of population in 1932:—Births, 15.21; Deaths, 9.30; Marriages, 6.50. Deaths under 1 year per 1,000 births, 43.00.

Religion.

There has been no State aid to religion since 1875. Members of the Church of England at the date of the census in 1921 numbered 601,809, "Protestants" 18,636, Presbyterians 257,072, Methodists 183,829, Baptists 32,305, Church of Christ 22,250, Independents 15,893, and Roman Catholics 322,565.

PHYSIOGRAPHY.

The *Australian Alps* and the *Great Dividing Range* pass through the centre of the State, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys. The Murray River forms the northern boundary of the State, and has many Victorian tributaries. The capital stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

Climate.—The mean temperature over a period of 77 years, ended in 1932, was 58.4° Fahrenheit, the thermometer rising (on the average four days during the year) above 100° in the shade, and falling (on the average for about two nights in the year) below 32° F. The average number of days on which rain fell was 139, and the average yearly rainfall was 25.61 inches.

GOVERNMENT.

Victoria was originally known as the Port Phillip District of New South Wales, and was erected into a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor, appointed by the Crown, aided by an Executive Council of 12 members.

Governor of the State of Victoria (Vacant).

£900; M. L. Cussen 630

Crown Solicitor, F. G. Menzies 1,475

NOTE.—All the above-mentioned salaries, including Judges' salaries, are subject to percentage reductions under the Financial Emergency Act, at graduated rates, varying from 20½ per cent. on £630 to 25 per cent. on £2,500.

EDUCATION.

Primary Education is compulsory, secular and free between the ages of 6 and 14, there being 265,673 children on the registers in 1932, the average attendance being about 70 per cent.

Secondary Education is principally under private control, 73,342 pupils being in attendance at the 505 schools in 1932. There is a State-aided University at Melbourne, with four affiliated colleges (Trinity, Ormond, Queen's, and Newman).

FINANCE.

The revenue and expenditure and State Debt for five years are given as follows:—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1928-29	28,156,034	28,104,947	159,551,653
1929-30	27,323,842	28,496,712	162,288,994
1930-31	27,575,504	28,029,702	167,016,596
1931-32	24,555,272	26,163,594	169,823,964
1932-33	24,077,586*	24,919,027	171,399,031

* Subject to revision.

Banking, &c.—There were (June 30, 1933) 13 banks (including Commonwealth Bank) with total assets £155,826,285, within the State, and liabilities £128,807,731. The savings bank deposits (including amounts deposited in the Commonwealth Savings Bank) at June 30, 1933, amounted to £67,823,544.

PRODUCTION AND INDUSTRY.

Agriculture.—Of the 7,552,928 acres under cultivation in 1931-32, 3,565,872 were wheat crops and 439,626 oats, and 955,839 acres were cut for hay. In 1931-32, 1,530,061 gallons of wine were produced. The estimated value of production in 1931-32 was (including manufacturing values) £7,416,286.

Livestock.—There were in 1932, 775,538 milch cows, producing 132,131 8oz lb. of butter and 7,723,328 lb. of cheese; and 861,992 other cattle, 16,376,217 sheep, 286,782 pigs, and 375,450 horses.

Minerals.—The gold production in Victoria, which had been declining for many years, increased in 1932 and 1933; the amount produced in 1932 was 47,745 oz. (£284,623). Other minerals raised consisted principally of coal (black and brown), kaolin, tin and gypsum.

Trade and Industry.—Wool, wheat, flour, butter, live stock, fruits, condensed milk and poultry are the staple productions of the State; and the manufactures (8,204 factories, &c.), employing 128,265 hands in 1931-32, are mainly for home consumption. The chief exports overseas are: wool, butter, wheat, flour, skins and hides, tallow, milk and cream, preserved and frozen meats and fruit (dried and fresh). The principal overseas imports of the State are iron and steel, machines and machinery, metals and metal manufactures, apparel, attire, cottons and linens, silk, bags and sacks, yarns, tea, timber, petroleum spirit and paper.

CITIES AND TOWNS.

MELBOURNE, the capital city, which is an episcopal see, was originally laid out in the year 1837 with wisdom and foresight; its wide streets, park lands, public gardens, university, public library, museum and large churches are the principal features of the city. Melbourne and suburbs cover an area of 125,742 acres and contained (December 31, 1932) a population of 1,028,300. Other cities are Ballarat, 41,750; Geelong, 42,750; Bendigo, 33,730; Warrnambool, 8,200. The chief towns are Castlemaine, 6,670; Wonthaggi, 7,330; Mildura, 6,000; Hamilton, 5,300; Ararat, 5,350, and Shepparton, 5,660.

Transmission of mails, approximate, 30 days. Melbourne, distant from London 11,267 miles; transit, 30 to 35 days.

III.—SOUTH AUSTRALIA.

The State of South Australia is situated between 26° and 37° S. lat. and 120° and 141° E. long., the total area being 380,070 sq. miles.

POPULATION.—In 1933 the population numbered 580,849 (290,937 males and 289,912 females).

Increase of the People.

Year	Births.	Deaths.	Marriages.
1928	11,408	5,147	4,146
1929	10,665	5,039	3,719
1930	9,984	4,851	3,212
1931	9,079	4,888	3,069
1932	8,521	4,957	3,636

Birth rate 14·54, death rate 8·46, marriage rate 6·20 per 1,000 of population. Infantile mor-

tality, 35th per 1,000 births, being one of the lowest rates in the world.

Religions.

Religion is free and receives no State aid. At the Census, 1921, the persons belonging to the principal religious denominations were as follows:—Church of England, 165,968; Methodists, 122,634; Congregationalists, 15,289; Baptists, 23,033; Lutherans, 24,604; Roman Catholics, 64,054; Presbyterians, 22,599; and Churches of Christ, 15,039.

PHYSIOGRAPHY.

The eastern portion of the State is divided longitudinally by the *Flinders Range*, which extends from the eastern side of the Gulf of St. Vincent to the Lakes Torrens and Eyre. The north-western portion is partly desert which can never be brought into cultivation. The northern portion of the State, between Lake Eyre and 26° South latitude, is also unpromising in comparison with the fertile land that surrounds the hill country of the east. Except for the Murray, which flows for some 250 miles through the south-eastern corner into the Southern Ocean, there are no rivers of importance in South Australia.

Climate.—The mean annual temperature at Adelaide is 53°, the winter temperature (July–August) averaging 53°, and the summer (November–March) 71°. During the summer months the maximum temperature at times exceeds 100°, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight. The average annual rainfall at Adelaide, derived from 44 years' record, is 21¹/₄ inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas extending from Melrose to Cape Northumberland. In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while on the Adelaide plains the precipitation has fallen as low as 16 inches.

GOVERNMENT.

South Australia was proclaimed a British Province in 1836, and in 1852 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 6 Ministers, and the Lieutenant-Governor.

GOVERNOR.

Governor of South Australia, His Excellency Brig.-Gen. Hon. Sir Alexander Gore Arkwright Hore-Ruthven, 1st W. K.C.M.G., C.B., D.S.O. (1928) £5,000

Private Sec., Leigh Winsor, C.M.G., M.V.O.
Lieut.-Governor, Hon. Sir George John Robert Murray, K.C.M.G., LL.M., born 1863 (1916)

THE MINISTRY (April 18, 1933).

(£7,750 is allotted as salaries to Ministers, less 20 per cent.)

Premier and Treasurer, and Minister of Immigration, Hon. Richard Layton Butler.
Attorney-General and Minister of Education, Industry and Employment, Hon. Shirley Williams Jeffries.

Chief Secretary and Minister of Mines and Forestation, Hon. George Ritchie.

Commissioner of Crown Lands and Minister of Repatriation and Irrigation, Hon. Malcolm McIntosh.

Commissioner of Public Works and Minister of Railways and Marine, Hon. Herbert Sydney Hudd, M.C.

Minister of Agriculture and Local Government, Hon. Albert Percy Blessing.

AGENT-GENERAL IN LONDON.

Agent-General in London, Hon. Lionel L. Hill, Australia House, W.C. &..... £1,600
Secretary and Trade Commissioner, C. F. G. McCann 850

THE LEGISLATURE.

Parliament consists of a *Legislative Council* of 20 members elected for 6 years, one-half retiring every 3 years; and a *House of Assembly* of 46 members, elected for a maximum duration of 3 years. Election is by ballot, with universal adult suffrage for the House of Assembly for all British subjects, male and female; there is a small property qualification for electors to the Legislative Council, who numbered 133,258 in 1932, those for the Assembly numbering 334,915.

President of the Legislative Council, Hon. Sir D. J. Gordon £680
Speaker of the House of Assembly, Hon. R. D. Nicholls 680

THE JUDICATURE.

Law and Justice.—The Supreme Court is presided over by the Chief Justice and four Puisne Judges; there are Courts of Vice-Admiralty and Insolvency, as well as Local Civil Courts, with stipendiary magistrates and the usual Police Courts. The Supreme Court convictions for 1931 totalled to 774, which is at the rate of 1 in every 2,200 of the population.

Chief Justice and Judge of Vice-Admiralty, Hon. Sir G. J. R. Murray, K.C.M.G., B.A., LL.M. £2,000
Judges, Hon. J. M. Napier, LL.B.; Hon. H. A. Parsons, LL.B.; Hon. F. W. Richards, LL.D.; Hon. A. W. Piper 1,700

EDUCATION.

Public Education (Primary, Secondary and Technical) is provided by the State, and controlled by a responsible Minister; it is secular, compulsory, and free; there are 1,087 State schools, with 3,408 teachers and 93,863 scholars; the expenditure in 1932 was £875,265, including grants to University, Libraries, &c. The Government grants Exhibitions and Scholarships, carrying the holders to higher schools and the University. Private schools number 283, with 890 teachers and 13,887 scholars. There is an endowed University at Adelaide, founded in 1874, with 1,052 undergraduates, and 1,361 other students; all classes are open to women. A State School of Mines and Industries has also been established, and there are technical schools at 9 country centres and also special trade schools for apprentices and domestic art centres. The public library, museum, art gallery and local institutes are supported or assisted by the State.

STATE FINANCE.

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1929	10,840,914	11,771,778	92,653,531
1930	9,847,202	11,473,083	93,419,118
1931	10,725,811	12,539,668	99,527,447
1932	10,481,977	11,545,336	101,599,232
	10,160,712	11,169,610	103,707,332

Banking.—There are 8 banking institutions in Adelaide, in addition to the Commonwealth Government Bank and the State Bank of South Australia, with about 384 branches and agencies, and £41,000,000 paid-up capital, having a total average liability of £37,228,528 and assets £31,528,803 in June quarter, 1933. The savings banks on June 30, 1933, had 59,012 accounts open with £22,515,288 to their credit. Over 90 per cent. of the population have Savings Bank accounts.

PRODUCTION AND INDUSTRY.

Agriculture.—Of the total area about one-half is farmed or grazed, and 7,870,000 acres cultivated—under wheat 4,200,000 acres, hay 528,000, oats 206,000, barley 222,000, orchards and vineyards 82,000, with 2,500,000 acres lying fallow. Wheat produced 42,430,000 bushels. Oranges, lemons, apples, apricots, peaches, and all stone fruits and olives are successfully grown, and fruit drying is profitable. There were 52,000 acres of vines, with a production of 22,170,000 gallons of wine; 137,000 cwt. of currants, and 185,000 cwt. of raisins. Considerable quantities of fruits (fresh and dried) and also wine are annually sent to overseas countries, principally the United Kingdom and the other Australian States. Brandy and other spirits are also produced. The land is also very suitable for the growing of all kinds of root crops and vegetables.

Live Stock (Dec. 31, 1932).—There were 7,713,236 sheep, cattle 312,932, horses 190,222, pigs 113,831. Wool production, 75,500,000 lb.

Minerals.—Silver, lead, manganese, bismuth, iron, gypsum, salt, phosphate rock, coal, &c., are found, the total mineral output being valued at £821,808 (1932). Over £33,056,000 of copper have been produced since the foundation of the State, but production has not been profitable for some time.

Manufactures.—In 1932 there were 1,662 factories, employing 23,830 hands, the gross value of the output being £19,222,370, and the wages paid £4,071,117. Plant, machinery, land, and buildings were valued at £17,656,901.

Value of Production, 1931-32.—Crops, total value, £13,907,488, average per head, £24; manufactures, £6,570,939; pastoral, £2,725,762; minerals, £559,069; dairying, £1,570,144; poultry, fisheries and game, forestry, &c., £1,630,905. Total value of production, £26,973,307, average £46 per head. Mean previous five years. Total £34,666,639. Per head, £60.

Trade and Commerce Oversea, 1931-32.—The total value of the Imports was £2,821,538 (U.K. £1,038,885, or 38 per cent.; other British countries £806,807, or 29 per cent.; foreign countries £956,740, or 33 per cent.). The total value of the Exports was £12,227,406 (U.K. £7,188,008, or 59 per cent.; other British countries £550,602, or 4 per cent.; foreign countries £4,508,796, or 37 per cent.). In 1931-32 the imports were £2,766,892 and exports £12,844,984, consisting of breadstuffs £5,571,804; pastoral and dairying products £3,299,086; fruit and wine £1,444,553; minerals £1,589,352; gold specie £483,535; and miscellaneous £122,654.

Transport, &c.—There are 3,756 miles of railway in South Australia, 156 miles of electric tramways, 46,000 miles of roads and several good harbours. On June 30, 1933, there were 59,629 motor vehicles in use, classified as 39,036 cars,

taxi-cabs, &c., 12,073 lorries, trucks, &c., 8,520 motor cycles and 95 road tractors. There are 872 post offices in the State, and 795 telegraph stations and 48,666 telephones connected.

Shipping (1931-32).—Ships entered numbered 999, tonnage 4,139,455; British 819 (3 451,697 tons), foreign 180 (687,758 tons).

TOWNS.

ADELAIDE, the chief city and capital, population (1932) 320,000, inclusive of suburbs within 10 miles radius. Other towns are Moonta (4,250), Kadina (5,000), Wallaroo (3,250), Port Pirie (10,000) on the east, and Port Augusta (3,350) at the head of Spencer Gulf, and Kapunda (2,200), Gawler (5,000), and Peterborough (3,300) on the line from Adelaide to the north, Victor Harbor (3,450) in the south, Mt. Gambier (6,000) in the south-east, and Port Lincoln (2,850) on Kyre Peninsula. Murray Bridge (3,600) and Renmark (3,750) on the River Murray.

Transmission of mails from London to Adelaide, approximate, 29 days.

IV.—QUEENSLAND.

This State, situated in lat. 10° 40'—26° S. and long. 138°—153° 30' E., comprises the whole north-eastern portion of the Australian continent.

Queensland possesses an area of 670,500 square miles (i.e., equal to more than 5½ times the area of the United Kingdom).

POPULATION.—At the Census of 1921 the population numbered 755,972 (398,966 males and 359,003 females). On March 31, 1933, the estimated population was 978,299.

Increase of the People.

Year	Births	Deaths	Marriages
1928	19,783	7,976	6,321
1929	18,487	8,308	6,169
1930	18,939	7,455	6,199
1931	17,833	7,525	5,952
1932	17,367	7,813	6,415

Religion.

Since 1861 no State aid has been afforded to religion. At the Census of 1921 there were 299,786 Church of England, 172,662 Roman Catholics, 91,610 Presbyterians, 77,566 Methodists, 17,891 Lutherans, 14,725 Baptists, and 44,132 other Christians, with 4,267 Muhammadans and Pagans, besides "Indefinite," "No religion," &c.

PHYSIOGRAPHY.

The Great Dividing Range on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the *Kirby's Range* divides the land into a northern and southern watershed. The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt in the Gulf of Carpentaria, and the Barcoo and Warrego rise in the central ranges and flow southwards.

Climate.—At Brisbane the mean temperature for 1932 was 69° 0', the maximum and minimum shade temperatures being 99° 3' and 41° 0'; mean barometer, 30° 048. The coastal regions are warm and moist, the plateaus dry and temperate, whilst in the very far west the rainfall is scanty.

The rainfall during 1932 was 24.80 inches, and there were 97 wet days.

GOVERNMENT.

Queensland was constituted a separate colony with Responsible Government in 1859, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of 10 members.

GOVERNOR

Governor of Queensland, His Excellency
Col. The Rt.-Hon. Sir Leslie Orme
Wilson, G.C.S.I., G.C.I.E., C.M.G., D.S.O. ... £3,000
Private Sec., Maj. A. V. Stark ... 300
Aide-de-Camp, Capt. T. P. Honour, R.M.
Lieut.-Governor, Hon. Sir Jas. W. Blair ... 300

EXECUTIVE COUNCIL.

(H.E. the Governor presides.)

Premier, Chief Secretary and Treasurer,
Hon. Wm. Forgan Smith ... £1,300
Secretary for Public Lands, Hon. Percy
Pease ... 1,000
Attorney-General, Hon. John Mullan ... 1,000
Home Secretary, Hon. Edward Michael
Haulon ... 1,000
Minister for Labour and Industry, Hon.
Maurice Patrick Hydes ... 1,000
Secretary for Transport, Hon. John Dush
Secretary for Mines, Hon. James Stopford
Secretary for Public Instruction, Hon.
Frank Arthur Cooper ... 1,000
Secretary for Agriculture and Stock, Hon.
Frank William Bulcock ... 1,000
Secretary for Public Works, Hon. Henry
Adam Bruce ... 1,000

AGENT-GENERAL IN LONDON.

Acting Agent-Gen. & Official Secretary,
L. H. Pike, A.C.I.R., J.F., 409-410 Strand, W.C.2.

THE LEGISLATURE.

Parliament consists of a *Legislative Assembly* of 62 members, elected by universal adult suffrage.
Speaker, Hon. George Pollock ... £1,000
Chairman of Committees, Edward Joseph
Hanson ... 700
Clerk, T. Dickson (*acting*) ...

THE JUDICATURE.

There is a Supreme Court, with a Chief Justice and six Puisne Judges; an Industrial Court, with a President and another Judge; and Inferior Courts at all the principal towns, presided over by Police Magistrates.

Chief Justice, Supreme Court, Hon. Sir
J. W. Blair ... £2,250
Senior Puisne Judge, H. D. Macrossan ...
Puisne Judges, W. F. Webb; H. H.
Henchman; E. A. Douglas; F. T.
Brennan; R. J. Douglas ... each 2,000

EDUCATION.

Primary Education is compulsory, secular and free. In 1932 there were 1,723 State schools, including 93 Provisional and 13 High schools in operation, with 4,064 teachers and an average daily attendance of 127,990 children; and in 1931, 122 private and 10 grammar schools, with 1,282 teachers and an average attendance of 27,196. A State-aided University was established during 1920.

FINANCE.

Revenue, Expenditure, and Debt of Queensland for five years ended June 30 :—

Year.	Revenue.	Expenditure.	Debt (Gross).
	£	£	£
1929	16,735,188	16,902,145	112,862,049
1930 ..	15,997,870	16,721,055	112,148,979
1931 ..	15,072,652	15,914,696	112,231,189
1932 ..	12,994,113	15,069,293	111,911,785
1933 ...	13,396,644	14,951,088	114,530,855

Banking.—Assets of Joint Stock Banks at June 30, 1933, £40,077,885, liabilities £36,188,919. The deposits at the same date amounted to £35,595,858. The Commonwealth Bank of Australia also has a branch in Queensland with assets June 30, 1933, £8,433,643, and liabilities £10,727,825. Depositors' balances in Queensland branch of the Commonwealth Savings Bank at March 31, 1933, £22,934,161, averaged £23 8s. 7d. to each inhabitant. There were 394,150 operative accounts.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—Of the total area of 429,120,000 acres the Government have parted with the fee simple of 19,031,136, and 89,003 acres have been granted without payment; under a system of deferred payment, 8,812,440 acres more are in process of alienation, and an additional area including preferential pastoral leases of 223,906,040 acres leased out for sheep and cattle runs, 75,879,750 acres for grazing selections, 9,321,080 acres are held under occupation licence, 365,255 acres under gold-mining and mineral lease, 991,606 for special purposes, 4,036,329 acres perpetual leases and perpetual lease prickly pear selections, 22,288 acres held as auction perpetual leases, prickly pear leases 8,489,640 acres, leases and roads 20,666,794 acres, leaving 57,508,538 unoccupied. Oats and barley flourish on the Darling Downs, while large areas are devoted to maize and wheat, the average yield per acre over a period of ten years being, maize 23.42 bushels and wheat 14.33 bushels. Both English and sweet potatoes are cultivated, as also are coffee, cotton, oranges, peaches, pineapples, grapes, bananas, coconuts, mangoes, plums, and various English fruits, while tobacco growing is rapidly expanding. In the year 1932, 214,027 tons of sugar were produced. The live stock in January 1932 included 5,535,065 cattle, 21,312,866 sheep, 454,486 horses, and 213,249 pigs. Wool, meat, sugar and butter are the principal products.

Climate.—The Bureau of Seasonal Forecasting of the Council of Agriculture, Turbot Street, Brisbane, makes researches into the climatic sequences of Queensland and issues forecasts, the beneficial nature of the work being much appreciated by farmers and graziers in Queensland and the adjoining States.

Forestry.—There are about 24,000,000 acres of commercial timberland in Queensland, of which there have been reserved for forestry purposes 5,583,270 acres. In 1931-32 the wealth produced by the timber industry of Queensland was about £1,350,000, and there were 2,785 hands employed in the sawmills and plywood mills. At June 30, 1932, the total area of reforestation plantations was 8,193 acres, and

in addition 82,518 acres had been treated for natural regeneration by the State Forest Service, which employs 359 persons, and is engaged actively in timber farming and wood-trading operations. An area of 236,711 acres has been reserved for National Parks.

Minerals.—The total mineral output in 1932 was £1,784,499. There are rich deposits of gold, copper, tin, lead, silver, limestone, ironstone, and wolfram, while coal is found in several districts. The gold output in 1932 was valued at £98,815; silver, £182,733; copper, £108,885; tin, £66,174; coal, £684,555; wolfram, £137; molybdenite, £296; lead, £573,813; opals and gems, £2,482; arsenic, nil; cobalt, nil; zinc, nil; fluor spar, £1,220; bismuth, £12; limestone, £51,811; scheelite, £34; ironstone (flux), £8,783; mercury sulphide, £754.

Commerce.—The chief articles of export overseas, the produce of the State, in 1932-33 were: Wool, £6,415,183; meat, including extract, and lard, £1,115,558; skins, sheep, £77,491; skins, other, £5,024; tallow, £149,252; butter, cheese, £3,035,779; sugar, £1,471,776.

TOWNS.

CAPITAL, Brisbane, with an area of 385 square miles. Population Census, April 4, 1921, 210,032. Estimated Dec. 31, 1932, 334,000. The status of the chief magistrate of Brisbane was raised to that of Lord Mayor in 1930.

The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the coast:—Brisbane, Rockhampton (30,000), Maryborough (12,000), Townsville (31,000), Port Douglas, Mackay (9,400), Thursday Island (1,400), Cooktown, Cairns (11,000), Bowen (3,000), and Bundaberg (11,250), Gladstone (2,552). Other places of importance are Ipswich (26,239), Toowoomba (26,827), Charters Towers (9,200), Gympie (9,800), Mt. Morgan (3,500), Warwick (7,500), Roma, (4,000) and Cloncurry (1800).

Transmission of mails from London to Brisbane, approximate, 32 days. Air mail takes about a week less.

V.—TASMANIA.

Tasmania is an island in the South Pacific Ocean, off the southern extremity of Australia, from which it is separated by Bass Straits, about 140 miles wide, in which are situated the Furneaux Group and King Island, included within the State. It lies between 40° 33'—43° 39' S. lat. and 144° 39'—148° 23' E. long., and contains an area of 26,215 square miles.

POPULATION.—At the Census of 1921 the population numbered 213,780 (107,743 males and 106,037 females).

Year.	Birth Rate	Death Rate.	Infant Mortality.	Marriage Rate
1928	22.13	10.06	64.0	7.09
1929	22.44	10.17	53.2	8.01
1930	22.11	9.00	50.6	6.70
1931	21.65	9.35	46.0	6.82
1932	20.25	9.12	41.2	6.79

Religion.

All religions are free. In 1921 there were 112,222 members of the Church of England, 35,456 Roman Catholics, 27,171 Methodists, 14,796 Pres-

byterians, 4,543 Congregationalists and Independents, and 5,332 Baptists.

PHYSIOGRAPHY.

The surface of the country is generally hilly and timbered, with mountains from 1,500 to 5,000 feet in height, and expanses of level, open plains. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions; the hot winds of Australia do not reach the island. At Hobart the mean annual temperature averages 54.4°, the mean temperature for Dec., Jan., and Feb. being 61.5°, and that of June, July, and Aug. 46.9°. The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England; the average rainfall varies from 20 inches to 100 inches in different parts.

GOVERNMENT.

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1825. In 1825 a partly elective legislature was inaugurated, and in 1856 Responsible Government was added. In 1901 Tasmania became a State of the Australian Commonwealth, &c. The State executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of responsible Ministers.

GOVERNOR.

Governor of Tasmania, His Excellency Sir Ernest Clark, K.C.B., C.B.E., born 1864 (1933).

Lieut.-Governor. Hon. Sir N. Elliott Lewis, K.C.M.G. (1933).

EXECUTIVE COUNCIL (June 15, 1928).

Premier, Treasurer, and Minister for Forestry and Agriculture, Hon. J. C. McPhie

Chief Secretary and Minister for Railways and Mines, Hon. C. E. W. James

Land and Works, Hon. Sir Walter H. Lee, K.C.M.G.

Attorney-General and Minister for Education, Hon. H. S. Baker

Without Portfolio, Hon. Edward Hobbs;

Hon. A. Wardlaw.

AGENT-GENERAL IN LONDON.

Acting Agent-General in London & Official Secretary, H. W. Fly, L.R.O., J.P.

Address, Australia House, Strand, W.C.2.

THE LEGISLATURE.

Parliament consists of two Houses, a *Legislative Council* of 18 members, elected for six years; and a *House of Assembly* of 30 members, elected by proportional representation for three years, the electors for the latter being all adult Tasmanians who have resided continuously in the State for 6 months; the electorate for the Council is smaller, having a property or educational qualification for both sexes.

President of the Legislative Council, Hon.

W. B. Propating, C.M.G.

Speaker of House of Assembly, Sir John

W. Evans, K.C.M.G.

Clerk of the House, Henry McPherson

THE JUDICATURE.

There are justices of the peace and courts of petty, general and quarter sessions, and a

Supreme Court with a Chief Justice and two Puisne Judges.

Chief Justice, Hon. Sir H. Nicholls, K.O.M.G. (b. 1868)	£1,800
Puisne Judges, Hon. H. Crip ; A. J. Clark	each 1,500
Solicitor-General, P. L. Griffiths	950
Registrar Supreme Court, A. G. Brammall	730
Recorder of Titles, A. A. Richardson	775

EDUCATION.

Primary education is compulsory, secular, and free, there being 499 State schools in 1931, with 37,695 children on the registers. Secondary education is also provided by the State (5 high schools with 1,647 scholars), and by private endowment. There is a University at Hobart, and technical schools at Hobart, Launceston, Queenstown and Zeehan.

FINANCE.

Year.	Revenue.	Expenditure	Debt.
1928-29 ..	£2,766,434	£2,855,977	£23,324,630
1929-30 ..	2,956,272	2,981,992	22,921,211
1930-31 ..	2,609,290	2,854,394	23,389,079
1931-32 ..	2,434,090	2,657,109	23,659,588
1932-33 ..	2,522,191	2,577,407	23,708,532

Banking.—June 30, 1932, the banks of issue had total deposits £7,989,000; the savings bank deposits were £5,705,000.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—Of the total area of 16,778,000 acres there were, in 1931-32, 247,353 acres under crops. The principal crops are apples, potatoes, hay, and other fruit, followed by hops, peas, oats, green forage and wheat. The live stock included 232,570 cattle, 2,013,556 sheep, 41,494 pigs, and 30,689 horses. The wool production was 23,875,000 lb. The butter produced amounted to 9,462,866 lb.

Electrical Energy.—The Hydro-Electric Department of Tasmania has completed an important waterpower development at the Great Lake, in the centre of the State, the capacity of the installation being 81,000 h.p. The advantage of cheap power is steadily attracting new manufacturing industries.

Forestry.—Timber reserves total 950,538 acres. Area held under lease or forest permits for saw-milling, logging, &c., 243,000 acres. The amount of timber milled for 1931-32 was 36,146,290 super feet, exclusive of piles, poles, fencing, and for practically all sleepers. The utilisation of forest waste for the production of wood-pulp has, after long investigation, been brought within the scope of business operations. A company has been formed with options over large areas, and there is every prospect of an early commencement of manufacturing operations.

Minerals.—The chief minerals produced are copper, tin, silver, lead, coal, the value of all minerals produced in 1932 being £739,236.

Manufactures.—The chief factories for export are metallurgical, fruit preserving, woollen mills, cement, and confectionery; the value of production in 1931-32 was £2,808,383, the capital invested in the 821 establishments being £9,230,444 in 1931-32.

TOWNS.

CAPITAL, Hobart. Population (1933), 58,750. Other towns are Launceston (pop. 31,700), Devonport, Ulverston, Burnie, and Queenstown. Transmission of mails, approximate, 31 days.

VI.—WESTERN AUSTRALIA.

Includes all that portion of the continent west of 120° E. long., the most westerly point being in 112° 52' E. long., and from 13° 30' to 35° 8' S. lat. Its extreme length is 1,500 miles, and 1,000 miles from east to west, and its total area 975,920 square miles.

POPULATION.—At the Census of June 30, 1933, the population was 437,515 (232,895 males, 204,620 females).

Natural Increase of the People.

Year.	Births.	Deaths.	Marriages.
1928	8,704	3,640	3,399
1929	9,051	3,939	3,367
1930	9,200	3,774	3,205
1931	8,549	3,681	2,741
1932	7,965	3,715	2,504

Religions.

There is no State aid to religions. At the Census of 1921 there were 153,285 persons belonging to the Church of England, 64,488 Roman Catholics, 39,116 Methodists, and 26,377 Presbyterians.

Physical Features.—Large areas of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,022 ft.) in the north-west division or that of Bluff Knoll (2,640 ft.) in the Stirling Range in the south-west. The coastal regions of the west and of the north are undulating, with an interior slope to the unsettled central portion of Australia. The Darling and Hamersley ranges of the west have a western slope to the Indian Ocean. Into which flow many streams, notably the Swan, Murchison, Gascoyne, Ashburton, Fortescue, and De Grey. In the north the Mitzroy flows from the Leopold Range into the Indian Ocean, and the Drysdale and Ord into the Timor Sea. The greater portion of the far interior may be described as a great tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level the surface of which consists in parts of sand-dunes, varied by wide stretches of clayey soils. The climate is one of the most temperate in the world. The total rainfall at Perth during 1932 was 39.40 inches, the average for the past 57 years being 34.79. Of the area of Western Australia, which is equal to more than half that of European Russia, probably about two-thirds is suitable for pastoral purposes, immense tracts having already been proved eminently so.

GOVERNMENT.

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acts Amendment Act, 1912; the Executive is vested in a Governor appointed by the Crown and aided by a Council of responsible Ministers.

GOVERNOR.

Governor of Western Australia, (vacant).
Lieutenant-Governor, His Excellency Hon. Sir James Mitchell, K.O.M.G. (July, 1933).
Private Sec., Maj. B. Kerr-Pearse, O.M.G., M.V.O.

EXECUTIVE COUNCIL.

<i>Premier, Treasurer and Minister for Forests</i> , Hon. Philip Collier, M.L.A.	£1,700
<i>Public Works, Labour and Water Supplies</i> , Hon. Alexander McCallum, M.L.A.	1,500
<i>Justice, Railways and Education</i> , Hon. John Collins Wilcock, M.L.A.	1,500
<i>Chief Secretary</i> , Hon. John Michael Drew, M.L.C.	1,500
<i>Mines and Health</i> , Hon. Selby Walter Munster, M.L.A.	1,500
<i>Land and Immigration</i> , Hon. Michael Francis Troy, M.L.A.	1,500
<i>Agriculture, Police and the North-West</i> , Hon. Harold Millington, M.L.A.	1,500
<i>Employment, Child Welfare and Industrial Development</i> , Hon. James Joseph Kennelly, M.L.A.	1,500
<i>Honorary Minister</i> , Hon. William Henry Kitson, M.L.C.	
AGENT-GENERAL IN LONDON.	
<i>Agent-General in London</i> , Sir Hal Pateshall Colebatch, C.M.G. <i>Offices</i> , Savoy House, 115-116, Strand, W.C. 2.	£1,550
<i>Secretary</i> , C. B. Rushton, L.S.O.	750

THE LEGISLATURE.

Parliament consists of a *Legislative Council* of 30 members elected for 6 years, and a *Legislative Assembly* of 50 members elected for 3 years by universal adult suffrage; the electorate of the Council is restricted by a property qualification, that of the Assembly being subject to residence and registration.

<i>President of the Legislative Council</i> , Hon. Sir John Waters Kirwan	£800
<i>Speaker of the Legislative Assembly</i> , Hon. Alexander Hugh Pantoun	800

THE JUDICATURE.

There is a Supreme Court presided over by a Chief Justice and three Puisne Judges, which has complete jurisdiction in all criminal and common law matters. There are courts known as local courts which have limited civil jurisdiction. There are Courts of Session, dealing with criminal matters outside Perth, and there are Magistrates' courts and Children's courts.

<i>Chief Justice</i> , Hon. Sir J. A. Northmore, K.C.M.G., LL.B.	£1,783
<i>Puisne Judges</i> , Honrs. T. P. Draper, C.B.E., J. P. Dwyer (and 1 vacant), each	£1,550

EDUCATION.

Education.—Education is compulsory and free, and numerous elementary schools are under the control of the Minister of Education. There are a training college, technical schools, a school of mines and a Goldfields High School at Kalgoorlie (State Secondary Schools in various centres and the capital), and a University. The total amount expended on education during the year ended June 30, 1933, was £558,846; in addition, a grant of £24,880 was made to the University.

FINANCE.

Revenue and Expenditure and gross public Debt for 5 years ended June 30:—

Year.	Revenue.	Expenditure	Debt
	£	£	£
1929	9,947,950	10,222,019	69,355,449
1930	9,760,515	10,268,518	71,194,325
1931	8,686,756	10,107,794	76,564,885
1932	8,335,316	9,593,212	79,707,953
1933	8,332,153	9,196,234	83,514,698

Banking.—There were, including the Commonwealth Bank of Australia, 8 cheque-paying banks, formerly banks of issue, in the State on June 30, 1933, with total assets £26,685,630 and liabilities £17,122,369. The amount due to depositors in Savings Banks in Western Australia on June 30, 1933, was £9,871,029.

PRODUCTION AND INDUSTRY.

Crops and Live Stock.—Of the total area (624,588,800 acres) 4,259,000 acres were under crops in 1932-33, wheat for grain accounting for 3,387,940 acres. In 1932 the live stock included 857,473 cattle, 10,417,031 sheep, 117,529 pigs, 28,123 goats, and 157,443 horses. There were 5,139 acres of vineyards.

Manufacturing Industries.—There were on June 30, 1932, a total of 1,490 industrial establishments in the State employing either machinery or at least four hands. The total number of persons employed in them was 13,392. The combined output of these establishments for 12 months ended June, 1932, was computed at £11,187,571.

Forestry.—The forests contain some of the very finest hardwoods in the world. Two of these, jarrah (*Eucalyptus marginata*) and karri (*Eucalyptus diversicolor*), are largely exported. The quantity of timber cut during the 12 months ended June, 1932, is computed to have been 57,690,364 super feet.

Minerals.—The groups of the Coolgardie gold-fields (covering a vast portion of the interior and extending to the 125th meridian), as well as other fields, are being constantly worked, the production of gold being 605,561 oz. in 1932. The total amount produced in the State from 1886 to June 30, 1933, is 39,720,905 fine ozs. Magnetic iron, lead, copper and tin ores and coal exist in large quantities.

Trade.—The principal ports are Fremantle, Albany, Bunbury and Geraldton. The opening of the Trans-Australian Railway in Oct. 1917 afforded another means of ingress and egress, both for travellers and merchandise. The imports chiefly consist of machinery, vehicles, manufactured hardware, clothing and textiles, tobacco, cigars and cigarettes, also (mainly from the sister states of the Commonwealth) provisions. Principal exports for the year ended June 30, 1933:—Gold, £4,740,369; Wool, £2,553,592; timber, £1,258,510; sandalwood, pearls and shell, hides and skins, £479,026; wheat, £4,661,276; flour, £554,519; and fresh fruit, £332,273.

TOWNS.

CAPITAL, Perth. Population (1932) of Metropolitan area, including Fremantle, 213,400.

Perth, the capital, stands on the right bank of the Swan River estuary, 12 miles from Fremantle. The King's Park (approximately 1,000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, possesses unique natural beauty. Other towns are Fremantle (including suburbs, 34,537), Albany (3,828), Kalgoorlie and Boulder (13,076), Bunbury (4,923), Cottesloe (5,326), Claremont (6,286), Geraldton (4,485), Midland Junction (5,415), Northam (4,760), and Collie (3,366).

Transmission of mails from London to Perth, approximate, 27 days.

The Dominion of New Zealand.

THE DOMINION OF NEW ZEALAND.

(By the Rt. Hon. G. W. FORBES, P.C., *Prime Minister.*)

THE Dominion of New Zealand is situated in the South Pacific Ocean, and in point of actual distance is consequently far from the Homeland and from the older established countries of the world. This fact does not, however, in any way diminish the importance of New Zealand. Rather, on the other hand, does it serve to increase its significance as a power in the Pacific Ocean.

Actually the Dominion possesses an importance far in excess of that which the uninformed might expect to be attached to such a young country. Directly connected with the older world by fast modern steamship services—indeed, only a few short weeks away from the Homeland—her isolation is much more apparent than real.

New Zealand extends for a length of over one thousand miles north and south, and possesses a population of slightly more than one and a half million people. In addition the Dominion has control over numerous islands in the South Pacific with a large aggregate Polynesian population. More specifically her jurisdiction extends from Penrhyn Island, about eight degrees south of the Equator, to the coasts of the Ross Sea on the borders of the Antarctic Continent.

New Zealand is primarily a grazing country, and the quality of its pastures has gained a world-wide reputation. For that and other reasons its future will for many years to come doubtless be inseparably associated with stock raising, principally of dairy cattle and sheep. Wool, frozen meat, butter, cheese, hides and skins, and fruit in the main comprise her staple exports, and are the products upon which the Dominion principally relies to exchange for many manufactured goods from overseas.

It is equally true, however, that with increasing population there is a growing tendency for greater diversity in industry and for the manufacture of many commodities within the Dominion which formerly were obtained solely from abroad. Nevertheless the population is as yet insufficient to maintain a very wide range of industries, and consequently the Dominion's industrial field of manufacture is to a great extent limited to the treatment of the principal primary products.

The main market for the products of New Zealand is the United Kingdom, as much as 88 per cent. of the total value of her exports being sent there during the calendar year, 1931. A further 5 per cent. was sent to other British countries, making a total of 93 per cent. marketed within the British Empire.

The importance of the United Kingdom and of the British Empire as a market for the raw materials and foodstuffs which the Dominion produces is fully realised by the Government and the people of New Zealand, and it is also realised that the prosperity of the United Kingdom is dependent in large degree upon the extent to which New Zealand and the other Dominions and Colonies co-operate by purchasing the products of the Homeland.

That this is fully recognised in New Zealand is obvious from the fact that this country purchases a greater proportion of its imports from the United Kingdom than any other British Dominion. The desire to further inter-Empire trade moreover finds practical expression in the extension of a substantial measure of preference by means of differential rates of customs duties to the products of the British Empire.

Generous provision is made in New Zealand for primary, secondary and technical education, and, in addition, every encouragement is given to the student who is desirous of continuing his course at the University. So far as humanitarian legislation generally is concerned New Zealand is recognised as being one of the foremost countries in the world.

Finally, a few words must be written of the Dominion's wonderful scenic attractions and sporting facilities. This article would, indeed, be incomplete without reference to them, however brief.

Within the compass of a comparatively small country there are to be found all the varieties of scenery that is possible to see in any other part of the world, and these offer unlimited scope to the tourist. From the sportsman's point of view the attractions, too, cannot be surpassed anywhere, for here in New Zealand is to be obtained much that appeals—deep sea fishing, incomparable angling in the numerous lakes, rivers and coastal waters, and excellent deer-stalking.

All these features combine to make the Dominion's scenic resorts, tourist attractions and sporting facilities one of its most important natural resources.

PHYSIOGRAPHY.

The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,700 miles, between 34° 22' and 47° 18' South latitude and 162° East longitude - 173° West longitude, with several groups of smaller islands lying at some distance from the principal group.

Geographical.—The two principal islands of New Zealand have a total length of 1,040 miles, the total coast-line reaching 4,330 miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several active and dormant volcanoes. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers in the South Island, the Tasman (18 miles by 1½) is the largest. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in navigation. The more important include the Waikato (220 miles in length), Waikanae (140) and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau 132) are abundant; many of them of great beauty.

Meteorological.—Owing chiefly to its great length, New Zealand's climate varies very considerably in its different divisions. In general it is mild with an abundant rainfall. Snow is rarely seen except upon the higher levels. Annual averages:—North Island, mean temperature 57° F., rainfall 47 in. (days with rain 163), sunshine, 2,134 hours; South Island, mean temperature 52° F., rainfall 56 in. (days with rain 145), sunshine, 1,956 hours.

GOVERNMENT.

The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H.M.S. *Duadalus* to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by an Executive Council, with a Legislature of two houses.

GOVERNOR-GENERAL.

Governor-Gen. and Commander-in-Chief of New Zealand, His Excellency The Right Hon. Lord Bledisloe, P.C., G.O.M.G., K.B.E., D.Sc., apptd. 1930 (Salary £7,500; H.E. has relinquished £2,250).....£5,250
Official Secretary, Sir Cecil Day, C.M.G., C.B.E. A.D.C.'s, Lt. R. C. V. Thomson, R.N.; Capt. J. W. Tweedie; Lt. Visct. Long of Wrexall.

* EXECUTIVE COUNCIL.

His Excellency the GOVERNOR-GENERAL.

COALITION CABINET (Sept. 1931).

Prime Minister, Minister of Railways, of External Affairs, Attorney-General, and in Charge of Scientific and Industrial Research, Public Trust, Electoral and High Commissioner's Departments, Rt. Hon. G. W. Forbes, P.C.£2,377
Minister of Finance, Minister of Customs, of Stamp Duties, of Transport, and in Charge of State Advances and Land and Income Tax Departments, Rt. Hon. J. G. Coates, P.C., M.C. 895

* Members of the Executive Council travelling within the Dominion on public service are entitled to an allowance not exceeding £1 12s per diem when so engaged, but not during attendance at a session of the General Assembly. A house allowance of £200 is also paid where a Government residence is not provided. (no per cent. cut in salary 1932-33 and further 11 per cent. in 1933-34, the figures subsequent to salary cuts being given.)

Minister of Lands, Commissioner of State Forests, and Minister in Charge of Land for Settlements, Scenery Preservation, Discharged Soldiers' Settlement, and Valuation Departments, Hon. E. A. Ransom£895

Minister of Native Affairs, of Cook Islands, and in Charge of Native Trust, Government Life Insurance, State Fire and Accident Insurance, Legislative, Public Service Superannuation, Friendly Societies and National Provident Fund Departments, and Member of the Executive Council representing the Native Race, Hon. Sir Apirana Ngata..... 895

Minister of Health, of Immigration, of Internal Affairs, and in Charge of Mental Hospitals, Printing and Stationery, Audit, Museum, and Advertising Departments, Hon. J. A. Young 895

Minister of Education and of Industries and Commerce, Hon. R. Masters, M.L.C. 895

Minister of Defence, of Justice, of Marine, and in Charge of Pensions, Police, Prisons, Registrar-General's, and Inspection of Machinery Departments, Hon. J. G. Cobbe 895

Government Offices, 415 Strand, W.C. 2	£1,575
<i>Secretary, F. T. Sandford...</i>	827

THE LEGISLATURE.

Parliament consists of a General Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for 7 years only), at present consisting of 21 members; and a House of Representatives consisting of 80 members elected for 3 years. (Life of present parliament extended to 4 years.) Four of the members are Maoris elected by the natives. Women have been entitled to vote since 1893, and to be elected Members of the House of Representatives, since the passing of the Women's Parliamentary Rights Act, 1919. Members of the Upper House receive £255 3s. per annum, and of the Lower House £364 10s. per annum, in each case with travelling expenses and deductions for non-attendance.

<i>Speaker of the Legislative Council, Hon.</i>	
Sir W. C. F. Carnarvon	£583 4s.
<i>Speaker of the House of Representatives,</i>	
Hon. Sir C. E. Statham (plus sessional	
allowance of £78 15s. per annum and	
free sessional quarters).....	708 15s.

THE JUDICATURE.

The judicial system comprises a Supreme Court and Court of Appeal; also Magistrates' Courts, having both civil and criminal jurisdiction.

<i>Chief Justice, Rt. Hon. Sir Michael Myers,</i>	
P.C., K.C.M.G.	£2,250
<i> Puisne Judges, Hons. Sir A. L. Herdman,</i>	
J. R. Reed, C.B.E., W. C. MacGregor,	
H. H. Oatler, A. W. Blair, D. S. Smith,	
R. Kennedy	2,000
<i>Judge, Court of Arbitration, Hon. F. V.</i>	
Frazer	2,000

In 1932, 52,886 civil cases were tried in Magistrates' Courts, while summary convictions in criminal cases were 42,366. In 1932 convictions (or sentences) in Supreme Courts were 1,710. Civil cases to number of 492 were tried, and 562 judgments were recorded for a total amount of £215,697.

POLICE.

On March 31, 1933, the strength of the Police Force was 1,195 of all ranks, equivalent to 1 for every 1,286 of the population. Average cost of police protection per inhabitant was, in 1932-33, 5s. 6½d.

LOCAL GOVERNMENT.

For purposes of local government the Dominion is divided into counties and ridings, with incorporated boroughs, under elected county and municipal councils, town, road, electric power, and harbour boards.

For cities or boroughs, any adult of either sex resident in the town may register as an elector. Non-resident ratepayers may also exercise the franchise.

For counties, adult ratepayers of either sex may register as electors, and may have one, two,

or three votes according to the value of their property.

Revenue of local bodies, 1931-32	£15,194,069
Receipts not revenue, 1931-32	4,374,251
Expenditure, 1931-32	20,087,381
Net indebtedness, March 31, 1932 ...	61,554,906

PASSPORTS.

With certain exceptions, no person over 15 years is permitted to land unless in possession of a passport issued by a competent British authority.

DEFENCE.

Army.

The New Zealand Defence Forces consist of the Permanent Force, the Territorial Force, the New Zealand Air Force, and the Senior Cadets.

Units of the N.Z. Permanent Forces are the Staff Corps, the Permanent Staff, the Artillery, the Permanent Air Force, the Army Ordnance Corps, the Permanent Army Service Corps, the Army Medical Corps, the Army Ordnance Corps, and the General Duty Section. The compulsory territorial system (including Senior Cadets) is at present in abeyance, for reasons of economy. It has been replaced by a volunteer system on a reduced scale. Establishment of N.Z. Permanent Forces, 80 professional officers; establishment of N.Z. Permanent Staff, 122 (chiefly drill-instructors). Strength of (volunteer) Territorial Force on June 30, 1933, 955 officers, 8,138 other ranks.

Navy.

In 1909 New Zealand presented the battle-cruiser *New Zealand* to the Imperial Government. The Naval Defence Act, 1923, provides for the establishment of a New Zealand Naval Force by voluntary enlistment for a prescribed period (fixed at 22 years or until age 30), members on discharge to be drafted into the New Zealand Royal Naval Reserve for such period as may be prescribed for service only in time of war: the ships and personnel forming the Force to pass under the control and to be at the disposition of the Imperial Government in time of war. A Naval Board controls all matters relating to the Naval Forces, and is vested with the executive command of the Naval Forces. By Order-in-Council of the 20th June, 1921, it was provided that the ships and personnel shall be described respectively as forming and belonging to "The New Zealand Division of the Royal Navy." Expenditure on naval defence 1932-33, £521,602. The New Zealand Division comprises the cruisers *Dionede* and *Dunedin*, the depot ship *Philomet*, the trawler *Wakaturua*, and oil-tanker *Nucula*. Two sloops, *Veronica* and *Laburnum*, are maintained by the British Government for duties in the South Pacific within the limits of the New Zealand station.

*FINANCE.

Year.	Revenue.	Expenditure.	Gross Debt.
1929	£23,599,676	£24,176,928	£264,291,983
1930	25,349,861	25,200,882	277,383,343
1931	23,068,931	24,708,042	276,033,358
1932	22,719,733	24,860,552	21,942,800
1933	22,568,521	22,528,379	...

* Financial year ends March 31; railway revenue and expenditure are excluded throughout, and post and telegraph revenue and expenditure in 1929 and subsequent years.

Banking.—At the end of 1932 there were six banks of issue doing business, two of which were New Zealand banks. Total assets (average of four quarters of year), £9,015,209; liabilities, £6,463,311; value of notes in circulation, £5,958,268.

Post-office and private savings banks had, at the close of the year 1932-33, 1,009,773 depositors, having £52,499,159 to their credit.

EDUCATION.

The State system of education is free, secular, and compulsory. There were (December, 1932) 2,517 public primary schools, with 6,222 adult teachers and 227,116 scholars; there are also 309 registered private primary schools, with 26,210 scholars, and, in addition, 135 village schools for the Maoris with 7,604 scholars. The higher education of boys and girls in the cities and large towns is carried on in 46 endowed colleges and grammar schools, in 21 technical high and technical day schools. In addition there are 80 secondary depts. of district high schools, and a Junior high schools, 52 private secondary schools, and 11 secondary schools for Maoris. The University of New Zealand consists of Auckland University College, Victoria University College, Canterbury University College, and the University of Otago, the four colleges having 4,912 students in 1932, and has power to confer degrees.

PRODUCTION AND INDUSTRY.

Agriculture and Forestry.—The total area of the Dominion (excluding annexed islands) is 66,390,261 acres, and, apart from boroughs and holdings under 1 acre, 42,728,749 acres of this were in occupation in 1932, this acreage representing 82,958 holdings. New Zealand is a pastoral rather than an agricultural country, but the quantity of wheat and oats grown is sufficient for the Dominion's requirements. The area under wheat in 1932-33 was 332,558 acres, giving a yield of 11,061,180 bushels. An area of 116,232 acres of oats was threshed, the yield totalling 5,132,294 bushels, while 259,627 acres were converted to chaff, hay, or ensilage. Other acreages in 1932-33 were: barley, 16,349; peas, 22,368; 13c-grass, 86,183; and potatoes, 24,621. An area of 483,880 acres was sown in turnips and mangolds. Amongst the forest productions are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding and for its resin (Kauri gum). New Zealand flax is used for the manufacture of ropes and twine.

Livestock.—The cattle in 1933 numbered 4,122,138; sheep, 27,755,665; pigs, 586,305; and horses, 275,793. The pastures of the South Island produce the celebrated sheep of the Canterbury Plain.

Manufactures.—Statistics of factory production show (1931-32) 4,959 factories in operation, employing 68,697 hands. Value of output for year, £67,813,394.

Minerals.—Coal-mining is one of the largest industries, the output in 1932 being 2,157,756 tons, the approximate total output to the end of 1932 being 75,999,000 tons. Gold-mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of iron sand, occurs in great abundance in Taranaki, and in the form of brown hematite at Onakaka and Parapara, near Nelson.

EXTERNAL TRADE (£ Sterling). (Excluding specie.)

Year	Imports	Exports	Total
1928	£44,844,000	£55,570,000	£100,414,000
1929	48,735,000	54,930,000	103,665,000
1930	42,481,000	43,158,000	85,639,000
1931	24,157,000	31,852,000	56,009,000
1932	22,405,000	32,373,000	54,778,000

[Note: All imports are given in terms of sterling values except those from Australia, which are in Australian currency.]

All exports are in terms of New Zealand currency.]

Principal Imports, 1931:—

Fruit (Fresh and Dried)	£611,703
Tea	378,683
Sugar	580,130
Tobacco	578,339
Iron and Steel	1,755,731
Electrical Machinery and Apparatus ..	959,254
Other Machinery	798,862
Motor-cars and parts thereof	1,994,152
Other Metals and Metal Manufactures ..	311,227
Cotton Piece Goods	1,374,019
Woolen Piece Goods	425,475
Other Piece Goods	813,045
Other Textiles	2,421,249
Wood, Timber, and Manufactures thereof ..	168,695
Oil, Petroleum (crude and refined)	1,845,837
Leather and Manufactures thereof	398,435

Principal Exports, 1932:—

Wool	£5,742,821
Butter	10,639,053
Frozen Meat	8,436,366
Cheese	4,051,268
Hides, Skins and Pelts	1,074,039

The external trade of 1932 was shared by the principal countries as under:—

Imports from.		Exports to.	
United Kingdom ..	£11,788,419	£32,449,211	
Australia ..	2,921,681	1,444,860	
United States ..	3,073,544	940,015	
Canada ..	998,373	244,160	
Japan ..	425,883	236,799	
France ..	406,678	508,960	
India ..	346,787	53,378	
Ceylon ..	348,754	3,498	
Germany ..	381,732	289,917	
Belgium ..	168,794	167,629	
Dutch East Indies ..	799,749	5,255	

COMMUNICATIONS.

Railways.—In March, 1933, there were 3,315 miles of Government railway lines in working order, and more under construction; and 168 miles of private lines, together with an excellent system of road service cars. The number of passengers carried on Government lines in 1932-33, including season-ticket holders, was 18,366,654, and in addition 2,740,263 on railway road motor services, while goods carried amounted to 5,490,686 tons. Operating revenue and expenditure were £5,339,075 and £4,833,754 respectively.

Shipping.—During 1932 the vessels entered inwards numbered 574 (tonnage, 2,347,656), and those entered outwards 583 (tonnage, 2,352,913) exclusive of coasting vessels.

Posts and Telegraphs.—The annual postal circulation was (1931), 271,243,916 letters and postcards, 39,454,971 newspapers, 151,369,568 books

and packets, and 3,415,554 parcels, and the work is effected by 1,738 post-offices. At 31st March, 1935, there were 12,415 miles of telegraph line, with 64,222 miles of wire. The telephone service is highly efficient and universal in all centres. Telegrams transmitted during year, 13,137,766.

TOWNS.

CAPITAL, WELLINGTON, in the North Island.

The estimated population of the principal towns at April 1, 1933, was as follows:—Wellington, 145,900; Auckland, 219,800; Christchurch, 130,100; Dunedin, 87,900; Wanganui, 27,650; Invercargill, 24,500; Palmerston North, 23,500; Napier, 19,450; Timaru, 18,750; New Plymouth, 18,750; Hamilton, 18,300; Hastings, 17,000; Gisborne, 16,500; Nelson, 12,850; Masterton, 8,750; Oamaru, 7,650; Whangarei, 7,750; Greymouth, 6,310; Ashburton, 5,500; Blenheim, 5,350; Rotorua, 5,220.

THE ISLANDS OF NEW ZEALAND.

The following islands form part of the Dominion proper:—*North Island* and adjacent islets, *South Island* and adjacent islets; *Stewart Island* and adjacent islets, and *Chatham Islands*, between 43° 20' S. lat. and 175° 40' 177° 15' W. long. *Chatham Islands* have a population of 620, two thirds of whom are Maoris and half-castes. They support large flocks of sheep and some cattle.

The following are included in the geographical boundaries of New Zealand as proclaimed in 1847:—*The Three Kios* (discovered by Tasman on the Feast of the Epiphany), in 34° 9' S. lat. and 172° 8' E. long. (uninhabited). *Auckland Islands*, about 200 miles south of Bluff Harbour, in 50° 32' S. lat. and 166° 13' E. long. The islands contain several good harbours, but are uninhabited. *Campbell Island* (uninhabited). *Antipodes Group* (49° 41' 15' S. lat. and 178° 43' E. long.) uninhabited, *Bounty Islands* (47° 43' S. lat., 179° 0' 30' E. long.) uninhabited, and *Snares Islands* (uninhabited.)

The following islands have been annexed to New Zealand:—

The Kermadec Group, between 29° 10' to 32° 30' S. lat., and 177° 45' to 179° W. long, includes Sunday, Macaulay, Curtis Islands, and L'Esperance, and some islets. The group is uninhabited.

Cook Islands, included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga, Atitaki, Mangua, Atiu, Mauke, Mitaro, Mauae and Te Au-o-tu, Takatea, Palmerston, Penrhyn (or Tongareva), Manihiki, Rakahanga, Pukapuka (or Dangei), Niue (or Savage), Suvarrow, and Nassau. The population at the Census of 1926 numbered 13,877, all except 313 being Natives. The chief products are bananas, oranges, and other tropical fruits, copra, and pearl-shell. The trade is chiefly with New Zealand and the United States of America. The exports (1932) were valued at £87,396, and the imports at £98,341. Rarotonga is the chief island, with a native population of 3,731, and a population other than native of 205. The government is administered locally under the direction of New Zealand. The Island Council of the Cook Islands is under the direction of the Resident Commissioner at Rarotonga. The five Arikis of

Rarotonga are of equal rank and are all members of the Council. Rarotonga is a place of call for the mail steamers between Sydney, N.S.W., and Wellington, N.Z., and San Francisco, U.S.A.

Resident Commissioner, Rarotonga, H. F.

AS 800, C.M.C.

Resident Comm., Niue, W. M. Bell, C.B.E.

Ross Dependency—By Imperial Order in Council of July 30, 1923, the coasts of the Ross Sea, with adjacent island and territories, were proclaimed a British Settlement under the control of the Governor-General of New Zealand.

Tokelau or Union Islands—A group of atolls (population 1,147 in 1913), transferred from Gilbert and Ellis Islands Colony in 1926, and now administered on behalf of New Zealand by Administrator of Western Samoa.

The Mandated Territories are:—

Western Samoa, consisting of the islands of Savai'i, Manono, Apolima, Upolu, Faimatapu, Nafanua, Nukunono, and Nukunono (the remaining islands of the Samoan group belonging to the U.S.), have a total area of 1,123 square miles and a population at the Census of 1926 of 40,229. 30,880 were Samoans, 1,079 Chinese and Melaneans, and 2,270 half-castes and Europeans. The largest islands are Savai'i (703 square miles) and Upolu (430 square miles). Upolu contains the harbours of Apia and Salafata, of which the former is the capital. In 1889 a very heavy sea set up by a cyclone wrecked three U.S.A. warships and the *Eber* and *Adler* of the German Navy, H.M.S. *Calliope* of the British Navy, effecting its escape. The disaster is recorded in "A Footnote to History," by R. L. Stevenson, whose home was at Vailima (near Apia). The natives of the islands are Christians of different denominations, including a few adherents of the Latter Day Saints (Mormons). Coco-nuts (copra), coconuts, bananas and rubber are the chief products of the islands. The exports were valued in 1932 at £183,028 (copra £108,698), and the imports at £150,502.

Administration, Brigadier-General H. E. Hart, C.B., C.M.G., D.S.O., V.D.

NAURU ISLAND.

Nauru Island, situated in longitude 166 degrees east, and 26 miles south of the Equator, was proclaimed German Territory on Oct. 1, 1888, and was administered as part of the (German) Marshall Islands group until its surrender to the Australian Forces in 1914. The island was included in the cession of colonies made by Germany in 1919, and is now administered by the United Kingdom, the Commonwealth of Australia, and the Dominion of New Zealand under a mandate from the Allied and Associated Powers. 1919, the first and second Administrators having been appointed by agreement by the Australian Government. The island has a population (July 1, 1933) of 2,641, of whom 165 are Europeans. There are valuable deposits of phosphates on the island, and in 1932 the exports of phosphates were 418,180 tons (valued at £466,423). The value of the imports in 1932 was £95,739.

Administrator, Commander R. C. Garsla, N.Z.N. (address, Nauru Island, Central Pacific).

The Union of South Africa.

AREA AND POPULATION.

Provinces.	Area (English Sq. Miles).	Census of 1921.		European Population, 1931.
		European.	Total.	
Cape of Good Hope	276,966*	650,609	2,782,719	749,231
Natal	35,284	136,838	1,429,398	177,449
Transvaal	110,450	543,485	2,087,636	696,120
Orange Free State	49,647	188,556	628,827	205,375
Union of South Africa	472,347*	1,519,488	6,928,580	1,828,175
South-West Protectorate	322,393	19,432	227,739	24,115†

Of the European population of the Union, 1931, 930,541 were males, and 897,634 females. The increase in the European population of the Union (1926-31) was 9.0 per cent. For the Provinces it was as follows:—Cape, 6.0 per cent.; Natal, 11.7 per cent.; Transvaal, 14.4 per cent.; Orange Free State, 1.2 per cent.

* Includes Walvis Bay (42 sq. miles), which is administered by the Territory of S. W. Africa, but is an integral part of the Cape of Good Hope Province.

† 1926 figures

A law (No. 17 of 1923) amending and consolidating the pre-Union Acts in force in the four Provinces was passed and came into force as from the 1st January, 1924. Under this law registration of all European, Asiatic and Coloured (as distinct from Native) births and deaths was compulsory throughout the Union. Registration of Native births and deaths is compulsory only in urban areas. Only marriages solemnized under the prescribed civil laws are subject to registration.

PHYSIOGRAPHY.

Boundaries.—The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, i.e., from 34° 50' - 22° South latitude, and include all the British territories within those limits, with the exception of Basutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

Relief.—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Zwarte Berg* and *Lange Berg* run in parallel lines from west to east of the Cape province. Between these two ranges and the *Roggeveld* and *Nieuweveld* to the north is the Great Karroo Plateau, which is bounded on the east by the *Sneeuberg*, containing the highest summit in the province (Compassberg, 7,800 feet). In the east are ranges which join the *Drakensberg* (11,000 feet) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magalies* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the Hooe Veld of the south, the Banker Veld of the centre, and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered waste. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakensberg and the coast, the interior rising in terraces as in the southern provinces.

Rivers.—The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the Drakensberg and flowing into the Atlantic between the Protectorate of South West Africa and the Cape of Good Hope. The *Limpopo*, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

HISTORICAL SKETCH.

The *Cape of Good Hope* was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Netherlands' East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The *Transvaal* was formed as the *South African Republic* by parties of Dutch Boers from the English colonies who "trekked" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The *Orange Free State* was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent history is identical with that of the Transvaal.

Delville Wood.—The title deeds of Delville Wood, containing the graves of South African troops who fell there during the battles on the Western Front in France in the Great War, are held by the Government of the Union of South Africa, and Delville Wood is part of South Africa.

GOVERNMENT.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal and the Orange Free State respectively.

The Union Government is seized of all State property, and the Railways, Ports and Harbours are administered by Commissioners. The former debts of the Colonies now constituting the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1909 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H.R.H. the Duke of Connaught, K.G., in 1910.

The Government publishes annually an "Official Year Book of the Union of South Africa," giving full statistics and descriptive information on all matters of public concern.

The seat of the Government is Pretoria; the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

Governor-General (Cape Town and Pretoria), The Right Honourable the Earl of Clarendon, G.C.M.G. (1931) £10,000

Secretary, Capt. H. T. Birch Reynardson, C.M.G.

Private Secretary and Comptroller, Lt.-Col. E. H. Davidson, C.B.E., M.C.

EXECUTIVE COUNCIL.

(March 30, 1933.)

H.R.H. the Governor-General presides.

<i>Prime Minister and Minister of External Affairs</i> , Gen the Rt. Hon. J. B. M. Hertzog, P.C.	£3,500
<i>Minister of Native Affairs</i> , Hon. P. G. W. Grobler	2,500
<i>Minister of the Interior and of Public Health and of Education</i> , Hon. J. H. Hofmeyr	2,500
<i>Minister of Labour</i> , Hon. A. P. J. Fourie	2,500
<i>Minister of Mines</i> , Hon. Patrick Duncan, K.C., C.M.G.	2,500
<i>Minister of Finance</i> , Hon. N. C. Havenga	2,500
<i>Minister of Justice</i> , Gen the Rt. Hon. J. C. Smuts, P.C., O.H., K.C., D.T.D.	2,500
<i>Minister of Posts and Telegraphs, and of Public Works</i> , Senator the Hon. C. F. Clarkson	2,500
<i>Minister of Agriculture</i> , General the Hon. J. C. G. Kemp	2,500
<i>Minister of Railways and Harbours and of Defence</i> , Hon. O. Pirow	2,500
<i>Minister of Lands</i> , Col. the Hon. Deneys Reitz	2,500
<i>Minister Without Portfolio</i> , Hon. R. Stuttaford.	

HIGH COMMISSIONER IN LONDON.

High Commissioner for the Union, C. T. de Water, South Africa House, Trafalgar Square, W.C. 2.

Secretary, G. W. Klerck.

EXTERNAL REPRESENTATION AND TRADE COMMISSIONERS.

Trade Commissioner, J. H. Dimond.
Envoy Extraordinary and Minister Plenipotentiary, The Hague, Dr. H. D. van Broekhuizen.
Envoy Extraordinary and Minister Plenipotentiary, Rome (vacant).
Envoy Extraordinary and Minister Plenipotentiary, Washington, D.C., U.S.A., E. H. Louw.
Trade Commissioner for the Union in East Africa, Nairobi, Col. Beresford Turner, C.M.G., D.S.O.

Hon. Trade Commissioners are also established at Rotterdam, Oslo, Genoa, Paris, Gothenburg, San Francisco and Vancouver, and a Consul-General at Lourenco Marques (D. Steyn).

THE LEGISLATURE.

The Senate consists of 40 members. Eight are nominated by the Governor-General-in-Council and 32 are elected, eight for each Province. Election for members is carried out according to the system of proportional representation with the single transferable vote, by the Members of the House of Assembly and of the Provincial Council for each Province sitting together and presided over by the Administrator of such Province. Vacancies amongst elected Senators are filled in the same manner, but only for the period which the Senator in whose place the new Senator is elected would have held his seat. Originally, under Section 24 of the South Africa Act, nominated Senators held their seats for a period of ten years, but this provision was amended by Act No. 54 of 1926, and nominated Senators are now required to vacate their seats on the dissolution of the Senate or upon a change of Government. Of the eight nominated Senators, four are selected on the ground of

their thorough acquaintance, by reason of their official experience or otherwise, with the reasonable wants and wishes of the coloured races.

The House of Assembly consists of 150 elected members, 61 of whom represent the Cape of Good Hope, 16 Natal, 57 Transvaal, and 16 the Orange Free State. Members of both Houses must be British subjects of European descent.

The Sixth Delimitation Commission functioned in 1932, and according to the results of the Census of 1931—Europeans only—delimited the country according to the following constituencies, Cape of Good Hope 61, Natal 16, Transvaal 57, Orange Free State 16, a total of 150, and the present Government was elected on that basis. The total number of seats contemplated by the South Africa Act, §§ 22-23, is now reached, and the members assigned to each province will henceforth be based on a Union quota of European on all adults. The female franchise which was introduced under the provisions of Act No. 28 of 1930 is not utilised in the determination of the quota.

<i>President of the Senate</i> , Sen. the Hon. C. A. van Niekerk	£1,200
<i>Speaker of the House of Assembly</i> , Hon. E. G. Jansen	2,000

LOCAL GOVERNMENT.

A Provincial Council in each Province has power to legislate by ordinance on certain subjects specified in the Act, and on such other subjects as may be delegated to it. All ordinances passed by a Provincial Council are subjected to the veto of the Governor-General in Council. Members of the Provincial Council are elected on the same system as Members of Parliament, but the restriction as to European descent does not apply. Provincial administration is in the case of each Province vested in an Administrator, with an Executive Committee of four members. The Provincial Council in each case consists of the same number of elected members as there are electoral divisions of such Province for the House of Assembly, unless that number is less than 25 (as in the cases of Natal and the Orange Free State), when the number is 25. Each Council exists for a period of three years. Direct taxation is permitted for Provincial purposes, and legislation is authorised on certain specified subjects.

Administrators of the Provinces.

<i>Cape</i>	The Hon. J. H. Conradie	£2,500
<i>Natal</i>	The Hon. H. G. Watson, I.S.O.	2,000

<i>Judge President</i> , Lennox Ward	1,500
<i>Judges</i> , A. W. Leslie ; S. A. McCormick ; E. H. Britter	each 1,400

DEFENCE.

The South Africa Defence Act, 1922, became law on June 14, 1922. This Act, as amended by the South Africa Defence Act Amendment Act of 1922, provides for the establishment of Defence Forces comprising:—

(1) *The South African Permanent Force*; (2) *The Active Citizen Force*; (3) *The Citizen Force Reserve*; (4) *The Coast Garrison Force Reserve*; (5) *The Royal Naval Volunteer Reserve*; (6) *The National Reserve*; (7) *Rifle Associations*; and (8) *Cadets*.

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number.

The establishment of Rifle Associations, under the Citizen Force Reserve, is a marked feature of the Act; citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle.

Provision is made in the Act for the cadet training of boys between 13 and 17 in urban and

other populous areas, where facilities can conveniently be arranged.

The Union is divided into 6 military districts. To each military district has been allotted various units of different arms, to which the citizens entered for peace training in their 20th and 21st years are posted.

EDUCATION.

In the South Africa Act, Section 85 (iii.), it is provided that "Education, other than higher education for a period of five years and thereafter, until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils."

Under Act No. 5 of 1922, a definition is given of the term "higher education." Section 12 of that Act, as amended by Section 14 of Act No. 46 of 1925, reads as follows:—The expression "higher education" as used in Section 85 of the South Africa Act, 1909, shall include *inter alia*: (a) Education provided by universities and university colleges incorporated by law; (b) education provided by the South African Native College; (c) education provided by such technical institutions (including schools of art, music, commerce, technology, agriculture, mining and domestic science) as the Minister of Education may declare to be places of higher education; (d) such part of the education provided by other technical institutions as the Minister of Education may, after consultation with the provincial administration concerned, declare to be higher education; (e) any other education which, with the consent of the provincial administration concerned, the Minister of Education may declare to be higher education.

In terms of clauses (c), (d) and (e) above, the Provinces have been relieved of all vocational education (technical, industrial and agricultural), and the Department of Education under the Minister is therefore now concerned with—

I. Universities and university colleges comprising the following:—

1. *University of South Africa*, with the following constituent colleges—

University College, Potchefstroom.
Grey University College, Bloemfontein.
Rhodes University College, Grahamstown.
Huguenot University College, Wellington,
C.P.

Natal University College, Pietermaritzburg.

2. *University of Capetown*.

3. *University of Stellenbosch*.

4. *University of the Witwatersrand*.

5. *University of Pretoria*.

II. Technical colleges which have been established under Act No. 30 of 1923 at Capetown, Durban, Johannesburg, Port Elizabeth, East London, Pretoria, Pietermaritzburg, and Bloemfontein.

III. Industrial, trade and agricultural schools (State and State-aided) at various centres throughout the Union.

The number of students at universities and university colleges for the calendar year 1922 was 6,929. The State expenditure on higher education as above defined during the financial year 1922-23 was £777,057.

Primary Education and Education other than Higher Education.—The central direction of

public education (other than higher education) is exercised by the Provincial Education Department in each of the four Provinces of the Union. Each Department is controlled by a Director or Superintendent of Education. In the Cape Province practically all the schools are State-aided. In Natal they are partly State schools and partly State-aided. In the Transvaal and Orange Free State they are in the main State schools. In all Provinces primary education is free.

Number of State and State aided Schools in the Union in 1932.—For European scholars, 4,872; for Non-European scholars, 4,032; total, 8,904.

Number of Scholars and Teachers on Nov. 1, 1932.—European scholars, 350,126; Non-European scholars, 403,302; total, 753,428. Teachers—In European Schools, 15,743; In Non-European Schools, 10,133.

State Expenditure on Education in 1932.—Cape, £3,220,641; Natal, £731,052; Transvaal, £2,695,119; Orange Free State, £879,169; total, £7,525,981.

Private Schools in 1931.—European, 289; Non-European, 420; total, 709.

Number of Scholars.—European, 20,455; Non-European, 20,540; total, 41,004.

Number of Teachers.—European, 1,216; Non-European, 610; total, 1,826.

In all Provinces Normal Colleges and other institutions for the training of teachers are maintained by the Education Departments.

Superintendent-General of Education, Cape, Prof. M. G. Botha, M.A.

Supt. of Education, Natal, F. D. Hugo, B.A.

Director of Education, Transvaal, S. P. E. Boshoff, M.A., D.Litt.

Director of Education, Orange Free State, S. H. Pellissier, B.A.

UNION FINANCE.

The ordinary Revenue and Expenditure of the Union (exclusive of subsidies to Provincial Administrations and interest on Railway capital) for the five years ended March 31, 1932, are stated as under:—

Year.	Revenue.	Expenditure.
	£	£
1927-1928.....	30,094,024	22,840,768
1928-1929.....	30,501,650	23,180,076
1929-1930.....	30,486,458	24,414,770
1930-1931.....	28,563,005	24,249,960
1931-1932.....	27,040,895*	22,298,931†

* Excluding an amount of £699,811 collected in respect of Primage Duty specially imposed for the payment of Exports Subsidies.

† Excluding an amount of £628,733 paid out as Exports Subsidies.

DEBT.

The Funded Debt of the Union at March 31, 1932, was £249,519,373 and the Floating Debt £14,427,457.

PROVINCIAL FINANCE.

Since their establishment in 1910 the powers and functions of the Provinces have undergone various alterations, and their powers of taxation have been limited from time to time. An Act (No. 46, 1925) to amend the laws regulating the financial relations between the Union and the several Provinces thereof was passed in the 1925 Session of Parliament, and as from April 1, 1926,

the sources of revenue available to the Provinces are:—

(1) A subsidy from the Union Government based upon the average attendance of pupils receiving education within the Province, and the extent of other educational functions carried on by the Province.

(2) Certain scheduled and limited taxes.

(3) Certain taxes collected by the Union and assigned to the Provinces without power to legislate in regard thereto.

(4) Special grants of £75,000 each to the two smaller Provinces of Natal and the Orange Free State.

The requirements of the Provinces in regard to capital expenditure are supplied by the Union Government by way of loans. Special loans repayable in 10 years have been made by the Central Government to finance the deficits on the Provincial Revenue Funds at March 31, 1924.

The ordinary Revenue and Expenditure for six years ended March 31, 1932, were as follows:—

Financial Year.	Revenue and transferred or assigned	Subsidies.	Total Ordinary Revenue	Total Ordinary Expenditure.
	£	£	£	£
1926-27	4,460,171	5,171,178	9,631,349	9,948,058

* Not enumerated.

Manufactures.—The development of local industries has been most marked during the last three years, the scarcity of overseas supplies, with the consequent increase in prices, having served as a very effective measure of protection, under which enterprise has flourished to a degree previously unknown. New industries have sprung up in the principal centres of trade, and existing industries have largely extended their operations. From the recently published returns of manufactures in the Union, the total output during the year 1927-28 was £60,223,111 sterling; 1928-29, £70,934,098; 1929-30, £92,913,844; 1930-31, £98,307,910; 1931-32, £79,448,299; 1932-33, £74,146,292; 1933-34, £76,789,348; 1934-35, £84,159,604; 1935-36, £91,536,986; 1936-37, £97,878,822; 1937-38, £106,981,697; 1938-39, £113,440,757; and 1939-40, £12,128,613. Amongst the new industries which have been established during the period of the War may be mentioned the following:—Wattle extract; industrial alcohol (motor fuel) from molasses; calcium carbide; sulphate of ammonia; bottle-making; starch from maize; iron smelting (still in the initial stage); arsenic production; detinning of scrap tin; copper manufacture, &c.

Mines and Minerals.—Gold mining still continues the chief source of the country's mineral wealth. At the outbreak of war the diamond mines closed down. The value of the output of the principal minerals of the Union in 1932 was:—

Gold	£ 149,766,321	Silver	£ 65,839
Diamonds	1,679,600	Asbestos	116,401
Coal	2,733,382	Osmiridium	39,930
Copper	254,324	Corundum	2,621
Tin	63,228	Platinum	42,352

† Includes £668,798 received as premium on a portion of the gold produced in December.

The mineral production for the Union of South Africa was as follows:—

Gold.

1921	8,128,710 fine oz.	£ 43,082,162
1922	7,009,858	32,343,485
1923	9,149,073	41,574,945
1924	9,575,040	44,730,377
1925	9,597,592	40,767,981
1926	9,954,762	42,285,139
1927	10,122,491	42,997,608
1928	10,254,264	43,982,119
1929	10,412,220	44,228,748
1930	10,716,351	45,520,166
1931	10,877,777	46,205,858
1932	11,558,532	49,766,321

The labour employed in the gold industry in December, 1932, Transvaal, was 24,645 Europeans and 232,483 coloured.

Diamonds.

1922	669,359 metric carats	£ 2,266,631
1923	2,053,095	6,038,207
1924	2,440,398	8,033,406
1925	2,430,128	8,128,128
1926	2,217,967	10,683,597
1927	4,708,038	12,392,308
1928	4,372,857	12,677,772
1929	3,661,212	10,590,113
1930	3,163,591	8,340,719
1931	2,119,156	4,128,503
1932	798,382	1,679,600

The average labour employed in diamond mining, including individual diamond digging, was in 1932: Transvaal, 2,608 Europeans, 72,321 coloured; Cape, 2,127 Europeans, 6,473 coloured; O.F.S., 207 Europeans, 352 coloured; a total of 4,932 Europeans and 79,146 coloured. The value of diamonds owned throughout the world was stated to be £600,000,000 in 1928, one-half being owned by residents in U.S.A.

Coal.

(Tons of 2,000 lb.)

1932.

Transvaal	6,642,162 tons	£ 1,622,622
Cape	5,467	3,333
O.F.S.	1,190,781	338,859
Natal	2,811,241	778,558

Totals

10,649,651

£ 2,733,382

The average labour employed in coal mining in 1932 was: Natal, 437 Europeans, 9,050 coloured; Transvaal, 785 Europeans, 11,022 coloured; Cape, 7 Europeans, 97 coloured; O.F.S., 125 Europeans, 1,971 coloured; a total of 1,354 Europeans and 22,200 coloured.

Silver.

There are no silver mines in the Union. The output, valued at £65,839 in 1932, represents silver contained in gold bullion and base metal ores.

Copper.

(Tons of 2,000 lb.)

In 1932, 10,348 tons of concentrates were produced in the Transvaal, and 52 tons in the Cape Province. The total shipments of copper during the year amounted to 11,068 tons, valued at £254,324.

* Premium included—1920, 1921, 1922, 1923, 1924, £10,950,842, £1,553,998, £2,457,902, £2,712,155 and £4,607,121 respectively, and £668,798 in 1932 (Dec.).

WHITAKER'S ALMANACK, 1934.

T'ns.

(Tons of 2,000 lb.)

The Union figures for 1932 are 953 tons, valued at £63,228.

Other Minerals.

The value of the total mineral production of the Union for 1932 was £55,030,426. The value of miscellaneous products: quarry products, £76,891; lead, £908; magnesite, £2,707; graphite, £1,566.

EXTERNAL TRADE.

The total value of the Imports and Exports in the five years 1928-1932 (exclusive of silver and copper specie) was as follows. Note amended figures (exports) include Gold Specie:—

Year	Imports.	Exports.	Total Trade.
	£	£	£
1928	79,106,083	96,460,170	175,566,253

COMMUNICATIONS.

Railways.—The first railway in South Africa was commenced in April, 1859, the first sod being turned by the then Governor of the Cape of Good Hope, Sir George Grey. This was very shortly followed by Natal, which started the construction of a line running from Durban. Another two lines finally linked up at Heidelberg in 1895. The Cape line was opened for public traffic to Stellenbosch in 1862 and to Wellington in 1863, while a track to Wynberg was opened to traffic in 1864. Little progress was, however, made in succeeding years, and it became evident that the development of the country could not be left to private enterprise. The existing Cape lines were therefore purchased by the Government on Jan. 1, 1873, and in 1876 Natal followed by acquiring the railways in that colony. Increased working at once took place, and the construction of four lines was pushed inland from Cape Town, Durban, Port Elizabeth, and East London. Bloemfontein was reached in 1890, and two years later a line to Germiston linked up with the system already established in the Transvaal.

The total open mileage of Government-owned lines at the end of March, 1932, was 13,100 miles (comprising Cape 5,277, Orange Free State 1,633, Transvaal 3,268, Natal 1,520, and South-West Africa 1,462), of which 12,226 miles are 3 ft. 6 in. gauge and 884 miles a ft. gauge.

The capital expenditure on Government railways up to March 31, 1933, amounted to £148,864,285. The gross earnings for the year ending March 31, 1933, were £20,619,878, and the net deficit, after payment of interest, £697,120. Working expenditure (excluding depreciation) amounted to £14,044,562, or 68.11 per cent. of the gross revenue, as compared with £15,627,753, or 70.20 per cent. of the gross revenue for the previous year. The Cape to Cairo Railway, projected by Cecil Rhodes, had advanced to Bulawayo by 1902, 1,362 miles from Cape Town and 3,600 miles from Cairo. Through communication by rail is now available from Cape Town to Port Francqui in the lower Congo, 3,200 miles, all 2' 6" gauge. The Trans-Zambesi Railway, from Bondon (on the Beira-Mashonaland line) to the Zambesi, was opened July 1, 1922, thus placing the Union in direct communication with Nyasaland.

Posts and Telegraphs.—On March 31, 1933, there were 3,141 post and 2,035 telegraph offices open in the Union. During the year 1932-33, 300,755,900 articles of mail matter, including 2,062,300 registered articles, addressed to places within and without the Union, were handled. An Air Mail service in conjunction with morning and outgoing European mails operates between Capetown and Port Elizabeth, with branches to Durban and Johannesburg (Rand Airport). A direct Air Mail service—once weekly—operates between South Africa (Capetown) and England (Croydon) via Rhodesia-Tanganyika, Kenya, Sudan, Egypt, Greece and France. The number of money orders issued was 652,821, valued at £2,720,402, while 499,654 orders, value £2,079,618, were paid. 3,641,665 postal orders were issued, and 3,511,036 postal orders paid. The number of depositors in the Savings Bank was 491,111, with £3,361,919 standing to their credit. 4,465,290 inland telegrams (including press messages) were received and despatched during the year. 36,445 miles of telegraph wire were in use. There are 5 wireless telegraph stations in the Union which during the year received from and transmitted to ships 10,007 messages, in respect of which £6,988 accrued to the revenue of the Department. The telephone system consists of 452,450 miles of wire, with 107,350 telephone instruments in the service of 80,757 subscribers, by whom approximately 167½ million (inclusive of 10½ million trunk) calls were made through departmental telephone exchanges. The combined cash revenue from Posts, Telegraphs and Telephones was £4,124,056, comprising Postal £2,208,684, Telegraphs £16,148, and Telephones £1,500,124. The combined cash expenditure totalled £2,818,201.

Shipping.—In 1932, 4,450 vessels (14,317,954 tons) entered, and 4,452 vessels (14,338,011 tons) cleared at the ports of the Union of South Africa.

RAILWAYS AND HARBOURS BOARD.

Chairman, Hon. O. Pirow, K.C., M.P., Minister of Railways and Harbours.

Members, A. Kuit, R. B. Waterston, and D. Hugo.

Secretary, W. Heckroodt.

The railways, ports, and harbours of the Union are administered and worked under the control and authority of the Governor-General in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners.

The management and working of the railways

and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame, after consultation with the Board.

South-West Africa.

(*Suidwes-Afrika*.)

Administered under Mandate as an integral part of the Union of South Africa.

Administrator, Dr. D. G. Conradie, B.A., LL.D.
Secretary, H. P. Smut.

SOUTH-WEST AFRICA lies between S. lat. 17° 23' and the Orange River, with a narrow strip between 18°-18° 30' S. lat. extending from 21° to 25° E. long., known as the Caprivi Zipfel, and gives access to the Zambesi. The estimated area of the country is 317,725 square miles, and the population (1932) is approximately 275,000, of whom approximately 22,000 are Europeans. The estimated native population (1932) is distributed as follows: Territory proper, 89,046; *Omahoboland*, 127,000; *Kaokoveld*, 4,669; *Okavango*, 20,566; *Caprivi Zipfel*, eastern portion 8,529, western portion 2,480. Running more or less parallel to the coast, and roughly at a distance of 60 to 100 miles from it, is a broken range of mountains, from which there is a gradual slope to the sea. The country between these mountains and the coast is barren desert except towards the north, and is known as the Namib. Towards the east from these mountains the land slopes eastward and forms the western edge of the great Kalahari Plateau. The boundaries are the Okavango and Kunene Rivers, in the north and the Orange River, in the south, all perennial streams of considerable volume. On the Orange are the *Augethames Falls*, twice the height of Niagara; these are situated about 25 miles east of the eastern boundary, in Cape Province.

The native races are—In the south, Hottentots. In the centre, Hereros and Bergdamaaras, with the exception of the Rehoboth district, which is occupied by a mixed race known as the Bastards; and in the north, Ovambos. To the north and east there are many small bushmen tribes, some pure bushmen, but the remainder a mixture of aboriginal native tribes and bushmen. The Kaokoveld (the north-western area) is very scantily inhabited by Hottentots and Ovambos; the only Europeans are those allowed in under permit for the purpose of prospecting for minerals. It is very mountainous, and in many places well supplied with water.

The Administration of the country is exercised by the Governor-General, who has, however, delegated most of his powers to an Administrator appointed by the Union Government. The territory is divided into 17 Districts ruled over by Magistrates as the representatives of the Government. The territory of Walvis Bay, which is actually part of the Cape Province of the Union, is administered so far as possible as a portion of South West Africa, and its magnificent harbour will undoubtedly in the future prove of great benefit. The constitution granted under Union Act No. 42 of 1925 provides for a Legislative Assembly consisting of 12 elected and 6 nominated members, an Executive Committee of 4 members elected by the Assembly with the Administrator as Chairman. The powers of legislation granted exclude the following matters which are permanently reserved to the Union Government:—

(a) Native affairs or any matters specially

affecting natives, including the imposition of taxation upon the persons, land, habitations or earnings of natives.

(b) Mines, minerals, mineral oils and precious stones; or the moneys derivable therefrom or payable to the administration in respect of licences for prospecting or winning the same or as share of the produce thereof or any taxation in connection therewith;

(c) The acquisition, construction, management, regulation, control and working of railways and harbours in the territory; and the organization, discipline and conditions of employment and the payment of pensions, retiring allowances and financial benefits to persons in the employment of the railways and harbours administration;

(d) The organization of and discipline and conditions of employment of persons in the public service who are serving in the territory, and the payment of pensions, retiring allowances and financial benefits to such persons;

(e) The constitution and jurisdiction of courts of justice, whether superior or inferior, and the practice or procedure to be observed therein;

(f) The administration, management and working of the postal, telegraph and telephone services;

(g) The establishment or control of any military organization in the territory;

(h) The movements or operations of any unit of the South African Defence Forces within the territory;

(i) The entry of immigrants into the territory or of other persons;

(j) Tariffs of customs and excise duties and the control and management of customs and excise;

(k) Currency and banking and the control of banking institutions.

Police, Civil Aviation, Public Education, Land or Agricultural Banks and Alienation of Government Land were reserved for a period of three years,* after which period the Assembly may by resolution ask to assume control thereof.

In regard to Finance, the Assembly may not initiate any ordinance imposing taxation unless recommended to it by the Administrator.

The railway system in South-West Africa, now controlled and worked by the South African Railways and Harbours Administration, and connected with Union Lines (De Aar to Nakop Protectorate border 343 miles), comprises Union Lines 398 miles, of which 55 are of 2' 6" gauge, the balance being 3' 6" gauge; S. W. Territory Lines 1,490 miles, of which 361 are 2' 6" gauge, the balance being 3' 6" gauge; and privately owned Lines 74 miles; a total of 1,962 miles.

The Capital of the Protectorate is Windhoek, which lies practically in the centre of the country at 5,500 ft. above sea-level. (Urban white population, 1926, 3,809.) Other inland towns are Keetmanshoop (Urban white population, 1926, 1,159), Aroab, Bethanie, Gibeon, Gobabis, Grootfontein, Karibib, Okahandja, Omaruru, Otjiwarongo, Outjo, Rehoboth, Warmbad and Malaboehie; also Aus, Mariental, Tsumeb and Usakos. The ports are Walvis Bay (Urban white population, 1926, 662) and Lüderitz Bay (Urban white population, 1926, 1,234).

* The period of three years has expired, and a resolution was passed unanimously by the Assembly on April 27, 1929, asking the Governor-General in terms of the Constitution Act to declare the full competency of the Assembly to make Ordinances in respect of these subjects-matters. This has, however, not yet (August, 1933) been done.

Provinces of the Union of South Africa.

CAPE OF GOOD HOPE.

The Province of the Cape of Good Hope reaches in S. lat. from 26° to 34° 30', and in E. long. from 16° 25' to 30°. The extent of the country is, N.E. to S.W. 750 miles, and from N.W. to S.E. 800 miles, with a coast-line of nearly 1,300 miles.

Area and Population.

Education.—Local School Administration is conducted by school boards and school committees, the unit of administration being the school district. The Province is divided into 211 school districts, each under the control of a School Board, a portion of the members being

elected by the ratepayers and a portion partly nominated by the Provincial Administration and partly by the Local authorities. Education is compulsory for children of European parentage. The necessary grants are provided from Provincial Council revenues, education up to the age of 25 being free.

State and Aided Schools, Nov. 1, 1932, 2,406 European and 2,386 non-European. There are 150,222 European pupils and 222,422 non-European. Total number of teachers 12,192 (6,536 in European schools and 5,656 in non-European schools).

Hospitals.—The daily average number in all hospitals (1932) was 1,876; ordinary revenue £167,206, ordinary expenditure £348,880. Provincial subsidies, donations, &c., £175,674.

Harbours and Works.—There are magnificent harbours at Table Bay (Cape Town), Port Elizabeth, East London, and Mossel Bay. There are electric tramways in Cape Town, Port Elizabeth, East London, and Kimberley.

Administration.—The Province is administered by an Administrator, appointed for five years by the Governor-General, aided by a Provincial Council of 61 members (elected for three years). There is an Executive Committee of four members in addition to the Administrator, who is Chairman of the Committee.

Local Government.—There are 128 municipalities, each governed by a Mayor or Chairman and Councillors, a certain number of whom are elected annually by the ratepayers. There are 93 Divisional Councils and 89 Village Management Boards and 23 Local Boards.

Administrator, Hon. J. H. Conradie £2,500
Prov. Sec., F. C. M. Voigt.

Superintendent-General of Education, M. C. Botha, M.A.

Professional Assistant, W. de V. Malan, Ph.D.
Secretary, P. A. Millard.

Capital, CAPE TOWN. Total population (1932), European (with suburbs), 250,914.

Cape Town, a seaport, the seat of the legislature and the mother city of South Africa, is pleasantly situated in the Table Mountain Valley. Its suburbs, which are included in the municipality, cluster along the base of Table Mountain, which rises almost sheer to a height of 3,582 feet and overshadows the whole with its immense bulk. The population in 1932 numbered 151,000 Europeans and approximately 135,000 other races. The city is the seat of a university and of a cathedral, and amongst its educational institutions numbers a museum, an art gallery, a notable library and municipal botanical gardens. Some fine old buildings of the Dutch period still remain.

Cape Town is 5,979 miles from Southampton; transit, 16 days.

NATAL.

The Province of Natal comprises an area of 35,284 square miles (including Zululand, 20,427 square miles), with a seaboard of 360 miles. In 1932 the European population was 177,449 (males 90,253, females 87,196).

In 1932 the European births registered numbered 3,538, deaths 1,765, and marriages 1,448. The race question in Natal is complicated by the presence of large numbers of Indian subjects of the Crown, brought over during the latter half of the nineteenth century to supply the deficiency of local labour.

Education.—There is a University College at Pietermaritzburg which is affiliated to the University of South Africa. It has a constituent college at Durban with faculties of engineering, fine arts, and commerce. In addition there were on Nov. 1, 1932—European: schools 475, scholars 22,604, teachers 1,652; non-European: schools 780, scholars 75,032, teachers 2,122. These are maintained or aided by Government. There is also a large number of private schools.

Administration.—The Provincial government is administered by an Administrator aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. H. Gordon Watson, I.S.O.
Executive Committee, F. C. Hollander; W. M. Power; J. Macaulay; W. V. Dyer.

Provincial Secretary, A. E. Charter, O.B.E.

PIETERMARITZBURG, the capital and seat of the Provincial Government, is situated about 54 miles inland from Port Natal. Total population (European and coloured), 36,023 in 1931. The 1931 Census figures for the European population of Pietermaritzburg are 21,581.

In Durban (population, 1925, 153,555; 1926, 72,928; for 1932 European population of Durban was 86,228), or Port Natal, is the only harbour of any importance on the south-east coast. The entrance is now safe and navigable for any vessel at any time; the average low-water depth at the entrance, L.W.O.S.T., the bar being no longer existent, for 1927 being 37 feet.

Natal, 6,800 miles; transit, 20 days.

ZULULAND.

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the new territory (formerly Utrecht and Vrijheid districts of the Transvaal) and Swaziland. The *Amagutaland Protectorate*, created by proclamation of Nov. 22, 1897, was annexed to Zululand on Dec. 27, 1897, and now forms part of the Province. The *Northern Districts* territory (consisting of the Magisterial Divisions of Vrijheid, Utrecht, Paulpietersburg, and Babanango) was annexed to Natal on January 27, 1903.

THE TRANSVAAL.

In 1932 the European population numbered 696,120 (males 357,504, females 338,616).

The Province of the Transvaal has a total area of 120,450 square miles, about 20,000 square miles lying within the tropics. The Census of 1921 showed a population of 1,087,636, of whom 1,159,430 were males and 928,206 females. In 1932 there were 18,730 European births, 6,489 European deaths, and 6,647 European marriages.

Religion.—The religious statistics for 1921 are:—

	Europeans.	Others.

On Nov. 1, 1932, there were 1,209 European and 638 non-European State and State-aided Schools in the Transvaal. The enrolment was 135,734 and 82,686; and the number of teachers 5,399 and 1,771 respectively.

Administration.—The government is administered by an Administrator, aided by a Provincial Council of 57 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. J. S. Smuts.

Executive Committee, J. M. van H. Brink; E. Goodman; F. W. R. Robertson; H. L. M. Leibbrandt.

Provincial Secretary, C. E. Viljoen, B.A.

Asst. do., C. H. Sheard, B.A.

Director of Education, S. P. E. Boshoff, M.A., D.Litt.

Sec. to the Education Dept., F. S. Malan, B.A.

The Capital is PRETORIA, pop. 1931, European 62,138. Pretoria, which is also the seat of the Union Government, is pleasantly situated on the Apies River, and has wide, shady streets and magnificent buildings. The principal town is JOHANNESBURG, 5,500 feet above sea-level, about 35 miles S.W. of the capital. Johannesburg is the centre of the Witwatersrand goldfields, and possesses magnificent buildings. Among its other industries are printing, brickmaking, brewing, tobacco manufactures and iron foundries. The population in 1931 was (European) 203,298.

Pretoria is distant from London 7,200 miles; transit, *via* Capetown, 19 days.

ORANGE FREE STATE.

The Province of the Orange Free State has a total area of 49,647 square miles, and is divided

into 34 districts. The population at the last six censuses was:—

Year.	White	Coloured	Total.
1904	122,679	244,636	367,315
1911	175,189	352,985	528,174
1918	181,678
1925	188,556	440,271	628,827
1931	202,985
1931	205,375

In 1931, of the Europeans, 104,738 are males and 100,637 females.

The number of European births registered in 1931 was 4,975, deaths 1,709, and marriages 1,558.

Religion.—Europeans only (1926 Census):—

Dutch Churches	163,504	Lutherans	893
Anglican	13,235	Roman Catholics	2,516
Presbyterian	3,945	Jews	5,753
Congregational	116	Other	5,545
Methodists	7,478		

Education.—On November 1, 1932, there were 782 European and 228 non-European State and State-aided Schools in the Orange Free State Province. The enrolment was 45,566 and 27,141 respectively, and the number of teachers 2,157 and 596.

Administration.—The government is administered by an Administrator aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. C. T. M. Willcocks.

Executive Committee, J. O. D. du Toit; J. D. T. Erasmus; C. T. van Schalkwyk, Jr.; J. C. Buys.

Provincial Secretary, R. A. Gregorowski.

BLOEMFONTEIN, the Capital and seat of the Provincial Government, had a population of 28,503 Europeans in 1931. The city is an important railway centre, is developing rapidly, and continues to hold its place as one of the foremost cities in the Union. Many fine buildings have been erected, and a new Town Hall (costing £200,000) will be erected very shortly.

Bloemfontein is distant from London 6,700 miles; transit, *via* Capetown, 19 days.

GOLD PRODUCTION.

THE Annual Production of Gold, for the 26 years 1906-1931, is stated below from figures issued by the Bureau of the Mint, Washington, D.C., U.S.A. In 1931 the chief producing countries were Union of South Africa, \$224,863,607; Dominion of Canada, \$55,715,121; United States, \$45,762,088; Russia, \$35,161,963; Mexico, \$12,878,615; Australia and New Zealand, \$12,205,127; Southern Rhodesia, \$10,959,770; Japan, \$8,785,530; British India, \$6,831,702. In 1931 the production of Silver was 192,709,971 fine oz. (\$55,910,942).

Year.	Fine Oz.	Value	Year	Fine Oz.	Value.
1906	19,471,080	\$402,503,000	1917	17,608,184	\$365,853,933

BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in $32^{\circ}15'$ N. lat. and $64^{\circ}51'$ W. long., comprising an area of about 19 square miles, with a population (1931) of 27,789 (11,353 white and 16,436 coloured). These islands derive their name from Bermudez, a Spaniard, who sighted them in 1527; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant.

The Government is administered by a Governor, who is also Commander-in-Chief of the military forces. He is advised by an Executive Council of 7 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members.

The climate is mild and healthy. There are no streams or ordinary wells, and the inhabitants are normally dependent on the rainfall stored and preserved in tanks, but a new system of horizontal wells has recently been successfully installed. Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding. The islands produce large quantities of onions, potatoes, and green vegetables, which are largely exported, together with cut flowers and lily bulbs, to Canada. Arrowroot and bananas are also grown, but meat, flour and other articles of consumption are imported from the U.S. and Canada. Fish are plentiful round the coasts. The islands are much frequented as a health resort by Americans and Canadians.

BORNEO.

Borneo is a large island in the Eastern Archipelago, extending from lat. $7^{\circ}4'$ N. to $4^{\circ}10'$ S. and from long. $108^{\circ}50'$ to $119^{\circ}20'$ E. It is about 850 miles in length and 600 in breadth, and contains an area of 284,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malays, Kyan, Papus or Negritos, Chinese, Bajans, Dusuns, Muruts and Bigas (the aboriginal Celebes). The island was discovered by the Portuguese in 1521, and at the present time rather more than two-thirds of the island is included within "Netherlands India." The remainder of the island is under British protection.

STATE OF NORTH BORNEO.

The territory of the State of North Borneo occupies the northern part of the island, with a total area of about 31,000 square miles, and a coast-line of about 900 miles. The population (1931) is 270,223, consisting mainly of Muhammadan settlers on the coast, aboriginal tribes inland, and a large number of Chinese traders, artisans, and agricultural labourers. The interior is mountainous (Mount Kinabalu, 13,455 feet) and is densely timbered.

The two chief towns are Sandakan, on the east coast, and Jesselton, on the west coast. All legislation is passed by the Legislative Council, which consists of 9 official and 5 unofficial members, who have the local title of Honourable. The appointment of the Governor is subject to the approval of the Secretary of State. For administrative purposes the whole State is divided into 4 Residencies. The laws are based on the Indian codes of criminal and civil procedure, amended and adapted by local ordinances. There is an Imam's Court for Muhammadan law.

The chief products are timber, tobacco, rubber, copra, catch, birds'-nests, salt fish, damar, sago, coco-nuts, rattans, and all varieties of jungle and sea produce. The country is suitable for the cultivation of sugar, tapioca, coco-nuts, kapok, ground nuts, rubber, pepper, and gambier on a large scale. Gold has been found.

A railway runs from Jesselton, the chief port on the west coast, and down the coast to Beaufort, the centre of the rubber industry, where it turns inland to Melalap, in the interior; there is a branch from Beaufort to Weston (20 miles). There are five wireless stations. There is a State bank at Sandakan with an agency at Jesselton.

There is an Armed Constabulary numbering 500 all ranks, composed of Indians and Natives under European officers, armed with S.M.L.E. rifles and Lewis guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton.

BRUNEI.

Sultan, H. H. Ahmed Tajudin Akhazul Khairi Waddin, suc. Sept., 1924; Assumed full power (after minority) Sept. 19, 1931.

A native State on the north-west coast of the island of Borneo. The total area is about 2,500 square miles, the population being 30,135 (April, 1931), of whom 25,972 are Malays and Bornean races. The territory was placed under British protection in 1888, and on Jan. 2, 1906, the Sultan accepted by treaty a British Resident to assist and advise him in the administration.

* Exclusive of land sales.

The chief town, Brunei, has a population of 20,452. Native industries include fishing, cloth-weaving, brass foundries, and silversmiths' work. The chief imports are rice, cloth, tobacco, sugar, petroleum, and sundries; the exports are chiefly cutch (mangrove extract), rubber, jelutong, and sago.

High Commissioner, The Governor of the Straits Settlements.

British Resident, Brunei, T. F. Carey, M.C.S.

Brunei is 5 hours by steamer from Labuan, and is distant 758 miles from Singapore (transit 4 days). There are wireless stations at Brunei, Labuan, Temburong, and Belait.

BRITISH GUIANA.

which includes the Counties of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America and has a total area of 89,480 square miles, with a seaboard of more than 300 miles. The population, Dec. 31, 1932, was estimated at 317,812, of whom 134,059 were East Indian immigrants. The birth-rate was 34.1, and the death-rate 21.1 per 1,000 of the population. The colony is bounded on the south by Brazil, on the east by Dutch Guiana, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The climate, although hot, is pleasant and healthy. The cultivated portion of the country, amounting to about 125,368 acres (of which 62,905 acres are in sugar-cane and 73,453 in rice), is confined to the sea-coast and to a short distance from the rivers. The coastland is very like the Netherlands, being below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the boundaries of British Guiana and Venezuela is Mt. Roraima, a flat-topped mountain 9,304 feet above sea level, and on the Potaro River (a tributary of the Essequibo) are the Kaieteur Falls, with a clear drop of 747 feet and a total fall of 822 feet. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The meteorological records taken on the coast-lands during a period of 86 years show, as regards temperature, that the climate is a very equable one. The mean temperature is 80.4°, its recorded extremes during this long period ranging between 68° and 96°, but these extreme temperatures are very rarely recorded, the usual extremes during a year being 70° and 90°. In the interior the mean temperature is higher—82.6°, its extremes ranging from 66° to 103°. The yearly rainfall is, on the contrary, subject to marked variation, its mean on the coast lands being 97.86 inches distributed over 288 days of the year, and its range from 65.23 to 138.68 inches per year. In the interior the average recorded rainfall is 58.4 inches per year, ranging from 45.2 to 80.4 inches per year. The chief product is sugar, which forms 62 per cent. of the export trade. The leading exports are sugar (£1,342,190 in 1932), rum, diamonds, gold, timber, balata, bauxite, rice and copra. There are about 7,400 aboriginal Indians living in their primitive state in the remote part of

the Colony; they are occupied largely in fishing, hunting, and raising crops of cassava.

The British Guiana Order in Council, 1928, providing for the Government of the Colony and for the Constitution of a Legislative Council in place of the Court of Policy and Combined Court which have been determined, came into operation on July 18, 1928. The Legislative Council consists of the Governor as President, of 20 Official Members and of 19 Unofficial Members. Executive and administrative functions are exercised by the Governor and an Executive Council. There are 4,878 miles of post-office telephone wire, 1,430 of which are contained in 13 miles of aerial cable; in addition, there are 23 miles of submarine cable and 313 of telegraph lines, with 73 post-offices and postal agencies, and 7 wireless stations. There are 95 miles of railway.

BRITISH HONDURAS.

British Honduras, in Central America, lies within 18° 20' N. to 15° 55' N. latitude and 89° 9' 22" to 88° 20' W. longitude. Its extreme length and breadth are approximately 174 m.

and 68 m. respectively; it is bounded on the north and north-west by Yucatan (Mexico), on the west and south by Guatemala, and on the east by the Caribbean Sea. The total area is about 8,508 sq. miles, with a population (Census 1931) of 51,347—25,524 males and 25,823 females. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 50° to 98°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. In September 1931 a disastrous hurricane devastated the capital of the colony, with a loss of nearly 1,000 lives, a Mansion House Fund being raised for the sufferers. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten or twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary.

The staple products are the natural woods of the colony, principally mahogany and logwood. Sugar, rubber and cacao grow readily. Fruit, including bananas, plantains, coco-nuts, pineapples, oranges, and mangoes also grow well, while inland there are extensive regions of good pasturage. About 60,000 acres are under cultivation. The best description of cacao trees grow wild in the bush. There are 8 primary schools in the colony, and 4 schools with secondary departments in Belize. The shipping outered and cleared at the port of Belize in 1932 was 573,276 tons. There is a radio-telegraph station at Belize.

British Honduras is governed as a Crown colony. There is an Executive Council of 3 official and 4 appointed members and a Legislative Council of 6 official and 7 appointed members. The Governor is President of both Councils.

BRITISH WEST INDIES.

The West Indies, so named in 1492 by Columbus who believed the islands to form the western limits of India, are a number of islands and islets, some of them mere rocks, situated between 10° to 27° North and 50° 30' to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezuela (South America), and is divided into three main groups: I. GREATER ANTILLES, which contain the largest islands, Cuba (44,000 sq. miles) and Hispaniola (28,000 sq. miles), being Independent; Jamaica and its dependencies, British; and Puerto Rico, a dependency of the United States. II. BAHAMAS, which are entirely British. III. LESSER ANTILLES, which are divided among the United Kingdom, France, Netherlands, the United States and Venezuela. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are Independent, 12,300 British, 3,800 United States, 1,350 French, 430 Netherlands, and 90 Venezuelan. Trade Enquiry Office in London, The West India Committee, 14, Trinity Square, E.C. 3.

B. W. I. COMMISSION

In 1932 a Commission was appointed by the Secretary of State for the Colonies to examine the possibilities of closer union between Trinidad and the Windward Islands and the Leeward Islands.

Chairman, Gen. Sir Charles Fergusson, Bt., G.C.M.G., K.C.B., D.S.O., M.V.O.
Other Members, Maj. Sir Charles Hill, K.C.M.G.; Sir Sidney Arncliffe-Smith, K.B.E., C.B.
Secretary, S. MacNeill Campbell.

THE BAHAMAS.

The Bahamas (or Lucayos) are an archipelago of the British West Indies, lying between 21° 42'—27° 34' N. lat. and 72° 40'—79° 5' W. long., and extending from the coast of Florida on the north-west to Haiti on the south-east. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 4,404 square miles, and a population in 1932 of 61,822, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), Cat Island, Abaco, Grand Bahama, Long Island, Eleuthera, Exuma, Harbour Island, Inagua, Andros Islands, San Salvador or Watling Island, Rum Cay, Long Cay, Ragged Island and Bimini. Originally settled by Englishmen, the Bahamas were, in 1782, surprised by the Spanish, but at the peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1932 being valued at £78,202. Tomatoes are cultivated in large quantities for shipment to Canada and the United States. Mahogany, lignum-vite, mastic,

ironwood, ebony, logwood, and satinwood are found throughout the islands. A fibre industry is largely established. The imports are chiefly foodstuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a nominated Legislative Council of 9 members and an elective Representative Assembly of 29 members.

CAPITAL, Nassau.

BARBADOS.

the most windward of the West India Islands, is situated in 13° 4' N., and longitude 59° 37' W. It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 106,470 acres (about 166 square miles), about 100,000 acres being cultivated. The population (Census of 1921), was 126,322; estimated at 176,874 on Dec. 31, 1932. The principal exports are sugar, molasses, rum, and cotton, and the imports are, salted meat, corn, salted fish, butter, flour, and Indian corn meal. Liberal provision is made for elementary education, and the Lodge School and Harrison's College provide for higher education for boys, and Queen's College and Codrington High School for girls. Barbados alone of the W.I. Islands makes local provision for University training, Codrington College having been founded under the will of Christopher Codrington, who died in 1720. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1627. In 1885 it was constituted a distinct government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of 9 members appointed by the Sovereign, and a House of Assembly of 24 members elected yearly on the basis of a moderate franchise.

The CAPITAL and port is Bridgetown (pop., 1921, 13,486), on the shores of an open roadstead (Carlisle Bay).

	1931-32	1932-33
Revenue	£415,644	£446,842
Expenditure	424,087	425,875

JAMAICA,

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 42'–18° 32' North lat and 76° 11'–78° 23' W. long. It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,450 square miles, and a population, in April, 1921, of 858,118 (males, 401,973; females, 456,145), whites, 14,476; coloured, 157,223; blacks, 660,420; East Indians, 18,610; Chinese, 3,666; not specified, 3,603.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,388 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 220 miles of railway open. Telegraph stations and post offices

are established in every town and in very many villages; the number of accounts open in the Govt. savings banks was 129,889 (1932). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches a high price. There is an extensive trade in fruits and nuts, chiefly bananas, oranges and coconuts, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and there are some rare cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members; the Legislative Council consists of the Governor, the Senior Military Officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex officio*), of 10 Nominated Members, and of 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop. (Census, 1921) 62,707; the next in importance are Spanish Town, 8,694; Montego Bay, 6,580; and Port Antonio, 6,272. Chief exports (1932): bananas, £1,869,111; sugar, £342,909; coffee, £224,057; pimento, £61,687; cocoa, £48,102.

THE CAYMAN ISLANDS.

The Cayman Islands, forming a dependency of Jamaica, between 79° 44' and 81° 26' W. and 19° 15' and 19° 45' N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 200 square miles. They are said to have been discovered by Christopher Columbus on his return voyage from Porto Bello to Haiti, and called "Las Tortugas." Population (1931) 6,182. Shipbuilding and turtle-fishing are the principal industries.

The principal town is Georgetown, in Grand Cayman, population (1931) 1,500.
Revenue, 1931, £6,250; expenditure, £7,290.
Imports, 1931, £25,140; exports, £9,952.
Commissioner & Judge of the Grand Court, Lt.-Col. E. A. Weston, C.M.G. (with house and fees) £520 |

TURKS AND CAICOS ISLANDS.

These West India Islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-east of which they are distant about 450 miles. They have an area of about 170 square miles, and a population (1921) of 5,612, of which the principal island, Grand Turk, contains 1,568. Grand Turk is an important cable station. The islands are celebrated for producing the finest salt in the world.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turks and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and is also a Court of Appeal.

THE LEEWARD ISLANDS.

The Leeward Islands of the West Indies under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda; (2) St.

Christopher and Nevis, with Anguilla; (3) Dominica; (4) Montserrat; and (5) the Virgin Islands, with Sombbrero; all, except the last, having their own local Legislature. These 5 presidencies are administered by a Governor, to whom the Administrators and Commissioners are subordinate. There is a General Legislative Council of 10 official and 10 elective members, with the Governor as President, possessing concurrent legislative powers with the local Legislature on certain subjects. The population of the federal colony at the Census of 1921 was 122,242 (estimated Dec. 31, 1932, at 121,066). Governor, His Excellency Sir Reginald

(2) ANTIGUA AND BARBUDA.

Antigua is the seat of government and residence of the Governor-in-Chief of the Leeward Islands. It lies in 17° 6' N. lat. and 61° 45' W. long., and is nearly 108 square miles in area with a coast line of about 70 miles. Antigua was first settled by the English in 1632, and was granted to Lord Willoughby by Charles II. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which two central sugar factories have been erected. Cotton is planted on a small scale and the island also exports molasses, tamarinds, pine-apples, and arrowroot. In March, 1898, the Crown Colony system of government was instituted. The population, with Barbuda (Census of 1921) was 29,767, estimated at 32,144 on Dec. 31, 1932.

Revenue	1930-31. 1931-32.
Expenditure	£73,739 £73,283
Public debt	97,351 82,512
Total imports	145,000 145,000
Total exports	1931. 1932.
Capital, St. John's. Population (1921), 6,997.	£155,256 £146,679
<i>Island Secretary</i> (the Colonial Secretary of the Leeward Islands)	64,576 197,597
<i>Treasurer</i> , (see Leeward Islands).	

Magistrate, S. L. Athill..... £500
Supt. of Public Works, Hon. W. J. Essex £400 to 450

Chief Medical Officer, W. M. McDonald, O.B.E. £600
Barbuda, formerly a possession of the Codrington family, is situated 30 miles N. of Antigua, of which it is a dependency, in lat. $17^{\circ} 35' N.$, long. $61^{\circ} 42' W.$. Area, 62 square miles. Population, 900. The island is flat and is fertile in parts, producing cotton, corn, pepper, tobacco, and vegetables. Wild deer are plentiful and afford excellent sport, and there is good tarpon and other fishing.

Warden, H. D. C. Moore.....(and quarters) £250
Redonda is uninhabited.

(a) ST. KITTS-NEVIS WITH ANGUILLA.

The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they have a population (Dec. 31, 1923) of 36,720 and a total area of about 150 square miles. The climate is decidedly healthy for the tropics, the temperature being from 66° to 88° .

St. Kitts (population Dec. 31, 1923, 18,730), the principal island, is the oldest colony in the West Indies; it is situated in lat. $17^{\circ} 18' N.$ and long. $62^{\circ} 42' W.$, and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central range, which rises to a height of 3,711 feet (Mount Misery). Cotton is also grown to a considerable extent. The capital, Basseterre, is a port of registry.

Nevis (pop. 12,899) is separated from St. Kitts by a strait 3 miles wide and has an area of 50 sq. miles. Cotton and coco-nuts are exported, and cattle and vegetables are raised. Its greatest elevation is 3,596 feet. The chief town, Charlestown, is a port of entry.

Anguilla (population 5,102) is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. There are no hills. Salt is the principal product, and small stock are raised.

	1923.	1922.
Public revenue	£114,242	£100,204
Expenditure	116,893	90,001

Surveyor of Pub. Works, C. Garry Thibou 400
Agricultural Superintendent, E. H. Kolsick 400

(3) DOMINICA,

the largest island of the colony, and the loftiest of the Lesser Antilles, is situated between $15^{\circ} 20' - 15^{\circ} 45' N.$ lat. and $61^{\circ} 13' - 61^{\circ} 30' W.$ long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 305 sq. miles,

or 195,000 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 25° to 85° . The cultivation of sugar has been practically replaced by cocoa, limes, coco-nuts, vanilla, and fruit. The population was estimated at 24,103 on Dec. 31, 1923; included in this total are 4,000 Caribs, of whom about 100 are of pure blood. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Administrator, who sits as President, and 6 official and 6 non-official members, 4 of whom are elected, and 2 nominated by the Governor. The principal towns are Roseau, on the south-west coast, population 7,042, and Portsmouth, population 3,069.

	1923-24.	1922-23.

Magistrates, S. E. Mohr, £500; E. P. S. Bell 250
Chief Medical Officer, Hon. Dr. C. N. Griffin £700 to 750

(4) MONTSEERAT

is situated in $16^{\circ} 42' N.$ lat. and $62^{\circ} W.$ long., 26 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of 32½ square miles, with a population (1923) of 12,880. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island is mountainous, the rest well cultivated. A great part of the island was devastated by hurricanes in 1924 and 1928. The chief exports are cotton-seed meal, cotton, cotton-seed oil, onions, limes and its products, tomatoes, and animals of all kinds. The chief town is Plymouth, with a population (1922) of 1,709. There is a wireless station in the island.

	1923-24.	1922-23.

(5) THE VIRGIN ISLANDS.

a group of islands belonging chiefly to Great Britain and the U.S.A., form a connecting link between the Greater and Lesser Antilles. Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27' N. lat. and 64° 40' W. long., Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1921 was 5,082. There is good pasture for cows, sheep, and goats. Sugar cane and coco-nuts are grown; fishing and poultry-rearing are also carried on. The capital of the group is Road Town, on the south-east of Tortola; population (1921), 463.

	1930-31	1931-32
Revenue	£8,707	£5,723
Expenditure	7,027	6,420
Imports	16,360	9,402

Medical Officer, Hon. D. P. Walling

TRINIDAD AND TOBAGO.

Trinidad, the most southerly of the West India Islands, lies close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between 10° 2'—10° 50' N. lat. and 60° 55'—61° 56' W. long., and is about 50 miles in length by 37 in breadth, with an area of 3,862 square miles, and a population at the Census of 1931 (including Tobago) of 422,783, estimated at 429,559, on Dec. 31, 1932. The island was discovered by Columbus in 1498, was colonised in 1598 by the Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 71,492), is one of the finest towns in the West Indies, with sewerage, electric lighting, tram and telephone services. Other towns of importance are San Fernando (pop. 14,590), about 30 miles south of the capital; Princetown (pop. 5,150), and Arima (pop. 5,132). A remarkable phenomenon is the asphalt lake, 120 acres in extent, near the village of La Brea, from which (1932) 52,679 tons of asphalt (£131,652) were exported. The soil of Trinidad is rich and productive, the most important products being sugar, cocoa, molasses, rum, copra, limes, and coco-nuts, and various kinds of timber and fruits. The chief exports (1932) were petroleum £2,382,846; cocoa £707,389; and sugar £845,874. On Dec. 31, 1932, there were 26 companies actively engaged in the production of oil, the royalties payable on oil won from Crown Lands being £50,053. Coal, iron, graphite and gypsum exist in small quantities; and traces of gold have been found in the Northern Range. On Dec. 31, 1932, there were 290 Elementary and Intermediate Schools, 43 being Government and 247 Assisted, Trinidad having 254 and Tobago 36, in addition to 7 colleges for higher education, which also receive a grant-in-aid. There are 218 miles of railway open, and the island is in communication with Tobago and the mainland by telegraph and wireless. The Government is vested in a Governor, an Executive Council, and a Legislative Council of 12 official and 13 unofficial members, 6 of the latter being nominated by the Crown and 7 elected.

	1931.	1932.
Revenue	£1,641,144	£1,694,137
Expenditure	2,605,233	2,698,114
Public debt	3,023,518	3,032,401
Imports	3,917,439	4,695,137
Exports	4,643,959	4,577,111

Tobago lies between 11° 8' and 12° 12' N. lat. and between 60° 30' and 60° 50' W. long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados. The island is 26 miles long, and from 6 to 7½ broad, and has an area of 114 square miles, with a population estimated (1932) at 25,774. It is one of the healthiest of the West Indies; the temperature varies from 81° to 88°. There are two towns in the island, viz., Scarborough (pop. 843) and Plymouth (pop. 397).

Governor of Trinidad and Tobago, His Excellency Sir Alfred Claud Hollis, K.C.M.G., C.B.E. (1930)

Chief Justice, Sir Charles Frederick Belcher, O.B.E., M.A.

Conservator of Forests, R. C. Marshall, M.A.

CAPITAL, Port of Spain (pop. 71,492); transit, 12 to 12 days to U.K.; 5 days to U.S.A.

THE WINDWARD ISLANDS.

The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided

between Grenada and St. Vincent. The total area is 508 square miles, with a population (1921) of 162,254. There is one Governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions, and in the Governor's absence is governed by an Administrator subordinate to him.

Governor and Commander-in-Chief, Sir

Thomas Alexander Vans Best, K.C.M.G.,

K.B.E. (1930) £3,000

Transit to Grenada from London about 14 days.

GRENADA AND THE GRENADINES.

Grenada is situated between the parallels of 12° 30'–12° 58' N. lat. and 61° 20'–61° 35' W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.E.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 85,120 acres; population (including some of the Grenadines), 66,302 (Census of 1921). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1763.

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee and fruit are grown. The forests are rich in tubers. The imports chiefly comprise dry goods, bread-stuffs, hardware &c. The Legislative Council consists of 16 members, 8 of whom are officials, 3 nominated and 5 elected.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

	1930	1931
Public revenue	£141,946	£141,739
Expenditure	168,688	195,182
Public debt	252,800	256,627
Total imports	348,551	269,618
Total exports	356,760	281,260

Colonial Secretary, N. R. R. Blood, M.A.,
(and quarters) £1,000

Chief Justice, R. S. de Vere 1,000

Colonial Treasurer, I. C. Beaubien £450 to 500

Attorney-General, J. H. Jarrett 700

Chief Medical and Health Officer, Maj. H.

E. Sutherland Richards 750

Magistrate, I. G. Wakeley, M.C. S. Dist. ;

H. W. Steele, N. Dist., each £500 ;

V. F. Drayton, District Commr. of

Carriacou (and quarters) £350 to 420

Chief of Police, Maj. E. E. Turner

(and quarters) £450 to 500

The Grenadines are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1921) 7,104.

ST. LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 54' N. lat. and 60° 59' W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 223 square miles with a population (Dec. 31, 1921) of 59,676. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly

changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1931) are sugar, cocoa, coco-nuts, copra, limes, lime-juice, lime-oil, charcoal, bay rum, molasses, syrup, and fruit. The chief places are Castries, the capital (pop. 1921, 5,899), and Soufrière (pop. 1921, 2,480). Port Castries, one of the finest in the W.I., is a coaling depot. In 1931, 268 steamers (tonnage 707,964) entered Port Castries.

	1930	1931.

Chief Justice and Magistrate, First Dis-

trict, T. W. S. Garraway 700

Attorney-General and Registrar, G. N. W.

Boyes 500

Treasurer and Postmaster, H. J. Pink £640 to 650

Chief Medical Officer, (vacant) £600 to 700

ST. VINCENT,

an island about 95 miles west of Barbados, situate in 13° 10' N. lat. and 60° 57' W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (Census of 1931) of 47,961. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, molasses, rum, cassava, cocoa, coffee, and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

CAPITAL, Kings-town. Population (1931), 4,269.

	1930	1931.

Chief Justice and Police Magistrate of

1st District, R. S. Thacker £650 to 700

Attorney-General, (vacant) 500

CAMEROONS.

(Cameroons under British Mandate)

The German Protectorate of Kamerun on the west coast of Africa between (British) Nigeria and French Congo was obtained by conquest by Franco-British forces during the War of 1914–18.

The approximate geographical limits of the German territory were 2°–12° 30' N. lat. and 8° 30'–16° E. long. and the area was about 187,596 square miles. By the Milner-Simon Agreement of July 10, 1919, the whole area was divided into a British sphere and a French sphere, and in 1922 the territories were placed by the League of Nations under British and French Mandates. The Cameroons under British Mandate marches the whole distance of the Nigerian Eastern boundary, save for one short break. The total

area is 34,559 square miles, and the population is 761,611.

The two narrow strips of territory reach from the Atlantic Ocean to Lake Chad, a distance of 700 miles, and lie diagonally between 4° – 12° 30' N. lat. and 8° 30'– 14° 45' E. long. The nature of the country varies to a remarkable extent, from the coastal mangrove swamps and thick forest regions to the grasslands at heights of 4,000 ft. to 7,000 ft. and more, and again to sandy and swampy areas in the region of Dikwa and Lake Chad. The highest point is the peak of the Cameroon Mountain, which rises to a height of 13,350 ft. It is volcanic, but has not been active since 1922.

Cameroons under British mandate is administered as part of Nigeria. The Northern areas are administered by the Residents of the adjoining Provinces of Adamawa, Bornu and Benue; the Southern section forms a separate Province, known as the *Cameroons Province*, with headquarters at Buea on the slopes of the Cameroon Mountain. Cattle breeding and the production of guinea corn are the chief occupations of the population of Dikwa, which consists mainly of Arabs and Kanuri. The inhabitants of the areas which for administrative purposes form part of the Adamawa Province, are mostly primitive hillmen whose chief occupation is agriculture.

Cameroons Province is rich in timber, and the volcanic soil of the lower slopes of the Cameroon Mountain is particularly fertile. The chief exports of the Province are cocoa, palm oil and kernels, rubber and bananas (fresh and dried), the banana industry being recently established with marked success; the chief imports are textiles, salt, iron-ware dried fish and other provisions, motor spirit and tobacco.

The ports are Victoria and Tikou, and are connected with Buea by motor road. 106 ships (139,604 tons) arrived in Victoria in 1932 and 58 ships (51,762 tons) entered Tikou.

	1932.	1931.
Imports	£107,769	£103,462
Exports	155,432	158,294

Exports to U.K.	6,341	10,974

CEYLON.

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 55'– 9° 50' N. lat. and 79° 42'– 82° 53' E. long. Its area is (with outlying islands) 25,332 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles. The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle. The coolest months are December and January; the hottest are April and May.

The population (Census of 1931) was 5,312,548 (including military and shipping), the most important element being the Sinhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. In 1505 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but six years after, in 1802, Ceylon was formed into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his

dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the island are agricultural. The most important for home consumption is rice in its two forms of paddy and husked grain. The principal exports are tea, rubber, products of the coconut palm, plumbago, cacao, cinnamon, citronella oil, cardamoms, areca nuts, and unmanufactured tobacco.

About one-fifth of the island is under cultivation, and the approximate areas in 1932, in acres, were:—Rice, 850,000; other grain, 105,000; tea, 457,000; coconuts, 1,100,000; rubber, 534,000; cinnamon, 26,000; cacao, 34,000; citronella, 33,000; and tobacco, 14,000. The live stock in 1932 included 1,580,000 horned cattle, 57,000 sheep, 204,000 goats, 32,000 pigs, and 1,200 horses. Among the more important native industries are gold, silver, brass, ivory and tortoiseshell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially catseyes, rubies, &c.; and for the pearl fishery in the Gulf of Mannar, off the N.W. of the island. The manufacture of salt is a Government monopoly.

There are 952 miles of railway open, 834 being 5 ft. 6 in. gauge and 117 miles 2 ft. 6 in.; and 839 post offices, 397 money order offices, and 261 telegraph offices, with 13,047 miles of telegraph wire.

The government of Ceylon is administered by a Governor, aided by a *State Council* consisting, at its full strength, of 50 members (elected on a territorial basis) with 8 nominated unofficial members, and 3 Officers of State (Chief Secretary, [†]Legal Secretary and Financial Secretary). The elected and nominated members are divided into 7 Executive Committees: (1) Home Affairs, (2) Agriculture and Lands, (3) Local Administration, (4) Health, (5) Labour, Industry and Commerce, (6) Education and (7) Communications and Works, each with an elected Chairman who is the Minister for the subject dealt with. The Chief Secretary is in charge of External Affairs, Defence and the Public Services; the Legal Secretary and the Financial Secretary in charge of Legal and Financial Affairs. The Officers of State and the Ministers form a Board of Ministers which prepares the Estimates of Revenue and Expenditure in consultation with the Financial Secretary.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities, Urban District Councils, or local boards; and in the country districts the Ceylonese retain their village councils and tribunals for matters of minor importance.

The MALDIVES ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Malé, the seat of government, is about 400 miles

distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Maliala. The islands are unhealthy, and the main exports are dried fish, cowrie shells, coco-nut oil, and tortoiseshell.

Colombo, distant from London (overland) 5,668 miles; transit, 17 days.

THE CHANNEL ISLANDS,

situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the *Dukedom of Normandy* now belonging to England, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres), Guernsey (15,654 acres), and the following dependencies of Guernsey—Alderney (1,962 acres), Brechou (74), Great Sark (1,035), Little Sark (139), Herm (320), Jethou (44), and Lihou (38), a total of 48,083 acres, or 75 square miles. The 1931 Census population of Jersey was 50,455, and of Guernsey, &c., 42,743 (Guernsey 40,585, Alderney 1,251, Sark 571, Herm 53, Jethou 2).

The climate is mild, and the soil exceptionally productive. The land under cultivation in 1932 was 81,847 vergées (2½ vergées = 1 acre), the principal product of the soil of Jersey being potatoes, tomatoes and wheat, and of Guernsey green crops and oats, fruits, tomatoes and flowers. The famous Jersey and Guernsey breeds of cows have earned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents the King-Emperor (the Duke of Normandy). French is the official language of the local legislatures, called the *States*, and of the Royal Court, and is still spoken by the people, but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The islands possess a very large trade, the principal imports being coal and coke, and the chief exports being potatoes, tomatoes, flowers, and stone and granite. The chief town of Jersey is St. Helier, on the south side; the principal town of Guernsey is St. Peter Port, on the east coast.

The trade of the Channel Islands is principally with the United Kingdom.

CYPRUS

is an island in the Mediterranean Sea, between N. lat. $34^{\circ} 33'$ and $35^{\circ} 41'$, and E. long. $32^{\circ} 20'$ and $34^{\circ} 35'$. It is about 40 miles distant from the nearest point of Asia Minor; and 60 miles from Latakia, on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad; from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is 3,584 square miles. The population at the census of 1931 was 347,959, of whom about 18 per cent. were Muhammadans, and the remainder mostly members of the autocephalous Church of Cyprus, which is a branch of the Orthodox Eastern Church. The principal productions are grain of various kinds, sesame, linseed, flax, wine and apricots, silk, olives, locust-beans (carobs), cotton, wool bides, grapes, oranges, pomegranates, asbestos, amiceed, sponges, sumac leaves, terra umbra, gypsum, salt, pyrites, and chrome. In 1932 the wine export was 1,471,822 gals., and that of spirits 5,719 gals., the wine going to Egypt, the U.K., Malta, Syria, and the Dodecanese, and spirits to Egypt, Syria and Castile. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus was formally annexed to the British Empire in 1914. From March 20, 1925, until Nov. 22, 1931, the Government was administered by a Governor, aided by an Executive and Legislative Council, the latter containing 9 official and 15 elected members, but after the disturbances which occurred in the island during the autumn of 1931, the clauses (in the Letters Patent of March, 1925) dealing with the constitution of the Legislative Council were revoked, power to legislate being vested in the Governor pending a review of the constitutional future of the island.

For administrative purposes the island is divided into six districts, in each of which the executive government is represented by a commissioner. For judicial purposes it is divided into three judicial districts. The law courts were reconstituted in 1927, and there are now a supreme court, 3 divisional courts, 3 assize courts, 3 district courts, and also magisterial and assistant district judges' courts. In all the courts Cypriot judges (Christian and Moslem) take part. There are also 3 Mussulman religious tribunals, styled *Shari* Courts, and a *Shari* Tribunal of Appeal.

The capital is Nicosia (Lefkosia), near the centre of the island, with a population of 23,507 in 1931; the other principal towns are Larnaca (population 11,725), Limassol (15,065), Famagusta (8,771), Kyrenia (2,049), Paphos (4,467), and Morphou (4,335).

Important works at Famagusta have rendered the inner harbour accessible to steamers, and there are 37 miles of railway, and 71 miles of motor road services. There is a regular service of steamers between Cyprus and Egypt, Syria, Cilicia, Palestine, Smyrna, Istanbul, Greece, France and Italy.

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between $51^{\circ} 15'$ – $53^{\circ} 3'$ S. lat. and $57^{\circ} 40'$ – $62^{\circ} 15'$ W. long. They consist of East Falkland (area 2,580 sq. miles), West Falkland (2,038 sq. miles), and upwards of 100 small islands

* Exclusive of Grants-in-aid; † exclusive of share of Cyprus of the Turkish Debt charge (£59,800), and of Exp from Grants

(islets, rocks, and sandbanks), comprising in the aggregate 4,628 sq. miles, and a population in 1922 of 2,428. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764; this was subsequently handed over to Spain, but the latter country recognised Great Britain's title to a part at least of the group in 1771. In 1820 the Argentine Republic established a settlement, which was destroyed by the Americans in 1831. In 1833 the islands were again taken possession of by the British for the protection of the seal-fisheries, and colonised, being the most southerly organised colony of the British Empire. On Dec. 8, 1914, a British squadron under Adm. Sir Doreen Sturdee defeated a German squadron (von Speer) off the Falkland Islands. A memorial erected in the harbour of Port Stanley in commemoration of this victory was unveiled on Feb. 26, 1927. The climate is cold, the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65° Fahrenheit. The islands are chiefly bog-land, and have proved suitable for sheep, 625,769 being carried in 1922; the output of wool is about four million lb. annually. The population is mainly British, and is principally engaged in sheep-farming. The chief exports are wool, tallow, hides and sheepskins; seal oil is also produced and exported. The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

The government of the Falkland Islands is vested in a Governor, aided by an Executive Council of 3 official and 2 unofficial members, and a Legislative Council, of 4 official and 2 unofficial members.

CHIEF TOWN, Port Stanley. Population (1922), 2,300.

DEPENDENCIES.—*South Georgia*, an island 800 miles east-south-east of the Falkland Group, with an area of 1,094 square miles, is the only part of the dependencies which is permanently habitable, there being a Resident Magistrate and other officials, and a permanent population (engaged in the whaling industry) at Grytviken Harbour. In the *South Shetlands*, Deception Island contains a harbour at Port Foster, ice-free for about five months in the year, with a land station which arrives and departs with the whaling fleet. The *South Orkneys* also have a seasonal land station, and the Argentine Government have, with the permission of H.M. Government, established a meteorological station, in connexion with a discovery that a cold winter in

the Weddell Sea is a precursor of drought in the maize and cereal area of Argentina $\frac{3}{4}$ years later. The other dependencies, of which the principal units are the *South Sandwich Islands*, and a part of the *Antarctic*, or South Polar, continent known as *Graham's Land*, are even more inhospitable than those already named, being nearly covered with snow and ice and almost completely destitute of plant life. In spite, however, of the climatic and other disadvantages, the revenue derived from all the dependencies in 1922 amounted to £77,283. The local expenditure was £20,144, the surplus (after meeting administrative expenses at Port Stanley) being devoted to local research and development. The trade is considerable. The whaling industry carried out from these dependencies is greater than that of the rest of the world combined. Seven companies (1 British, 5 Norwegian, 1 Argentine) caught 7,301 whales in the 1922 season, the landed value of the oil being £2,354,504. In 1922 only one company operated at South Georgia, and no operations were carried out in the other dependencies: the whales caught numbered 995, and the oil was valued at £5,541,114.

In 1922 a claim was made by Norway to *Thomson* and *Bonnet* Islands in the Antarctic and by Argentina to the *South Orkneys*; these claims were not admitted by the British Government, but *Bouvet Island* was ceded to Norway in November, 1928, as an act of grace.

Port Stanley is distant about 8,130 miles; transit, 26 days from Liverpool. Telegrams by cable and wireless telegraphy *via* Monte Video and *via* Bergen.

FEDERATED MALAY STATES (See MALAYA).

F.I.J.I.

This is a group of 200 to 250 islands (of which some are, however, mere uninhabited islets and rocks) in the South Pacific Ocean, about 1,200 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between 15° 45' 21' 10' S. lat and 176° E.—178° W. long. The gross area of the group is about 7,083 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji) and Vanua Levu (Great Land). The climate is equable and remarkably healthy for Europeans, the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 94°. Vegetation is remarkably luxuriant, the chief products being bread-fruit, bananas, plantains, pea-nuts, yams, and dalo (taro), coco-nuts, sugar-cane, rice, maize, and cotton. The principal exports are sugar, copra, bananas, trocas shell, molasses, maize, fresh fruit and vegetables, and bêche-de-mer. The Governor is appointed by the Crown, and is assisted by an Executive Council consisting of 7 members. Laws are passed by a Legislative Council (of which the Governor is president) containing 13 nominated members, 6 European elected members, 3 native members, and 3 Indian elected members. Native administration is carried on through the chiefs under the Governor's supervision. The

* The total number of whales caught in the world in 1922 was 4,592; in 1921 it was 22,202 (oil production 254,320 barrels); in 1927-8 the catch was 37,094 (oil production 2,799,622 barrels).

* Colony only.

estimated population (Dec. 31, 1932) was 189,398 (94,976 native Fijians, 76,975 Indians, 4,863 Europeans, and some Polynesians and others).

30 days; and via Sydney, about 50 days.

GAMBIA.

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1763 that the river was recognised, by the Treaty of Versailles, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the Island of St. Mary, British Kombo, Albrede, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,134 sq. miles. The

population of the Island of St. Mary, at the Census of April 11, 1932, was 14,370, and that of the Protectorate 185,150. The climate is unhealthy during the rainy season, viz., from June to October; but during the rest of the year it is less unhealthy. The chief export is ground nuts, which form ninety-five per cent. of the total exports; over half of this crop is sent to France, where the oil is extracted and used for the same purpose as olive oil. Palm kernels, hides, and beeswax are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are apparel, cotton goods, flour, kola nuts, oil, rice, soap, spirits, hardware, sugar, tea, wine, and tobacco. A Company of the R. W. A. F. F. (4 officers and 145 non-commissioned officers and men) is stationed in the Colony, and there is an armed police force (numbering 150 officers and men), which performs both civil and military duties. There are 4 Government wireless stations. The Government, which is that of a Crown Colony, is vested in a Governor, assisted by an Executive Council consisting of 4 official members (besides the Governor) and by a Legislative Council of 6 official members and 4 unofficial members, nominated by the Crown.

Bathurst is distant from London 2,600 miles;

transit about 20 days.

GIBRALTAR.

a rocky promontory, 2½ miles in length and ¾ of a mile in breadth, and 1,366 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured

In 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1799-83, when General Elliot, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade, and is becoming a popular tourist centre. During the year 1932 4,091 vessels (including 112 tourist steamers) entered, with a total tonnage of 8,674,558. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer, motor spirit and perfume. There is an enclosed Admiralty harbour with an area of about 440 acres, containing three graving docks. The estimated civilian population (1932) was 16,609.

The Governor is in command of the garrison, and is aided in the administration by an Executive Council of 7 members; there is no Legislative Council.

GOLD COAST.

The Gold Coast Colony, with Ashanti, the Northern Territories and Togoland under British Mandate, is situated on the Gulf of Guinea, between 3° 7' W. long. and 1° 14' E. long., and is bounded on W. by the French Ivory Coast, on E. by Togoland under French Mandate, on N. by the French Sudan, on S. by the sea. It extends about 334 miles along the Coast line and inland to an average distance of 440 miles or to 11° N. lat. The area of the Colony is 23,937 sq. miles, of Ashanti 24,379 sq. miles, of the Northern Territories 30,486 sq. miles, and of Togoland under British Mandate 23,041—a total of 91,843 sq. miles.

The climate of the Gold Coast is on the whole hot and damp, although rather cooler than that of most tropical countries within similar latitudes. By the aid of medical science and sanitation it is becoming less unhealthy. The population (April 1933) was: Gold Coast Colony, 1,621,217; Ashanti, 599,563; Northern Territories, 740,640; Togoland, 306,887; total, 3,268,307, excluding 3,216 Non-Africans. The natives are almost all Pagans, but there are many Muhammadans, and the number of Christians is steadily increasing. The Government assists the missionaries in educational matters and has established many schools of its own, and a college and school at Achumota, 6 miles from Accra, have been built and opened. Great efforts are being made to improve the sanitary condition of the coast towns. Accra, Kumasi, Sekondi (including Takoradi), Koforidua, Winneba and Tamale are lighted by electricity, and there are pipe-borne water supplies at Accra, Sekondi (including Takoradi), Cape Coast, Winneba and Tamale; a similar supply is being installed for Kumasi 4,713 miles of telegraph land wire and 7,840 miles of telephone trunks have been established. Exchanges have been opened in the principal towns and are served by 3,633 miles of underground and overhead line wire. There is a wireless station at Takoradi. A Government railway runs from Sekondi through Tarkwa, the centre of the gold-mining industry, to Kumasi and thence to Accra (362 miles), with branches (500 miles in all). In 1928 a harbour was opened at Takoradi.

The trade in 1932 was principally with the United Kingdom (50 per cent.), U.S. (18), Germany (13), Netherlands (8) and France (2 per cent.). The principal exports in 1932 were: cocoa, £5,511,360; gold and gold dust, £1,336,591; manganese £123,627; and diamonds, £536,925. The chief imports are apparel, building materials, cotton goods, hardware, kerosene, motor spirit, motor cars and motor lorries, beer, ale, stout and porter, provisions, sugar, tobacco and cigarettes.

The seat of government is Accra (population 60,766). The other principal towns are: Cape Coast (17,685), Ada (4,450), Elmina (4,797), Sekondi (16,953), Tarkwa (3,321), Keta (6,405), Axim (4,533), Kumasi (35,829), Saltpond (6,369), Koforidua (10,529) and Winneba (10,990). The government of the Colony is administered by a Governor, aided by a nominated Executive Council. There is a Legislative Council of 15 official and 14 unofficial members, for the Colony, excluding Ashanti and the Northern Territories.

ASHANTI.

Ashanti was placed under British protection on Aug. 27, 1896, and an Order in Council (Sept. 26, 1901), defined the boundaries of Ashanti, annexed it to H.M. Dominions and provided for its administration under the Governor of the Gold Coast Colony, though only some of the laws and ordinances of the Gold Coast Colony apply to the annexed territory. Ashanti is administratively a Chief Commissioner, with an Assistant Chief Commissioner as relieving Officer, and a staff of 14 District and Assistant District Commissioners. The area is 24,379 square miles, with a population (census of 1931) of

578,702 (including 100,000 Africans, 624). Kumasi, the chief town, has about 36,284 inhabitants. In 1932 there were 1,049 children in the Government schools, and 6,618 in the mission schools; 38 students were in residence (1932-33) at the Agricultural and Forestry Training centre. Police force, 4 officers and 258 other ranks; prosecutions (1932-33) 5,595, but there is little serious crime. There are 1,600 miles of motor roads. Agriculture is the staple industry, and 61,587 tons of cocoa were exported in 1932-33. The gold output was 176,072 fine oz. £747,955 at par). In the western parts of the Dependency are rich forests of mahogany, cedar, &c., and trees yielding fruits, oil, rubber and gum copal. On the eastern side the forests are sparser, though timber and oil trees are common and game fairly plentiful; the products there are chiefly maize, yams, cocoyams, bananas, plantains, and ground-nuts.

Chief Commissioner, Maj. F. W. F. Jackson, C.M.G., D.S.O. £1,600

Asst. Chief Commissioner, F. W. Apple

Territories) C. M. Barton 1,200

NORTHERN TERRITORIES.

In 1901 the Northern Territories lying to the north of the parallel of 8° N. lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under British protection. They are administered, under the Governor, by a Chief Commissioner with his headquarters at Tamale. By the census taken in 1931 the population was 177,275. The Muhammadans have substantial mosques; there is a White Father's mission in the north of the Protectorate and an American Protestant mission and a Roman Catholic mission in the Mandated Territory. Government schools have been established at Tamale, Gambaga, Salaga, and Wa. There are 2,128 miles of permanent motorable roads. The Northern Territories are capable of producing various agricultural crops (cereals, shea-butter, ground-nuts, indigo, tobacco), also cattle, sheep and goats, and are said to contain wide auriferous areas.

Chief Commissioner (vacant) £1,600

Assistant Chief Commissioner, E. O. Rake 1,200

Accra is distant from Liverpool, 3,920 miles;

transit, 14 to 30 days.

HONG KONG.

The Crown Colony of Hong Kong consists of a number of islands and of a portion of the mainland, situated off the south-eastern coast of China, at the mouth of the Canton River, in 22° 9' N. lat. and 113° 52'—114° 30' E. long., and bounded on the N. by the Shum Chun River.

Hong Kong is an island about 11 miles long and from 2 to 5 miles broad, with a total area of 32 square miles; it lies close to the mainland, being separated at one point by a narrow strait (Lycemoon) not more than a quarter-mile wide, and was first occupied by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842. British Kowloon was subsequently acquired by the Peking Convention of 1860; and the New Territories, being a peninsula in the southern part of the Kwangtung province, by a lease signed June 9, 1898. The whole colony comprises an area of about 391 square miles with a population for 1932 of 900,796. The non-Chinese residents, excluding naval and military, numbered 19,984.

The capital of the colony is Victoria, which lies along the northern shore of the island, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 10 square miles. With the exception of liquor, tobacco, and motor spirit the port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry. Shipping entered, (1932) 22,051,367 tons; (1933) 21,911,589 tons. A railway, of which 22 3/4 miles belong to the Government, runs from Kowloon to Canton; the length north of the Shun Chun River (which is the boundary of the British territory) is controlled by the Chinese Government. Good roads connect the principal districts with the railway.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 1,809 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The New Territories contain peaks from 1,800 to 3,000 feet. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The average daily maximum temperature ranges from 87° in July to 63° in February, and the average daily minimum temperature from 78° in July to 55° in February. The average annual rainfall is 86 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly camphor, coal, cottons, flour, gunnies, hides, iron and steel goods, leather, matches, oils, rice, silks, sugar, tea and tin.

Much encouragement is given by the Government to education in the colony. In 1932 there were 1,063 schools subject to Government supervision, attended by 70,752 pupils. The University (opened in 1912) includes faculties of medicine, engineering, and arts.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 9 members, together with a Legislative Council of 18 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also a Sanitary Board, partly elected, which controls certain sanitary measures.

THE ISLE OF MAN (MONA),

an island in the Irish Sea, 10 lat. 54° 3' - 54° 25' N. and long. 4° 18' - 4° 47' W., nearly equidistant from England, Scotland, and Ireland. The total land area is 145,225 acres (227 sq. miles), with a population (1931) of 49,308 (22,459 males, 26,849 females). In 1922 the births numbered 632 and the deaths 754. The cultivated area (1932) was 79,749 1/2 acres, and the live stock included 3,553 horses, 20,605 cattle, 102,587 sheep, and 3,733 pigs. The island's main industry is catering for holiday makers (numbering about 500,000 in the year) from all parts of the British Isles.

The land is rich in minerals, lead, iron, blende and slate, and exports large quantities of agricul-

tural produce. Forty-seven miles of railway have been constructed, and about 25 miles of electric tram road.

Government, etc.—In the 9th century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western isles, and Man. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1827 the Crown purchased it for the sum of £427,244.

Man is now governed by a separate Legislature, called the Tynwald, consisting of two branches—the Governor and Council and the House of Keys. The Council consists of the Governor, the Bishop of Sodor and Man, the two Deemsters, the Attorney-General, a members appointed by the Governor, and 4 members appointed by the House of Keys. The House of Keys (possibly from the Scandinavian *ketæ*—chosen) is one of the most ancient legislative assemblies in the world. It consists of 24 members, elected by the adult male and female population, 16 from the six *sheedings*, 2 from Douglas, and 1 each from Castletown, Peel and Ramsey. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. After receiving the Royal Assent, a Bill does not become law unless promulgated within the ensuing twelve months, and on the first "Tynwald Day" (July 2) following it is announced in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys. An annual contribution of £10,000 is made to the Imperial Government. In 1921 Tynwald accepted liability for the redemption of £250,000 War Stock, and in 1927 liability for a further sum of £500,000 of War Stock was accepted in final settlement of all responsibility to the Imperial Government in respect of the cost of the Great War. In the financial year, 1933-34, the Government of the Isle of Man discharged this War liability to H.M. Government from the proceeds of a loan (£530,000) (Isle of Man Government 3½ per cent. 1933-1934 Stock) raised for that purpose, as well as for the purpose of financing in part the cost of extending the Red Pier, Douglas. The chief source of revenue is found in the customs duties, the only direct taxation being income tax, which ranges from 2s. for incomes under £500 to 2s. 2s. for incomes over £5,000. There are 38 elementary and 4 secondary schools in addition to King William's College; the gross expenditure on elementary education in 1932-33 was £71,731 and on higher education £7,475.

CAPITAL, Douglas. Pop. (1932), 19,329 (Castletown is the ancient capital); the other towns are Peel and Ramsey.

(See BRITISH WEST INDIES.)

KENYA.

Kenya Colony and the Kenya Protectorate are situated in Eastern Equatorial Africa. The eastern boundary has been settled by agreement with Italy, to whom the Province of Jubaland (35,812 sq. miles) was ceded by treaty in 1925; and on the north by an agreement with Ethiopia in 1908. On the west the Colony adjoins Uganda, the boundary being determined by an Order in Council in 1906 to include in Kenya an area on the west of Lake Rudolph and north of the River Turkwel, stretching from Mt. Elgon to Mt. Zulia (on the boundary of the Sudan), which was formerly part of the Uganda Protectorate. On the south Kenya adjoins the mandated Tanganyika Territory. Kenya Protectorate also includes the *Witu Protectorate*, a small tract of country at the mouth of the river Tana. The total area is 224,960 sq. miles and the population is estimated at 3,076,343 (Europeans 17,249, Indians 34,966, Gossis 3,369, Arabs 11,752, Africans 3,007,645, and others 1,362).

A great portion of this vast region consists of pasture lands or barren wastes, but there are not lacking extensive districts of great natural fertility in the interior, as well as on the coast. The Colony is divided for administrative purposes into 9 provinces, which are subdivided into districts, those most suitable for settlement by Europeans being Kyamini, North Nyeri, Laikipia, Nakuru, Naivasha, Kericho, Uasin Gishu, and Trans-Nzola. There is also a considerable region still undeveloped.

The telegraph and telephone systems of Kenya have 15,300 miles of wire. Telegraph lines connect Mombasa with Lamu and Witu, Mombasa with Gazi and Tanganyika Border along the coast and inland between Mombasa and Entebbe, the capital of the Uganda Protectorate. There are also extensions to Kahe, Lake Magadi, Machakos, Nyeri, Nanyuki, Meru, Isiolo, Narok, Rumuruti, Kericho, Chemagel, Songhor, Eldama Ravine, Lake Solai, Eldoret, Kitale, Endebess, Kimini, Mobeu and Kakamega. Communication between Mombasa and ships at sea and Italian Somaliland is maintained by radio-telegraphy. A short-wave wireless station (owned and maintained under licence from Government) is established at Nairobi and provides communication between the Colony and Protectorate and Great Britain. Telephone communication exists in the majority of the settled areas of the Colony. The Kenya and Uganda railways and harbours are State-owned; the railway, which is metre gauge, has a total route mileage of open lines 1,627 miles, made up as follows:—*Main Line* (Mombasa—Kampala) 886 miles; *Principal Lines*—Nakuru Junction—Kisumu (131 miles), Tororo—Soroti (100 miles), Voi—Kahia Junction (92 miles); *Minor and Branch Lines*, Rongai—Lake Solai (27), Kisumu—Butere (43), Loeur—Kitale (41), Mbulamuti—Namasagali (17), Kampala—Fort Bell (6), Gilgil—Thomson's Falls (48), Nairobi—Nanyuki (145). The Konza—Lake Magadi Line (25 miles) is worked but not owned by Govern-

ment. In addition, the Administration operates a marine service on Lakes Victoria, Kioga and Albert, and on the River Nile, with a route mileage of 2,064 miles.

Kenya and Uganda are one administrative unit for purposes of customs, and the principal imports are cotton piece goods and manufactures, textiles and textile manufactures, motor cars, parts and accessories, motor spirit, cigarettes, cigars and tobacco, cutlery, hardware, instruments and implements; china and glass ware; motor lorries, parts and accessories, industrial machinery, and wearing apparel. The principal exports are coffee, raw cotton, maize, sisal fibre and sisal tow, hides and skins, carbonate of soda, oil seeds, wheat, ivory, wattle bark and extract, gold, tin ore and butter.

	1931	1932
Revenue	£3,066,930	£3,010,214
Expenditure	3,216,089	3,119,723
Imports (Kenya & Uganda)	5,092,026	4,662,859
Exports (Kenya)	2,343,874	2,280,982
Imports from U.K. (K. & U.)	1,961,652	1,925,347
Exports to U.K. (do.)	1,581,059	1,771,559

NAIROBI, the capital of the Colony, and central station of the Kenya and Uganda railways and harbours, has a non-native population of 23,566, of whom 6,789 are Europeans, and 16,807 Asiatics and other non-natives. The native population of the Nairobi district (including parts of Kiambu and Fort Hall) is 67,131. There are also some 600 European farmers in the immediate neighbourhood of Nairobi. Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa (population 54,894, of whom 1,023 are Europeans).

MALAYA.

British Malaya comprises the Colony of the Straits Settlements, the Federated Malay States of Perak, Selangor, Negri Sembilan, Paliang and the Unfederated Malay States of Johore, Kedah, Kelantan, Trengganu and Perlis. The total area is 51,001 square miles (Straits Settlements 1,531, Federated Malay States 27,450, Unfederated Malay States 21,020) and the total population was estimated (June 1932) to be 4,206,950 of which there were 1,076,564 persons in the Straits Settlements, 1,622,903 in the Federated Malay States and 1,507,513 in the Unfederated Malay States, as compared with populations of 1,114,025 in the Straits Settlements, 1,113,096 in the Federated Malay States and 1,526,604 in the Unfederated Malay States as recorded in the 1931 Census. The decrease was due to the emigration of Chinese, Indian and Japanese labourers owing to depression in the rubber and tin industries. The total European population was estimated at 16,688 persons.

(2) THE STRAITS SETTLEMENTS.

There are 4 Settlements—Singapore (including the Cocos or Keeling Island and Christmas Island); Penang (including Prince Wellesley and the Dindings); Malacca; and Labuan (off the coast of Borneo). These Settlements have an entire area of about 1,531 square miles, with an estimated population (1932) of 1,076,564. The Government consists of a Governor, assisted by an Executive Council of 11 members, and a Legislative Council of 13 official and 13 unofficial members, appointed by the Crown. Of the unofficial members 11 are nominated by the Crown and 2 are selected by the Chambers of Commerce at Singapore and Penang. The law of the colony is the common and statute law of England as it was in 1826, qualified by local ordinances. The Supreme Court consists of the Chief

Justice and 3 puisne judges, and constitutes also a court of appeal (from which there is appeal in certain cases, to the Privy Council). The jurisdiction of the Supreme Court includes that of a Colonial Court of Admiralty. There are also in each Settlement district courts with limited civil and criminal jurisdiction, and the usual police magistrates' and coroners' courts. An ordinance passed in 1931 provided for the establishment of a Court of Criminal Appeal.

Straits Settlements lie well within the tropics very little north of the Equator and there is little variation in the temperature. There are no well marked dry and wet seasons, rain falling throughout the year. The climate of the colony is healthy.

The colony is provided with an excellent road system, the total length of metalled roads being 999 miles, in addition to which 120 miles of gravel road, natural road and hill path are maintained. Most of the roads are capable of carrying heavy traffic. Singapore, Malacca and Province Wellesley have railway communication (Federated Malay States Railways) with the Federated Malay States, the Unfederated Malay States of Johore Kedah, Perlis and Kelantan, and with Bangkok. Communication by sea between the various Settlements is frequent and regular, and Singapore and Penang have regular sea services with every part of the world. There is a weekly air mail service by the Royal Dutch Airways between Batavia and Amsterdam, via Singapore and Alor Star.

The trade of Singapore and Penang is principally in the collection and distribution of commodities for the counties of the Malayan Archipelago. The principal imports in 1932 were areca nuts, cigarettes, coal, copra, cotton piece-goods, fish (dried and salted), machinery, milk (condensed and sterilized), rubber, pepper, petroleum, lubricating oil, rattans, rice, sago, sarongs, sugar and tin ore. The principal exports (including re-exports) in 1932 were areca nuts, petroleum, lubricating oil, copra, cotton piece-goods, cigarettes, fish (dried and salted), milk (condensed and sterilized), pepper, processed pineapples, rice, rattans, rubber, sago, sarongs, sugar and tin.

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, to which it is joined by a causeway across the Straits of Johore, about three-quarters of a mile in width; its length is about 27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 220 square miles, and a population (1932) of 544,118. Singapore was in the 13th and 14th centuries a Malay city of importance till it was destroyed by the Javanese about 1377. It then remained waste till the present Settlement was founded on January 30, 1819, by Sir Stamford Raffles, then Lieut.-Governor of Bencoolen, Sumatra. Singapore remained a dependency of Fort Marlborough, Bencoolen, till 1823, when it was placed directly under the Government of India. The original lease by the Sultan of Johore and the Dato Temenggong, Chief of Singapore, of the site of a factory, in 1819, was followed in 1824 by the cession of the Island in perpetuity, this being accepted by the Dutch in the Treaty of Holland of the same year. The town of Singapore, situated on the south side of the island in lat. 1° 17' N. and long. 103° 50' E., with 433,432 inhabitants in 1932, is the seat of government for all the settlements.

The number of merchant vessels entered and cleared in 1932, exclusive of native craft, was 13,454, with a tonnage of 28,758,538. The total for the whole colony was 20,011, with a tonnage of 43,353,043. The total native craft entered and cleared at all five ports, Singapore, Penang, Malacca, Labuan and Dindings, during the same year was 52,933 (tonnage, 2,016,391). The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, Australia, and Netherlands Indies, and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Govern-

* Including \$20,000,000 from Currency Guarantee Fund.

ment in 1905 at a cost (fixed by arbitration) of \$29,000,000 (£3,300,000). The King's Dock (opened in 1913) is the largest east of Suez, being 899 feet long, 100 feet wide, and 34 feet deep; its cost was \$3,500,000. Singapore is a free port; no duties are levied, but excise is collected upon the release for consumption of opium, tobacco, spirits, wines, malt liquors, and petroleum.

Labuan is an island of the Malayan Archipelago, situated about 6 miles off the north-west coast of Borneo (and 725 miles from Singapore) in 5° 16' N. lat. and 155° 15' E. long. Its area is about 40 square miles and its population is 7,401 (1932). It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time uninhabited and was incorporated in the Straits Settlements in 1907, becoming a separate Settlement in 1912. The island has a good harbour. The principal export is sago. Labuan is a market for much of the produce of the neighbouring coasts of Borneo and the Sulu Archipelago (sago, rice, sugar, cigarettes, para rubber, jelutong, copra, fresh fruit and vegetables, cattle and pigs). Cattle and goats are reared, and about 10,500 acres are under cultivation. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage. There is a cable station of the Eastern Extension Telegraph Company on the island.

Resident, G. S. Rawlings, M.C.S. (acting).

The Cocos-Keeling Islands were declared a British possession in 1857, and in 1878 were placed under the control of the Governor of Ceylon. On Feb. 1, 1886, they were placed under the Governor of the Straits Settlements, and in 1903 they were annexed to the Straits Settlements and incorporated with the Settlement of Singapore. The 20 islands lie between lat. 11° 50' to 12° 45' S. long. 96° 50' E. 700 miles S.W. of Batavia. The largest is 5 miles by ¼ mile. There are large coconut plantations, and copra, oil and nuts are exported. In 1902 a station on the Cape-Australia cable route was established on Direction Island, in the north-eastern part of the group. The population numbers (1931), 1,142.

Christmas Island, in the Indian Ocean, 222 miles S. of Java, and 529 miles E. of the Cocos-Keeling Islands, has an area of about 60 square miles and a population of 1,043 (1932). A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1932 was 84,107 tons.

Penang is the northernmost of the Settlements. It includes Penang or Prince of Wales's Island (pop. 1932, 196,601) on the eastern side of which is George Town, the port and capital, and the strip of mainland opposite, known as Province Wellesley (pop. 1932, 140,333), and the territory of Dindings, west of Perak. Penang Island, about 15 miles long and 9 broad, with an area of 220 square miles, is situated off the west coast of the Malay Peninsula, in lat. 5° 24' N., long. 100° 21' E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kedah. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula.

Province Wellesley is a strip of coast about 45 miles in length with an area of 280 square miles, ceded by the Raja of Kedah in 1800, with some

land S. of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, spices, tapoca, rubber, and coconut plantations.

The Dindings Territory, ceded by the State of Perak in 1874 (area 180 square miles, pop. 1932, 19,346) is at present little developed; but it contains what is considered the best natural port on the western side of the peninsula. The headquarters are at Lumut, where a District Officer is stationed, and steamers call regularly at Pangkor and Lumut. The territory comprises a group of islands (of which Pangkor is the largest), and a strip of the mainland on the west coast of the peninsula, cut out of the State of Perak, and measuring about 22 miles long by about 10 miles in width.

Malacca, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 120 miles to the N.W. of Singapore, comprises an area of about 640 square miles. It is one of the oldest European settlements in the East, having been captured by the Portuguese in 1511, and held by them till 1641, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1818, when it was restored to the Dutch; it finally became a British possession, in pursuance of the treaty with the Netherlands, March 17, 1824, being exchanged for the British settlement of Benoolen in Sumatra. The population in 1932 was 185,650.

(a) THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Peninsula, and are closely connected with the Straits Settlements; they consist of the States of Perak, Selangor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a Chief Secretary to Government, with Residents in each State, subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements. The total area of the Federation is 27,648 square miles, with a population in 1931 of 1,713,006. The principal towns are Kuala Lumpur (Sel.), pop. 111,728; Ipoh (Pk.), 53,863; Taiping (Pk.), 31,881; Kampar (Pk.), 15,302; Seremban (N.S.), 21,650; Klang (Sel.), 20,013; and Teluk Anson (Pk.), 14,672.

The first three States are to the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed by their native rulers under the above-mentioned control. The States are policed by a mixed force of Indians and Malays, officered by Europeans.

There are 1,067 route miles of railway, practically all of which have been constructed from revenue. This mileage includes the Johore State Railway (221 miles), which is leased from the Johore Government. The line is of metre gauge throughout, and extends from Singapore (in the South) to Padang Besar (on the Siamese frontier), where it is connected with the Royal State Railways of Siam, affording direct communication with Bangkok. The journey between Singapore and Penang occupies 22 hours, and that between Penang (Penang) and Bangkok 26 hours (compared with a sea journey of 4 days). The railway runs direct between Singapore Island and the mainland, crossing the Straits of Johore by a cause-

way. At **ROMAN LUTE** is a branch from the main Singapore-Penang line running northwards through Negri Sembilan, Pahang and Kelantan as far as Tunipat. At Sungai Golok this line is connected with the Royal State Railways of Siam. There are 2,246 miles of metalled roads, 123 miles of unmetalled roads, and 1,501 miles of bridle-paths, while the principal rivers are navigable for small boats.

The Federated Malay States contribute largely to the supply of raw materials of the British Empire, and although production of plantation rubber and tin predominates, figures given below show that other products are produced and exported in large quantities. Gold has always been found in small quantities, chiefly in Pahang, and about half a million tons of coal are annually mined in Selangor and used locally. While with the growth of the rubber industry there has been a tendency to neglect some of the older agricultural products, such as indigo, coffee, sugar, pepper, nutmegs and other spices, it has been proved that large areas in the Federated Malay States are suitable for the cultivation of the oil palm, and 19,000 acres have already been planted and nearly 30,000 acres allocated for this cultivation.

Principal exports from the Federated Malay States:—

	1931.	1932.
Para Rubber.....Tons	242,886	234,769
Para Latex.....Galls	168,008	722,276
Tin and Tin Ore.....Tons	51,250	27,081
Copra.....	65,583	74,085

Palm Kernels.....	641	1,072
Gambier.....	222	293
Gold.....Oz.	26,381	25,757

Climate.—Temperature shows little variation throughout the year. The days are sometimes oppressive, owing to the high humidity, the nights are generally cool. The mean maximum shade temperature is about 90° F. inland, and rather lower on the coasts, while the mean minimum is about 72° F. inland and a little higher on the coasts. The average yearly rainfall varies in places from 65 inches to 125 inches. There are no clearly defined wet and dry seasons, but there are well-marked seasonal variations in the rainfall. On the West Coast and inland the months of January, February, June, July and August have considerably less rainfall than the remaining months. The full force of the S.W. monsoon is not felt, owing to the barrier provided by Sumatra, but violent squalls of short duration (known as "Sumatras"), are not infrequent between April and September. On the East coast, during the N.E. monsoon which prevails from November to March, heavy rains and strong winds are experienced, the remainder of the year being comparatively dry.

Kuala Lumpur is distant 8,500 miles from London; transit, 21 days (via Penang).

(3) OTHER STATES.

The Malay States not included in the Federation consist of Johore, Kedah, Perlis, Kelantan, and Trengganu. The relations of Johore with Great Britain are defined in the Treaty of Dec. 21, 1885, as amended by an agreement dated May 12, 1914, whereby the Sultan accepts, and acts upon, the advice of a British officer called the General Adviser. In respect of the other four States, the rights of Suzerainty, protection, administration and control were transferred by Siam to Great Britain by the Anglo-Siam Treaty of March 20, 1909. In all these States the trade is almost entirely carried on with the Straits Settlements. Currency, weights and measures are the same. The religion is Muhammadanism.

JOHORE, with an area of 7,698 square miles and a population (census of 1931) of 505,309, occupies the southern extremity of the Malay Peninsula. In 1895 the Sultan undertook to receive a British Agent having the functions of

* All salaries are exclusive of allowances

a Consular Officer. In 1914, following an agreement of that date, a General Adviser was accepted. The Legislature consists of a Council of State to which European and Asiatic unofficial members are appointed. The judicial system resembles that of the Federated Malay States. Judges of Supreme Court of the Straits Settlements and of the Federated Malay States are *ex officio* Judges of the State of Johore and *vice versa*. Johore is primarily an agricultural country producing, as major crops, rubber, coco-nuts, tapiooca and pineapples. The cultivation of African oil palm is also making progress. Tin ore and iron ore are exported in considerable quantity. The Johore State Railway runs for 120 miles through the middle of the State. There are 835 miles of metalled road.

	1931	1932
Revenue	\$12,102,704	\$12,518,363

Warden of Mines, F. C. Marshall.

Commissioner of Police, E. Bagot.

Superintendent of Surveys, T. Kitching.

Conservator of Forests, T. A. Strong (acting).

KEDAH, between 5° 5' - 6° 35' N., lies on the west coast of the peninsula, and includes the Langkawi group of islands. The population in 1932 was 423,022, and the approximate area 3,150 sq. miles. Rice is the principal crop in North Kedah, while coco- and betel-nut and rubber are cultivated in South Kedah. The capital is Alor Star, 8 miles inland on the Kedah River, with a population of about 19,150. The powers of the Sultan have, owing to illness, been vested in a Regent, who is assisted by a Council. There are 49 British officials, employed in the Public Works, Survey, Police, and Medical departments.

	1931	1932
Revenue	\$5,180,244	\$4,983,345
Expenditure	5,722,757	5,069,402

Sultan, H.H. Sir Abdul Hamid Halimahah, K.C.M.G.

Regent, H.H. Tunku Ibrahim, C.M.G., C.V.O.
British Adviser, J. D. Hall, M.C.S.

PERLIS, the most northerly State, is on the west coast of the Malay Peninsula. The area is about 316 sq. miles, and the population is about 49,300, of whom 40,000 are Malays. The capital is Kangar, a few miles up the Perlis River, but

H.H. the Raja lives at Arau, which is on the main trunk line from Singapore to Bangkok. Rice is the principal crop, and tin ore and rice are the principal exports. The State came under British protection in 1909.

	1931-32 (A.H. 1350)	1932-33 (A.H. 1351)
Revenue	\$407,145	\$513,874
Expenditure	421,546	416,574
Public Debt	<i>nil.</i>	<i>nil.</i>

Raja, H.H. Tuan Syed Alwi, C.B.E., C.M.G.
British Adviser, O. E. Venables, M.C.S.

KELANTAN lies between 4° 35' - 6° 15' N. and 101° 22' - 102° 37' E. on the east coast of the peninsula, with a total length of about 115 miles and a breadth of 60 miles. The total area is 5,713 square miles; population (1931 Census) 352,517. The northern portion is flat and fertile, producing rice, coco-nut and betel-nut and affording pasturage for large quantities of live-stock. Agriculture, fishing, and the production and weaving of silk are the principal industries. The southern and larger portion is in parts mountainous, but a railway (through to Singapore) has been constructed through the flatter part and good land is thus made accessible for planting. There are many rubber estates and the African oil palm is also cultivated. Tin and gold are found. The capital, Kota Bharu, 6 miles from the mouth of the Kelantan River, has a population of 14,843. Kuala Krai is the headquarters of the Southern Administrative District, and Pasir Puteh of the Eastern.

	1931	1932
Revenue	\$1,544,139	\$1,677,983
Expenditure	1,961,124	1,664,051
Public Debt	5,430,684	5,454,255

Sultan, H.H. Sir Ismail, K.C.M.G.
British Adviser, Capt. A. C. Baker, M.C., M.O.S. (acting).

TRENGGANU, between 4° and 5° 55' N. and 102° 15' - 103° 30' E., lies south of Kelantan on the east coast of the peninsula. Area, about 5,000 square miles. Population (1931), 179,664. Industries of agriculture (mainly rice), fishing and fish-curing, silk weaving, shipbuilding, and tin mining. The principal exports are Para rubber, tin ore, dried fish, cotton and silk, sarongs, gambier, areca nuts, copra, iron ore and wolfram. The capital, Trengganu, on the river of that name, contains 13,972 inhabitants.

	1931-32 (A.H. 1350)	1932-33 (A.H. 1351)
Revenue	\$983,675	\$926,922
Expenditure	1,163,693	1,175,584
Public Debt	3,500,000	3,986,485

Sultan, H.H. Sir Suleiman Badrul-alam Shah, K.C.M.G.

British Adviser, G. L. Ham.

MALTA.

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 61½ square miles. The colony includes also the adjoining island of Gozo, with an area of 24½ square miles; COMINO—the site of the *Sultan's* disaster in 1889 and several islets. The civil population of the whole group, on April 24, 1931, was 241,622. In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese language, which is generally spoken by all classes, is of Semitic origin, and is held by some to be derived from the Carthaginian and the Phœnician tongues.

There is a Maltese order of nobility, recognised by the Crown, consisting of 29 families.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Valette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814.

The climate, although not tropical, is very hot in summer. The mean temperature for the summer months in 1930 (June, July, August and September) was 81.7°. In winter the mean temperature was 51.7°. The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage, cummin seed, onions, and potatoes; figs and honey are plentiful. The principal occupation of the people is in connexion with shipping.

Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to 982, but its suburb, Rabat, has 9,050 inhabitants. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet.

Malta possesses a University and Lyceum; 29 elementary and infant schools, 6 central schools, 2 secondary schools, and 60 night schools; in addition there are garrison schools, a Dockyard school, and 49 private schools of which 15 receive grants-in-aid from the Government.

Under the Constitution of 1921 the Legislature consists of a Senate and a Legislative Assembly. The Senate is composed of 17 members, 10 of whom are special members representing the Clergy, the Nobility, the Graduates, the Chamber of Commerce and the Trade Union Council, the other 7 being elected by a special electorate. The Legislative Assembly consists of 32, returned by 8 electoral districts, each represented by 4 members. The method of voting is that of Proportional Representation under the system of the single transferable vote. The Governor is assisted by two Councils—an Executive Council consisting of such of the Ministers as he selects, and a Nominated Council consisting of the Lieutenant-Governor, the Legal Adviser and three officers chosen from the Navy, Army and

Air Force. The Governor may summon these two Councils to sit together as the Privy Council of Malta. When any legislative or administrative act is done which, in the Governor's opinion, affects a reserved matter, he may submit the consideration of it to a Joint Committee consisting of three members of the Nominated Council appointed by himself and three members of the Executive Council appointed by the Head of the Ministry. The Constitution, which was temporarily suspended by an Order in Council (June 26, 1930) empowering the Governor to make laws for the peace, order and good government of Malta, was restored to the island in 1932.

In 1931 the Port of Valletta was entered by 2,322 vessels (tonnage, 3,639,918).

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17' 57' 46" E. long. and S. lat 19° 58' 20' 33', and comprising an area of 720 square miles. The permanent population at the Census of 1931 was 393,428, made up of Indians, Europeans (mainly French), and natives of mixed descent.

Mauritius was discovered between the years 1507 and 1528 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1720 they abandoned the island, and in 1715 the French took possession of it and changed the name to Ile de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name, Mauritius, was restored.

Of the total cultivated area of 170,165 acres, 134,915 are under sugar, 20,000 under fibre, and 15,250 under other crops; the necessities of life have all to be imported from abroad. Rice and grain are obtained from India, flour from Australia and India, oxen from Madagascar, and minor imports from South Africa and elsewhere. 82 per cent. trade of the island is with Great Britain and British Dominions. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe; a cyclone lasted from March 5 to 7, 1930, and did considerable damage to sugar plantations and buildings. There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes entirely through Port Louis. The shipping entered and cleared, in 1932, amounted to 1,115,817 tons. In 1932 there were 144 miles of railway (200 of 4 ft. 6½ in. gauge and 24 of 4 ft. 6 in.), 52 post-offices, 49 telegraph offices and 20 telephone offices

in the island, with 438 miles of telegraph, including block telegraph for the railway, and 230 miles telephone wires (Government).

The Government is administered by a Governor, aided by an Executive Council of four official members, and of such other persons as the Governor, through instructions of the Secretary of State, may from time to time appoint, and a Legislative Council of 27 members, eight being *ex-officio*, nine nominated by the Governor, and 10 elected by a moderate franchise. Port Louis has two members, and each of the country districts one.

The inhabitants of European descent are mostly Roman Catholic. Education has two branches:—(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College and the Associated Schools; (2) *Primary Instruction*, consisting of the Government schools and the grant-in-aid schools. The estimated expenditure on education for 1933-34 is Rs 1,353,497.

DEPENDENCIES OF MAURITIUS.

(1) **RODRIGUES**, 350 miles north-east of Mauritius. Population (Census 1931), 8,202. Area, 40 square miles. Cattle, beans, salt fish, and goats are the principal exports. The island is under the administration of a magistrate from Mauritius, who takes his orders from the Governor of Mauritius.

Magistrate, R. Brouard (acting) Rs. 12,000.

(2) **OTHER DEPENDENCIES**. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coco-nut oil. The most important is Diego Garcia (pop. 1922, 445),

one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and possesses a good harbour. The total population of the "Other Dependencies" (1931) is 1,457.

Transit from London to Mauritius, 30 to 35 days.

NIGERIA.

The Colony and Protectorate of Nigeria includes the territories situated on the Bight of Benin, between Jahomey on the west and the Cameroons on the east. The Protectorate (Headquarters, Lagos) is in two main divisions, the Northern and Southern Provinces, coinciding with the former Protectorates of Northern and Southern Nigeria. The area of the whole territory (including the portion of the Cameroons under British Mandate) is about 378,674 sq. miles, and the population is 19,928,171.

By Order in Council of Nov. 1922 (amended 1928) there is a Legislative Council for the Colony and the Southern Provinces of the Protectorate. The Legislative Council consists of the Governor as President, 27 official members, 3 nominated official members, 3 elected members representing the municipal area of Lagos (Dr. C. C. Adeniyi Jones, Eric O. Moore, and T. A. Doherty), 1 elected member representing Calabar (C. W. Clinton) and 14 nominated unofficial members. The Governor continues to legislate for the Northern Provinces.

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-nuts, kola-nuts, maize, guinea-corn, millet, rice, coffee, yams, cassava, and tobacco. The export trade relies mainly upon certain staple articles of great value, principally palm oil and kernels, ground nuts, cocoa, cotton lint, and tin. The Udi coalfields are of great extent and the coal is of excellent quality. A railway is in operation comprising (1) a Western line from Lagos to Kano (704½ miles), and extension to N'Guru (847½ miles), crossing the Niger by bridge at Jebel, with branches from Minna to Baro (121 miles), from Zaria to the Bauchi tin fields (Joe) (133 miles, light railway); from Zaria to Kaura Namoda (137 miles), and from Ifo to Idogo (27 miles). (2) an Eastern line (569 miles) from Port Harcourt to Kaduna on the Western Railway, crossing the Benue at Makurdi with a branch line connecting from Kafanchan junction (mile 458) with the tinfields (Jos), 62½ miles. Centres of trade are Lagos, Abeokuta, Ibadan, Oshogbo, Ilorin, Zaria, Kano, Onitsha, Ilokoja, Warri, Bonny, Sapele, Calabar, Opobo, Forcados, and Port Harcourt.

The principal imports (1932) were cotton goods (£2,559,788), provisions, spirits, hardware, cutlery, cycles, kerosene, tobacco, building material, soap, motor-cars and lorries, motor spirit, cement and bags and sacks; the principal exports were palm kernels (£2,695,964), palm oil (£1,514,310), tin ore (£1,540,283), cocoa (£1,461,451), ground nuts (£1,073,831), hides and skins (£625,623) and cotton lint. The total imports from the British Empire were £2,603,407 in 1932, and from U.S.A. £548,105.

	1931-32	1932-33
Revenue	£4,857,612	£4,984,505

Chief Inspector of Mines (vacant) 1,300

Port Engineer, Lagos Harbour Works, Major J. E. Bostock, O.B.E., M.I.C.E. 1,400

Chief Veterinary Officer, Capt. W. W. Henderson 1,300

Transit to Lagos from Liverpool, 14 to 15 days.

Cable communication to Lagos. Inland telegraphs to all important places.

NYASALAND PROTECTORATE.

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the western shore of Lake Nyasa and the country southwards nearly to the Zambezi. The population of the Protectorate (Dec. 31, 1932) was 1,609,915, including 1,901 Europeans and 1,283 Asiatics, and it has a total land area of 37,596 square miles.

The principal exports are tobacco, cotton, chillies, coffee, ground-nuts, fibre, and tea. The cultivation and export of tobacco is considerable; tea, cotton and fibre are also exported in fair quantities. The principal imports are soft goods, provisions, and hardware. On Lake Nyasa there are three steamers. A railway from Port Herald (the "inland port" of the Protectorate) to Blantyre (123 miles) is open for traffic. An extension from Port Herald to Chindio (the terminus of the Central Africa Railway) on the Zambezi (61 miles) was opened in 1925. The Trans-Zambezi Railway, from Beira to Muraça (on the southern bank of the Zambezi

River) was opened in April, 1922; the terminus is opposite to Chindio, and the line (174 miles) thus establishes direct railway communication between Beira and Blantyre; a bridge across the Zambezi is under construction. A further extension to Lake Nyasa is under construction. Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 3,142. A road from Salisbury to Blantyre *via* Tete (Portuguese E. Africa) is open and is freely used during the dry season.

Mails to and from England are despatched every week *via* Cape Town and Beira and also *via* Imperial Airways Line from Salisbury. Between Beira and Europe the means of communication are the Union-Castle Mail S.S. Co., Messrs. Remile's Line *via* Natal, the British India Steam Navigation Co., and other lines. The Protectorate is connected by telegraph overland with the Cape *via* Salisbury. The telegraph lines extend northwards as far as Tukuyu, in Tanganyika. There are full-sized aerodromes at Chikela (11 miles from Blantyre), Zomba and Lilongwe, and landing-grounds have been prepared at most district headquarters.

The chief towns are Blantyre (population about 666 Europeans and 73,000 natives), Limbe (near Blantyre), and Zomba, the headquarters of the Government.

PACIFIC ISLANDS.

High Commissioner, His Excellency Sir

A. G. M. Fletcher, K.C.M.G., C.B.E. ... £1,200

(In addition to £3,000 as Governor of Fiji, and allowance of £150 as Consul-General for Western Pacific.)

Secretary to High Commissioner, H. H. Vassess (House Allowance £75) £700 to 800

Chief Judicial Commissioner, Capt. M. H. Maxwell-Anderson, C.B.E., K.C., R.N. (ret.) 400

(In addition to £1,200 as C.J. of Fiji)

(1) **The British Solomon Islands, protected since 1893, consist of Guadalcanal, Malaita, San Cristoval, New Georgia, Choiseul, Yasabel, and other islands situated east of New Guinea, with a total area of about 15,000 square miles, and a population (1931) of 478 Europeans, 173 Asiatics, and 93,415 natives. The Santa Cruz Group and several other islands were incorporated in the Protectorate in 1898 and 1899; and in 1900 Choiseul and Yasabel, with the islands in Bougainville Straits and Lord Howe's Group, were transferred by treaty from Germany. The revenue in 1930-31 was £64,728, and the expenditure £67,816; exports 1930-31 £304,310; imports, £215,269. The seat of government is Tulagi.**

Resident Commissioner, Francis Noel Ashley

(and £150 allowance) £1,200 to £1,400

Secretary to Govt., N. S. B. Kidson £500 to £600

(2) **The Gilbert and Ellice Islands, formerly a Protectorate, were formally annexed to the Empire in November, 1915. The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° W. longitude, consists of 16 islands, with several small islands or islets depending upon them; and the Ellice Group, between 0° S. and 10° S. latitude and 176° E. and 179° 58' W. longitude, consists of nine islands. Ocean Island (or Paanopa), in lat. 0° 52' S. and long. 169° 35' E., which is the seat of government, was proclaimed British in 1900. Total area, 180 square miles; population (1931) 266 Europeans, 730 Asiatics (698 on Ocean Island), and 32,813 Pacific Islanders. Revenue (1929-30), £67,105; expenditure, £50,324; imports (1929-30), £148,779; exports, £213,328.**

Fanning Island, in lat. 3° 30' N., long. 159° 13' W., and Washington Island, 66 miles N.W. by W. of Fanning Island. Pop., 37 Europeans, chiefly in connexion with Pacific cable station, and 390 Gilbert Islanders in copra industry. The islands were included in the Gilbert and Ellice Colony by an Order in Council of Jan. 27, 1916, and Christmas Island was included in 1919.

Resident Commissioner (vacant).

(and £100 allowance) £800 to £1,000

(3) **The Tonga or Friendly Islands.—A protectorate over the Tonga Islands Kingdom was proclaimed May 18, 1900. These islands are situated in the Southern Pacific to the E.N.E. of Fiji, and 390 miles therefrom, with an area of 385 square miles, and population (1932) of 412 Europeans, 357 half-castes, 28,381 Tongans, and 264 others—total 29,454. The limits of the group are between 15° and 23° 30' S. and 172° and 177° W. Nukualofa, on the island of Tongatabu, is the seat of government. The present Queen Salote succeeded the late King George Tupou II. in 1928. Soil generally is fertile; the principal export is copra. Two of the smaller islands disappeared, owing to a tidal wave, in June, 1929. Revenue 1931-32, £57,224;**

expenditure, £63,986; imports (1932), £86,006; exports, £96,163. The total shipping entered and cleared in 1932 was 124,908 tons. *Agent and Consul*, J. S. Neill, B.A., B.L.

(and duty allowance £200) £800 to £1,000
(4) *The Phoenix Islands* (McKean, Gardner Birnie, Hull, Enderbury, Phoenix, Canton, and Sidney), between 8° 30' and 4° 30' S. and 171° and 174° W.

(5) *Pitcairn Island*, situate in lat. 25° 3' 30" S., long. 130° 8' 30" W. Pop. (1931), 200, descendants of the mutineers of H.M.S. *Bounty*. *Chief Magistrate*, Richard Edgar Christian.

(6) *The New Hebrides Group*, situated between the 13th and 21st degrees of South latitude and the 166th and 170th degrees of East longitude, of an area of roughly 5,700 square miles, are administered by a British-French Condominium Government in accordance with the provisions of the Anglo-French Convention of 1906, later modified by the Anglo-French Protocol of 1914. The executive consists of a British and a French Resident Commissioner assisted by a staff of officers. The population is estimated at 43,000 (British Nationals 270, French Nationals 868, French Protected Subjects (Tonkinese, &c.) 1855, Natives, estimated at 40,000). Principal products, copra, coffee, cotton, cocon, maize, wool, sandalwood and shell. Joint revenue, 1932, £10,021; expenditure, £19,802. Total imports, 1932, £81,587; total exports, £78,601. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia; there is a two-monthly service with France, via Panama. *British High Commissioner*, Sir A. G. M. Fletcher, K.C.M.G., C.B.E.

French High Commissioner, M. Sialons.
British Resident Commissioner, G. A. Joy.
(Albionville £100) £800 to £1,000
French Resident Comm., M. Santot.
President of Joint Court, Count de Buena Esperanza, K.C.M.G.
British Judge, A. de J. Carey.
French Judge, M. Sachon.

(7) There are also a large number of scattered groups and isolated islands.

PALESTINE.

Palestine, extending from the Mediterranean on W. to an eastern boundary formed by the Wady Arabah, Dead Sea, River Jordan and Sea of Tiberias, and from the Egyptian frontier on S. to the French Mandatory Sphere of the Great Lebanon on N., includes, in addition, a large area E. of the Jordan and S. of the Yarmuk.

Palestine has been under British administration since the conquest of the country by the forces of General Allenby in 1917. The Administration is conducted under a Mandate from the League of Nations which entered officially into force on Sept. 29, 1923. The country consists of a W. maritime lowland, the mountain region of Judea (which forms the backbone of the district) and, on the E., the depression through which the Jordan winds its way from the Sea of Galilee (Tiberias) to the Dead Sea. The *Dead Sea*, 1,392 feet below the level of the Mediterranean, is 46 miles long and has an average width of 8½ miles; it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. Its water is intensely salt and has a specific gravity one-sixth greater than water, with 24 per cent. of salt. (The Great Salt Lake of Utah, U.S.A., is 80 miles long and 30 miles wide, at 4,218 feet

above mean sea-level, and contains 25 per cent. of salt.) The area of Palestine W. of the Jordan is about 10,000 square miles, with a population (census Nov. 18, 1931), of 1,035,821, of whom 759,712 are Moslems, 174,610 Jews, 91,398 Christians, and 10,101 members of other faiths. The population of Beduin in the Beersheba sub-district enumerated at the same date was 50,907; they are included in the total population assigned to Moslems. Since Sept. 1, 1920, about 118,500 immigrants (mostly Jews) have been recorded as having entered Palestine. In 1931, 5,533 immigrants were registered (4,075 Jews, 1,245 Christians, 211 Moslems and 2 Druzes). The Jewish immigrants came principally from Poland (41 per cent.), Russia (9 per cent.), Roumania (8 per cent.), the United States of America (6 per cent.), and the Yemen (5 per cent.); 34 per cent. of the Christian immigrants came from Great Britain. During the same year 1,346 persons are recorded to have emigrated from Palestine (666 Jews, 573 Christians and 107 Moslems); 35 per cent. of the emigrants left for America, North and South.

Palestine is divided into 3 administrative districts, under District Commissioners. English, Arabic and Hebrew are the official languages of the country. The chief town, *Jerusalem*, had been in Moslem hands since 1244, and under Turkish rule since 1517, until it surrendered to General Allenby on Dec. 9, 1917, to be entered the next day by British troops. The city, which occupies so prominent a place in the affections of the Jewish, Christian and Moslem peoples, had a population in Nov., 1931, of 90,503 (51,222 Jews, 19,894 Moslems, 19,335 Christians and 201 other religions). The Church of the Holy Sepulchre at Jerusalem is visited annually by large bands of Christian pilgrims, principally of the Orthodox and Coptic churches. The site of Solomon's Temple is occupied by the Dome of the Rock, sometimes erroneously called the Mosque of Omar, which contains a relic of Mahomet and the "Holy Rock," the sacrificial altar of Abraham. A conflict of claims, Jewish and Arab, as to rights at the *Wailing Wall* of the Haram al-Sharif at Jerusalem has provided opportunities for disorder, and the Government submitted proposals to the Council of the League of Nations for a Commission to define and determine the rights and claims. In Jan., 1930, the Council appointed a Commission, as requested by the British Government. *Bethlehem*, the scene of Christ's Nativity, 5 miles S. of Jerusalem, had a population of 6,817 in Nov., 1931. The Church of the Nativity, at the E. end of the present village, is reputed to be the oldest Christian church in existence. King David was also born in Bethlehem. *Nazareth*, about 25 miles S.W. of the Sea of Galilee, had a population of 8,756 in 1931. Other large towns are Jaffa (51,866), Tel-Aviv (46,101), Gaza (17,046), Acre (7,897), and Haifa (50,403). An archaeological museum, constructed, equipped and endowed at the cost of Mr. John D. Rockefeller, Jr., is in course of erection at Jerusalem.

The railway system of Palestine consists of five sections: *Rafa-Haifa*, continuing southward to Kantara to join up with the railways of Egypt, passengers and freight being transported across the Suez Canal at Kantara; *Haifa-Acre-Samakh*, continuing beyond Samakh to Damascus in the French mandated territory of Syria; *Jaffa-Lydda-Jerusalem*; and *Nablus-Afula-Tulkarem*. The main junction of the Govern-

ment Railways is at Lydda, the general offices being at Haifa. In 1933 the kilometrage operated (excluding 112 kilometres Ma'an-Mudawara section) was 977 kilometres, the freight handled amounting to 589,565 tons, and the passengers carried numbering 1,235,494. The gross railway revenue was £P554,711 and the working expenses £P425,064.

The chief ports are Haifa, Jaffa and Acre. Harbour construction at Haifa was begun in 1929 and completed in Oct., 1933, the main part of the harbour being dredged to a depth of 37 ft. and a depth of 30 ft. provided alongside the main quay. In 1932, 2,943 vessels (2,058,305 tons) engaged in foreign trade entered the ports, and 2,914 (2,033,814 tons) cleared. There are branches of Barclay's Bank, Anglo-Palestine, Banco di Roma, and Ottoman Bank in the main towns.

The country is generally fertile, and cereals, vegetables, tobacco, olives, grapes, oranges and various fruits are produced, factories producing wine, soap, oil, cigarettes, fruit juice, &c., are being established on a large scale to meet local requirements and for export. Economic conditions depend chiefly on agricultural produce and immigration, but progress is being made in the manufacture of cement, hosiery, weaving apparel, furniture, mineral salts, fancy leather goods, shoes, motor-bus bodies, bedsteads, artificial teeth, &c.

In 1932-33 there were 305 Government (Arab) schools with 24,837 Moslem and Christian pupils, 157 private Moslem schools with 9,196 pupils, 151 private Christian schools with 17,183 pupils (besides a number of Latin and Greek Catholic schools concerning which no figures are available), and 367 public and private Jewish schools with 34,456 pupils. Public examinations up to B.A. standard are conducted by the Palestine Board of Higher Studies. There are also training colleges for teachers, technical, trade, law and agricultural schools, and a Hebrew University (with faculties of Humanities and Science).

TRANSJORDAN.

Emir, H. H. Abdullah, G.B.E., K.C.M.G., born 1882, second son of King Hussein of Hejaz, appointed April, 1921.

Transjordan consists of the 4 Districts of Maan, Kerak, Balqa, and Ajlun, and is under the same mandate as Palestine. It is bounded on the west by Palestine, on the north by Syria, on the east by Iraq, and on the south by Hejaz and Nejd, and has access to the Red Sea at Akaba. No census has yet been taken, but it is estimated that the total population is 300,000, of whom 130,000 are settled, 120,000 semi-nomads, and 50,000 nomads; the great majority are Moslems. The area is unknown, as the boundaries are not definitely determined. The extreme west of the country is fertile, and agricultural and pastoral industries are carried on, but the rest of the country is almost entirely desert. The Hejaz Railway runs (with the exception of the first few miles) through Transjordan territory from Deraa to Kalaat el Mudawwara, where it enters Hejaz territory and continues to Medina. There is a Legislative Council of 6 official and 26 elected members, constituted in 1929.

RHODESIA, SOUTHERN.

Southern Rhodesia is that part of the territory named after Cecil Rhodes lying south of the Zambezi River, its political neighbours being Northern Rhodesia and Portuguese East Africa on the N.; the Transvaal and Bechuanaland on the S. and W.; and Portuguese East Africa on the E. The total area is 150,344 square miles, and the population (1933) 1,200,000, of whom 52,000 are Europeans. The native population is 1,444,000, with 4,300 Asiatics and other coloured persons, including those of mixed race. The total number of European births in 1932

was 1,266 (a rate of 22s per 1,000) and of deaths 485 (9s per 1,000), the marriages numbering 525 (20s 3d per 1,000). Responsible Government was instituted in Southern Rhodesia on Oct. 1, 1923. The Government is administered by a Governor appointed by the Crown, with an Executive responsible to the Legislature, which consists of a Legislative Assembly, but that body may pass a law constituting a Legislative Council, in addition.

The laws in force in the Cape Colony up to June 10, 1891, were adopted for Southern Rhodesia so far as they were applicable. Subsequent legislation has been by proclamation of the High Commissioner and by ordinances passed by the Legislative Council up to the grant of responsible government in Sept. 1923; since then much consolidation and codifying legislation has been incorporated in the Acts of the Legislature. Municipal self-government has been established in Salisbury, Bulawayo, Gwelo, Umtali, and Gatooma.

The main arteries of communication are the Rhodesia and the Mashonaland Railways, the total mileage of which at Sept. 30, 1933, was 2,681 miles (including 1,360 miles operated within the boundaries of Southern Rhodesia). The former is a continuation of the line from Cape Town to Vryburg, and Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,362 miles. A line connecting Bulawayo with Salisbury (302 miles) was completed in Oct. 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and is continued by the Beira Railway Company to the port of Beira (Portuguese), a total distance of 374 miles. The main northern extension of the railway was constructed from Bulawayo. It takes the Wankie coalfields and crosses the Zambezi at the Victoria Falls (222 miles). Branch lines primarily constructed in the interests of established mines are:—Salisbury-Sinola (83 miles), Mt. Hampden Junction-Shanva (72 miles), Gwelo-Selukwe (24 miles), Bulawayo-West Nicholson (104 miles), Gwelo-Umuvum-Victoria (123 miles), and Sonabula-Shabeni (62 miles). There is also a short branch line, Bulawayo-Matopos. To provide facilities for the transport of passengers and goods in areas in process of development not directly served by existing railways, a system of road motor services has been organised, and is operated by the Rhodesia Railways. In September, 1933, routes covering 1,505 miles were in operation.

Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient gold-workers. The first regular crushing returns began in September, 1898, and the gold produced to December 31, 1932, was of the value of £50,738,242. The output for the year ended December 31, 1932, was valued at £3,266,212. Silver, copper, coal, diamonds, lead, chrome iron, asbestos, mica, platinum, corundum, and other minerals have also been produced in considerable quantities. Though the climate is sub-tropical, the average altitude makes it well suited for European occupation, and it possesses all the essential characteristics and

* When Responsible Government was granted to the Colony in 1923 the Crown recognised the British South Africa Company as the owner of the mineral rights throughout both Southern and Northern Rhodesia. After a long controversy the mineral rights in Southern Rhodesia were purchased by the Government in 1933 for the sum of £2,000,000.

facilities necessary for successful agriculture and cattle raising, and for the cultivation of European fruit trees, cereals, and vegetables, in addition to tobacco, cotton, and the indigenous products of the country. The staple crop is maize, and tobacco, cotton and citrus fruits are largely exported. The total area under cultivation in 1932 was 432,932 acres (maize 252,947, tobacco 25,354, cotton 3,486). The export of citrus fruit in 1932 was 151,657 boxes. Cattle (2,747,485 on Dec. 31, 1932) thrive well. Dairy products sold include butter 1,223,312 lb., milk 1,273,651 gallons, cheese 224,483 lb., and eggs 809,881 dozen. In addition to the main industries of mining and farming there are creameries, cotton ginneries, bacon factories, oil, soap and candle factories, cement and lime works, and many other undertakings.

The British South Africa Company has relinquished all rights and interests in the land in Southern Rhodesia except in the estates which it was already developing and working on July 10, 1933. Considerable efforts have been made by the Government during recent years to increase the number of new settlers on the land, which is cheap, and may be had on very favourable terms. These efforts were particularly effective during the years 1925-27, and with the passing of the present depression it is anticipated that a further extension of successful land settlement will materialise in the near future.

Complete courses of primary and secondary education up to the standard of matriculation of the South African Universities are provided in the Government schools. For European children there are 22 Government and Government-aided schools (7 vocational, 12 secondary and 3 primary). For children in rural areas, where the population is too scanty for a school, very successful correspondence classes have been inaugurated to supplement the aided government schools. The total number of European children in all types of schools at the end of 1932 was 9,522. There are seven schools for children of mixed race, with 828 pupils, and native education conducted by mission agencies with Government aid is provided in 1,323 schools, with 103,867 pupils. Grants in aid of native education in 1931-32 amounted to £50,093, the total educational (other than native) expenditure being £258,282 in the calendar year 1932.

SALISBURY, the capital, is situated on the Mashonaland plateau, altitude 4,880 ft. (total population, census 1931, 28,800, including 9,637 whites). **BULAWAYO**, the largest town in Matabeleland, altitude 4,460 ft. (total population of 31,000, including 11,818 whites). Other centres are Umtali, Gwelo, Gatooma, Que Que, Wankie, Fort Victoria, Selukwe, and Hartley.

RHODESIA, NORTHERN.

Northern Rhodesia lies to the North of the Zambezi, its neighbours being Tanganyika Territory and the Belgian Congo on the north, Nyasaland and Portuguese East Africa on the east, Southern Rhodesia and South-West Africa on the south, and Portuguese West Africa on the west. The country comprises an area of 268,400 square miles, and with the exception of the Luangwa, Zambezi and Kafue Valleys, consists of a tableland varying from 3,000 to 4,500 feet, with greater altitudes in N.E., and especially in the vicinity of Lake Tanganyika. The estimated European population in December, 1933, was 10,553; the native population was estimated (Dec. 31, 1933) at 1,328,705. Much of the country is suitable for farming, and contains large areas of good arable and grazing land. Over 2,500,000 acres of land are under settlement by white farmers. The chief crop grown is maize. Other crops are tobacco, coffee, wheat, oil seeds, and citrus. Stock raising is carried on by many farmers. The native-owned cattle in the territory is estimated at 378,205 and European-owned 99,144. Copper, zinc, vanadium, lead, gold, mica and coal have been discovered, and scientific prospecting is being carried on over large areas. The copper deposits have attracted much capital, the Roan Antelope and the Nkana mines having commenced output, while others are expected to follow. The copper mines of Northern Rhodesia appear likely to produce a large proportion of the world's supply, while zinc and vanadium production are on a considerable scale. Many species of game are to be found, and good sport at a moderate cost is available for the big-game hunter, but the areas now open for hunting are somewhat restricted. The trunk line of the Rhodesia Railway system traverses Northern Rhodesia from Livingstone to the Belgian Congo border. The Zambezi, Kafue, Chambesi and other rivers are navigable for a considerable portion of their courses. There are 43 post offices, 17 of which are money order offices. The main telegraph and telephone route lies alongside the railway from Victoria Falls Bridge to the Congo border, with branches from Ndola to Luanshya, Ndola to Nkana, and from Nkana to Mufilira; Fort Jameson is connected with the Nyasaland system, and Kasama and Abercorn with the Nyasaland and Tanganyika systems. Aeronautical wireless stations at Mpika and Broken Hill are equipped for communication with air-

craft in flight (900 metres wave length) as well as for point-to-point communication on short wave. Short wave equipment has been installed at Fort Jameson, Livingstone and Mongu-Lealui. All wireless stations maintain a public service.

The administration of the territory is in the hands of a Governor appointed by the Crown, assisted by an Executive Council of five official members. There is a Legislative Council of 16 members, with a majority of official members. The seat of Government is at Livingstone, near the Victoria Falls, on the Zambezi. The country is divided into 5 Provinces for fiscal and administrative purposes. The most important centres are Livingstone, Broken Hill, Fort Jameson, Lusaka, Mazibuka, Abercorn, Kasama, Fort Rosebery, Ndola, Luanshya, Nkana and Mongu-Lealui.

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 555 miles S. of the Equator, 700 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15° 55' S. lat. and 5° 45' W. long. It is 10½ miles long, 6½ broad, and encloses an area of 49 square miles, with a population (Census 1931) of 3,995. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines.

Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator Juan de Nova Castella, on May 21, 1502 (St. Helena's Day), and remained unknown to other European nations until 1588. It remained uninhabited until the Dutch colonised it *circa* 1645. The English East India Company seized it in 1651; but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch and was held by the Company, who had obtained a charter for its possession from Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for the Emperor Napoleon, who died there May 5, 1821), when it was ceded by them to the Crown. It was formerly an important station on the route to India, but its prosperity decreased after the cutting of the Suez Canal. A phormium (flax fibre) and lace-making industry has been established. St. James's Bay, on the north-west of the island, possesses a good anchorage.

Ascension (Resident Magistrate, E. A. Willmott), an isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,800 feet, situated $7^{\circ} 55' 55''$ S. lat. and $14^{\circ} 25' 5''$ W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is $7\frac{1}{2}$ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and, being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it; in 1931 the population was about 150. The island was administered by the Board of Admiralty until Oct. 27, 1922, when by Royal Letters Patent it became a Dependency of St. Helena and was transferred to the Colonial Office. Georgetown, the capital, is situated in a small bay on the N.W. coast. Ascension is visited by the sea-turtle from January to May, which lay their eggs in the sand; the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month.

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of 6 members, the Governor alone making all ordinances.

Sarawak Government Agent in England, F. R. Boulton. Offices, Millbank House, Westminster, S.W.2.

Sarawak is a state on the north-west coast of the island of Borneo, with a seaboard of about 500 miles, an area of about 50,000 square miles, and a population of about 475,000, composed of various races. The territory of the Raja of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of British North Borneo. The southern boundary is formed by three ranges, the Serang, Kelinggang, and Batang-Lupar mountains; the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 100 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (23 miles). The government consists of a hereditary sovereign and a Supreme Council of 9 (4 Europeans and 5 Malay magistrates), and a General Council of 50, composed of European and Malay officials and native chiefs, meeting every 3 years. The civil service is composed of English officials to the number of 110, appointed by the sovereign. The government of Sarawak was obtained in 1842 from the Sultan of Brunei by the late Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions have been made in 1861, 1882, 1884, and 1890, when the Limbang River was obtained. The Lawas River was added in 1905. In 1864 Great Britain recognized Sarawak as an independent state, and under an agreement of 1888 the State

has been placed under British protection. The country produces sago, gutta-percha, India-rubber, bees-wax, illipe nuts, birds'-nests, oil, gold, silver, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper. The large petroleum field at Miri and Iwakong, in the Baram district, is now a valuable asset; oil exports (1928) 568,389 tons; (1929), 734,454 tons; (1930) 645,399 tons; (1931) \$510,879 tons; (1932) 520,004 tons.

	1931.	1932.
Revenue	\$4,324,909	\$4,210,558
Expenditure	5,466,366	4,277,278
Imports	10,385,056	9,698,808
Exports	17,414,672	13,573,872

CHIEF TOWN, Kuching. Population (1931), 25,000. Distance from London, 8,700 miles; transit, 25 to 30 days. There are 16 wireless stations, in communication with Singapore. Steamer leaves Singapore for Kuching and Kuching for Singapore every Saturday. There is also direct communication with Sibn and Miri.

SEYCHELLES.

The Seychelles Islands, in the Indian Ocean, which number altogether 92, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1810. By letters patent of Sept. 1903 they were erected into a separate colony. The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependences, is estimated at 156½ square miles, of which Mahé occupies nearly 56 square miles; the most important of the dependences are the Amrautes, Farquhar Islands, Coetvry, Astore, and the Aldabra Group. The population was estimated (Dec. 31, 1932) at 28,235. At the census of 1931 the population of Mahé was 21,977, Praslin 2,476, La Digue, 1,225, other islands 1,736. Victoria, the capital, on the N.E. side of Mahé, has an excellent harbour, and the lighthouses in the vicinity have been fitted up with modern automatic lights. Although only 2° 8' of the Equator the islands are healthy, the death-rate in 1932 being 22.86 per 1,000. There are 27 Roman Catholic and Church of England primary schools; there are also 2 secondary schools.

The principal exports are copra, vanilla, coconuts, coconut oil, tortoise-shell, cinnamon, essential oils, soap, and guano. Aldabra, one of the dependences of the Seychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double coco-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 4 members (2 *ex-officio* and 2 nominated official and 2 unofficial), and by a Legislative Council of 3 official and 3 unofficial members.

SIERRA LEONE.

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony has a coast-line of 210 miles, with an estimated area of 4,000 square miles, and a population (1931) of 56,422, of whom 420 were resident Europeans. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes; a babel of tongues is thus to be heard in the streets of Freetown. The total area of the Colony and Protectorate is about 28,000 sq. miles, and the total population about 1,770,000. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 210 miles, lying between 7° and 10° N. lat., and the extreme breadth from east to west is 208 miles, between 10° 15' and 13° 16' of W. long. Its estimated area is 24,000 sq. miles, and its population about 1,672,626. For administrative purposes the Protectorate is divided into 2 Provinces, under Provincial Commissioners, assisted by 2 Senior District Commissioners, and 28 District and Assistant District Commissioners. The principal peoples are the Limbas and Korankos in the north, the Tennes in the centre, and the Mendis in the south.

The principal exports are palm kernels, kola nuts, palm oil, and ginger; piassava, hides, and rice are also exported. The value of the palm kernels exported in 1931 reached £449,742. The chief imports are cotton goods, coal, apparel, hardware, provisions, and tobacco. Freetown, the capital, possesses the finest and most important harbour in West Africa.

A railway runs inland from Freetown to Pendembu, a distance of 227½ miles, and a branch line 83 miles in length extends in a north-easterly direction from Bauya to Makeni. Motor roads are now being opened up in the Colony and Protectorate, in the Colony connecting the various towns and villages with the port, and in the Protectorate as feeder roads to the railway. There are (1932) 1,925 miles of combined telegraph and telephone service.

Sierra Leone is a Crown Colony, possessing a Legislative Council partly elected and partly

nominated by the Crown, with full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council.

SOMALILAND.

(The Somaliland Protectorate.)

Somaliland occupies the "North-Eastern Horn" of the African continent, jutting out into the Indian Ocean along the south of the Gulf of Aden, and is divided between Great Britain, France and Italy, while the interior is subject to Ethiopia. The British Protectorate, declared in 1884, contains about 68,000 sq. miles, its boundaries being defined by treaties with Ethiopia, France and Italy; the northern coast as far as 49° E., and the 8th parallel of N. latitude are the limits on the north and south. The population, mainly consisting of Somalis, a Muhammadan people, is estimated at 344,700. The Protectorate garrison is now confined to a Camel Corps, 400 strong, and a Police force of 550, the Dorvish power having been finally broken in 1920. The chief products of British Somaliland are cattle, sheep, goats, hides, skins and gum. There is wireless communication with Aden. The Protectorate was transferred to the administration of the Colonial Office on April 1, 1905.

SOUTH AFRICAN HIGH COMMISSION.

High Commissioner for South Africa, His Excellency Sir H. J. Stanley, O.C.M.G.	£5,000
Private Secretary & A.D.C., Capt. L. Holbech, D.S.J., M.C.	
Administrative Secretary, Shirley Eales, C.B.E.	1,200
Chief Clerk, H. L. Smith, O.B.E.	750
Auditor, T. A. Williams	1,100

The Office of High Commissioner in and for South Africa was created by Letters Patent in 1878. In 1879 a second High Commissioner was appointed, to whom was assigned South-Eastern Africa, including Zululand and Amatongaland; but this arrangement ceased in 1881, when a Special Commissioner for Zulu affairs was appointed, who was also Governor of Natal (which now includes Zululand and Amatongaland). The High Commissioner for South Africa, who, under the Commission of 1880, was the officer for the time being administering the Government of the Cape, now represents the Crown in all matters occurring in South Africa beyond the limits of the Union and of Southern and Northern Rhodesia. The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate and of Swaziland. Prior to October 1, 1923, Southern Rhodesia was administered by the British South Africa Company, and the High Commissioner exercised certain powers of control under the Southern Rhodesia Order in Council 1898. Upon the establishment of responsible government the Order in Council 1898 lapsed, but under the Southern Rhodesia Constitution Letters Patent certain of the High Commissioner's previous powers and functions in regard to native administration were reserved to him and the Southern Rhodesia Order in Council, 1920, whereby the Native Reserves were vested in the High Commissioner, was continued in full force and effect. On April 1, 1924, the functions which the High Commissioner had exercised in Northern Rhodesia during the British South Africa Company's administration of that Territory were, with the assumption of the administration by the Crown, transferred to the Governor of Northern Rhodesia.

The Office of High Commissioner, which was formerly held by the Governor of Cape Colony, was, by a Commission dated October 6, 1900, vested in Lord Milner, and by a similar Commission, dated March 25, 1905, in Lord Selborne.

During the years 1920-1930 the Office was vested, by separate Commission, in the successive Governors-General of the Union of South Africa. This arrangement ceased upon the termination of the period of office of Major-General the Earl of Athlone, K.G. Sir Herbert Stanley, C.O.M.G., was then appointed by His Majesty to be High Commissioner for South Africa, and he holds that office concurrently with the office of High Commissioner in the Union of South Africa for His Majesty's Government in the United Kingdom.

BASUTOLAND.

(The Territory of Basutoland.)

Basutoland is an inland Native Territory of South Africa, bounded North and West by Orange Free State, East by Natal, and South by Cape Colony, with an area of 11,716 square miles. The Census of 1921 showed 495,937 natives and 1,603 whites, 1,069 coloured and 172 Asiatics.

The territory is well watered, and enjoys a good climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear immense herds of cattle, sheep and goats, the mohair produced being of excellent quality. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged. Basutoland has been called "The Switzerland of South Africa" and contains amongst its natural wonders the *Maletengue Falls* (650 feet).

The Territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The final court of appeal in the Territory is the Resident Commissioner's Court, appeal from which lies direct to the Privy Council. The revenue is derived from Customs, native tax, income tax on Europeans, post-office, and licences. Telegraph offices have been opened at Buthe Buthe, Leribe, Peka, Teyateyaneng, Maseru, Morija, Mafeteng, Molele's Hoek, Quthing and Qacha's Nek. There are 591 native schools, with an average attendance (1923) of 44,359, a large proportion being in the schools of the French Protestant Mission; there are also 9 white schools. The education vote for 1923-24 was £45,310. The chief articles of export are wool and mohair, cattle and hides, the imports being chiefly blankets, groceries and hardware.

BECHUANALAND.

(The Bechuanaland Protectorate.)

The Bechuanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambesi.

The Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north and north-east by Southern Rhodesia, the Zambesi and Chobe (Linyanti) Rivers, and on the west by South-West Africa. It is about 500 miles long and 550 miles broad, with a total area of about 275,000 square miles; the *Caprivi Zippel* was attached to the Protectorate for administrative purposes by Proclamation (1922), but was retransferred to S.W. Africa, Sept. 1, 1929. The population at the Census of May, 1921, was 152,983, of whom 1,743 were Whites, 52 Indians, 1,003 coloured and 150,185 Natives.

The climate is healthy during part of the year. Malarial fever is prevalent during February, March, and April, but with ordinary precautions is not seriously detrimental to health. The country is essentially pastoral, although Kaffir corn, mealies, beans, pumpkins and melons are sown, and when the rainfall is adequate crops are reaped. Cattle thrive, and numbered 456,344 at the Census of 1921. Much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Tsekeledi, Regent during the minority of Serotse (Bamangwato), of Moleli Pilane (Bakgatla), of Kuri Schelle (Bakwena), of Bathoen (Bangwaketse), of Seboko Mokgisi (Bamatote), and of Momanaburu (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Province through from Mafeking, via Gaberone and Francistown, to Bulawayo and Salisbury. The chief European centres are Lobatse, Gaberone, Francistown, and Serowe, whither the late Chief (Khama) and all his people moved in 1921 from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Province.

SWAZILAND.

(The Swaziland Protectorate.)

Swaziland (called by the natives *Kwa Nqwane*) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and Portuguese East Africa. The total area is 6,705 square miles, and the population (1921) 112,951, of whom 2,205 are whites, the remainder being Ama-Swazi Bantus (or Swazis). Estimated European population (1932) 2,725. Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet; the Middle Veld, about 2,000 feet lower; and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. The country is well watered and healthy, the annual rainfall averaging 55 inches, the mean temperature being 62° Fahr. (30°-90°). The soil is generally fertile, particularly so in the Low and Middle Veld. The whole of the Territory forms excellent grazing for cattle, and cattle-ranching on a large scale has been commenced by several companies. There were about 346,772 head of cattle in the Territory at the end of 1932. In the winter season sheep are brought to Swaziland for grazing from the high table-lands of the Eastern Transvaal.

The agricultural products are, maize (the staple product), tobacco, millet, ground-nuts, beans, pumpkins, and sweet potatoes. Cotton growing from jassid resistant seed is becoming important. The country possesses considerable mineral wealth, including gold, tin, coal, copper and asbestos. During the year ended Dec. 31, 1932, 84 tons of cassiterite in value at £11,497 were exported.

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. There are townships in the districts at Bremersdorp, Hlatikulu, Stogi and Goedgegun. There are schools for Europeans at various centres.

There is a daily South African Railway motor omnibus service between Breyten and Mbabane (89 miles); Bremersdorp and Stogi (43 miles); Piet Retief and Hlatikulu (57 miles); and Goedgegun to Hlati (33 miles). There are post offices, and telegraph and telephone offices at all the chief centres.

	1931-32	1932-33
Revenue	£84,907	£84,931
Expenditure	113,069	112,556

STRAITS SETTLEMENTS.

(See MALAYA.)

THE SUDAN.

The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 30' N. lat., and reaches from the French Sahara about 19° 20' E. (at 22° N.) to the north-west boundary of Eritrea (Italian) in 38° 35' E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 1,200 miles. The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea, Eritrea and Abyssinia; on the south lie Kenya Colony, the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial Africa.

The estimated area is about 1,008,100 sq. miles, with a population of about 5,600,000, partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 3,000 Europeans. The Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally pagans. The *Gambella enclave* (within the boundaries of Abyssinia) is leased from the Abyssinian Government as a trading post. The Nile enters at Nimmule, in Mongalla Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. From the Athara confluence to the Mediterranean the river has a course of close on 1,726 miles, and from its sources to the confluence its length may be reckoned at 1,810 miles, giving a total water-way of 3,536 miles. Between Khartoum and Wadi Halfa occur five of the six *Cataracts*, the remaining (first) cataract being in Egypt at Assuan.

Government.—The Sudan is administered by a Governor-General, aided, since 1920, by a Council nominated from amongst the Officials of the Government. All Ordinances and Laws are made by the Governor-General in Council. No duties may be levied on imports from Egypt, and duties on imports *enit* the Red Sea ports may not exceed those levied in Egypt. The Sudan is divided into 14 provinces (*Mudriyas*) under governors (*Mudirs*). Each province is subdivided into districts with one (or more) District Commissioners in charge of each. Native administrative officials are employed under the District Commissioners. *Civil Justice* is administered by a Chief Justice and four puisne Judges, one of whom is also Registrar-General of Lands. There are also Province and District Judges who are usually the Governors and District Commissioners of Provinces, but there are also District Judges who are professional lawyers in some of the more important centres. Appeals lie from the District Judges to the Province Judges or the High Court, and from the Province Judges and the High Court to the Court of Appeal, which consists of three Judges of the High Court. The system of the law administered is "justice, equity and good conscience" in all cases in which there is no special enactment.

There is no general code of civil and commercial law such as is in force in Egypt and many Continental countries. The religious law of Islam is administered by the Mohammedan Law Courts in matters of inheritance, marriage, divorce, and family relations generally amongst the Moslem population. There are District and Province Courts under District and Province Kadis, and a High (Mahkama) Court at Khartoum presided over by the Grand Kadi. *Criminal Justice* is administered chiefly by the Governors and District Commissioners and Mamours of Provinces and Districts, all of whom are magistrates. The Judges of the High Court and District Judges also have criminal jurisdiction as magistrates. The more serious offences are tried by courts consisting of three magistrates, and many native notables have been made magistrates for the purpose of sitting as members of such courts. The decisions of such courts require confirmation by the Governor of the Province or the Governor-General, who exercise powers similar to those of confirming officers in Courts Martial, and to them also appeals lie. Courts of Sheiks or Chiefs in all parts of the country have varying powers of limited jurisdiction in accordance with native customs. The Sudan is garrisoned by native troops, forming the Sudan Defence Force. A small garrison of British troops is quartered at Khartoum. The *Police* are locally enlisted and are under Provincial administration.

Education.—In addition to *khatwas* there are 87 *kuttabs* (vernacular schools) attended by 8,943 pupils, and 10 *primary schools*, where instruction is given in English as well as Arabic, attended by about 970 pupils; a *secondary school* at Khartoum (Gordon College), a *teachers' training school* and *technical or trade schools*, at Omdurman, and Atbara. There are also 22 *elementary vernacular schools for girls*, and a *training college for girls' teachers*.

Production.—The principal grain crop is *dura* (great millet), which is the staple food of the people in the Sudan, and is also used as cattle and poultry food elsewhere. Egyptian cotton has been successfully established, and increasing quantities are being produced annually. The *Gezira Irrigation Scheme* at present (1933) enables an area of 682,000 acres to be cultivated between the Blue and White Niles and one-quarter will be under cotton in the 1933-34 season. The necessary water is stored by the Sennar Dam on the Blue Nile, about 170 miles south of Khartoum. Cotton cultivation in the irrigated area is managed by a syndicate, and is one of the largest cotton-growing schemes in the world (194,975 feddans in 1932). The Sudan is the chief source of the world's supply of gum arabic. Natural salt fields on the Red Sea coast near Port Sudan supply the whole needs of the country and maintain an export trade with Abyssinia. Work has been commenced on a new scheme for the further expansion of salt production on a large scale in this area. Other products include sesame, senna leaves and pods, ground-nuts, dates, chillies, lulu nuts, hides and skins, and gold.

Communications.—The railways and steamers throughout the country are administered by a Government department. During the past few years nearly 500 miles of new railways have been built, while other transport has been revolutionised by the opening up of a net-work of motor roads spreading all over the country

during the dry season. In 1932 there were 1,989 miles of railways open for traffic. The gauge is 3 ft. 6 in. Since the opening of the eastern railway the Red Sea port of Port Sudan receives much of the trade which formerly passed northwards. A line from Sennar Town, crossing the Sennar Dam, was completed during 1929, and affords an alternative route (498 miles) for produce of the Southern provinces to Haiya Junction, 126 miles W. of Port Sudan. There are over 3,000 miles of the various reaches of the river Nile and its tributaries under navigation by a fleet of shallow draught steamers and barges. Three of these routes are only practicable in the flood season, June to September, but communication with the Kenya and Uganda Railways is maintained throughout the year by means of a motor service over the Juba-Nimule road, which connects with the regular fortnightly sailings of the Sudan Nile Service and the Uganda Lake Albert Service. Frequent services are also provided by private enterprise over the Juba-Aba Road, connecting with the road system of the Belgian Congo. During the dry season (December to March) private enterprises also operate motor car services between Juba and Kampala (600 miles) and Juba and Nairobi (800 miles). In the interior of the country there are other dry season motor roads. All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telegraph lines being 5,737 miles in 1928. There are 80 stationary and 16 travelling Post and Telegraph offices, and 10 wireless telegraphy offices.

Finance.—The revenue is derived mainly from land tax, annual tax, royalties on gum and ivory, customs and railways, posts, telegraphs and steamboat services.

	1931	1932
Revenue	£44,398,618	£43,853,798
Expenditure	4,398,618	3,853,798
Total Exports.....	1,733,795	3,797,548
Total Imports	3,761,013	3,054,828
Imports from U.K.	1,164,485	692,623
Exports to U.K. ...	781,327	2,067,099

The principal export is cotton, the value of which, together with cotton-seed, amounted to £645,449 or 37½ per cent. of the value of the total exports. Gum arabic, £602,753. Other exports are: sesame, cattle, hides and skins, dates, ground-nuts, don-nuts, salt, senna, chillies, lulu nuts, ivory and gold.

Governor-General, His Excellency Sir George Stewart Symes, K.C.M.G., K.B.E., D.S.O. (1933)

CAPITAL, KHARTOUM, at the junction of the White and Blue Niles. The town contains a large mosque for Mohammedans, a cathedral, and the Gordon College, with extensive Government buildings. Population 55,318. Opposite Khartoum, on the Blue Nile, is Khartoum North (33,412), and on the White Nile is Umdurman (104,454), the former Mahdist capital.

TANGANYIKA TERRITORY.

TANGANYIKA TERRITORY has a coast-line of about 500 miles and an estimated area of 373,500 square miles. The coast-line extends from the mouth of the Umba to the mouth of the Rovuma River.

The native population consists mostly of tribes of mixed Bantu race. In 1932, the native population of Tanganyika Territory was estimated at 4,933,179. The total white population is about 8,150. According to German law every native born after 1905 is free, but a mild serfdom was continued under German rule. Legislation for the abolition of the status of slavery was enacted on June 9, 1922.

The amount allocated to education in 1932 was £100,393, further sums being contributed by native administrations. In 1932 there were 90 Government schools for Africans, with 7,002 children in average attendance, and 3,345 Mission schools with average attendance of 107,439 pupils. Two schools are maintained by the Government for the education of European children, one a day school at Dar-es-Salaam, and the other a boarding school at Ngare Nairobi, in the Northern Province. Assistance is given to 3 kindergarten schools at Tabora, Dodoma and Tanga; to 3 Dutch schools in the Arusha district; to 2 Roman Catholic schools in Dar-es-Salaam and Tabora; to 4 German schools in Northern Tanga and Iringa Provinces, and to 1 Greek school at Kibosho. There were 47 Indian schools (3,193 pupils), of which 45 are in receipt of financial assistance. The Government publishes a monthly journal printed in Swahili to disseminate news and useful information among the vernacular speaking population.

The total area under forests is about 4,096 square miles, of which 3,978 square miles are included in the Government Forest Reserves, 55 square miles await reservation, and about 63 square miles are privately owned. Non-native plantations are mainly for the production of sisal fibre and coffee, with small areas under tea and tobacco, minor crops being cotton, maize and coconuts. Native production consists chiefly of coffee, bananas, cotton, ground-nuts, rice, millet, maize, cassava and pulses.

In 1932 there were 533,641 cattle, 2,281,405 sheep and 3,374,989 goats in the Territory. The value of minerals produced in 1932 was—gold £149,854, salt £33,788, mica £3,808, and tin £6,893.

The chief exports are sisal, cotton, coffee, ground-nuts, hides, skins, copra, g. alu, sisimbi, bees-wax, ghee, diamonds and gold; the chief imports being cotton piece goods, iron and steel manufactures, foodstuffs, machinery, building materials, kerosene and motor spirit, sugar, rice, spirits and cigarettes.

	1930-31.	1931-32
Revenue	£1,747,478	£1,522,368
Expenditure	2,102,507	1,820,928
	1932.	1931.
Imports	£2,495,596	£1,871,598
Exports	1,290,722	1,190,216

The following units of the King's African Rifles are stationed in the Territory:—The Headquarters of the Southern Brigade, the Brigade Signal Section, the Brigade Supply and Transport Corps, the 1st and 6th Bus. and a company of the 1st Bn., totalling about 1,000 native soldiers and 35 European officers. There is a Police Force of 1,240 of all ranks.

The chief seaports are Dar-es-Salaam, Tanga, Lindi, Mikindani, and Kilwa, all of which are accessible to ocean-going vessels. In 1932, 437 steamers (exclusive of coastal boats) of 1,041,545 tons, and 2,229 dhows of 50,789 tons entered and cleared at the various

ports from places beyond the Territory. There are two railways of metre gauge in the Territory. The Tanga Railway from Tanga to Arusha via Moshi (77½ miles). The Kenya and Uganda Railways connect with this railway at Kahe Junction. The Central Railway from Dar-es-Salaam to Kigoma (77½ miles), with a branch line from Manyoni (36½ miles) to Kiung'iri (94 miles) and Singida, and a branch line from Tabora (52½ miles) to Mwanza (126 miles) on Lake Victoria. Steamers run on Lakes Victoria, Nyasa and Tanganyika. Dar-es-Salaam is in telegraphic communication with many inland centres, and with the adjoining territories Nyasaland, Kenya, Uganda and Northern Rhodesia. Mbeya, Dodoma and Moshi are ports of call for Imperial Airways Mail Service. London to Capetown. There are 135 post-offices and postal agencies (705 of which have telegraphic facilities), and 140 telegraphic offices. Telephone exchanges are established and trunk-telephone communication is in operation between 30 inland centres, and also with Mombasa.

TOGOLAND.

(Joint Franco-British Administration.)

The total area is about 43,040 square miles, with an estimated population of 920,000. The British sphere consists of an area of about 13,041 sq. miles with a population estimated (1931) at 293,714, including 43 Non-Africans. The mandated sphere adjoins the eastern frontier of the Gold Coast and is administered as part of it.

TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat. 37° 6' S. and long. 12° 1' W., discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. The main island is about 2,000 miles W. of the Cape of Good Hope, 4,000 miles N.E. of Cape Horn, and about 1,500 miles S.W. of St. Helena. It was the resort of British and American sealers from the middle of the 18th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale Island. On August 14, 1815, the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha, but this force was withdrawn after a few months. Corporal William Glass (died 1853) remaining at his own request, with his wife and two children. This party with two masons imported for the purpose of housing the garrison, formed the present settlement. In 1825 five coloured women from St. Helena, and afterwards others from Cape Colony, joined the party. The inhabitants are of mixed blood, but the British strain is predominant. In 1826 many of the able-bodied men were drowned through the upsetting of a boat, and in 1826 a grant of stores and provisions was made by Parliament. In 1827 the inhabitants numbered 127 and in 1933 the number was 163; they are stated to be very long-lived. The principal settlement (Edinburgh) is in a fertile tract in the north-west of the island, its name being in honour of a visit from the Duke of Edinburgh in 1867. The inhabitants raise crops and possess cattle, sheep and pigs.

From the death of Corporal Glass until 1933 the oldest inhabitant acted as Governor; in 1933, a council of four was set up (with one of its members as chairman), the chairman, or chief, acting as island spokesman and conducting marriages in the absence of a chaplain. There is also a women's council for matters affecting women and children. Communication with the outside world is infrequent and the occasional visits of steamers are the only opportunities afforded to the inhabitants for the replenishment of comforts. In spite of periods of distress the inhabitants refuse to leave the island for the Cape of Good Hope, to which they are attracted by offers of land.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and ¾ m. wide, and rises in two peaks, 950 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are

little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

GOUGH ISLAND (or **Diego Alvarez**), in $40^{\circ} 20' S.$ and $6^{\circ} 44' W.$, lies about 250 miles S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

THE UGANDA PROTECTORATE.

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East Africa Company. In 1894 a British Protectorate was declared over the kingdom of Uganda and some of the adjoining territories. The present limits are approximately as follows:—On the north, the Uganda-Sudan boundary; on the east, a line drawn from Mt. Zulia, on the Sudan boundary, along the Turkana escarpment over the top of Mt. Elgon, and along the west boundary of the Colony of Kenya and the eastern shores of Lake Victoria; on the south, by Tanganyika Territory (late German East Africa); and on the west, by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Sudan commences. Total area, 94,204 square miles, including 13,616 square miles of water.

For administrative purposes, the Protectorate is divided into 4 Provinces:—

(1) *Eastern Province*, comprising the districts of Busoga, Bugwere, Bugishu, Budama, Teso, and Karamoja.

(2) *Northern Province*, comprising the districts of Bunyoro, Gulu, Chua, Lango, and West Nile.

(3) *Western Province*, comprising the districts of Toro, Ankole, and Kigezi.

(4) *Buganda Province* (with islands in Lake Victoria) comprising the districts of Mengo, Masaka, Mubende, and Entebbe. Owing to sleeping sickness, the islands of Lake Victoria were entirely depopulated, and the inhabitants (about 20,000) settled on the mainland in fly-free districts, but the work of repopulating these islands was undertaken and completed in 1921 and 1922, and natives and their cattle have been repatriated.

The whole Protectorate is under direct administration; but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of *Buganda* is recognised as a native kingdom under a *Kabaka* (H.H. Sir David Chwa, K.C.M.G., grandson of the celebrated Mutesa). He is assisted in the government by three native ministers and a *Lukiko*, or native Council, and each county and district chief also has his *Lukiko* to assist him in local government and in the administration of justice. In Buganda (and in *Bunyoro*, *Ankole* and *Toro*, also ruled over by paramount chiefs, as well as in most of the other parts of the Protectorate more directly administered), purely native matters are dealt with by the various *Lukikos*, but in serious cases there is an appeal to British courts. For Europeans

and non-natives justice is administered by His Majesty's Courts. The principal British representative is the Governor, who (with the assistance of the Executive and Legislative Councils) makes Ordinances for the administration of justice, the raising of revenue, and other purposes. There are local British courts of justice, and a High Court with civil and criminal jurisdiction. The Appeal Court consists of the Judges of the High Courts of Kenya, Uganda, Nyasaland, Zanzibar, and Tanganyika Territory. There is an armed constabulary force, under a British Commissioner of Police and British officers. There is also a battalion of the King's African Rifles stationed in the Protectorate.

The total population of Uganda (Census of May 1931) is given as 3,553,534, composed as follows: Natives, 3,536,267; Asiatics, 14,750; Europeans, 2,001, and others, 1,526. At first educational work was entirely in the hands of the various Missionary Societies, who still receive grants towards scholarships, &c., for students and teachers; their efforts have for some years been supplemented by Government, which has also established a University College for natives at Makerere, Kampala. About 2,000,000 natives speak Bantu languages, the most important of which is Luganda, the language of the Baganda tribe, after whom the Protectorate is named. Swahili is also widely spoken. There are a few pygmies living near the Semliki river and the Mufumbiro mountains; the rest of the natives belong to the Nilotic, Hamitic and Sudanese groups.

	1930	1931
Revenue ...	£1,412,242	£1,399,913
Poll-tax ...	522,972	516,808
Customs ...	324,763	304,128
Expenditure (incl. loans) ...	2,040,394	1,451,564
Total Exports ...	2,060,453	1,978,262
Special Imports ...	1,614,164	1,308,786

The Customs Services are now merged in those of Kenya (*q.v.*). The export trade is mainly in cotton (£1,503,307 in 1931), coffee, chillies, oil-seeds, rubber, ivory, tin ore and hides and skins. The trade is chiefly with Great Britain, the United States, and India.

Nile steamers ply to Juba, which is connected by a motor road with Nimule, the Sudan port of the Kenya and Uganda Railway Marine Service on the Albert Nile and Lake Albert. Passengers are transported between these two places by the Sudan Government Railways motor service. A regular steamer service is maintained by the *Kenya and Uganda Railway Administration* on Lake Kioga, between Masindi Port and Namasagali, the terminus of the Busoga railway; and on Lake Victoria between Kisumu and Entebbe and Port Bell and the other Uganda ports. The Lake Albert Marine, which has already been mentioned, provides a weekly service on the Nile between Butiaba and Nimule during the season (Oct.-Feb.), and a fortnightly service on Lake Albert between Butiaba and the Belgian port of Kaseyi. The Railway Administration therefore provides a through service from Jinja and Kisumu to the Sudan and the Belgian Congo. The *Busoga Railway*, from Jinja (on Lake Victoria) to Namasagali, a point on the Nile below the rapids, which was completed in 1922, has recently been merged in the main line of the K. & U. Ry., which now runs from Kampala *via* Eldoret to Nakuru, where it joins the old line to the coast. The continuation of this main line to Kampala has now been com-

pleted, and a further extension from Tororo Junction to Soroti *via* Mhale was opened in 1929. There is a railway from Port Bell to Kampala, 7½ miles in length. There is a fleet of Government motor vans, and there are aeroplane landing grounds at Entebbe, Tororo and Jinja. Good all-weather motor-roads connect the principal administrative centres. Hotels exist at Kampala, Jinja, Tororo, Masindi, Fort Portal and Masaka.

The unit of currency is the shilling, and the lower coinage is on a cental basis.

In 1920 Executive and Legislative Councils were constituted, and these came into being in Jan., 1921. The former consists of 6 appointed members and the latter includes the former, with the addition of unofficial members, and is presided over by the Governor. The headquarters of the British administration is at ENTebbe; the chief commercial centres are Kampala (Buganda) and Jinja (Eastern Province).

Governor and Commander-in-Chief, His Excellency Sir Bernard Henry Dillon, K.B.E., C.M.G. (1932) (and £1,500 duty) £3,500

ZANZIBAR.

(The Zanzibar Protectorate.)

Sultan, H. H. Seyyid Sir Khalifa bin Harub, K.C.M.G., K.B.E., born Aug. 26, 1879; succeeded Dec. 9, 1911.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tughli Bay and north as War-shelkh; but since the cession of the coast-line

from Ruvuma to Vanga, including the island of Mafia, to Germany in 1890, and of the Benadi and Kismayu coasts to Italy in 1904 and 1904 respectively, they are now confined to the islands of Zanzibar and Pemba, a coastal strip from Vanga to Ras Kiamboni (Dick's Head), the islands of Lamu, Mandi, Patta, and Sini. The Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander-in-Chief in the Kenya Colony and Protectorate (*q.v.*). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

The population of Zanzibar and Pemba (Census of 1931) was 235,428, the area of the former being 640 square miles, and of the latter 380 square miles.

As the centre of the Arab power, Zanzibar, from the beginning of the 15th century until quite recently, dominated the trade of East Africa. The islands possess practically a monopoly in cloves (the export of which was valued at Rs. 64,95,558 in 1932) and produce quantities of copra (exports in 1932, Rs. 19,12,421). In addition, Zanzibar serves as a storehouse for the East African coast, where both imports and exports are received and distributed. Of late years its importance as a port of transhipment and distributing centre has decreased, owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the Benadir coast. Recent figures, however, tend to indicate that the island will continue, from the very fact of its geographical position, to retain control of the local traffic—of that portion of the trade which goes to small towns up and down the adjacent mainland coast. There are 241 miles of roads throughout the Protectorate suitable for motor traffic.

The principal imports are rice, grain, groceries, sugar, tobacco, copra, petroleum and piece-goods; the exports are cloves and copra, in addition to re-exports of previously imported rice, grain, copra and piece-goods.

The city of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. Tonnage of ocean-going steamers which entered the port in 1932, 2,393,911, and 3,369 dhows (64,107 tons). Zanzibar provides the best water supply on the East Coast of Africa, and it is much in demand for shipping supplies.

* In 1930 a separate classification was provided for Mexicans who, up to that date, had been counted with the white population. The number of Mexicans reported in 1930 (1,422,533) is included for that year in the figure for "Other races," and its inclusion accounts for most of the increase between 1920 and 1930. It is estimated that the 1920 figure for the white population included 700,541 persons who would have been counted as Mexicans in 1930. If these are deducted from the 1920 total, there is obtained what might be termed an adjusted figure, 94,120,374, which is more closely comparable with the 1930 figure for the white population.

BIRTHS AND DEATHS.

The annual compilation of mortality statistics for that part of the Continental United States known as the "Registration Area" began with the calendar year 1900. This area at that time included 40.5 per cent of the total population, and in 1930 96.2 per cent. The birth registration area was established in 1915, it included at that time 31.7 per cent of the total population, and in 1930, 94.7 per cent. The following table shows the number of births and deaths in the respective Registration Areas, with rates per 1,000 of the estimated population, for the calendar years 1924 to 1931.

CALENDAR YEAR	BIRTHS *		DEATHS *	
	Number	Rate per 1,000	Number	Rate per 1,000
1924	1,930,614	21.4	1,173,990	11.7
1925	1,878,880	21.5	1,219,019	11.8
1926	1,856,068	20.7	1,285,927	11.3

1931	2,112,760	18.0	1,322,589	11.1

* Exclusive of still-births.

IMMIGRATION AND EMIGRATION.

From 1820 to 1933, 37,917,795 alien immigrants landed in the United States. In the fiscal year ended June 30, 1933, 23,058 immigrant and 127,660 non-immigrant aliens were admitted, a total of 150,718. During the same year, 80,081 emigrant and 163,721 non-migrant aliens departed, a total of 243,802. The net decrease for the year was 93,074.

MARRIAGE AND DIVORCE.

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In general, adultery, cruelty, abandonment (desertion), habitual drunkenness, and imprisonment on conviction of felony, are legal causes of divorce.

YEAR	MARRIAGES	DIVORCES GRANTED		
	Total	To Wife	To Husband	Total
1916	1,040,684	74,893	33,809	118,702

SUMMARY: Europe, 11,742,685; Asia, 157,580; America, 1,395,070; Other, 70,872. Total, 13,366,407.

PHYSIOGRAPHY.

The Republic occupies nearly all that portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25°-49° North and longitude 67°-124° 30' West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line has an estimated length of about 5,565 miles on the Atlantic, 2,730 miles on the Pacific, 3,641 miles on the Gulf of Mexico, and 1,050 miles on the Great Lakes. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 1,700 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone Platte, Nebraska, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannas and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium; the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver). The highest point is Mount Whitney at 14,966 feet above sea level, and the lowest point of dry land is in Death Valley, 276 feet below sea level; these two points are in California, only 86 miles apart. The mean elevation of the 48 States is approximately 2 500 feet.

GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleven to twentieth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, Aug. 26, 1920, and Oct. 15, 1933), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE.

THE *Executive* power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the second Monday of the January following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the second Wednesday of February by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. Under the XXth Article of the Constitution the terms of the President and Vice-President end at noon on the 20th day of January of the years in which such terms would have ended if the Article had not been ratified, and the terms of their successors then begin. In case of the removal or death of both President and Vice-President, a statute provides for the succession, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of \$75,000, with a travelling allowance of not exceeding \$25,000. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and has power, "by and with the advice and consent of the Senate, to make Treaties, provided two-thirds of the Senators present concur." The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT.

President of the United States (1933-1937), Franklin D. Roosevelt, of New York, born at Hyde Park, New York, Jan. 30, 1882; A.B., Harvard University, 1904; Columbia University Law School, 1904-1907; member of New York Senate, 1910 to March 17, 1913 (resigned); Assistant Secretary of the Navy, 1913-1920; elected Governor of New York in 1928; and re-elected in 1930; in charge of the inspection of United States naval forces in European waters, July-Sept., 1918, and of demobilization in Europe Jan.-Feb., 1919. *Democrat*.

1. *Vice-President*, John Nance Garner, of Texas (born Nov. 22, 1869), elected *Vice-President* Nov. 8, 1932. *Democrat*.

THE CABINET.

(In order of succession to the Presidency, after the Vice-President.)

2. *Secretary of State*, Cordell Hull, of Tennessee (born 1871), appointed March 4, 1933.
3. *Secretary of the Treasury*, William Hartman Woodin, of New York (born 1868), appointed March, 1933.
4. *Secretary of War*, George Henny Dern, of Utah (born 1872), appointed March 4, 1933.
5. *Attorney-General*, Homer Stille Cummings, of Connecticut (born 1870), appointed March 4, 1933.
6. *Postmaster-General*, James A. Farley, of New York (born 1888), appointed March, 1933.
7. *Secretary of the Navy*, Claude Augustus Swanson, of Virginia (born March 31, 1862), appointed March 4, 1933.
8. *Secretary of the Interior*, Harold L. Ickes, of Illinois (born 1874), appointed March 4, 1933.
9. *Secretary of Agriculture*, Henry Agard Wallace, of Iowa (born 1888), appointed March 4, 1933.
10. *Secretary of Commerce*, Daniel Calhoun Roper, of South Carolina (born 1867), appointed March 4, 1933.
11. *Secretary of Labor*, Frances Perkins, of New York, appointed March 4, 1933.

THE LEGISLATURE.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 281,000. The Senate consists of 96 members. The salary of a Senator is \$10,000 per annum, with mileage at 20 cents per mile each session. The House of Representatives consists of 435 representatives besides a delegate from Alaska, a delegate from Hawaii, a resident commissioner from the Philippines, and a resident commissioner from Porto Rico. The salary of a Representative is \$10,000 per annum, with mileage as for Senators. By the XIXth Amendment sex is no disqualification for the Franchise.

THE SEVENTY-THIRD CONGRESS.

(*March 4, 1933—January 3, 1935.)

<i>President of the Senate</i> , John Nance Garner, Texas	\$15,000
<i>Speaker of the House of Representatives</i> , Henry T. Rainey, Illinois.....	15,000

LIBRARY OF CONGRESS.

(National Library).

Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1815, purchase of Jefferson collection formed basis for a new collection. Partially destroyed by fire, 1851, and replenished in 1851-2. Since that date increased (1) by regular annual appropriations by Congress (now \$150,000); (2) by deposits under the copyright law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which was in 1866 (then 40,000 volumes; now over 550,000 volumes) deposited in the Library of Congress, with the stipulation that future accessions should follow it. The collection is the largest in the Western Hemisphere, but statistics of the four largest libraries in the world are not sufficiently uniform to tell their order in respect to numbers. The Library of Congress now contains 4,633,476 volumes (gain in 1932-33, 250,045). The building was first occupied in 1897. A considerable addition just completed has brought the total cost to approximately \$9,344,000, and the floor space to 666,190 square feet (15.3 acres). The book stacks, including the new constructions, contain a little over 265 miles of shelving. The library is maintained by Congress, the appropriation for 1933-34 being \$2,087,735. An auditorium for chamber music (the gift of Mrs. F. S. Coolidge) was opened in 1925, and in the same year the Library of Congress Trust Fund Board was created under an Act of Congress. This Board is permitted to accept and administer gifts and bequests of personal property in the interests of the Library of Congress, its collections and its service.

Librarian of Congress, Herbert Putnam,

L.L.D. \$10,000

* The change in the date of the termination of the 73rd Congress is due to the 26th Amendment to the Constitution, which became effective Oct. 25, 1933.

NATIONAL COMMISSION OF FINE ARTS.

Interior Dept. Building, Washington, D.C.

The Commission of Fine Arts was created by Congress May 17, 1910, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings, public parks, within the D.C. An expenditure not exceeding \$10,000 in any one year is authorised by Congress for travelling and other expenses. The members serve without remuneration.

Chairman, Charles Moore, Detroit, Mich.*Members*, John L. Maurau, Mo.; Egerton Swart-

wout, N.Y.; Gilmore D. Clarke, N.Y.; Lee

Lawrie, N.Y.; John M. Howells, N.Y.;

THE JUDICIATURE.

The Federal Judiciary consists of three sets of Federal Courts: (1) The *Supreme Court* at Washington, D.C., consisting of a Chief Justice and eight *Puisne Judges*, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal

Courts and from decisions of the highest Courts of the States. (a) The *Circuit Courts of Appeal*, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (c) The *District Courts*, eighty-seven in number, each served by a District Court Judge.

DEFENCE.

The President is Commander-in-Chief of both Navy and Army, the former being controlled by a Secretary of the Navy, and the latter by a Secretary of War.

THE ARMY OF THE U.S.

The present authorised strength of the Regular Army is: Commissioned officers 12,402; warrant officers 925; enlisted men (approximately) 118,750, exclusive of the Philippine Scouts. The actual strength of the entire active Army of the United States on June 30, 1933, including retired personnel on active duty at the time, was 135,015, of whom 12,301 were commissioned officers, 925 warrant officers, and 121,788 were enlisted men. These figures include the 6,398 enlisted men of the Philippine Scouts. The Army is made up entirely of volunteers.

1912	251,144	186,797	437,941	232,509,429
1913	242,153	174,687	416,840	234,996,328

The total disbursement in pensions since the War of Independence to June 30, 1933, is \$8,871,483,951, of which \$7,608,594,102 has been paid on account of the Civil War.

World War Pensions.

Disbursements in claims arising out of service in the World War between April 6, 1917, and July 2, 1921, are not included in the above totals. (See "Ordinary Expenditures" under "Finance," *post*.)

By Executive Order of July 21, 1930, the Veterans' Bureau, the Bureau of Pensions, and the National Home for Disabled Volunteer Soldiers, were consolidated in accordance with the Act of Congress, approved July 3, 1930, by the President. The combined organisation is known as the *Veterans' Administration*, under the direction of Brigadier-General Frank T. Hines, formerly Director of the Veterans' Bureau, now Administrator of Veterans' Affairs.

THE NAVY OF THE U.S.

On October 1, 1933, the Navy of the United States consisted of the following seagoing vessels: 14 battleships, not "over-age"; 1 battleship, "over-age"; 10 heavy cruisers, not "over-age"; 1 heavy cruiser, "over-age"; 10 light cruisers; 2 aircraft carriers, not "over-age"; 1 aircraft carrier, "over-age"; 4 destroyers, not "over-age"; 225 destroyers "over-age"; 12 light mine layers, "over-age"; 4 mine layers, 37 mine sweepers, 48 submarines, not "over-age"; 34 submarines "over-age"; 25 eagles; 24 submarine chasers; 4 gunboats; 8 river gunboats; 2 converted yachts; 8 destroyer tenders; 7 submarine tenders; 2 aircraft tenders; 3 repair ships; 4 store ships; 3 colliers; 19 oilers; 2 ammunition ships; 5 cargo ships; 2 transports; 2 hospital ships; 34 tugs; 6 submarine rescue vessels, 8 miscellaneous auxiliaries, and 26 unclassified vessels.

On the above-mentioned date there were under construction: 7 heavy cruisers, 4 light cruisers, 3 aircraft carriers, 6 submarines, 32 destroyers and 2 gunboats. In addition to the foregoing new construction, there have been authorized: 2 cruisers and 1 transport, the construction of which has not been begun.

Information as to characteristics, costs, &c., available for publication concerning naval vessels mentioned above, may be found in the *Ships' Data Book*.

EDUCATION.

State School Systems, 1929-1930.

In 1929-30 the total number of children in the United States 5 to 17 years of age was 31,571,322.

of whom 25,678,015 (12,957,487 boys and 12,720,528 girls) were enrolled in public elementary and secondary schools, and (1928-30) 2,776,344 were enrolled in private elementary and secondary schools, and in private commercial and business schools. The average daily attendance in the public schools was 21,264,886, the average length of school term was 172.7 days, and the average number of days attended by each pupil enrolled was 143.0 days. In 1929-30, 854,263 teachers (141,771 men and 712,492 women) were employed. The average annual salary of all teachers was \$1,420. The total number of buildings used as school houses was 247,289, and the estimated value of all public school property was \$6,211,327,040.

The total money received for school purposes, excluding balances on hand, was \$2,088,556,837. Of this amount, \$27,516,517 was received from permanent school funds and from the rent of school lands, \$329,312,434 from State taxes or State appropriation, \$1,645,687,651 from local tax or appropriation, and \$86,040,235 from all other sources, State and local. The total payments, excluding payments of bonds, were \$2,316,790,384. This amount includes expenditures for sites, buildings, furniture, libraries and apparatus, \$370,877,969; for salaries of superintendents, supervisors, principals and teachers, \$1,295,201,424; and for all other purposes, \$650,710,991.

Compulsory Attendance Laws, 1930.

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 14 years of age, and those from 14 to 16 must attend school or secure employment certificates. The required attendance each year varies from eighty days in two States to the full term in thirty-six States. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

Universities, Colleges and Professional Schools, 1929-30.

Of the 1,078 universities, colleges, and professional schools, 246 are public institutions and 832 under private control or management. The total number of instructors in both private and public institutions was 71,722 (55,861 men and 15,861 women). The public institutions enrolled 399,397 undergraduate and graduate students (244,754 men and 154,643 women). The private institutions enrolled 581,187 undergraduate and graduate students (359,459 men and 221,728 women). In general engineering, 8,506 students were enrolled; in chemical engineering, 6,474; in civil engineering, 11,563; in electrical engineering, 15,647; in mechanical engineering, 11,507; and in mining engineering, 1,459.

The total number of baccalaureate degrees conferred in 1929-30 was 91,623 (51,160 men and 40,463 women), altogether 16,832 graduate degrees were conferred (10,693 men and 6,139 women); 1,347 honorary degrees were conferred.

The schools of theology enrolled 13,045 students and reported 1,251 graduates; law schools, 41,426 students and 8,874 graduates; schools of medicine, 21,964 students and 4,769 graduates; schools of dentistry, 8,162 students and 1,798 graduates; schools of pharmacy, 10,906 students and 2,599

graduates; and schools of veterinary medicine, 884 students and 135 graduates.

Teachers' Colleges and Normal Schools, 1929-30.

In 1929-30, 331 teachers' colleges and normal schools reported to the United States Office of Education. These schools are chiefly concerned with the training of elementary teachers. Of this number 273 are public institutions, and 58 are private institutions; 140 are teachers' colleges, 134 are public, and 6 are private institutions (schools granting a degree after four years' work beyond high school); 66 are State normal schools; 26 are city normal schools; 47 are county normal schools; and 52 are private normal schools. The total number of instructors in all teachers' colleges and normal schools was 14,473. The total number of students enrolled was 279,195 (60,935 men and 218,260 women). Of this total enrollment, 264,257 students are in normal training courses. The number of graduates from the normal training courses was 7,038 men and 42,189 women, making a total of 49,227. 11,073 bachelor's degrees were also conferred, 3,609 on men and 7,464 on women. Practice or model schools are usually operated in connection with these normal schools, or the public schools are used for this purpose. The total enrollment in these model schools, so far as reported, was 90,601. The total receipts for normal schools (1929-30) were \$69,983,932. The total number of volumes in the libraries was 4,025,076.

Nurse Training Schools, 1926-27.

The number of nurse training schools has increased very rapidly since 1900. At that time 432 schools reported to the Office of Education. In 1920-21 the number of such schools reporting was 1,844. The number of pupils enrolled in these schools in 1920-21 was 200,419 and the number graduated 18,623. Of these schools reporting, 66 are in hospitals for the insane. The capacity of the hospitals in which all nurse training schools reporting are located, is 428,472 beds, and the average daily number of patients is 325,319. In 1920-21 a large majority of schools required a minimum age requirement for admission of only 18 or 19 years. In general hospitals two-thirds of the schools required 8 hours of duty daily in 1920-21. In hospitals for the insane, about a fourth required 12 hours duty, a fourth 10 hours, and less than a third, 8 hours.

The remuneration granted the pupils in general hospitals is usually less than \$200. In the first year 45 per cent. of the schools pay less than \$10 per month, and more than 50 per cent. pay from \$10 to \$15 per month during the second and third years. About 15 per cent. pay no remuneration at all. In the schools in hospitals for the insane the remuneration usually exceeds \$400. In the first year of the course 48 per cent. of the schools pay between \$25 and \$50 a month.

More than 89 per cent. of all the nurse training schools in general hospitals offer a three-year course. In hospitals for the insane, about 80 per cent. of the schools offer a three-year course, and the remaining schools offer a two-year course. 87 per cent. of the general nurse training schools require four years of high school work for admission.

Of the nurse training schools reporting, about 20 per cent. are affiliated with colleges or

universities. By this co-operation an excellent opportunity is afforded to the training schools to secure for their pupils a high type of instruction in technical and academic subjects.

Public High Schools, 1929-30.

In 1929-30, 22,237 public high schools reported to the Office. The total number of teachers in these secondary schools was 213,306* (74,532 men and 138,774 women). The total number of pupils enrolled in these schools was 4,145,669 (1,991,202 boys and 2,154,467 girls). The total number of coloured pupils included in the preceding figures is 118,897. In the first year of the course 1,460,459 pupils were enrolled, in the second year 1,132,061, in the third year 852,012 and in the fourth year 664,985 pupils, including post-graduate and special pupils. In the 7th and 8th elementary grades organised as a part of junior high schools, 1,066,510 pupils were enrolled. The number of graduates reported was 591,719 (267,298 boys and 324,421 girls).

There were 16,460 regular high schools that reported a four-year curriculum. In these four-year high schools there are 2,652,471 pupils enrolled (1,270,199 boys and 1,382,272 girls). In addition, there are 1,842 junior high schools, with 1,036,919 pupils (517,255 boys and 519,664 girls); 2,287 junior-senior high schools, with 979,176 pupils (471,102 boys and 508,074 girls), and 648 senior high schools, with 543,813 pupils (264,261 boys and 279,552 girls).

Private High Schools and Academies, 1929-30.

The number of pupils in private high schools and academies, in general, has increased slowly but steadily. In 1900 the number of students enrolled in these schools was 110,797. In 1929-30 the number enrolled was 269,249. The number of schools reporting in 1930 was 1,978, and the number reporting in 1930 was 2,760. The total number of instructors in these private high schools in 1929-30 was 22,003 (8,577 men and 13,426 women). In this group of schools, more than any other, there is a tendency for the schools to be either for boys or girls exclusively, rather than co-educational. Of the schools reporting in 1930, 504 were for boys only, 873 were for girls only. Altogether, 116 of the schools had military drill in 1928, enrolling 16,528 students.

* Includes 9,277 men and 30,755 women teachers in junior high schools

FIRE LOSSES IN THE UNITED STATES.

(Estimated by the *Journal of Commerce*.)

In the following table the losses for 1906 include the losses from fires following the disastrous earthquake in San Francisco. In 1923 the *Loss of Life* caused by fires was stated to amount to 15,000 persons. The Fire Losses in New York (1930) are stated at \$18,116,305; Chicago (1928) \$12,999,899; Montreal (1927) \$2,599,603; in London, Eng (1927) \$1,773,900.

The lowest American percentage was 29 in 1880, 1881 and 1882; the highest was 51 in 1885

PRODUCTION AND INDUSTRY.

Agriculture.—The total land surface, excluding island possessions and Alaska, is 1,903,216,640 acres, of which in 1930 986,771,016 were farms (522,395,804 acres improved). The total number of farms in 1930 was 6,288,648, of which 2,314,858 are between 100 and 500 acres, 1,374,665 between 50 and 100 acres, and 1,440,388 between 20 and 50 acres. The gross value of farm products of the United States in 1931 was \$5,143,226,000, as compared with \$6,911,266,000 in 1931. Crops in 1932 were valued at \$2,115,177,000, live-stock products (including animals sold or slaughtered) at \$3,226,302,000.

Farm value of principal crops in 1931 and 1932:—

Crop	Farm Value.	
	1931	1932
Corn (Maize)	\$824,869,000	\$566,930,000
Wheat	352,151,000	254,525,000
Oats	238,279,000	175,207,000
Barley	64,498,000	59,555,000
Cotton Lint	483,582,000	397,295,000
Seed	72,390,000	56,489,000
Tobacco	131,830,000	110,910,000
Potatoes	173,767,000	136,922,000
Sweet	45,688,000	37,652,000
Truck Crops	289,449,000	220,767,000
Hay	637,876,000	513,697,000
Apples	131,975,000	82,110,000
Farm Gardens	222,346,000	210,142,000

Animal Products

Cattle and Calves	727,879,000	563,322,000
Hogs	941,042,000	539,665,000
Sheep and Lambs	106,902,000	73,343,000
Chickens	320,903,000	244,775,000
Milk	1,661,273,000	1,294,629,000

Minerals.—The total value of all mineral products of the U.S. in 1931 was \$3,166,600,000; the value of metallic minerals produced was \$567,200,000 (pig iron, \$285,147,156; copper, \$54,827,000; gold, \$49,527,200, and silver \$8,970,294), and of non-metallic minerals the total value was \$2,592,200,000 (bituminous coal, \$588,895,000; Pennsylvania anthracite, \$296,354,586; petroleum, 851,081,000 barrels of 42 gallons, value \$550,630,000; natural gas, \$392,816,000; cement, \$124,579,826).

MANUFACTURES.

The manufacturing establishments enumerated at the biennial Census of 1931 numbered 175,225, the value of their products being \$41,350,464,564, as compared with a value in 1929 of \$70,424,863,442. The leading manufacturing States ranked according to value of products, are New York, Pennsylvania, Illinois, Ohio, Michigan, and New Jersey.

Areas ranked by the Value of their Manufactured Products for 1929 and 1931.

Industrial Area.*	1929	1931
New York City ...	\$3,424,294,682	\$6,162,828,205
Chicago	5,553,331,422	3,097,672,800

Bridgeport — New Haven — Waterbury	862,311,307	463,274,032

Leading Industries (Ranked by Value of Products) in Principal Industrial Areas for 1931.

New York City Area.—Women's clothing not elsewhere classified; Printing and publishing, newspaper and periodical; Bread and other bakery products; Men's, youths' and boys' clothing (except work clothing) not elsewhere classified; Printing and publishing, book and job; Meat packing, wholesale; Petroleum refining; Electrical machinery, apparatus and supplies; Fur goods.

Chicago Area.—Meat packing, wholesale; Steel-works and rolling-mill products; Electrical machinery, apparatus and supplies; Petroleum refining; Printing and publishing, book and job; Printing and publishing, newspaper and periodical; Foundry and machine-shop products not elsewhere classified; Bread and other bakery products; Confectionery.

Philadelphia Area.—Petroleum refining; Printing and publishing, newspaper and periodical; Knit goods; Cane-sugar refining; Bread and other bakery products; Men's, youths' and boys' clothing (except work clothing) not elsewhere classified; Foundry and machine-shop products not elsewhere classified; Women's clothing not elsewhere classified. The "Radio apparatus and phonographs" industry is one of the leading industries in this area, but its rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Detroit Area.—Motor vehicles, not including motor-cycles; Motor vehicle bodies and motor vehicle parts.

Boston Area.—Boots and shoes, other than rubber; Worsteds goods; Printing and publishing, newspaper and periodical; Electrical machinery, apparatus and supplies; Bread and other bakery products. The following are among the leading industries in this area, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments: Leather, tanned, curried and finished; Printing and publishing, book and job; Soap.

Pittsburgh Area.—Steel-works and rolling-mill products; Blast-furnace products; Electrical machinery, apparatus and supplies; Foundry and machine shop products not elsewhere classified; Structural and ornamental metal-work, not made in plants operated in connection with rolling-mills; Glass; Bread and other bakery products; Coke-oven products.

St. Louis Area.—Meat packing, wholesale; Motor vehicles, not including motor-cycles; Petroleum refining; Electrical machinery, apparatus and supplies. The following are among the leading industries in this area, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports)

approximations of the data for individual establishments: Boots and shoes, other than rubber; Bread and other bakery products; Chemicals not elsewhere classified; Chewing and smoking tobacco and snuff.

San Francisco-Oakland Area.—Petroleum refining; Cane-sugar refining; Motor vehicles, not including motor-cycles; Canned and dried fruits and vegetables and preserves, jellies, fruit butters, pickles and sauces; Meat packing, wholesale; Coffee and spices, roasting and grinding. The following are among the leading industries in this area, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments. Bread and other bakery products; Cigars and cigarettes; Printing and publishing, newspaper and periodical; Smelting and refining lead.

Cleveland Area.—Steel-works and rolling-mill products; Motor vehicle bodies and motor vehicle parts; Foundry and machine-shop products not elsewhere classified; Electrical machinery, apparatus and supplies; Motor vehicles, not including motor-cycles; Meat packing, wholesale; Printing and publishing, newspaper and periodical; Blast-furnace products.

Los Angeles Area.—Petroleum refining; Meat packing, wholesale; Printing and publishing, newspaper and periodical; Rubber tyres and inner tubes, Bread and other bakery products; Women's clothing not elsewhere classified; Foundry and machine-shop products not elsewhere classified. The production of motion pictures is also one of the leading activities in this area.

Buffalo Area.—Motor vehicles, not including motor-cycles; Flour and other grain-mill products; Chemicals not elsewhere classified; Steel-works and rolling-mill products; Meat

packing, wholesale; Motor vehicle bodies and motor vehicle parts.

Milwaukee Area.—Foundry and machine-shop products not elsewhere classified; Meat packing, wholesale; Motor vehicles, not including motor-cycles; Motor vehicle bodies and motor vehicle parts. The following are among the leading industries in this area, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments: Boots and shoes, other than rubber; Electrical machinery, apparatus and supplies; Engines, turbines, tractors, water-wheels and windmills; Knit goods; Wrought pipe.

Baltimore Area.—Steel-works and rolling-mill products; Smelting and refining copper; Meat packing, wholesale; Men's, youths and boys' clothing (except work clothing) not elsewhere classified. The following are among the leading industries in this area, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments: Bread and other bakery products; Petroleum refining; Cane-sugar refining; Tin cans and other tinware not elsewhere classified.

Cincinnati Area.—Motor vehicles, not including motor-cycles; Meat packing, wholesale; Paper; Soap; Foundry and machine-shop products not elsewhere classified; Men's, youths' and boys' clothing (except work clothing) not elsewhere classified; Steel-works and rolling-mill products; Printing and publishing, book and job.

Providence-Fall River Area.—Cotton goods; Worsteds goods, Dyeing and finishing textiles; Silk and rayon goods, Jewellery.

Bridgeport New Haven-Waterbury Area.—Non-ferrous metal alloys and non-ferrous metal

products, except aluminium, not elsewhere classified; Electrical machinery, apparatus and supplies; Hats, fur-felt; Foundry and machine-shop products not elsewhere classified; Silverware and plated ware; Hardware not elsewhere classified; Printing and publishing, newspaper and periodical; Corsets and allied garments; Ammunition and related products.

Motor Vehicle Industries.—The value of the complete passenger cars and business vehicles manufactured in 1931 was \$1,316,355,778; of parts and accessories, \$837,234,593, and of tyres and tubes \$364,454,334. The number of complete passenger cars produced was 1,921,435 and of complete business vehicles 246,550, while 49,254,973 tyres and 49,166,765 inner tubes were also manufactured in 1931. The motor vehicle factories, the parts and accessories and tyre factories gave employment to 334,674 wage earners, who received \$43,614,930 in wages in 1931. The number of motor vehicles registered in 1931 in the U.S.A. was 25,814,103. The gasoline produced in 1931 amounted to 18,384,882,600 gallons, and that consumed to 16,719,239,000 gallons. The taxes levied on motor vehicles by the Federal, State, and Municipal Governments in 1931 amounted to \$1,025,735,112. The number of motor vehicles, exclusive of those shipped as "parts for assembly," exported in 1931 was 135,836.

FEDERAL EMPLOYMENT BUREAU.

Activities of the U.S. Employment Service, Department of Labour, showing the work done during the fiscal years ending June 30.—

ADULT SERVICE.

Year	Registrations	Help Wanted	Referred.	Placed.
1924	2,755,593	2,201,157	2,104,620	1,806,990
1925	2,663,846	1,876,626	1,873,926	1,609,977
1926	2,727,763	2,091,539	2,058,638	1,791,381
1927	2,440,640	1,991,598	1,944,097	1,688,476
1928	2,590,095	1,607,344	1,632,456	1,412,645
1929	2,332,505	1,771,957	1,778,311	1,534,022
1930	2,346,316	1,518,081	1,558,367	1,345,936
1931	2,421,936	1,216,698	1,223,726	1,104,136

JUNIOR SERVICE.

Year	Registrations	Help Wanted.	Referred.	Placed.
1925	72,563	21,846	29,949	22,131
1926	53,021	28,097	36,257	24,734
1927	55,261	27,988	36,111	24,631
1928	56,116	29,117	36,741	26,037
1929	61,424	35,027	42,848	31,369

(The Junior offices are conducted in co-operation with local agencies, usually public schools.

Most of them serve limited groups of boys and girls. Only a few attempt centralised placement. These facts should be borne in mind in interpreting the figures.)

FARM LABOUR (Seasonal)

1924	425,548	1928	559,571
1925	392,750	1929	611,598
1926	423,112	1930	704,100
1927	433,954		

NOTE.—The Employment Service has been entirely reorganized under the provisions of the Wagner-Peyser Bill signed by the President June 6, 1933, and activity data will be presented in another form from November, 1933.

COMMUNICATIONS.

RAILWAYS OF THE U.S.

PUBLIC ROADS.—On Dec. 31, 1932, there were approximately 3,000,000 miles of rural roads. The mileage of State highways was 358,210, of which 266,060 were surfaced. In 1932 the expenditures for State highway purposes were \$316,765,000.

SHIPPING.—On June 30, 1933, the mercantile marine of the U.S. (vessels of 500 gross tons and over) consisted of 340 sailing vessels of 518,029 gross tons; 2,575 steam vessels of 11,349,758 gross tons, and 275 motor vessels of 703,828 gross tons—total, 3,130 vessels of 12,571,615 gross tons. (The total in 1932 was 3,327 vessels of 13,324,300 gross tons.) In the year ended June 30, 1933, sailing and steam vessels of 60,723,097 tons entered at the various ports of the U.S.; of this total 22,565,796 tons were American and 38,157,301 tons foreign. The tonnage cleared from the various seaports was 60,671,456, of which 22,228,083 tons were American and 38,443,373 tons foreign.

POSTS AND TELEGRAPHS.—On June 30, 1932, there were 48,159 post offices in the U.S. handling 26,544,351.951 "pieces" of mail matter, of which amount 26,186,137.125 were domestic and 358,214,826 foreign. The telegraphs and telephones are not operated by the U.S. Government.

WEIGHTS, MEASURES AND CURRENCY.

The *Weights and Measures* in common use are shown on page 543. The Metric System of Weights and Measures is permissive, but is little used. The unit of *currency* is the dollar of 100 cents. The rate of exchange with sterling will be found on p. 531.

INDIAN POPULATION.

In 1932 the enumerated and estimated Indian population of the United States, exclusive of Alaska, was 317,234. The leading Indian States are as follows: Oklahoma, containing 94,552, Arizona 48,162, New Mexico 28,736, S. Dakota 26,296, California 19,215, Montana 14,741, North Dakota 9,613, Washington 12,063, Wisconsin 11,897, and Minnesota 14,743. The seeming decrease in the total population and the population of Oklahoma and Minnesota was caused by the change in the estimated figure for the Five Civilized Tribes of Oklahoma and dropping from the rolls Indians in Minnesota, and not by an actual decrease in population. For further explanation see page 49 of the Annual Report of the Commissioner of Indian Affairs, June 30, 1931. The decrease in North Dakota was caused by shifting the population of the part of Standing Rock Agency in South Dakota to that State. The decrease in Minnesota, which also affected the total population, was caused by dropping a large number of Indians illegally enrolled from the Consolidated Chippewa Agency Census Rolls. Total disbursements authorized for the fiscal year ended June 30, 1934, for Indian Service are \$16,766,000. In addition to this the sum of about \$5,516,400 is to be paid over to the Indians from receipts for oil and other leases, interest on trust funds, &c. The total wealth of U.S. Indians under the nominal control of the Indian Bureau on June 30, 1928, amounted to \$1,716,815,123, of which \$220,106,386 was tribal, and \$796,708,737 individual.

RECLAMATION.

Commissioner, Elwood Mead, Interior Dept. Building, 19th and F. N.W., Washington, D.C. Employees: Washington Office, 30; Field, 1,500 to 2,000. Expenditures for fiscal year ended June 30, 1933, over \$25,000,000.

The Bureau of Reclamation was organized as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged

In the investigation, construction and operation of irrigation works in 15 arid and semi-arid States of the far West. Thirty projects, comprising an irrigated area of about 1,500,000 acres, are under construction or operation, and the major works aid in serving an additional 1,500,000 acres under private canals purchasing stored water from the government reservoirs, making a total irrigated area of nearly 3,000,000 acres. The funds for this work have come chiefly from repayments by the water users, from oil leasing and other mineral operations, and from the sale of public lands. The money expended is returned to the fund by graduated payments of settlers.

The Bureau has built 17,807 miles of canals, ditches and drains (including 169,650 canal structures). There have been constructed 133 storage and diversion dams with an aggregate volume of 23,044,966 cubic yards, including the Owyhee Dam (405 feet high), Oregon, on the Owyhee River, the highest dam in the world; Arrowrock Dam (349 feet high), Idaho, on the Boise River, and the Elephant Butte Dam (306 feet high), New Mexico, on the Rio Grande. The Bureau has under construction the Boulder Dam on the Colorado River, which, when completed, will have a maximum height of about 730 feet and a volume of 3,400,000 cu. yds. of concrete. The Bureau has built 190 tunnels, 1,497 miles of road, 120 miles of railroad, 4,086 miles of telephone line, 22 power plants, and 3,587 miles of transmission lines. The construction cost to June 30, 1933, was \$216,784,745. This work has involved the excavation of 319,004,119 cubic yards of materials, and the Bureau has used 6,502,636 barrels of cement.

Nearly 700,000 persons are living on the 43,377 farms irrigated by the Bureau, and in the project towns and cities. Of the 3,000,000 acres above referred to, 1,702,720 acres were harvested in 1932, producing crops worth \$50,000,000, or an average of \$30.70 per acre.

Public land farm units on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law, soldiers and sailors of all wars have a preference right of 90 days to enter these farms.

Information in regard to farms available for settlement may be obtained by addressing, Commissioner, Bureau of Reclamation Dept. of the Interior, Washington, D. C.

The Bureau issues settlement and other booklets. An annual report is also issued, and other publications from time to time, relating to various phases of the work.

An engineering library of about 6,000 manuscript and printed volumes on the subject of irrigation is maintained in the Washington office of the Bureau. This library contains descriptions of the construction and operation

of the projects, with numerous photographs and maps, plans, specifications, cost data and results of original experimental investigations, and is available for consultation by those interested. The Bureau also maintains a photographic file of about 40,000 negatives of scenes on the projects from the beginning of construction through the period of settlement and development.

GOVERNMENT PRINTING OFFICE, North Capitol and G Streets, Washington, D. C.

The Government Printing Office of the United States was established by Congress in 1860 and has been in continuous operation since that time. The buildings have a floor space of 22 acres, and, together with the machinery and equipment which they contain, represent an expenditure of approximately \$10,100,000. The annual cost of operation and maintenance is over \$12,000,000, including the Public Documents Division. There are over 4,300 persons annually employed in the various divisions of the office, which operates generally on the 5-day week plan, at a total yearly compensation of about \$9,000,000. In addition to doing all of the printing and binding ordered for Congress, the office executes all the printing and binding required by the various executive departments, emergency relief activities, and independent establishments of the U. S. Government. The office has the largest battery of type-setting machines in the world, including 174 linotype machines, 2 Ludlows, 2 material casters, 100 monotype keyboards and 130 monotype casting machines, which produced about 2,750,000,000 ems of type in the fiscal year 1932. The 192 presses of the office are credited with 2,000,000,000 chargeable impressions, not including 212,000,000 on money order forms and 1,300,000,000 on postal cards. During the year the office handled approximately 80,000 separate jobs. In addition to the execution of all kinds of printing and binding, this office produced 10,000,000 square inches of electrotypes and stereotypes, and 612,000 square inches of half-tones and line-cuts, supplied blank paper to other Government establishments at a cost of \$413,000, and manufactured its own printing and writing inks, rollers, glue, type and type metal, some of these supplies being furnished to various branches of the Government. It also has one of the largest industrial cafeterias and recreational rooms in the United States. *Public Printer*, George H. Carter, *Iowa* \$50,000 *Deputy Public Printer*, John Greene, *Mass.* 7,500 *Production Manager*, Elwood S. Moorhead, *Pa.* 5,600

* During the fiscal year 1934 all salaries and wages are subject to a reduction of 15 per cent. under an Executive order issued in compliance with Public Act No. 2, approved March 20, 1933.

The "Lame Duck" Amendment.—The XXth Amendment, which became effective on Oct. 15, 1933, provides (Section 1) that the terms of the President and Vice-President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3rd day of January, of the years in which such terms would have ended if this Article had not been ratified, and the terms of their successors shall then begin. Section 2 provides that Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3rd day of January, unless they shall, by law, appoint a different day. Sections 3 and 4 provide for the succession to the Presidency in the event of a President elect dying before the beginning of his term. Section 5 provides that Sections 1 and 2 shall take effect on the 15th day of October following the ratification of the Amendment. Section 6 prescribes that the legislatures of three-fourths of the several States must ratify the Amendment within seven years of its submission before the Amendment can be operative.

Dependencies of the U.S.A.

HAWAII.

The Hawaiian (or Sandwich) Islands form a Territory of the U.S. and consist of a chain of 20 islands in the N. Pacific Ocean between 18° 55'—22° 16' N. lat. and 154° 4'—160° 30' W. long. The nine inhabited islands are:—

Island	Sq. miles.	Pop. (1930).
Hawaii	4,016	73,325
Oahu	598	202,887
Mauli	728	48,756
Kauai	547	35,806
Molokai	261	5,032
Lanai	140	2,356
Niihau	97	136
Kahoolawe	69	2
Molokini	3	...

The total population (Census of 1930) was 368,336, an increase of 112,424 since 1920; of the total 121,072 were aliens.

The islands were discovered by Capt. Cook in 1778 (he was killed there in 1779) and formed a kingdom under native rulers until Queen Liliuokalani was driven from the throne in 1893, a republic being proclaimed in 1894. In 1897 the group was annexed by the U.S., being organized as a Territory on June 14, 1900. The Governor is appointed by the President of the U.S. There is a Senate of 15 and House of Representatives of 30 members, the Territory sending a Delegate to Congress at Washington, D.C.

The group is of volcanic origin and contains many craters, Haleakala on Maui being the largest in the world. Kilanea and Mauna Loa, on Hawaii, are active volcanoes, with Mauna Kea (13,823 ft. above mean sea level) extinct. The islands are very fertile, and rice, cane sugar, pineapples, coffee, bananas and other tropical and sub-tropical products are abundantly grown.

Revenue (1932-31)	\$12,839,762
Expenditure (1930-31)	11,895,693
Debt (June 30, 1931)	32,000,000
Total Exports (1931-32)	105,093,072
Total Imports	76,028,496
Exports to U.S.	55,362,867
Imports from U.S.	67,515,507

Governor (1929-1933), Lawrence M. Judd, assumed office July 5, 1929.

CAPITAL, Honolulu, on the island of Oahu, population (1930) 137,582. Hilo, on the island of Hawaii, has a population of 19,468.

THE PHILIPPINE ISLANDS

are situated between 4° 40'—21° 10' N. lat. and 116° 40'—126° 34' E. long., and are distant about 500 miles from the south-east coast of the continent of Asia. Their total land area is 114,400 square miles, of which total 103,288 square miles are contained in the eight largest islands, the 7,075 other islands having a combined area of 11,112 square miles. At the Census of 1930 the population was ascertained to be 12,604,100, almost all of Malayan stock, of whom (in 1928) 8,724,065 are Roman Catholic, 4,000,000 are Aglipayan, 200,000 are Protestant, (and 1918) 443,037 are Muhammadan, 508,596 are Pagan, 24,463 are Buddhists, and all others 5,454. Of the foreign-born residents about three-quarters are Chinese, and of the white population over one-half are from the United States (6,931 in 1921).

The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan, who was slain by the natives of Mactan. In 1565

Spain undertook the conquest of the islands, which were named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. Aguinaldo was deported, but on his return his assistance was accepted by Admiral Dewey, the commander of the American Pacific fleet, after the annihilation of the Spanish vessels in Manila Bay on May 1, 1898. Manila was captured by the American troops under General Wesley Merritt on Aug. 13, 1898, and the islands were ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898.

On Aug. 31, 1928, the Philippine Scouts, which form a part of the United States regular Army, consisted of 88 officers and 6,239 enlisted men. On the same date the regular Army in the Philippines (other than the scouts) consisted of 512 officers and 3,788 enlisted men, many of these officers being on duty with the scouts. The Philippine constabulary, which is under the Philippine Government, in Oct., 1928, consisted of 397 officers and 6,119 enlisted men. All enlisted men in the scouts and constabulary are natives of the islands, while almost all the constabulary commissioned personnel are Filipinos.

The expenditure on education in 1931 amounted to \$17,027,378 for public schools only; the University had an enrolment of 7,533 students, and there were 1,099,306 pupils enrolled in the public schools. The principal exports are sugar, tobacco (Manila hemp), coconut oil, copra, abaca, embroidery, desiccated coconut, lumber and timber, copra meal and magnesia; the imports being cotton and its manufactures, iron and steel and dairy products, automobiles and accessories, wheat flour, silk and its manufactures, paper and its manufactures, and coal.

Receipts	\$46,074,000
Expenditures	46,730,000
Debt (Dec. 31, 1931)	50,368,459
Total Imports	\$92,393,662
Total Exports	120,331,688
Imports from U.S. (1932)	47,171,214
Exports to U.S. (1932)	79,781,825

Notes.—(Capital, Manila, in the island of Luzon; population (1928), 324,522. The next largest towns are Cebu (86,154), Legaspi (32,670), Iloilo (67,147), and Zamboanga (47,305); there are several others with populations from 25,000 to 40,000.

Governor-General, Frank Murphy, assumed office at Manila, 1933.

Vice-Governor, John M. Halliday.

GUAM.

Guam, the largest of the Ladrones or Marianne Islands in the North Pacific Ocean, lies in 13° 26' N. lat. and 144° 39' E. long., at a distance of about 1,506 miles east of Manila, the capital

of the Philippine Islands, and forms a naval station between that dependency and the United States. The area of the island is estimated at 225 square miles, with a population of 20,857, of whom 19,612 are classed as native, 425 of the naval station, and 761 other than native. The natives are of Chamorro stock, mingled with Filipino and Spanish blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island.

CAPITAL, Agaña. Port of entry, Apra.

WAKE AND MIDWAY ISLANDS.

Wake Island, annexed in 1898, has an area of about 1 sq. mile and lies in the N. Pacific about 1,000 miles from Hawaii on the direct route to Hong Kong.

Midway Islands, with a total area of 28 sq. miles and a population (1930) of 35, lie in the N. Pacific about 1,200 miles from Hawaii. The group is administered by the U.S. Navy Dept.

PUERTO RICO.

Puerto Rico (Rich Harbour) is an island of the Greater Antilles group in the West Indies, and lies between 17° 50'–18° 30' N. lat. and 65° 30'–67° 15' W. long., with a total area of 3,433 square miles and a population of 1,543,073 at the census of 1930. Three fourths of the population are of Spanish descent and about one fourth coloured. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,400 miles distant from New York, and 984 miles from Key West. *Puerto Rico* was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508, and he was made Governor of the island in 1509. It continued a Spanish possession until Oct. 12, 1898, when it was ceded to the United States as a result of the Spanish-American War. Sugar is grown in the low-lying districts, and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, rice, and yams are also grown. The trade is principally with the U.S. About 344 miles of railroad were in operation in June, 1931, and there are good harbours at San Juan and Ponce. The legislative functions are vested in a legislature which consists of 2 elective houses; the Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (2 from each of the 19 representative districts and 1 elected at large). The term of the Legislature is 4 years. The Governor is appointed by the President of the U.S. and holds office at the pleasure of the President. A Supreme Court of 5 members is also appointed by the President. There is a Cabinet composed of 7 heads of Departments, two appointed by the President and five by the Governor. The Governor also appoints all inferior judges. Great improvement has been made in the progress and welfare of the island during the present century—the island is self-supporting, free public schools are established throughout, a system of good roads reaches every important city and town, public buildings are attractive and well built, health and sanitary measures are in force. The capital, San Juan, had 124,775 inhabitants in 1930, other towns being Ponce (53,430), Mayaguez (37,060), Arecibo (12,863), Bayamon (12,936), and Caguas (19,792).

TUTUILA, AMERICAN SAMOA.

American Samoa consists of the island of Tutuila, Anuuu, Ofu, Olosega, Tau, and Rose Islands, with a total area of about 56 square miles and a population of 20,055 in 1930, distributed (1930) as follows:—Tutuila and Anuuu, 7,809; 1140, 1,243; Olosega, 438; Ofu, 466; Rose Island, uninhabited; and Swain's Island (annexed May 13, 1925), 99.

Tutuila, the largest of the group, has an area of about 40 square miles and contains a magnificent harbour at Pago Pago, the capital and seat of government. The remaining islands have an area of about 16 square miles. Copra is the only export of importance.

VIRGIN ISLANDS.

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq. miles, with a population in 1930 of 22,022. *St. Thomas* (28 sq. miles) has a population of 9,834; *St. Croix* (84 sq. miles) has a population of 11,413, the capital being Christianstad (or Bassin); *St. John* (20 sq. miles) has a population of 765, the capital being Cruz Bay. St. Croix exports sugar; St. Thomas is famous for its bay rum.

CAPITAL, St. Thomas, contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station. The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months.

Governor, Paul M. Pearson.

Governor Sec., Boyd J. Brown.

THE PANAMA CANAL.

The administrative organisation for the canal is known as "The Panama Canal." Its headquarters are at Balboa Heights, Canal Zone, with the Governor of the Panama Canal (Colonel Harry Burgess, U.S.A.) at its head.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Inter-oceanic Panama Canal Company, of which de Lesseps was nominal head. The amount of work to be accomplished proved to be greater than was estimated, and resulted in the failure of the company, a receiver being appointed in 1889. A new company was formed to carry on the work, and excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

Congress authorised the President in 1902 to purchase the effects of the French company for \$40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$10,000,000, of the

territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognised by the United States, and a treaty was signed on February 20, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory. In 1922 a treaty between Colombia and the U.S. provided for the payment to Colombia of \$25,000,000 in satisfaction of all claims arising out of the Canal controversy. The independence of Panama was recognised by this treaty.

The total investment by the United States in the Panama Canal to June 30, 1933, was \$539,000,059.23, which includes the purchase of rights, payments to Panama, 1913 to 1921, inclusive, and interest at 3 per cent. per annum on construction funds. Beginning with the fiscal year, 1922, the annual payment of \$500,000 to Panama has been charged to operation. The total net revenue from the operation of the Canal and its adjuncts to the end of the fiscal year, 1933, was \$177,799,555.60, exclusive of interest on the capital investment.

The Canal was opened to commercial traffic Aug. 15, 1914, and was closed from Sept. 18, 1915, to April 15, 1916.

Fiscal Year	No. of Transits.	Canal. Net Tons	Cargo Tons

1933	4,494	22,821,876	18,777,728

The canal is fifty statute miles long (44.08 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. It contains 12 locks, and transit from sea to sea occupies about 8 hours (passage through locks 4 hours). The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The

water depth when the surface of Gatun Lake is at 85 feet above sea-level varies from 85 feet in some parts of Gatun Lake to 41 feet in the Atlantic entrance. The depth through Culebra Cut is 45 feet.

Foreign Countries.

The following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Courts, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies, Legations, and Consulates-General in London for various corrections and additions.

The Salaries and Allowances of Officers of H.M. Diplomatic, Commercial and Consular Services are fixed in accordance with the scale shown below:—

Salaries and Allowances.

Rank.	Salary	Representation Allowance	House Rent Allowance
<i>Diplomatic Service</i>			
1st Secretaries	1,200-1,500	300-1,100	300-525
2nd Secretaries	800-1,000	250-700	250-437
3rd Secretaries	300-600	150-650	150-437
<i>Commercial Diplomatic and Consular Service</i>			
Commercial Counsellors	1,700	300	250
Commercial Secs., Grade I		300	250
1st Secs. of Consulates	1,200-1,500	300	
Consul-General		300	250
Commercial Secs., Grade II	800-1,000	250	200
Inspectors and Consuls	600-800	100	100-200
Commercial Secs., Grade III	300-600	50-150	100-200
Vice Consuls			

AFGHANISTAN.

(Pushtunah.)

King of Afghanistan, H.M. Mohamed Zahir Shah, born 1914, acceded Nov. 8, 1923 (on the assumption of his father, King Nadir Shah).

Minister in London, H. E. Sardar Ali Mohammad Khan, 31 Princes Gate, S.W. 7.

Afghanistan lies on the N.W. frontier of India. The estimated area is 245,000 sq. miles, and the population is estimated (1933) at about 11,000,000.

Afghanistan is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus on the branch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khannab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures. The population is very mixed. The Duranis have predominated since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashes, who belong to the Shiite sect. The national tongue is Pushtu, but Persian is more universally spoken.

Afghanistan is divided into five major provinces, Kabul, Mazar, Kandahar, Herat, and Badakshan (with Qataghan, Kafirstan (now Nuristan), and Wakhan), and four minor provinces, the Eastern, Southern, Furai, and Maimana. Each province is under a Governor (called in major provinces *Najib-ul-Hakumah*, and in minor provinces *Hakim-i-Aala*). Amir Abdurrahman (1880-1901) established a strong central government, with a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself. Considerable quantities of rifles and artillery have been purchased in Europe and the army now consists of about 35,000 to 45,000 regulars. A small Air Force is maintained. Factories for arms and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are based on the "Shariat," or Islamic law and tribal custom. Recently steps have been taken to develop education, hitherto controlled by the mullahs. Two schools under French and German superintendence respectively have been opened and a large number of middle and primary schools in the provinces. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woollen, and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, and gold are found.

The following roads are fit for motor traffic, except after snow or heavy rain, but are mostly unmetalled — Kabul-Khyber; Kabul-Gardez; Kabul-Kandahar-Chaman; Kandahar-Pasahlerat (sometimes impassable, owing to lack of bridges); Kabul-Bamian; Kabul-Mazar-i-Sharif (opened in 1933) and Mazar-i-Sharif-Maimana-Herat.

Goods are still chiefly conveyed by pack animals. The chief trade routes to India are the Khyber Pass route, from Kabul to Peshawar (220 miles), and the road from Kandahar to Chaman (70 miles). The exports to India are mainly timber, carpets, fruits, raw wool, skins and *ghis*; while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, and sugar. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £3,250,000. There are taxes on land, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories, and mining royalties.

As the result of a British mission to Kabul in 1904-5 the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence. The Amir Habibullah Khan was assassinated on February 20, 1919; his brother,

Nasrulla Khan, seized the throne by a *coup d'état* and temporarily held the reins of government at Kabul, but the Amir's third son, Amanulla Khan, soon after declared himself, and was recognised as King. Afghan troops crossed the Indian frontier on May 2, 1919, on which the Indian Government took immediate steps to expel them; fighting followed and Dacca was occupied by British troops, but overtures were made by King Amanulla and a treaty of peace was signed in August. By this treaty Afghanistan is left officially free and independent. By treaty of Nov. 22, 1921, Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognise boundaries then existent, subject to a slight re-adjustment near the Khyber; to receive Legations at London and Kabul and consular officers at Delhi, Calcutta, Karachi, Bombay and Kandahar and Jaisalabad respectively. The Afghan Government import free of customs duty such material as is required for the strengthening of their country. A Trade Convention was concluded and Afghanistan adhered to the International Postal and Telegraphic Union. In 1929 Amanulla Khan, whose modernist reforms had brought on him the charge of infidelity, was expelled. After a usurpation of some months by a local freebooter Kabul was captured (Oct. 1929) by Nadir Shah.

CAPITAL, Kabul (about 80,000). The chief commercial centre is Kandahar (60,000). Other provincial capitals are Herat (30,000), Mazari-Sharif (20,000), and Khanabad (5,000).

FLAG: Black, with white device in centre.

British Envoy Extraordinary and Minister Plenipotentiary, Sir Richard Roy Macdonachie, K.D.E., C.I.E. (1929).

Comptroller, Capt. H. L. Mallam.

Military Attaché, Maj. A. E. Farwell.

Surgeon, Capt. E. S. S. Lucas.

Secretary, Capt. E. W. Fletcher.

Oriental Secretary, Khan Sahib Sikander Khan. *British Consul at Jelalabad*, Mufi Abdullatif Khan.

British Consul at Kandahar, Khan Bahadur Sayyid Siddiq Hassan.

ALBANIA.

(Shqipëria.)

King of the Albanians, Zog I, born Oct. 8, 1895; elected *President*, Jan. 31, 1925; proclaimed *King*, Sept. 1, 1928.

Prime Minister (Mch. 4, 1930), Pandell Evangeli. *Minister for Foreign Affairs*, Dajfer Villa.

Minister in London, (vacant)

Chargé d'Affaires, M. Fuad Aslani.

Legation, 36 Egerton Gardens, South Kensington, S.W. 3. (Kensington 1755).

Sec. of Legation, Çatlu Saraçi.

Consul-General in London, Edwin Crippwell, 229, Finsbury Pavement, E.C. 2. (Met. 8615.)

Albania (the former Turkish Province of Scutari and parts of Kossovo and Yanina) lies on the west of the Balkan peninsula of south-eastern Europe, the western boundary being the Adriatic; total area about 11,000 to 12,500 sq. miles; total population (Census of 1930) 1,002,104. The political neighbours are, on the north and east, Yugoslavia, and on the south-east and south, Greece. Albania was declared independent by

a National Assembly at Valona, Nov. 28, 1912, and its independence was confirmed by the *Treaty of London* of Dec. 20, 1912. The first King of Albania (Prince William of Wied) abandoned the throne in Sept. 1914, having been in power only six months, and during the Great War the country was invaded by troops of the Central Powers and of the Allies, and remained in a state of anarchy. After the Armistice a National Council at Durazzo established a provisional government, supported by an Italian military occupation of the country. The independence of the country was reaffirmed and guaranteed by the Supreme Council of the Allies. The provisional government was in power until 1920, when a revolt overthrew it and set up a new government which remained in power until upset by a further revolution in December, 1924. A new Constitution was proclaimed on Jan. 21, 1925, under which Albania became a Republic under a President (elected for 7 years), with a Council of Ministers, a Senate, and a House of elected Representatives. On Sept. 1, 1928, the Constituent Assembly proclaimed the country a democratic monarchy and offered the crown to Ahmed Bey Zog, the President, who assumed the title of Zog I, King of the Albanians; the Senate then ceased to exist, and a High Council of State was formed of 20 members appointed by the King.

The country is very primitive, agriculture and sheep and goat rearing being the principal industries, and olives and olive-oil, grains and tobacco the principal products, but there is some mineral wealth which remains largely undeveloped. A harbour, under construction at Durazzo to accommodate vessels up to 7 metres draft alongside the quays and 4 metres elsewhere, is expected to be completed in the summer of 1933.

BRITISH LEGATION.

(Rruga Tomorica, Durazzo.)

British Envoy Extraordinary, Minister Plenipotentiary and Consul-General, Sir R. M. Hodgson, K.D.E., C.M.G. (1928) £2,425. *Naval Attaché*, Captain R. B. Ramsay, M.V.O., R.N.

Asst. do., Eng.-Com. F. V. Stopford, R.N.

Military Attaché, Col. H. R. G. Stevens, D.S.O.

Air Attaché, Group Capt. T. G. Hetherington,

C.B.E.

Archivist, F. W. Borman.

Albanian Secretary (local rank), Triphoni Toul.

* In July, 1931, the Albanian Government accepted the offer of the Italian Government of annual loans of 20,000,000 Gold Francs, maximum for 20 years, making a total maximum of 200,000,000 Gold Francs, from 1931.

BRITISH CONSULAR OFFICER.

Durazzo—Vice-Consul (local rank of and Secretary), Edward H. J. Hadwen.
„ Pro-Consul, F. W. Borman.

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,500; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel. The franchise was enlarged after a bloodless revolution in April, 1933.

FLAG: Three horizontal bands, azure, yellow, red; crown on yellow band.

ARABIA.

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E. long and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from Akaba, at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus enclosing the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,300,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, and Dahna deserts), and the total population is believed to be about 5,000,000. The various Arab States are shown below.—

THE KINGDOM OF SAUDI ARABIA.

King of Saudi Arabia (Jan. 8, 1926), H. M. Abdul Aziz Ibn Abdul Rahman al Faisal Al Saud, G.C.I.E., born 1880.

Heir Apparent, H.R.H. Prince Saud Ibn Abdul Aziz Ibn Saud, born 1905.

Minister in London, His Excellency Sheikh Hafiz Wahiba, 43 Eaton Place, S.W. 1. (Shi'ane, 3898.)
1st Sec., M. Mahmood Riyad Zaid.
and Sec., M. Youssef Sal omia.

In the 18th century Nejd was an independent State and the stronghold of the Wahhabite sect. It subsequently fell under the Turkish yoke, but in 1913 the present King threw off Turkish rule and captured from the Turks the Province of Hasa. In 1921 he added to his dominions the territories of the Rashid family of Shammar, which he captured by force of arms, and in 1925 completed the conquest of the Hejaz, and accepted the surrender of the greater part of Asir, the whole of which is now *de facto* part of the Kingdom.

Nejd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahna Deserts, and reaches eastward to the

Persian Gulf (Hasa). The population is largely nomadic and is estimated at 1,275,000 Arabs, negroes and half-breeds, the majority being Muhammadans of the Wahhabite movement. There is little agriculture, but wheat and barley are grown; the principal industry is camel and sheep raising. The exports are woven cloaks, dates, live stock, hides and skins. The capital is Riyadh, and the principal trading centres are Hufuf, on the Persian Gulf littoral (30,000), Shaqra, Anaisah, Buraida, Hail and Haula (Central), which have populations of 8,000 to 10,000. The only ports (Persian Gulf) are Qatif and Uqair, which are suitable only for sailing craft. Riyadh is a station on the Pilgrims' trans-Arabian caravan route from Hasa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahhabis.

The Hejaz extends from Asir in S. to Transjordan in N., and from the Red Sea, the Gulf of Akaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 350,000 to 400,000, including many nomad tribes. On the coast are the small ports of El Wedji, Yanbo, Rabigh and Jeddah (the chief port of the country and the pilgrims' port), which contains the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the course of the Hejaz Railway. The *Oases of Khubar*, east of the railway, contains a considerable population, descendants of former negro slaves, with a centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. *Medina (Al Medina, "The City"),* 800 miles by rail from Damascus, and the present terminus of the Hejaz Railway, has a permanent population of about 20,000, and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabi'a, A.H. 12). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. *Mecca*, the birthplace of the Prophet, is 55 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a fixed population estimated at 60,000. The city contains the great mosque surrounding the *Kaaba*, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. *Jeddah*, the principal port, has a considerable trade in hides, mother-of-pearl, coffee and carpets. The course of the *Hejaz Railway* runs from Medina in S. through the Syrian Desert to Damascus and Beirut, and is connected with the projected Baghdad Railway at Aleppo.

Asir extends, geographically, from a line drawn inland from lith on the southern limit of Hejaz to the northern boundary of Al Yemen (about lat. 17° 15' N.) and includes the seaboard down to lat. 16°. Its breadth extends about 180 miles eastwards to Bishah in the north and to the boundary of the Beni Yam in the south. According to Arabian geographers, Asir is part of Al Yemen. The territory includes the Farsan Islands. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. The capital is Sabia, a small inland town.

The total cost to the British Government of

the subsidies paid to King Ibn Saud during the years 1917 to 1923 is approximately £542,000. No subsidy was paid before 1917 or after 1923, and the subsidy was given in the first instance in consideration of assistance in the war against Turkey. The later payments were made subject to the following conditions:—

(1) That Ibn Saud refrained, and restrained his adherents from aggressive action against the Hejaz, Kuwait, and Iraq.

(2) That he afforded co-operation in the matter of the Hajj (pilgrimage to Mecca) by maintaining the safety of pilgrim routes to his territory.

(3) That he consented to be guided generally by the wishes of His Majesty's Government in regard to his foreign policy, and to co-operate with them in promoting their own policy, which had for its object the maintenance of peaceful conditions in Arab countries and the promotion of the economic interests of both parties.

No terms of repayment were suggested.

By the Treaty of Jeddah (May 20, 1927) Great Britain recognized Ibn Saud as an independent ruler, King of the Hejaz and of Nejd and its Dependencies.

FLAG: Green square with narrow white band at staff; white device on square.

CAPITAL, Riyadh.

British Envoy Extraordinary, Minister Plenipotentiary and Consul-General, Sir Andrew Ryan, K.B.E., C.M.G. (1930).

Jeddah—Vice-Consul, A. S. Culvert (with local rank of 2nd Secretary); G. W. Furlonge (with local rank of 3rd Secretary); A. C. Oppenheim (with local rank of 3rd Secretary); Munshi Ihsanullah.

Pro Consul, Basil W. Seager.

THE PRINCIPALITY OF KUWAIT.

Ruler, Sheikh Sir Ahmad al-Jabir as-Sabah, K.C.I.E., C.S.I., born 1885, acceded March, 1921.

Kuwait (or Koweit) has been semi-independent for many years, and is in treaty relation with British India. It extends along the shore of the Persian Gulf from Mesopotamia to Saudi Arabia (El Hasa). The important harbour and gulf port of Kuwait, the capital (pop. 60,000), is an entrepôt for goods for the interior, and for the export of horses, pearls, wool, &c. It was designated as the terminus of the Berlin-Constantinople-Baghdad railway as originally projected in 1903. The trade of Kuwait (1929-30) was valued at £71,825 for imports, and £182,900 for exports.

British Political Agent, Lt.-Col. H. R. P. Dickson, C.L.E.

THE SULTANATE OF OMÂN.

Sultan, H. H. Sayyid Said bin Taimur, born Aug. 13, 1910, etc. Feb. 10, 1932.

Omân (area undefined; estimated pop. 550,000) is a Muhammadan State in S.E. Arabia. Its seaboard is nearly 600 miles long, and extends from 'Ibbat (on the W. side of Cape Musandam) round Ras Rajir (200 miles N. of Socatra) with the exception of a small strip of the E. coast of the Musandam Peninsula from Dibbah to Khor Kalba, which is in the administration of the minor chiefs of Trucial Oman. The Sultanate extends inland to the borders of the Great Desert, but of late years the Omanis have become autonomous and are now subject to the Imam of Omân.

The interior is for the most part mountainous, the high country extending down to the sea coast in a series of arid rocky heights, though

vegetation exists on the higher mountains. N.W. of Muscat the sea coast littoral tract is fertile and prosperous, and date groves extend along it for over 100 miles. This strip is known as the Batlinah Coast. The remainder of the coast, with one notable exception, is barren and forlorn and rarely visited by Europeans.

Guadur, a port on the Makran Coast, and a small tract of country round it, also owns allegiance to Muscat. It is the last remnant of the Omani possessions on the Persia side of the Gulf. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent at his capital. The Sultan is pledged not to cede territory to any Power but the British Government. Muscat has a considerable trade, amounting in 1931-32 to Rs. 5,444,445. Dates and dried fish are the chief export, and rice, wheat, coffee, cotton and silk goods the chief imports. The capital, Muscat (with the sister town of Matrah), has an estimated population of 12,500.

Muscat—British Consul and Political Agent, Major C. E. V. Bremner, M.C., I.A., 1st member Rs. 2,400.

THE IMAMATE OF YEMEN.

Imam, Yahya Muhammad Hamid-ud-din, born 1869.

Yemen occupies the S.W. corner of Arabia between Aden and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 2½ millions. Under Turkish rule, it was divided into the vilayets of Sana, Taiz, and Hodeida, and it extends inland to the borders of the Hadramut. The highlands and central plateau of Yemen, and the highest portions of the maritime range form the most fertile part of Arabia, where wheat, barley, millet, coffee and oats, are extensively grown. The chief port of Yemen is Hodeida which is noted for the export of coffee, shipped from Hodeida to Masawa and Aden, and thence to Europe. The trade from Yemen perhaps exceeds that of the remainder of Arabia. The Imam is the head of the Zaidi sect of the Shiah Division of the Muhammadan religion; about half of his subjects are Zaidis, the remainder being Shafais, over whom he rules by force majeure alone. On the withdrawal of the Turks from Yemen, the Imam took over occupation of the territory bordering on the Aden Protectorate populated by the Shafai sect of Sunni Muhammadans, and also the 'Ibbama, or coast lands, from S. of Hodeida to Sheikh Said. Since 1920 the Imam of Yemen has been gradually encroaching on the Aden Protectorate, which is populated by tribes of the Shafai sect, but has now been ejected by air action from Aden, in support of the Protectorate tribes. In 1925, the Imam occupied Hodeida, which had been evacuated by the Idrisi, and later took the ports of Midi and Loheiya, together with the intervening country between the highlands and the coast, all of which is populated by Shafai tribes. The rule of the Imam is very unpopular with the Shafais owing to his exactions. About 60 miles to the south of Sana is the town of Dhammar, an ancient seat of learning.

CAPITAL, Sana; population, about 40,000.

BAHRAIN.

Ruler, H. E. Shaikh Hamid bin Isa Al Khalifah, C.S.I.; acceded Dec. 9, 1932; proclaimed Feb. 9, 1933.

Financial Adviser, C. Dalrymple Belgrave.

Political Agent, Lt.-Col. Gordon Loch, I.A.

Asst. to do., Khan Bahadur Abdul Hali Elhashimy.

Bahrain is the largest of a group of islands (Bahrein, Manamah, Muharra, Sitra, Nabi Saleh and some uninhabited islets) half way up the Persian Gulf near the Arab Coast (El Hasa). Bahrain is the headquarters of extensive pearl fisheries and a distributing centre for the adjacent mainland. Pearls are the principal export, varying in value from 2 to 2 millions sterling per annum. The principal imports are rice, cottons, dates, sugar and spices. The Bahrain Petroleum Company have been prospecting and have met with some success since they commenced operations in 1930. The people (about 115,000) are Muhammadans. Bahrain has been in treaty relations with the Government of India since 1880. In 1880 the ruler engaged not to make treaties with any other state and in 1923 the active control of affairs was handed over to the present regent.

CAPITAL, Manama; population, about 25,000.

THE HADRAMUT TRIBES.

The coastal region of Southern Arabia, between Yemen and Aden on the west and Oman on the east, and extending inland (northwards) to the Dahna Desert, contains a coastal strip of some 550 miles. Parallel with the coast (at a distance of 50 miles from the Arabian Sea) is an extensive plateau inhabited by the Hadhram, an ancient people of Arabian stock (Hadhram was the son of Joktan, *Genesis* x, 27). There are many settlements on the coast and in the interior, but the latter are being steadily enveloped by the sand of the northern desert. There are sacred shrines near Kasm (Qabr Hind) and Shubun (Qabr Salihi). The eastern districts, known as Mahra and Gara, are very sparsely populated. The estimated area of Hadramut is 82,000 sq. miles, and its Muhammadan population, of independent Arab tribes, is estimated at 150,000. The most important Coastal Chief is the Sultan of Shehr and Mokalla (H.H. Sultan Omar bin Awadh) who is in treaty relations with Great Britain. Inland, the most important tribe is the Kathiri, whose chief towns are Saiyun and Terim. The Kathiri are noted as travellers and traders, and many of them are settled and carry on commerce at Singapore and Java. A long-standing feud between the Kathiri and the Qa'iti (by whom the former were expelled from the coast) was settled by treaty in 1919 on the initiative of the Aden Government. Under this Treaty the Qa'iti Sultan of Mokalla permits access to the port of Mokalla on the part of Kathiri traders. Agriculture and cattle raising are the principal industries, together with the cultivation of dates, indigo and tobacco.

TRUCIAL COAST.

The independent tribes on the *Pirate Coast*, which partly encloses the Persian Gulf from Ras-al-Khaimah to Odaid, are bound under treaties with the Government of British India

to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1892 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the coast ports largely consists in exports of pearls to India via Lugal and Bahrain.

ARGENTINE REPUBLIC.

(República Argentina.)

President, General Augustin P. Justo, assumed office, Feb. 20, 1932.

Vice-President, Dr. Julio Roca.

Min. for Foreign Affairs, Dr. Carlos Saavedra Lamas.

Interior, Dr. Leopoldo Melo.

Finance, Dr. Federico Pinedo.

Justice and Public Instruc., Dr. Manuel de Iriondo.

Agriculture, Dr. Luis Duhaou.

War, Col. Manuel A. Rodriguez.

Navy, (vacant).

Public Works, Dr. Manuel R. Alvarado.

Ambassador in London, His Excellency Señor Dr. Don Manuel Mallbran, G.B.E., 11 Leowndes Square, S.W. 1.

Counsellor, Señor Don Carlos Miguens, G.B.E.

First Secretary, Señor Dr. Don Pablo Santos Muñoz.

and Secretary, Señor Dr. Don Mariano A. Barrenechea.

Military Attaché (vacant).

Naval Attaché (vacant).

Attaché and Legal Adviser, Señor Dr. Don Ricardo Q. Blamey Lafone.

Agricultural & Commercial Counsellor, Señor Dr. Don Anibal Fernandez Beyro.

Counsil-General, Señor Don Mario Molino Salas, 7 Gower Street, W.C. 1.

There is a Consulate-General at Dublin, and there are also Consulates at Liverpool, Southampton, Cardiff, Newcastle-upon-Tyne, Newport, and Glasgow; and Vice-Consulates at Aberdeen, Belfast, Bristol, Hull, Manchester, Middlesbrough, and Swansea.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 3,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. (For the sta. of Christ the Redeemer see Chile.) On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries; on the east are the great plains, those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas, which together constitute *La Plata*, extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of

Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 2,000 ft.) and the Sierra Ventana, near Bahia Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluences with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 10 territories, comprising in all about 1,132,000 square miles, with a population of 11,846,655 in 1932. Immigration is encouraged, and comes principally from Spain and Italy, but legislation, introduced in 1919, requires intending immigrants to produce certificates of good character and ability to work. In 1931 the immigrants numbered 353,829, and the emigrants numbered 337,113. The climate is moderate. Spanish is the language of the country.

Government.—The estuary of La Plata was discovered in 1515 by Juan Diaz de Solis, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9) the Independence of Argentina was declared by the Congress of Tucumán. In 1853, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well-governed and progressive Republic. The constitution dates from 1853 (revised 1899) and is modelled on that of the U.S. of America, but each province enjoys practically complete autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members and of a House of Deputies of 128 members. Members of Congress receive \$18,000 (paper) *per annum*.

Production.—Of the total area about one-third is suitable for agriculture and cattle raising. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, and horses. There were (1930) 32,211,855 cattle, 44,413,211 sheep, 9,828,111 horses, 1,039,420 mules (1930), 5,647,356 goats (1930), and 3,768,738 pigs (1930). The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, copper, manganese, and wolfram. In 1932 the exports of wheat were 3,441,882 metric tons, oats 715,621, casein (1932) 17,680, cotton (1932) 28,272 tons, linseed 5,027,609, maize 7,055,387 metric tons, butter (1932) 25,363 tons, wool (1932) 121,205 tons, sheepskins (1932) 20,251 tons, chilled meat (1932) 379,634 tons, frozen meat (1932) 35,660 tons, frozen mutton and lamb (1932) 70,631 tons. Oil has been found in various parts of the Republic and is worked to a considerable extent in the neighbourhood of Comodoro Rivadavia, in the Department of Escalante. The Argentine State Oilfields produced 902,255 cubic metres in 1932; the out-

put of private companies was approximately 1,286,576 cubic metres in 1932.

Communications.—There were (1932) 24,858 miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £234,000,000 of British capital. Telegraphs about 75,250 miles, mostly Government lines. There are 22 wireless stations, of which one is reserved for communication between England and the Argentine. There are aeroplane services between Argentine centres, neighbouring Republics and Europe and North America. The principal ports are Buenos Aires, Rosario, La Plata, and Bahia Blanca. In 1932, 2,744 vessels (20,128,146 net tons) entered at all ports; of the total, 4,395,198 net tons (43·38 per cent.) were British.

Defence.—The Navy consists of a super-dreadnought battleships (reconstructed in 1925), 5 destroyer leaders, 4 destroyers, 4 coast defence ships and auxiliary vessels, a light cruiser, and 3 submarines. Strength about 800 officers and 14,000 men. The principal naval base is at Puerto Belgrano, near Bahia Blanca, and there are minor bases at La Plata and Buenos Aires, while a new submarine base is being built at Mar del Plata. The naval aviation base is at Puerto Belgrano, with a subsidiary base at Punta Indio. The Army is organised in 5 divisions and numbers about 1,500 officers and 25,000 men on a peace footing. Each division would consist of about 40,000 men on a war footing. The military aviation bases are at El Palomar (B.A.), Los Tamarindos (Mendoza), and Parana (Entre Rios). In 1933 the military air force consisted of 3 Reconnaissance Groups, a Fighter Group, and a Light Bomber Group; there is an aircraft factory at Cordoba.

Education.—Primary Education is secular, free and compulsory from the ages of 7 to 14. The scattered population of the country districts constitute a problem in attendance which is being gradually solved. Secondary Education is controlled by the National Government in National Colleges, numbering 57 in 1929, with 17,600 students, average annual fees \$45 (paper); in Normal Schools, numbering 86 in 1923, with 30,000 students who pay no fees; and in 60 Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are National Universities at Cordoba, Buenos Aires, La Plata, and Tucuman, and Faculties at Santa Fe, Rosario and Paraná.

Odo Neustädter-Stürmer.

Minister in London, Baron George Francken-

stein, 18 Belgrave Square, S.W. 1.

Counsellor, Baron Lothar Wimmer

Secretary, Count Max Attens

Consul-General, Sir Charles D. Selgman.

Prior to the War the Austrian Empire, joined

to the Kingdom of Hungary, was the largest

Empire, next to Russia, on the continent of

Europe, situated between 42°-51° N. lat. and

9° 30'-26° 20' E. long. It embraced an area of

240,456 sq. miles, and a population (1914) of

nearly 53,000,000. At the conclusion of the

Great War, the territories of Austria comprised

an area of 32,175 square miles with a population

(1923) of 6,534,451 (estimated Dec. 31, 1927, at

6,678,527). Before the armistice of Nov. 11,

1918, the Hungarians, Czechoslovaks, Poles,

Jugoslavs and Rumanians had seceded from the

"Dual Monarchy." The Emperor Karl "with-

drew from the exercise of government" by

proclamation (Nov. 11, 1918) and a Republic of

"German Austria" was declared Nov. 12, 1918.

Under the *Treaty of St. Germain* (Sept. 10,

1919) the political neighbours of Austria are

Germany and Czechoslovakia on the N.; Italy

and Yugoslavia on the S.; Switzerland on the

W. and Hungary on the E.

Under the new Constitution (Nov. 1920),

Austria became a Republican Federation of eight

Provinces:—

Province	Area (sq. miles)	Population 1927.
Lower Austria and Vienna ..	7,560	3,359,082
Upper Austria	4,627	928,006
Carinthia	3,679	403,722
Styria	6,320	1,025,475
Salzburg	2,765	237,384
Tyrol	4,881	338,491
Vorarlberg	1,010	150,231
Burgenland (West Hungary)	1,533	300,234
Total	32,175	6,732,625

Under the Constitution the Bundesrat and Nationalrat were constituted; a government formed, and a President elected; Vienna was later formed into a separate Province. The elections resulted in a majority for the *Christian Socialists* over the *Social Democrats*, the *Pan-Germans* coming next in order. In June, 1921, the Ministry resigned in favour of a non-party Government, which gave way (May, 1922) to a Christian Socialist Pan-German Coalition Government under Doctor Seipel (a priest). Elections were held again in October, 1923, March, 1927, and November 1930 and a similar Government was returned on each occasion. Since March, 1933, Parliamentary Government has been in suspense.

Complete religious liberty is one of the fundamental laws of the new Republic. The prevailing religion is Roman Catholic.

Defence.—During the War of 1914-18 about 5,000,000, all ranks, were passed into the common Army of Austria-Hungary. The total casualties exceeded 2,500,000, of whom over 700,000 were returned as killed. Under the *Treaty of St. Germain* the military, naval and air forces were demobilised and reduced to minimum requirements and all warships were surrendered to the Allies, those under construction being broken up. Service in the Republican Army is by voluntary enlistment for twelve years.

Education.—Primary education is compulsory and free, the children in attendance at schools numbering about 720,000 in 1927. Secondary education is provided in gymnasia, and real-schools and there are universities at Vienna, Graz and Innsbruck.

Finance.—The finances of Austria went from bad to worse for four years after the Armistice, owing to heavy deficits and incessant inflation.

The deficit on the State Budget was estimated in July, 1922, at considerably more than one billion crowns, and by Oct. 1922, the exchange value of the crown had sunk to about one-fifteen-thousandth of its nominal value, £1 being equal to 325,000 crowns (in place of 24'22). The circulation on Sept. 30, 1922, was over two billion crowns. In September and October, 1922, the League of Nations worked out a scheme for the restoration of the Austrian finances within two years under the control of a High Commissioner appointed by the League, the Governments of Great Britain, France, Italy, and Czechoslovakia agreeing to guarantee four-fifths of a loan of 520,000,000 gold crowns (about £25,000,000) in order to fill the deficit in the Budget during the two years. The guarantees for the remainder were given by other powers and a short term loan of £3,500,000 was issued in March, 1922. In the following June the big League of Nations loan was successfully floated, nearly one half in London, about £5,000,000 in New York, and the rest in various continental capitals. The sum actually received amounted to over £26,500,000. About £11,000,000 was used to repay the previous short term loans issued in 1922 and 1923. The High Commissioner, Dr. Zimmermann, appointed by the League of Nations to supervise the carrying out of their scheme for the reconstruction of Austria, entered on his office in Dec. 1922. Great progress has been made since in reducing Government expenditure and increasing the revenue. Thus about 79,000 superfluous officials were dismissed or pensioned off by the end of December, 1924, and on the completion of the work of reconstruction Dr. Zimmermann left Vienna in July, 1926. The issue of uncovered bank-notes was stopped on Nov. 18, 1922, and the Austrian crown was stabilised at about 18 345,000 = £1. In 1925 a new currency was introduced, the unit being the Austrian *schilling* (=10,000 paper crowns), the rate of exchange in Sept., 1923, being 34 56 sch. = £1 sterling. Since the Armistice (Nov. 11, 1918), the British Government has advanced about £20,000,000 to the Republic. The favourable condition of the Austrian State lasted until 1929, but in 1930 there was a small deficit on working account and in 1931 measures were passed to reduce expenditure and increase revenue.

	1931.	1932.
Receipts.....	2,008 5	1,909 0
Current Expenditure ...	2,232 2	1,918 2
Working Deficit	223 7	9 2
Capital Expenditure	98 3	5 8

Since 1930 Austria is being continuously affected by the general trade depression which causes an increase in the number of unemployed, a falling off in production and foreign trade, and a decline in the revenue. In May 1931 the leading bank, the Oesterreichische Credit Anstalt, got into difficulties and had to be supported by the Government. In order to relieve the strain on the Austrian National Bank, the Bank of England advanced £4,300,000 to the Austrian Government on June 16. In August 1931 the Austrian Government applied to the League of Nations to make an enquiry into its situation, and experts were sent; at the Conference of Lausanne (1932) the offer was made to facilitate the raising of a loan of not more than 300,000,000 sch. for Austria, under certain conditions, to which the Austrian Government

subsequently agreed, and this loan was issued in August 1933.

	1931.	1932.

Total Exports	1,326 7	783 8
Imports from U. K.	75 7	37 4
Exports to U. K.	93 2	28 5

Communications.—In Sept., 1923, there were about 4,140 miles of railway (exclusive of narrow gauge lines). The mercantile marine was considerable in 1924, but the new Republic is land-locked.

Industries.—The principal industry is agriculture, the chief products being wheat, barley, oats, rye, maize, and potatoes. Forestry and stock raising are important. The forests are principally coniferous trees. The live-stock includes horses, cattle, sheep, pigs, and goats. The vine is extensively cultivated. The most important mineral production is that of iron ore, magnesite, and salt; there are also lead, zinc, copper, common and brown coal, and graphite. The principal manufactures are woollens, cottons, steel, wood-work, brewing, and machinery.

CAPITAL. Vienna, on the River Danube. Pop. (1931) 1,824,912; other large towns are Graz (152,706), Linz (102,081), and Innsbruck (56,401). **Flag:** Three horizontal bands, red, white, red.

Chancellor, N. Dondervorst.

A Kingdom of Western Europe, with a total area of 11,750 square miles and a population, Dec. 31, 1931 (including Eupen and Malmédy) of 8,213,449. Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea. The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper" signed by Austria, France, Great Britain, Prussia, the Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium, in violation of the terms of the treaty; the main object of this act was to turn the French frontier defences and reach Paris before French resistance could be organized, but the Germans were foiled by the heroic defence of the forts at Liège, which gave the French and English armies time to establish contact and block the way to Paris. The invaders, however, ultimately over-ran nearly the whole of Belgium, and the Belgium army was entrenched during the remainder of the war period behind the river Yser. The Germans were ousted from the country shortly before the armistice of Nov. 11, 1918. About 10,000 persons were added in 1919 by the cession of Moresnet and part of Malmédy by Germany, and the district of Eupen, with the remainder of the district of Malmédy, were ceded by Germany and annexed by Belgium (Sept. 20, 1920) after a plebiscite, thus adding a further 50,000 to the inhabitants. In addition, the Grand Duchy of Luxemburg joined Belgium in an economic union when it ceased after the war to form part of the German *Zollverein*.

Belgium is inhabited by two distinct races, the Flemish, of Germanic stock, and the Walloons, of Latin stock. Flemish is spoken in the provinces of West Flanders, East Flanders, Antwerp, Lunenburg, and the northern half of Brabant, and French in the provinces of Hainaut, Namur, Luxemburg, Liège, and the southern half of Brabant. The town of Brussels is bilingual, and the upper classes everywhere speak French. The official languages are both Flemish and French, and also German in the districts

acquired after the war. Nearly all the inhabitants are, at least nominally, Roman Catholics.

Belgium has a frontier of 831 miles, and a seaboard of 48 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,130 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of 50° F. (summer 65°, winter 37°).

GOVERNMENT.—The constitution jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 154 senators (with the exception of 40 elected by the provincial councils and 20 elected by the senators themselves) and 187 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. In April, 1919, the Belgian Parliament decided as an emergency measure to hold 1919 elections on a "one man one vote" basis for Senate and Chamber. (Unmarried widows of soldiers killed before Jan. 1, 1919, or failing widows, the mothers; widows or mothers of civilians shot by enemy; women imprisoned by enemy for patriotic acts, also voted.) This Parliament, anomalous, and unconstitutionally elected, was required to make constitutional the machinery by which it was elected; i.e., to revise article 47 of the Constitution. This was done (Feb. 7, 1921) and a new Chamber was elected in 1925. The present Chamber (elected in Nov. 1932), consists of 79 Catholics, 24 Liberals, 73 Socialists, 8 Frontists (extreme Flemish Nationalists), and 3 Communists. Deputies receive 42,000 francs a year and a free pass over the railways. There are in addition representative Provincial and Municipal Councils, elected on a somewhat more liberal franchise.

PRODUCTION.—Agriculture and forestry are important industries, the chief crops being oats, rye, wheat, potatoes, barley and sugar-beet. Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgic (Mons, Charleroi, Liège, Namur, Hainaut, Brabant, and Limbourg), glass, textiles (Ghent and Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c.

DEFENCE.—In 1928 a new Recruiting Law was passed, curtailing compulsory service for an average of 22 months, including rappels. The annual contingent is fixed at 44,000, and the Army consists of a Field Army of 3 Corps, each of 5 Divisions, and a Cavalry Corps of 2 Divisions.

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 134 State high schools, including 44 for girls, and numerous private institutions. Special

schools abound. The Universities of Ghent and Liège are maintained by the State; those of Brussels and Louvain are free institutions. After considerable opposition, Ghent University, which had in the past given its teaching and transacted its business in French, was in 1930 turned into a purely Flemish institution. It had already been made bi-lingual in 1923.

Revenue (1932)	France	9,086,853
Expenditure (1932)		11,504,843
Deficit (Dec. 31, 1932)		
Internal consolidated		27,241,221,225
External		26,358,272,978

Total		53,639,494,203
Internal floating		1,715,397,000
External		497,770,000

Total		55,854,661,203
Imports (1932)	France	16,424,375,000
Exports (1932)		15,130,450,000
Imports from U.K. (1932) ..		2,435,539,000
Exports to U.K. (1932) ..		2,340,314,000

The imports in 1932 were: manufactured articles (4,794,661,000 francs), raw materials (7,203,147,000), foodstuffs and beverages (4,158,871,000), and live animals (203,309,000); the exports were: raw materials (5,300,159,000 francs), manufactured articles (7,928,651,000), and foodstuffs and beverages (1,429,414,000) and live animals (152,392,000).

COMMUNICATIONS.—In 1931 there were 5,147 kilometres of normal gauge railways, 4,823 of which were operated by the National Railway Company; the length of light railways (narrow gauge) at the end of 1931 was 5,188 kilometres, 4,632 kilometres (of which 1,000 are electrified) being in operation. In 1930 there were 9,600 kilometres of telegraph line, with 48,000 kilometres of telegraph wire. The navigable rivers and canals have a length of 1,992 kilometres (1931), and there are 20,309 kilometres of State and provincial roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile—marine consisting (1931) of 162 vessels (529,747 tons), in addition to which there were (1930) 552 fishing boats. In 1931, 17,555 vessels entered at Belgian ports (tonnage 27,793,141). The principal port and commercial entrepôt is Antwerp, on the River Scheldt. Other ports are Ostend, Ghent, Bruges, Nieuport, Blankenburg and Zeebrugge. The vexed question of the navigation of the Scheldt, the mouth of which is entirely in Netherlands territory, has lately been the subject of negotiations between the Belgian and the Netherlands Governments, which have not yet (Nov. 1932) reached a conclusion.

The Capital, BRUSSELS, had a population (Dec. 31, 1930) of 885,924 (with suburbs). Other towns with over 100,000 inhabitants are Antwerp, the chief port (451,334); Ghent (208,539), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; and Liège (169,566) the centre of the iron industry. Brussels is 224 miles from London; transit, 8 hrs.

THE BELGIAN CONGO.

Governor-General, His Excellency Lieutenant General Auguste Constant Tiliens.

The Independent State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908. Situated between long. 22°-31° E. and lat. 5° N.-13° S., the colony comprises an area of 909,624 sq. miles, with a native population (1932) of 9,382,882. The European population (Jan., 1933) was 18,722, of whom 12,045 were Belgians, 1,320 Portuguese, 1,238 Italians, 1,207 British, 428 Greeks, 597 Americans, 396 French, 453 Dutch, 182 Swiss, and 766 others of various nationalities.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 249 miles in length. A narrow-gauge line runs from Ikoma to Tchela in the Mayumbe (86 miles). Above Leopoldville the river and its numerous affluents are navigable by steamer for about 7,000 miles, the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthierville (58 miles), and another from Kindu to Kongolo (355 kilometres). Another line from Kabalo to Albertville on Lake Tanganyika (170 miles) connects the West Coast of Africa with British East Africa and the East Coast. The Katanga-Bukama Railway (446 miles) links up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. The Bukama-Port-Franqui Railway (702 miles) commenced in 1923 and opened in 1928 makes it possible to travel by train direct from Cape Town to the river Kasai, a distance of 3,400 miles. This new route plays an important part in the export of copper from the Katanga mines, its possibilities being limited only by the capacity of the Port of Matadi. Other railways are Kindu-Kongolo (223 miles), Aketi-Bondo (95 miles), Charlesville-Makumbi (56 miles) and

Manono-Mayumba (32 miles), making a total for the Colony of 2,772 miles. A new line has been completed from Katanga to join the recently completed Benguela Railway in Portuguese Angola, and work has been started on a line from Stanleyville to Lake Albert which will provide the last link to direct river and rail communication between the Cape and Cairo. Regular air services are established from Boma to Leopoldville, Leopoldville to Stanleyville and Leopoldville to Port Francqui (fortnightly services in conjunction with Belgian European mail); and from Elisabethville to Broken Hill (to link up with Imperial Airways African Service). Motor roads total 26,127 miles. The most important motor road is the *Route Royale Congo-Nil* (553 miles) from Djambi, on the Rabi, to Redja, on the Nile. Another runs from Bukama (201 miles) Kanda-Kanda and Luabo to Djoko-Punda, on the Kasai (625 miles). A complete system of telegraphic communication has been established throughout the Colony and is connected with the international system.

The West Coast District has rather scanty rain (40 inches), but on the Mayumba Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Sleeping sickness, once very prevalent and destructive, is now decreasing. Extensive forests cover the central districts; oil palms are plentiful everywhere, and supply an ever-increasing trade in palm-oil and palm-kernels. Cotton, cocoa, rubber and coffee are successfully planted. The Colony is rich in minerals. Extensive radium deposits exist in the Katanga, where there are enormous deposits of copper, but the smelters have been practically at a standstill since 1931. Bukama is the centre of an extensive tin-belt, and alluvial and reef gold are found in the North-eastern Congo. Diamond-bearing gravels are worked in the south. The chief exports are palm-kernels and palm-oil, cotton, cocoa, gum-copal, rubber, ivory, copper, gold, tin, radium, and diamonds. Capital, Leopoldville (pop. 1,995 whites). Principal towns, Matadi (433 whites); Jadotville (Katanga) (pop. 2,997 whites); Stanleyville, Eastern Province (586 whites); Copulhatville (478 whites).

Revenue	1932	433,674,475
Expenditure		608,016,521
Debt		4,959,253,033
Imports		464,631,939
Exports		667,022,436
Imports from U.K.		39,648,000
Exports to U.K.		5,546,000

Ruanda and Urundi (ceded July, 1919) formed the N.W. corner of German East Africa from 5° S. lat. to the S borders of (British) Uganda and have an area of about 15,000 square miles, with an estimated population of 3,000,000. They lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The soil is poor, and the only exports are live-stock and hides. The administrative capitals are Nyanza (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi).

Leopoldville—Consul-General, Harold C. Swan.

" Vice-Cons., C. W. von Hirschberg.

Elisabethville—Consul, H. G. Willis.

Stanleyville — Vice-Consul, P. R. Morgan (acting).
Matadi—Vice-Consul, G. V. Richardson.

BHUTAN.

BOLIVIA.

(República Boliviana.)

President, Dr. Daniel Salamanca, born July 8, 1869; assumed office, March 4, 1931.

Vice-President, Señor José Luis Tejada Sorzano.

Envoy Extraordinary, Minister Plenipotentiary in London, Señor Don Carlos Victor Aramayo. 26 Grosvenor Place, W. 1.

Counsellor, Señor Don Mamerto Urriolagoitia.

1st Secretary, Señor Don Mariano Deheza.

Secretary (Specially Attached), Señor Don Eduardo Aramayo.

Attaché, Pastor Llobet.

Consul-General, Señor Don Mamerto Urriolagoitia. 26 Grosvenor Place, W. 1.

The Republic of Bolivia extends between lat. 8° and 23° S. and long. 57° 30' and 73° W., and its area is officially estimated at 514,400 square miles (other estimates giving an area of 708,125 square miles), with an estimated population of 3,066,815. The Republic derives its name from its liberator, Simon Bolivar (born 1783, died 1830).

The chief topographical feature is the great central plateau (6,500 square miles) over 500 miles in length, at an average altitude of 12,000 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illimani (Sorata), and Illimani, two of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamoré, and Madre de Dios.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosi are now worked only for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after that of the Straits Settlements, the largest in the world, while copper, antimony, wolfram, bismuth, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, Indian rubber, cacao, potatoes, cinchona bark, medicinal herbs, &c. Manufactures are in a very undeveloped state. The principal exports are tin and silver ores, crude rubber, copper ores, bismuth, lead ores, wolfram, wool, coca, hides, and antimony; the chief imports are iron and steel products, textiles, machinery, sugar, flour, and coal. There are (1929) 1,374 miles of railways in operation, and the construction of a line from Cochabamba to Santa Cruz, in two sections of 115 and 120 miles respectively is in the preliminary stages. There are 4,000 miles of telegraph wire, and wireless services between Riberalta, La Paz, Cochiza, Capatandi (Chaco). There is direct railway communication to the sea at Antofagasta (2 days), Arica (1 day), and Mollendo (2 days), and also to Buenos Aires (3½ days);

branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosí. Construction on the railway between La Quiaca (on the Argentine frontier) and Atocha (in Bolivia) is now completed. There is through railway communication with Buenos Aires from La Paz. Communication with Peru is effected by rail to Guayaquil and thence by steamer across Lake Titicaca to the railroad at Puno. The principal line is the Antofagasta and Bolivia railroad (719 miles), and a line from La Paz to the province of Yungas (the first section of which is open) may eventually connect with the steamers on the rivers Beni, Mamoré, and other tributaries. A line from Potosí to Sucre, the legal capital, is under construction, and trains run to Betanzos.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones, and Antofagasta by the "Pacific War" of 1879-1882 (see Chile). The Peace Army amounts to about 5,000, all ranks, the War Effective being about 105,000.

Consul-General in Liverpool, Senhor Luiz de Faro.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Álvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean; and extends between lat. 5° 10' N. and 33° 45' S. and long. 34° 45' and 73° 59' 22" W., being 2,327 miles from north to south, and 2,321 from west to east, with a coast-line on the Atlantic of 3,577 miles. The Republic comprises an area of 3,258,870 square miles, with a population (Census 1920) of 30,635,605, estimated at 39,103,856 in 1928.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Mato Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. In the extreme south, towards the interior, the land rises by gentle gradations to the height of 2,000 to 5,000 feet above sea level. The principal ranges are *Serra do Mar* in São Paulo; the *Serra Geral* (Capimão 9,363 feet) between Minas Geraes and Espírito Santo, the *Serra do Mantiqueira* (Itatiaia, 9,163 feet), and the *Serra do Espinhaço* (Itacolúma, 5,748 feet), in the south-east of Minas Geraes; the *Serra do Paranaíba*, between Goyaz and Minas Geraes, the *Serra dos Apurés*, which divide Espírito Santo from Minas Geraes; and the *Serra do Gurgueia*, *Branca* and *Araucária*, which envelop Paulo.

Brazil is unequalled for its rivers. The *Rio Amazon* has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its principal northern tributaries are the *Xapó* and *Marañon*, the *Putumayo* or *Ica*, *Rio Branco*, *Rio Negro*, and *Japurá*; its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapanahy*, while the *Xingu* meets it within 200 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaia* flow northwards from the Plateau of Mato Grosso and the mountains of Goyaz to the Gulf of Pará. The *Paranhayba* flows from the encircling mountains of Piauí into the Atlantic. The *São Francisco* rises in the South of Minas Geraes and traverses Bahia on its way to the Eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Mato Grosso, forms a boundary with Bolivia on its way through Pará, on to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the Iguassú, which unites with the Upper Paraná at the Brazil-Argentine-Paraguay boundary, are the majestic *Falls of the Iguassú*, and on the São Francisco are the no less famous falls of *Pau do Afonso*.

GOVERNMENT.—Brazil was colonised by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal, the centenary of Brazilian

Independence being celebrated by an International Exhibition at the capital (Sept. 7, 1922, to July 2, 1923). On Nov. 15, 1889, Dom Pedro II., second of the line, was deposed and a republic was proclaimed. The constitution rests on the fundamental law of Feb. 24, 1891, which established a federal republic under the name of *Estados Unidos do Brazil*. The President and Vice-President are elected for 4 years by the direct votes of all male Brazilians over 21 years who can read and write; they are ineligible for the succeeding term. They are aided, as an executive, by a Council of Ministers, who are responsible to the President and not to the legislature. Congress consists of a Senate of 63 members and of a Chamber of Deputies of 222 members; members of both houses are paid. Constitutional Government was suspended after the revolution of 1930. Elections for a Constituent Assembly were held in May, 1933, under a new law (which included a provision for female suffrage). The Assembly is expected to meet before the end of the year 1933, to consider a new Constitution and to elect a President.

The language of the country is Portuguese, foreign languages being read and spoken in the following order:—French, Italian, English, German and Spanish.

PRODUCTION.—The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched. Manganese is exported, and there are important deposits of monozite sand. Low-grade coal deposits are in the south. Its agricultural produce is abundant and its forests are immense. Cattle-raising is an important industry, the number being 34,270,324 (Census of 1920). The chief products of the country are coffee, maize, sugar, raw cotton, hides and skins, cocoa, oleaginous fruits, *hera-maté*, rubber and tobacco; the rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manaus; coffee coming chiefly from São Paulo. Tobacco and cocoa are grown largely, especially in Bahia. Cotton is being largely cultivated. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. The exports include also meat, hides, maize, beans, and *hera-maté* (tea). The principal imports are machinery, wheat, iron and steel products, cotton goods, and coal and coke.

Foreign trade of Brazil, 1932:—

Imports from:	Exports to:
U.S.A. £6,576, 68	U.S.A. £16,788, 826
U.K. 4,175, 278	France 3,568, 270
Germany .. 1,551, 720	Germany .. 3, 57, 243
Argentina .. 1,505, 725	U.K. 2,571, 703

Venezuela (Oil) 728, 743	Uruguay 1,328, 341
Netherlands 628, 475	Belgium 954, 109
Portugal 469, 443	

DEFENCE.—The peace effective of the Army is about 54,910 all ranks. The Navy consists of 3 Dreadnoughts, 2 battleships, 11 destroyers, 1 tender, 4 submarines, and some small vessels and aircraft.

EDUCATION.—Primary education is carried out by private initiative and at the cost of municipalities and States, in some cases with a Federal subsidy; there were 1,783,571 pupils in 1928. Secondary and Technical education is

carried out by Federal, State and Municipal authorities, with 2,440 pupils in Federal schools, 7,975 in State and Municipal institutions, 45,061 in private schools, and 24,688 in technical institutes in 1928. Higher education (11,661 students in 1928) is carried out by Federal and State governments at the State University of Rio de Janeiro, and at the University colleges at Manaus (Amazonas) and Curitiba (Paraná) and other private colleges.

COMMUNICATIONS.—In December, 1932, there were 20,300 miles of railway open. Length of telegraph lines, about 95,000 miles. In 1928 steam and sailing vessels of 44,154,937 tons (of which 8,790,384 were under the British flag) entered Brazilian ports, the principal harbours being Manaus, Pará, Maranhão, Pernambuco, Macao, Bahia, Victoria, Rio de Janeiro, Santos, and Rio Grande.

 Koustoukoff.
Agriculture, C. Monravieff.
Justice, M. Katchakoff.
Public Works, V. Dimoff.
Education, M. Boyadjeff.
President of the Sobranie, M. Al. Malinoff.

Minister in London, M. P. Hadji Mischef, 24
 Queen's Gate Gardens, S.W. 7.
Chancery, 3 Queensbury Place, S.W. 7.
 1st Sec., M. Iliia Boyadjeff.

The Kingdom of Bulgaria is bounded on the
 north by Rumania, on the west by Yugoslavia
 and Greece, on the east by the Black Sea, and
 on the south by Greece and Turkey. The total
 area is stated at 39,844 square miles, with a popu-
 lation (June 30, 1932) of 5,911,700. The prevail-
 ing religion of the Bulgarians is the Eastern
 Orthodox Church. For secular purposes, the
 Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the
Treaty of Berlin (July 13, 1878) and in 1885
 Eastern Roumelia was added to the newly-
 created principality. In 1908 the country was
 declared to be an independent kingdom, the area
 at that date being 37,202 square miles, with a

population of 4,337,500. In 1912-13 a successful
 war of the Balkan League against Turkey in-
 creased the size of the kingdom, but in August,
 1913, a short campaign against the remaining
 members of the League reduced the acquired
 area, and led to the surrender of about 2,000
 square miles to Rumania. On Oct. 12, 1915,
 Bulgaria entered the War on the side of the
 Central Powers by declaring war on Serbia. She
 thus became involved in the defeats of 1918, and
 on Sept. 29, 1918, made an unconditional sur-
 render to the Allied Powers. On Nov. 29, 1919,
 she signed the *Treaty of Neuilly*, which ceded
 to the Allies her Thracian territories (later
 handed over to Greece) and some territory on
 the western frontier to Yugoslavia.

GOVERNMENT.—The executive power is vested
 in the Tsar, and is exercised by a Council of
 Ministers, appointed by him. The legislature is
 a single chamber National Assembly or *Sobranie*
 of representatives (1 per 20,000 inhabitants),
 elected for a maximum term of four years by
 adult manhood suffrage. Members receive
 12,000 leva a month and free railway travel.

PRODUCTION.—About 75 per cent. of the popu-
 lation is engaged on farming small holdings, the
 principal crops being wheat, rye, barley, oats,
 maize, tobacco, oleaginous seeds, beans, sugar
 beet, fodder, fruits, vegetables and cotton. The
 live-stock includes sheep, goats, cattle, pigs,
 horses, asses and mules. Rich and extensive
 brown and black coal deposits, certain of which
 (mainly State-owned mines) produce about
 1,500,000 tons yearly for home needs. There is
 a large variety of thermal and mineral springs,
 several of which have been modernised. Certain
 areas are well mineralised with copper, lead,
 zinc, iron, manganese, &c., but only copper and
 lead are mined and treated on a commercial
 scale. There are large deposits of bituminous
 shale and indications of petroleum. Alluvial
 gold is found in many places. Local industry
 is encouraged by tariff protection and other
 arrangements, and includes foodstuffs and bever-
 ages, cotton and woollen textiles, electrical
 goods, ceramics, metal-working, chemicals,
 leather, paper and woodwork. The principal
 imports are raw, semi-manufactured and finished
 textiles, metals and manufactures, industrial
 and agricultural machinery, implements and
 tools, chemicals, tanning materials, mineral
 and vegetable oils, greases, fats, gums, wax,
 paper, hides, leather, glassware, china and por-
 celain, drugs and medicines, colonial goods,
 sawn timber, rubber. The principal exports
 are cereals and flour, bran, tobacco, eggs, beans,
 poultry and dairy produce, sunflower seed and
 cake, vetches, goat, sheep and lamb skins, attar
 of roses, live-stock, nuts, fruits, silk cocoons,
 charcoal, hardwoods, copper matte and lead ore.

DEFENCE.—Before the War of 1914-1918 ser-
 vice in the Army was universal and compulsory,
 and on a peace footing it numbered about
 58,000, all ranks. During the War (Oct. 1915-
 Sept. 1918) about 560,000 passed into the
 ranks of the Army. By the *Treaty of Neuilly*
 the Bulgarian Army is limited to 30,000 all
 ranks.

EDUCATION.—Elementary education is obliga-
 tory up to 4th Standard, and free up to 7th
 Standard. 1,721 elementary schools, 103 high
 schools (including American, French, German
 and Italian schools). Illiteracy is rapidly
 decreasing. There are many technical and

commercial schools. Sofia has a State University, a Free University, and Art, Music and Military Academies.

COMMUNICATIONS.—On Dec. 31, 1932, there were 15,186 miles of roads of which 10,340 miles were open, 4,011 miles under construction, and 835 miles traced. Of roads in actual use 4,730 miles were State and 5,610 miles communal. There were 1,605 miles of normal and 285 miles of narrow gauge railway open. 578 post and telegraph offices, 563 telephone exchanges with 18,956 subscribers (8,000 in Sofia). The principal Black Sea ports are Varna and Bourgas; and Rustchuk, Rvistor, Vidin and Lom on the Danube. In 1932 the vessels cleared at Black Sea ports numbered 6,129 (2,046,442 tons), 12,575 vessels cleared at Danube ports (2,273,223 tons).

CHILE.

(República de Chile.)

President (1932–1938), Señor Don Arturo Alessandri; installed Dec. 24, 1932.

Ambassador in London, Señor Don Juan Enrique Tocornal.

Chancery, 3 Hamilton Place, Park Lane, W.1.
1st Secretary of Embassy, Don Luis Renard.
and Secretary, Dr. Don C. Manuel Pereira.

Commercial Counsellor, Don Julio Bietancourt.
Commercial Attaché, Don Santiago Monk.
Consul, Don Humberto Videla, 76 Victoria Street, S.W. 1.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 17° 15' and 55° 50' S., and long. 66° 30' and 75° 48' W. Extreme length of coast-line about 2,800 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a great height—the highest being, in Aconcagua Provincia, 7,019 metres (23,025 feet) with many others over 20,000 feet. The chain, however, lowers considerably towards its southern extremity. The Andes form a boundary with Argentina, and at the head of a trail leading from Chile to Argentina has been erected a statue of *Christ the Redeemer*, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of a boundary dispute in 1902. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid (Chile is divided into 16 provinces and 3 territories (Aysen and Magallanes) and the aggregate area is estimated at 289,798 square miles. In 1929 Chile signed a treaty ceding the province of Tena to Peru but retained the province of Arica in return for a payment to Peru of £2,200,000.

The population (Census of 1930) was 4,287,445. Included in the population are four distinct racial divisions; (a) the Spanish settlers and their descendants; (b) the indigenous Araucanian Indians, Fuegians, and Changos, (c) mixed Spanish-Indians; and (d) European immigrants, who were represented in 1920 by 25,062 Spaniards, 12,360 Italians, 7,200 British and Irish, 8,950 Germans, 7,200 French and 5,000 Syrians. In 1932, the births amounted to 34 per 1,000, marriages 6.6 and deaths 22.8 per 1,000.

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1820, when a revolutionary war, culminating in the *Battle of Maipú* (April 5, 1818), achieved the independence of the nation. The present Constitution was voted by an overwhelming majority at the plebiscite held on Aug. 30, 1925, and superseded that of May 25, 1833. It was drafted by a Committee appointed *ad hoc* by President Alessandri. In accordance with the new Constitution, the President is to be elected by direct vote of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of 124 Deputies. There is universal suffrage for persons who have attained the age of 21, can read and write, and are on the electoral roll.

PRODUCTION, &c.—Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, vines, tobacco, hemp, Chile pepper, potatoes, onions and melons are grown extensively; the vine and all European fruit-trees flourish; the exportation of fruit to the United States is increasing yearly. Excellent wines are produced, and the Government is taking steps to develop their exportation. The live stock includes (1930) 2,387,940 cattle

6,262,482 sheep, 788,831 goats, and 331,156 swine, 441,027 horses, 31,414 mules and 37,455 donkeys.

The mineral wealth is considerable, the country being extremely rich in copper-ore, iron-ore and manganese ore. The production of bar copper in 1932 was 97,516 tons, Chile being the second greatest copper producing country in the world. The rainless north yields more especially nitrate of soda, iodine, borate of soda, copper, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Calchinal in Atacama, and Caracoles in Antofagasta; the centre, copper, iron, manganese and silver; and the south, iron and coal (1,085,005 tons of coal were mined in 1932). In 1932 the production of nitrate was 693,778 tons, the exports of this fertilizer being in the same period 243,400 tons. Early in 1930 a law was passed constituting a national nitrate company, to be called *Compania de Salitre de Chile (Cosaeh)*, with a capital of £75,000,000 with State participation, to take over the whole of the nitrate industry, the export tax being abolished, and its place in the budget taken by a fixed payment to the Government during the first three years, and after that by the Government's share in the company's profits. By decree of Jan. 1, 1933, the dissolution of the *Cosaeh* was enacted. The liquidation of the concern is now proceeding, while a bill for the reorganization of the whole nitrate industry is being considered (Oct. 1933) by the Chilean Congress. There are smelting-works for copper and silver, tanneries, corn and saw-mills, starch, soap, biscuit, rope, glassware, jammits, mineral waters, boot and shoe, hosiery, hat, cloth, cheese, furniture, candle, match, brush, cordage, paper and cigarette factories, breweries and distilleries; and the domestic industry furnishes cloth, embroidery, baskets, and pottery. The many ports favour commerce, and 13 lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 30 days. The staple articles of export are nitrate of soda, iodine, oats, borax, frozen meat, wheat, copper bars and ores, silver ores, corn, flour, hides, wool, barley, honey and beans. The imports include silks, woollens and other textiles, food, and agricultural and mining machinery, and motor vehicles.

COMMUNICATIONS.—There were (1931) 5,542 miles of railway, of which 1,755 miles are British controlled. In 1931 there were 19,825 miles of telegraph, 910 post-offices, and 5,250 miles of telephone, with 13 public wireless stations. The mercantile marine (1932) numbers 127 vessels (161,777 tons). In 1932 416 vessels (1,165,265 tons) entered Chilean ports from abroad, and 12,163 coasting vessels (16,287,423 tons); legislation was passed in February, 1922, reserving the coasting traffic to vessels of the Chilean mercantile marine.

DEFENCE.—All able-bodied male citizens from 20th to 45th year must serve in the army for a training period. The peace effective of the active army is 19,474 (1932). The Air Force has a peace strength of 113 machines with 150 pilots and 1,000 mechanics. The navy consists of 1 battleship (recently renovated), 1 ironclad, 3 cruisers, 11 destroyers and 10 submarines, with a complement of 632 officers and 7,217 other ranks.

EDUCATION is free, and in July, 1920, elementary education was made compulsory; there

are 4,301 schools, attended by 479,761 children out of a total on the registers of 662,706. There are 3 Universities (2 in Santiago and 1 in Concepción). The National Library contains about 450,000 volumes. The language of the country is Spanish and the religion is Roman Catholic.

AREA AND POPULATION.

Territory	Square miles.	Population
China Proper	1,532,800	414,012,519
Tibet	463,320	6,500,000
Chinese Turkestan	550,580	2,491,000
Mongolia	1,360,000	4,000,000
Total...	3,906,300	427,002,519

The estimated foreign population of China was as follows in 1931: British, 13,344; Japanese, 260,621; Russian, 66,479; American, 8,637; Portuguese, 2,368; German, 3,444; French, 8,651; the total being 370,333. Out of a total of 7,921 foreign firms in China, 725 were British, 1,142 Russian, 3,940 Japanese, 284 German, 377 American, and 229 French (in 1923). The total number of Chinese abroad is estimated (1930) at 6,372,043.

Chinese civilisation is the oldest in the world, and its government, based upon that of the family, remained unchanged in its root idea until the revolution of 1911-12, by which the autocracy of the Emperor and the power of the bureaucracy were merged into a Republican form of government. For more than 2,000 years the Emperor was the supreme head of the State legislating by edict in matters great and small. In the seventeenth century the *Ming Dynasty* was overcome by the *Manchus* from the north, who have now become almost entirely absorbed by the conquered race. The conditions and practices of the autocracy were preserved by the *Manchus*, but for many years the civil service had become the power in the Empire and the central authority was but loosely exercised over the provincial and district adminis-

tration. Many reforms were initiated or promised in the last few years of the Imperial rule, and an executive body was actually created, while a legislature was promised. At the close of the year 1911 the party of the reform forced the Imperial dynasty to a "voluntary" abdication, and a Republic was proclaimed.

China became a Republic on Feb. 22, 1912, with a President and Vice-President and an Executive Ministry, and a Legislature of a Senate (*Tsan Yi Yuan*) of 264 members and a House of Representatives (*Chung Yi Yuan*) of 596 members. The government of the 18 provinces is entrusted to civil and military governors, the latter (*Tsuehuen*) ranking first and holding practically all the powers of government; under them each province is subdivided into circuits superintended by *Taoyins* or intendants, and again into districts. All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign affairs. The *Treaty of Kiakhta*, 1915, between China, Russia, and Outer Mongolia recognises the Hutukhta Khan as Ruler of Outer Mongolia, while China, as the Suzerain Power, appoints Residents at Urga and three other towns. *Mongolia* has since developed into an independent self-governing republic.

On Oct. 1, 1930, *Weihaiwei*, the island of *Liu Kung* and certain other islands, leased to Great Britain in 1898, were restored to China. The area comprised in the lease was about 285 square miles, with a population of about 170,000. On Jan. 15, 1931, the Belgian concession at Tientsin was also formally restored to China.

The revolution of 1911 brought out a victorious general in the person of Yuan Shih-kai, but from his death in 1916 until June 1928 his subordinates and their successors fought for supreme power. Presidential elections were held and their results disputed, and the Parliament elected in 1913 held occasional meetings in 1924, but its measures were not carried into effect. The Emperor (who had lived in the Imperial Palace since his enforced abdication) was stripped of his title and driven out of the capital in 1924, and such government as existed in 1927 was centred in Peking (for Northern China), while the Kuomintang (People's National Party) was represented by a Nationalist Government at Canton (for Southern China). In June 1928 Peking was captured by the Nationalists, and the capital of the country was transferred to Nanking, and on October 10, 1928 (the anniversary of the outbreak of the Revolution at Wuchang in 1911), Chiang Kai-shek, the commander-in-chief of the victorious Nationalist armies, was installed as President of the Republic. The constitution promulgated in 1928 provides for government by five Councils (*Yuan*) Executive, Legislative, Judicial, Examination and Control.

EDUCATION.—In 1924 there were 190,000 schools in operation, with 6,500,000 pupils. There is a University in Peking. In 1922 there were upwards of 1,250 Chinese newspapers and magazines, published at regular periods, in Peking, Shanghai, Tientsin, and the other large centres, in addition to English and other Foreign daily newspapers.

COMMERCE.—The foreign trade of China is stated as follows in *Haikwan taels*.

Year.	Net Imports.	Net Exports.	Excess of Imports.
1929	1,265,779,000	1,015,687,000	250,092,000
1930	1,309,756,000	894,844,000	414,912,000
1931	1,433,489,000	909,476,000	524,013,000
1932 *	1,100,000,000	525,000,000	575,000,000

* Estimate for 1932.

The import of Indian opium is now prohibited.

Japan	148,422,000	107,485,000
U.S.A.	269,176,000	60,000,000
U.S.S.R.	1,000,000	5,320,000

COMMUNICATIONS.—Of the total area of China about half consists of table lands and mountainous districts where communication and travel are difficult and dangerous. In the remaining districts the principal means of communication from E. to W. is afforded by the rivers, and from N. to S. by the Great Canal.

Railways.—The length of the railways is less than 8,000 miles, inclusive of the Manchurian lines, or less than one-fifth (per 100 sq. miles) of those available in Turkey.

Shipping.—The China Merchants Steam Navigation Co. have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the coasting trade and on the Yangtze. In 1931 the total tonnage of the 181,607 vessels and junks entered and cleared at Chinese ports was 160,005,101 tons. Of these ships 50,534 (60,560,794 tons) were British; 31,589 (43,042,411 tons) Japanese; and 6,130 (6,177,767 tons) U.S.A. In June, 1928, a vessel of 14,750 tons, constructed at the Kiangnan Dock and Engineering Works at Shanghai, was launched and supplied to the order of the United States Shipping Board.

Telegraphs are being rapidly constructed by the Central Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. There are about 53,000 miles of land lines and several high-power wireless installations. Telephones, Municipal and long distance, are in general use in the settled and trade areas, and wireless telephony has been installed in the large centres.

Maritime Customs.—The Chinese Maritime Customs consists of about 1,000 Europeans, a large proportion of whom are British subjects, and some 8,000 Chinese, all under the control of the *Inspector-General* (Sir Frederick Maze). By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. But the change has not materially affected the powers hitherto exercised by the Inspector-General. In addition to the collection of dues at the Treaty Ports, this service is responsible

for the payment of the Indemnities and foreign Loans secured on the Customs; also manages the Lighthouse Administration; is closely associated with conservancy operations, and keeps a small fleet of cruisers to enforce its regulations.

Post Office.—The Chinese Post Office was established by Imperial Decree in 1866 and placed in the hands of Sir Robert Hart, the great I. G., who developed it on modern lines. It remained a branch of the Maritime Customs until the death of Sir Robert Hart in 1911, when it was transferred to the Ministry of Communications and a Foreign Co-Director. Letters can be sent all over China at the uniform rate of 5 cents per 20 grammes. The number of Post Offices and Agencies (1931) was 12,523. In 1931, 774,017,800 postal packets and 6,217,230 parcels were handled.

BUDGET (1931-1932).

Revenue	Taels 632,644,996
Expenditure	682,990,864
External Debt (Jan. 1, 1931)	£153,000,000

At Jan. 1, 1931, according to the official statement of the Ministry of Finance, the total internal debt was 741,640,659 taels (including arrears of capital and interest).

OUTLYING TERRITORIES.

Mongolia has an estimated area of about 1,360,000 square miles, and a population of 3,000,000 to 5,000,000, of whom the greater number are Buddhists. In 1915 Mongolia threw off its allegiance to China, and by the Treaty of Kiakhta was recognised as an Autonomous Republic. Negotiations with Russia, after the 1917 revolution, led to an alliance, and by Treaty (May 31, 1924) the U.S.S.R. acknowledge the suzerainty of China over Outer Mongolia.

North-West (or *Outer*) *Mongolia* covers an area of about 360,000 square miles, and consists of an elevated plateau bounded by the Russian Altai range (N.W.), the Sayans (N.E.), the Kental (S.E.), and the Eklagh Altai (S.W.). The plateau contains many lakes and is watered by numerous rivers, among which are the headwaters of the Yenisei, the Irtysh and the Selenga. Agriculture is almost unknown, but excellent pasture provides grazing grounds for numerous cattle and sheep, and particularly for transport animals (camels and oxen). The exports are wool, hides and skins, and gold. The chief centres are Urga (Kuren, or Ulan-Buot-Khoto, "Town of the Red Knight"), Uliassutai, and Kobdo, all of importance as trading centres on the main caravan routes. Part of Outer Mongolia has declared itself independent of its suzerain as the Republic of *Tannu Tuva*. The districts affected lie between the Sayan and Tannu Olai ranges, the capital of the Republic being Chien Belder (or Krasny, "Red Town").

Inner Mongolia covers an area of about 1,000,000 square miles and includes the Gobi ("Desert"), or *Shamo* ("Sand Desert"), which covers nearly one-third of the total area, and in the extreme south-east the *Ordos* Desert, bounded on the south by the Great Wall of China, and encircled on the north by part of the main stream of the Hwang-ho river. In the north-east of Inner Mongolia rises the Keru-lun, which flows into the Dalai Nor in Manchuria. Agriculture is carried on wherever Chinese influence has been exerted, but is mainly confined to the south-eastern borders. The principal industry (as in North-West Mongolia) is sheep and cattle raising and the breeding of camels,

oxen and horses for transport, in order to supply the caravan routes from China to Siberia. The centres of population depend mainly upon the overland commerce of China and Eastern Russia across the Gobi, the general direction of the caravan routes being from south-east to north-west. The principal centres are: Kalgan, Kuku-khot, Kuku-ergh, Dolon-Nor and Biru-khoto. In the north-east, Keu-lun (on the river of that name) is a junction of the southern routes from the Chinese province of Pechili and the western route from Urga, in N.W. Mongolia.

Tibet (area, 750,000 square miles; pop. 3,000,000) borders on British India. (See p. 741.)

Chinese Turkestan (or *Sinkiang*) has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes *Zungaria* and Chinese *Tartary*, and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Kashgar and Urumchi. (See p. 741.)

CAPITAL OF THE CHINESE REPUBLIC, Nanking.
Population (1928), 1,000,000.

Nanking, selected as the capital of China in 1928 in place of Peking, is the principal city in the province of Kiangsu, and the seat of the provincial government of Kiang-nan (embracing the three provinces of Kiang-su, Kiang-si and Ngan-hui). About 1000 A.D. it was named Kiang nan, but in 1368 this was changed to Nanking ("Southern Capital.") The city is built on the south bank of the Yangtse Kiang river, about equidistant from Canton and Peking, and is connected by railway (192 miles) with Shanghai. *Peiping*, the former capital, had an estimated population of 1,300,000 in 1921.

Shanghai comprises (a) the *International Settlement* administered by the Shanghai Municipal Council (for the defence of which British Forces were despatched), the estimated population being (1930) 1,011,051 (Foreigners, 36,471; Foreign Defence Forces, 4,083; Chinese, 971,377); (b) the *French Concession*, an independent administration, population (1930) 456,015 (Foreigners, 15,149; Chinese, 440,866); and (c) the *Shanghai City, Chapel and Nantao* areas surrounding these settlements, population (1930) 1,689,100, (Foreigners, 9,790; Chinese, 1,679,310)—a grand total for Shanghai of 3,156,166.

The population of the principal ports is estimated as follows:—Amoy, 400,000; Canton, 1,370,000; Changsha, 1,272,000; Chungking, 500,000; Chungking, 1,011,600; Foochow, 1,500,000; Hangchow, 729,950; Hankow, 290,000; Ichang, 450,000; Kinkiang, 380,000; Kungchow, 590,000; NANKING, 1,300,000; Ningpo, 2,200,000; Shanghai, 3,160,000; Soochow, 1,100,000; Tientsin, 838,000; Taungtan, 310,000; Wankien, 758,000; Wenchow, 1,750,000; Wuchow, 250,000.

FLAG: Red, with blue canton bearing a white sun.

COLOMBIA

(República de Colombia).

President (1930-1934), Dr. Enrique Olaya Herrera, born Nov. 12, 1882, assumed office Aug. 7, 1930.

Envoy Extraordinary and Minister Plenipotentiary in England (vacant).
 Charge d'Affaires (ad interim), Señor Don Saturnino Rostegro.

Secretary of Legation, Señor Don Manuel Aya.
 Attaché, Sr. Dr. Don. Bernardo Samper.
 Consul-General, Señor Dr. Don Alejandro Lopez, 7 Seelham Avenue, Southampton Row, W.C. 1.
 Consul-General in Liverpool, Señor Don Carlos Venzana, 41 North John Street.

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between 2° 40' S. to 12° 25' N. lat. and 68° to 79° W. long., with an estimated area of 461,666 square miles, and a population (Census 1928) of 7,851,000, of whom more than one-half are whites and half-castes. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras, the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic.

The principal rivers are the Patia, Cauca, Magdalena, Cauquetá and Putumayo. The Patia flows through the famous *Mituma Gorge* of the Western Cordillera, and one of its tributaries (the Carchi, or Upper Guataquí) is spanned by the remarkable Arch, or *Inca's Bridge*, of natural stone on the Funza is the Great Fall of *Teguendama*, 480 feet in height.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Quesada established a government of certain coastal communities under the name of New Granada, which continued under Spanish rule until the revolt of the Spanish American colonies of 1811-1824. In 1829 Simon Bolívar (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada.

In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; petroleum is available in enormous quantities, and in the year 1931 the output was 18,236,000 barrels; it is possible that new oilfields will shortly be opened near the Venezuelan frontier. The principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, petroleum, gold, bananas, and hides.

The standing army consists of about 20,000 men; the navy has been nearly abolished. Railroads are in then infancy, about 1,500 miles being open in 1932, with 23,206 (1931) miles of telegraph; there are also (1932) 1,880 miles of national roads, in addition to departmental (some macadam) and "dirt" roads (passable by motors in dry weather only). There is a daily passenger and mail service (German) between Bogotá and Barranquilla and a bi-weekly service in concert with Pan-American Airways to the U.S. New York can be reached in 34 days and mail is delivered in England 21 or 22 days after leaving Bogotá. There are wireless stations at Barranquilla, Bogotá, Medellín, Cali and Ciénega.

Roman Catholicism is the established religion, but all religions are tolerated. Spanish is the language of the country.

Revenue	1932
Expenditure	\$35,346,072
Foreign Debt, June 30, 1933:—	37,338,596

COSTA RICA.

(República de Costa Rica.)

President (1932-36), Ricardo Jiménez Oreamuno, assumed office May 8, 1932.
Minister of Foreign Affairs, Leonidas Pacheco.

Minister in London (vacant).

Consul-General, London, José Vargas Porras, 33-36 King William Street, E.C. 4.
Consul, John C. Eggers.

The Republic of Costa Rica, the most southern State of Central America, extending across the Isthmus, between 8° 17' and 12° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of about 23,000 English square miles, and a population (Jan. 1, 1931) of 516,031.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824-1830 it was one of the United States of Central America.

The principal agricultural products are coffee, bananas, rice, maize, sugar-cane, potatoes, cocoa and beans, the soil being extremely fertile. The chief exports (1932) are coffee (£1,526,088), bananas, cacao, gold and silver bullion, skins and hides, fresh fruit and timber. The imports are dry goods, hardware, provisions, railway materials, machinery, paints, and general merchandise (in 1932, 53 per cent. from United States, 11 from United Kingdom, 12 per cent. from Germany).

The chief ports are Limon, on the Atlantic coast, through which passes the bulk of the important banana trade with the U.S. and U.K., as well as by far the larger part of the other exports and imports; and Puntarenas on the Pacific coast. In 1932, 494 vessels (1,258,510 tons) entered at Costa Rican ports. About 420 miles of railroad were open in 1930. In 1930 there were 205 post offices, and 205 telegraph offices (3 wireless), with 2,612 miles of telegraph and telephone line. A considerable amount of English capital is embarked in the Republic. Spanish is the language of the country.

CUBA.

(República de Cuba.)

President of the Republic, Dr. Grau San Martín, sworn in Sept. 11, 1933.

Foreign Affairs, Dr. Manuel Márquez-Sterling.

Minister in London, Señor Dr. Don Guillermo Patterson. *Legation*, 30 York Terrace, Regent's Park, N.W. 1.

Counsellor of Legation, Dr. Don Gabriel Suarez Solar.

and Sec., (vacant).

Commercial Attaché, Señor Don Luis Marino Pérez.

Consul, Señor Raoul Aeuille (*acting*). 95 Linden Gardens, Notting Hill Gate, W. 2.

(Cuba (the largest of the "West India" Islands) lies between 74° and 58° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population of 3,661,582 (June 30, 1930).

The island of Cuba was visited by Christopher Columbus, during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. The slave trade was abolished early in the 19th century, and the slaves were emancipated from 1880-1886. The government of Spain was marked by a generally corrupt administration, complicated by internal unrest fomented by external influences, and the various attempts at independence met with severe military repression. The separatist and autonomist agitation culminated in the closing years of the 19th century in a fierce and bloody war, and although a conciliatory movement was evinced by the Madrid authorities in 1897, the struggle was continued by the party of separation in the island. In 1898 the government of the United States put into execution a threat of interference by the despatch of the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which appears likely to remain an unsolved mystery. On April 20, 1898,

* In process of redemption.

the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from July to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated.

Of the total area of 28,000,000 acres, there were (1932) 3,051,470 acres under sugar, about 500,000 acres under tobacco, sweet potatoes and bananas. Rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pineapples, &c.) flourish. The chief agricultural products of the island are tobacco and sugar; sugar crop (1932-33) 1,990,000 tons; the chief product of the forests is mahogany, while cedar is also used for boxing the tobacco crop. The live stock includes about 4,500,000 cattle and 600,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

3,800 miles of railroad are open and about 6,000 miles of telegraph line; there are about 2,200 miles of roads.

Spanish is the language of the island.

	1932-33	1932-33
Revenue	\$47,045,000	\$44,117,000

Consul, Josef Bužáň, 8 Grosvenor Place, S.W. 1.

Part of the Austro-Hungarian Monarchy declared its independence on Oct. 28, 1918, as the Czechoslovak Republic, and ten days later the *Národní výbor* (National Council) of Czechoslovakia took over the administration of the independent territories. The political neighbours of the Republic are Austria and Hungary on the S., Germany and Poland on the N., Germany on the W., and Poland and Rumania on the E. Within these limits are the former Austrian Provinces of Bohemia and Moravia and part of the Province of Silesia; and Northern Hungary from the Danube (at Bratislava, on the Austrian frontier) to the Carpathians (at the headwaters of the Tisza River in the eastern slope of Mt. Vereczka)—a total area of about 54,877 sq. miles, with a population (Census of 1930) as under:—

Bohemia	7,106,766
Moravia and Silesia	3,893,157
Slovakia	3,330,885
Subcarpathian-Russia	795,350

Total 14,726,158

Of the total population it is estimated that 65 per cent. are Czechs and Slovaks, 23 per cent. Germans, 5 per cent. Magyars, 3 per cent. Ruthenians, and 2 per cent. Poles. The new State was recognised by Austria in 1918 and by Hungary on March 10, 1919. The National Assembly, consisting of a Senate and a Chamber of Deputies, is elected by universal adult suffrage of both sexes. The executive power is exercised by a Council of Ministers, appointed by the President. The Constitution guarantees religious and political freedom. About 80 per cent. of the people are Roman Catholics.

By the Peace Treaty Czechoslovakia acquired about 80 per cent. of the whole industry of the former Austrian Empire. It has several rich coalfields, and possesses valuable mineral resources which notably in Slovakia, have not yet been fully developed. Radium, gold, silver, iron, graphite and lead are all mined, while the whole country is rich in mineral and thermal springs. Bohemia has rich deposits of clay, kaolin and sand. The whole country is well farmed, and agricultural production is on a very high level of excellence. In foodstuffs, however, the country is not self-supporting. Thirty-three

per cent. of the total area of the country is forest land, and both in the productiveness of the forests and the quality of the timber the forest wealth of the Republic is enormous. In its industrial development Bohemia may be compared to Belgium. In Bohemia, Moravia and Silesia, which have a total population of 10½ millions, more than four million people are engaged in industry. The various industries are well organised, and as regards both machinery and modern improvements the factories are as well equipped as any in Europe. Except in Slovakia and Ruthenia illiteracy is almost unknown, and both the German and Czech elements which compose the working-class population are hard-working and in many cases highly skilled. The new Republic possesses, therefore, many valuable economic advantages, and it is no exaggeration to state that Czechoslovakia is in a far more flourishing state than most of its neighbours.

Czechoslovakia has no direct access to the sea, but has a right of access over the Elbe and Oder to Hamburg and Stettin, for which purpose the Government proposes to canalise the Upper Elbe in order to connect it with the Oder and the Danube. If this proposal is carried out, the country will be traversed by a waterway affording a communication from the North Sea and Baltic, *via* the Danube, to the Black Sea.

DANUBE COMMISSIONS.

The *International Danube Commission* (Headquarters, Vienna) was created by the Treaty of Versailles (1919), the States represented under the Treaty being Austria, Bavaria, Bulgaria, Czechoslovakia, France, Great Britain, Hungary, Italy, Rumania, Wurttemberg, and Yugoslavia. The Commission maintains the liberty of navigation and the equal treatment of all flags of the Danube from Ulm (Wurttemberg) to Braila (Rumania) and its international system, obtaining funds for administrative expenses from equal contributions of all the States represented. From Braila to Sulina (the mouth of the Danube), the navigation is controlled by the *European Commission of the Danube* (Headquarters, Galatz), created by the Treaty of Paris 1856, after the Crimean War; the representation on this Commission is confined to France, Great Britain, Italy and Rumania. The river is connected by canals with the Main, a tributary of the Rhine (Ludwig Canal); a new and deeper canal is under construction to permit the passage of larger craft than at present, thus linking up the whole Rhine and Danube systems across Europe from the North Sea to the Black Sea. The total length of the river is about 1,738 miles, and ocean-going vessels reach Braila, where transshipment into river barges is necessary. A pilotage and river-improvement service is maintained by the International Commission at the Iron Gates (headquarters, Orsova), the expenses being met by shipping dues.

The chief towns on the Danube are the Black Sea port of Sulina, with Galatz (confluence of the Sereth), Braila, Turnu-Severin and Orsova (Iron Gates), in Rumania; Rusechuk, Vidin and Iom Palanka, in Bulgaria; Belgrade, the capital of Yugoslavia; Buda-Pest, the capital of Hungary; Bratislava in Czechoslovakia, Vienna (the seat of the Commission), and Linz, in Austria; Passau and Regensburg, in Bavaria; and Ulm, in Wurttemberg.

The financial situation of the European Commission is shown below:—

Receipts during 1929	Gold francs 4,652,556
Expenditure, 1929	3,807,534

The receipts consist almost entirely of navigation dues (5,030,653 francs in 1927). The expenditure (1927) included 2,062,101 francs on the prolongation and strengthening of the embankments at Sulina, and 251,507 francs in repayment of the British portion of the loan raised by the Commission in 1924.

THE INTERNATIONAL DANUBE COMMISSION.

British Delegation, D. W. Keane (*Delegate*); C. H. Dick (*Asst. Delegate*).

EUROPEAN DANUBE COMMISSION.

British Delegates, D. W. Keane (*Plenipotentiary Commissioner*); T. B. Wildman (*Deputy Commissioner*).

DANZIG.

(Freie Stadt Danzig.)

Under Articles 100 and 102 of the Treaty of Versailles, the City of Danzig with the surrounding territory (constituting a total area of about 725 sq. miles, with a population estimated at 390,000) was set up as a Free City, under the protection of the League of Nations, Poland undertaking to conduct her Foreign

Affairs. The Free City was constituted Nov. 15, 1920, with an executive Senate and an elected Legislature of 72 members. The harbour is administered by a mixed board of Poles and Danzigers under a neutral President, and the League of Nations is represented by a resident High Commissioner. In Jan., 1922, the Free City entered the Polish Customs Union. The principal exports are coal, timber, cereals, cement, bacon, eggs, mineral oils and sugar, and the imports herrings, iron ore, machinery, scrap-iron, artificial manures, fats, foodstuffs and textiles. The tonnage of ships entered in 1932 was 2,750,204 tons, and of those cleared 2,773,146 tons.

Danzig—High Commissioner of League of Nations, Sean Lester.

FLAG: Red, with gold crown over two white crosses near staff.

Consulates at Falmouth, Hull, Liverpool, Manchester, Newcastle upon Tyne, Glasgow, Leth and Belfast.

A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Funen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'—57° 44' N. lat. and 8° 5'—12° 40' E. long., with an area of 25,042 square miles and a

population (Nov. 5, 1930) of 3,551,000. Nearly one-half of the population live exclusively by agriculture, and one-fourth by manufactures and trade.

In 1864 Denmark was attacked by Prussia and Austria and deprived of Schleswig-Holstein (Prussia taking the whole territory after a further war with Austria in 1866). At the conclusion of peace between the Central Powers and the Allies in 1919, the question of Schleswig-Holstein was subjected to a plebiscite of the inhabitants, and North Schleswig is now part of Denmark.

The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woolens, silks, cottons), iron, hardware, wine, fruit, coffee, tea, maize and colonial produce. In 1932, 1,286,100 hectares were under corn crops, 38,000 sugar beet, 410,000 forage roots, and 419,000 hay crop. In July, 1932, the live stock numbered 496,200 horses, 3,237,400 cattle, 193,000 sheep, and 4,863,000 swine. The crops in 1932 included 10,553,000 hkg. (hkg = 100 kilogrammes) of oats, 10,091,100 of barley, 2,993,000 rye, 7,939,000 mixed corn, and 2,993,000 qrs of wheat. Its chief exports are agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle. Sea-going mercantile marine (1932) 620 steamers, with a gross tonnage of 721,458. There are (1932) 5,290 kilometres of railway and 17,031 km. of telegraph line.

DEFENCE.—The Army consists of about 12,000 trained men, the vote for 1931-32 amounting to Kr. 35,000,000. The Navy consists of a constant defence ironclads and 1 completing, 2 small cruisers, 23 torpedo-boats (built and building), 14 submarines (built or building). Vote, 1931-32, Kr. 22,000,000.

EDUCATION is free and compulsory, the schools being maintained by local taxation. Special schools are numerous, technical and agricultural predominating. There are Universities at Copenhagen and Aarhus.

Outlying Possessions.

The outlying possessions and colonies of Denmark have an area of about 50,000 square miles, with about 40,000 inhabitants. They include the FAROE, or Sheep Islands (525 sq. m., pop., 1930, 24,200); GREENLAND (ice-free portion about 50,000 sq. m., total area about 830,000 sq. m., population, 1930, 16,896), the trade of which is a Government monopoly.

Copenhagen, distant 728 miles; transit, 36 hours.

DOMINICAN REPUBLIC. (República Dominicana.)

President (1930), General Don Rafael Trujillo, sworn in, Aug. 16, 1930.

Envoy Extraordinary and Minister Plenipotentiary in London, Señor Don Virgilio Trujillo, 67 Eaton Place, S.W. 1.

Consul, Señor Don Ruben Brache.

The Republic of Santo Domingo, formerly the Spanish portion of the island of that name, is the oldest settlement of European origin in America. The island was discovered by Christopher Columbus in December, 1492, who named it "La Española" or "Little Spain." In 1496 he ordered his brother, Bartholomew Columbus, to found the capital at the mouth of the Ozama River, on the south of the island, which city he called Santo Domingo. The island immediately became the objective for adventurous Spanish colonists, who exploited the native Indians almost to the point of extermination for the sake of the gold found in the streams. African negroes were imported for the sugar and other plantations both in Santo Domingo and Haiti, and this accounts for the present large proportion of negro blood in both countries. A short time after its discovery Santo Domingo became the "jumping-off point" for other adventurers proceeding from Spain to the newly-found mainlands of the western hemisphere,

thus greatly diminishing the importance of the island and causing an exodus to those places.

In 1821 Santo Domingo broke away from Spain and declared itself independent, but in 1822 it was invaded and subjugated by its negro neighbours from the west, the Haitians. The latter were driven out in 1844, when the Dominican Republic was definitely proclaimed by the natives, and has so remained except for an interregnum of two years (1861-1863) when the Spaniards again took possession, but were eventually forced to withdraw.

On November 29, 1916, American military forces landed in Santo Domingo and a Military Government was proclaimed. From October 21, 1922, a Provisional Dominican Government was in office until July 12, 1924, when a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the customs and the redemption of foreign obligations, which continue to be administered by an American official.

The Dominican Republic comprises an area of about 19,322 square miles, with a population estimated at 1,200,000. An extensive system of motor highways, totalling nearly 700 miles of first-class roads, has been built, and as a result of recent repairs they are now in excellent condition for motoring. There are about 300 miles of second-class roads. The streets of the capital have been repaired and asphalted. There is a direct road from Santo Domingo City to Port-au-Prince, the capital of Haiti, enabling the journey from capital to capital to be made in one day. There are about 150 miles of public railway, and a telephone system connects practically all the towns of the republic. There are six wireless stations, and the All America Cable Company maintains an efficient service with all parts of the world.

Sugar, cocoa, beans and coffee are the most important crops, and tobacco is grown in fair quantity. Other products are mahogany, furniture woods, lignum-vitæ, log-wood, divi-divi, cotton, wax, honey, maize, hides, turtle-shell and starch.

Of the total import trade in 1932, 58.96 per cent. came from the United States, 6.08 per cent. (rice) from British India, and 4.87 per cent. from the United Kingdom. British trade is hampered by distance (as compared with the U.S.), by lack of resident British merchants and industrial undertakings, and by indifferent and slow steamship services from Europe.

ECUADOR.

(República del Ecuador.)

President of the Republic, Señor Dr. Don Abelardo Montalvo (acting).

Minister in London, (vacant)

Attache, Señor Don Hernan Pallares Zaldumbide

Chargé d'Affaires and Consul-General in London, Sr. Eduardo Wright, 23 College Hill, Cannon St., E.C. 4.

Consuls at Liverpool, Birmingham, Hull, Glasgow, and Cardiff.

An equatorial State of South America, extending from lat. $1^{\circ} 38' N.$ to $6^{\circ} 5' S.$, and between $65^{\circ} 20' W.$ and $81^{\circ} W.$ long (according to the Ecuadorian geography, but there are boundary disputes with Peru), comprising an area of 276,000 English sq. miles.

The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Viceroyalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822).

The Republic of Ecuador is divided into 17 provinces and one territory. It has a population of about 2,000,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizos. The territory of the Republic extends across the Western Andes, the highest peaks of which are Chimborazo (20,702 ft.), Iniza (17,405 ft.), Carhuainrazo (16,515 ft.), Cotacachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.), and Sincholagua (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. The *Witch-broom* disease, which appeared (1921) in the cocoa plantations, has had a disastrous effect on the agricultural wealth of the country. The average yearly output previous to 1921 was one million quintals (of 100 lb.) as compared with 335,052 quintals in 1920, 387,424 in 1930, 283,189 in 1931, and 300,468 in 1932.

Its chief products are cocoa, petroleum, rice, vegetable ivory, bananas, cotton, coffee, india-rubber, sugar, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quick-

silver, lead, iron and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are cocoa, petroleum, caoutchouc, vegetable ivory and gold, cinchona bark, Panama hats, coffee, and cattle; the chief imports are textile machinery, foodstuffs, and manufactured goods. A railroad connecting Guayaquil and Quito was opened in 1908. The *Galapagos* (Tortoise) Islands (2,870 square miles) belong to Ecuador.

In October, 1926, an American Financial Mission arrived in the country and their recommendations have been enacted as laws. A new customs tariff, prepared by the Mission, came into force on July 1, 1927, and produced (*in thousands of Sucre*):—1926, 19,638; 1929, 19,869; 1930, 16,305; 1931, 13,387; 1932, 9,418. A new monetary law reintroduced the gold standard, the currency being stabilized at 5 sucres = \$1 U.S. A central bank was established on March 4, 1927, and a new banking law enacted. Ecuador suspended the gold standard on Feb. 8, 1932, and in May, 1932, introduced control of foreign exchange transactions.

In November, 1927, the Swedish Match Company of Stockholm secured the exclusive right to import and manufacture matches in Ecuador for a period of 25 years in return for a loan of 8,800,000 sucres, which sum was applied towards the establishment of a Mortgage Bank. Congress of 1931 rescinded this contract, and the monopoly is now administered direct by the Government.

The language of the country is Spanish

	1932.

EGYPT.

(Misr.)

King of Egypt, His Majesty FUAD I., G.C.B. (Ahmad Fuad); born March 26, 1868; succeeded his brother as Sultan, October 9, 1917 (23 Zil Hidja, 1335); proclaimed King of Egypt, March 16, 1922; married, May 24, 1919, to the daughter of Abdel Rahim Sabri Pasha.

Crown Prince, H.R.H. Prince Faruk, son of the King, born Feb. 11, 1900 (at Ginnada el Ula, 1338)

Ministry (Sept. 24, 1933)

Prime Minister and Minister of Foreign Affairs, H.E. Abdel Fattah Yehia Pasha.

Justice, H.E. Ahmed Aly Pasha.

War, H.E. Mohamed Naguib El Gharibly Pasha.

Education, H.E. Mohamed Helmy Issa Pasha.

Communications, H.E. Ibrahim Fahmy Keim Pasha.

Interior, H.E. Mahmoud Fahmy El Keissi Pasha.

Financial Adviser, Sir Frank P. Watson, K.C.M.G.

Finance Under Sec., Ahmed Abdul Wahab Pasha.

Foreign Under Secretary, Sherif Sabri Bey.

Director-Gen., Foreign Affairs (vacant).

Director-Gen. Posts and Lighthouses, Rear-Adm. G. Tomlin, C.M.G., M.V.O.

Egyptian Minister in London, (vacant).

Office of Legation, Bute House, 75 South Audley Street, W. 1.

Counsellor, and Charge d'Affaires ad interim, Abdel Wahhab Dawood Bey.

1st Secretary, Georges Chtani Effendi.

2nd Secretary, Radi Abou-Seif Radi Effendi.

Attaché, Hassan Mohamrad Effendi.

Archivist, Mohamed Mustafa Yassin Effendi.

Asst. do. (vacant).

Consul, Mohammed Hussein Effendi.

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (a) the valley and delta of the Nile, (b) the Libyan or Western Desert, and (c) the Arabian or Eastern Desert; (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Jubal, Shadwan, Gaiatin and Zeberzet (or St. John's Island). This territory lies between 22° and 34° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is continuous with the Sudan. The western boundary runs from a point on the east, N. of Sollum (long. 25° E.), inland in a south-westerly direction for some distance and then turns S. along a meridian line approximately in long. 24° E. until it meets the parallel of 22° N. lat., which forms the N. boundary of the Sudan. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E. long.) to the head of the Gulf of Aquaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aquaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 *faddins* (12,431 square miles) and the area of lakes at 641,000 *faddins* (2,039 sq. miles), a total of 8,308,000 *faddins* (12,470 sq. miles); but within the boundaries above-mentioned is enclosed an area of about 363,181 sq. miles. The

* A *Waqf* is an institution of Muhammadan Law similar to the "trust" of English Law. When property is made *Waqf* it is dedicated expressly or implicitly to some charitable or religious object, or for the benefit of private individuals. The nearest British equivalent is "The Public Trustee."

TOTAL.....	12,750,918	14,168,756

Of the total population in 1927 males numbered 6,369,517 and females 6,348,738. In 1927, males numbered 7,036,298 and females 7,096,996 (Nomads being excluded in each case).

Physical Features—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the flood of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The Nile has a total length of 3,470 miles from the Victoria Nyanza to its mouth. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*. Though as a whole it constitutes one of the most arid and inhospitable regions of the world, the Libyan Desert contains a number of depressions wherein wells and springs furnish water in sufficient quantity

(1) Bahkla and Kharga Oases. (2) Including Siwa Baharia and Farafra.

to irrigate small areas and to support populations of several thousands. These depressions are the *Oases*, of which the principal from S.E. to N.W. are known as Kharga, Dakhla, Farafra, Bahariya and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo, stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. (A new pyramid, making 4 in all, was discovered by Prof. Selim Hassan in Feb. 1932). Close to the pyramids is the *Great Sphinx*, 180 feet long. In the Eastern Desert a great back-bone of high and rugged mountains extends north-westward from Abyssinia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaus of sandstones and limestones, dissected by wadis (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main wadis from well to well, and here and there are to be found small encampments of wandering Arabs. The north (Mediterranean) coast of Sinai is flat and sandy. Inland, the ground gradually rises into a highly dissected limestone plateau, which extends southward for about 150 miles and terminates in the great scarp of El Tih. South of El Tih the character of the country abruptly changes, the southern third of the peninsula being formed of rugged granitic mountains intersected by deep ravines. Springs and wells occur in fair abundance, mostly in the *wadis*, and running water (mostly brackish) is found at a few points.

Native Population.—There are three distinct elements in the native population of Egypt. The largest, or "Egyptian" element, is a Hamito-Semitic race, known in the rural districts as *fellahin* (*fellah* = ploughman, or tiller of the soil). The *fellahin* have been mainly Muhammadans since the conquest of the country in the 7th century, but 824,474 Coptic Christians are enumerated in the towns and villages. These Egyptian townsmen and peasants numbered 11,404,942 in the total of the Census of 1917 (including 126,432 local subjects of foreign origin). A second element is the *Bedouins*, or nomadic Arabs of the Libyan and Arabian deserts (32,663 Bedouins and 107,364 Sudanese and Bebarin), of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated land of the Nile Valley and the Fayum. The third element is the *Nubians* of the Nile Valley between Aswan and Wadi-Halfa, of mixed Arab and negro blood. The Bedouins and Nubians are Muhammadans.

Foreign Population.—At the Census of 1917 the foreign residents were 205,998, of whom 20,797 were Turks, 56,723 Greeks, 40,198 Italians, 24,354 British, 21,270 French and Tunisians, 2,789 Austro-Hungarians, 4,225 Russians, 127 Germans, 23,922 other Europeans and Americans, and 1,450 Persians.

Religions.—At the Census of 1917 there were 11,623,753 Muhammadans, 1,226,107 Christians, 59,581 Jews and 8,814 other religions. The chief Muhammadan religious authorities in Egypt are the *Sheik el Gamel el Azhar* and the *Mufti el Dwy el Masriya*.

Government.—From B.C. 30 to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country

was incorporated in the Ottoman Empire, and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811, and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841.

Rulers of Egypt since 1811.

Name	Born.	Reigned.
Mohammed Aly (<i>Fatih</i>)	1769	1805-1848
Ibrahim (<i>Fatih</i>)	1789	1848
Abbas I	1813	1848-1854
Said	1822	1854-1863
Ismail (<i>Khedive</i>)	1830	1863-1879
Mohammed Tewfik (<i>Khedive</i>)	1852	1879-1892
Abbas II (<i>Khedive</i>)	1874	1892-1914
Hussein Kamel (<i>Sultan</i>)	1853	1914-1917
Fuad I (<i>King</i>)	1868	1917

Legislature.—Legislative power is exercised by the King in concurrence with the Parliament within the limits laid down in the Constitution established by Royal rescript of April 19, 1923, and general elections took place for a Parliament, consisting of two houses, which first assembled March 15, 1924. Parliament consists of a Senate of 100 members of whom three-fifths are nominated by the King, the remainder being elected (for 10 years) on the basis of 1 Senator for every 180,000 inhabitants; and of a Chamber of 190 Deputies elected (for 5 years) on the basis of 1 for every 60,000 inhabitants.

Executive.—The executive power is exercised by the King through his Ministers within the limits of the Constitution, the Ministry being held jointly responsible to the Chamber of Deputies.

Local Government.—The chief towns constitute governorships (*muhafzas*), and the remainder of the occupied country is divided into provinces (*mudirats*), which are subdivided into districts (*markaz*), each under a *markazi*, who controls the head man (*ouda*) of each village in his district. By the law of 1883 provincial councils were instituted, consisting of two representatives from each *markaz*, under the presidency of the *mudir* (or governor) of the province. These councils were reorganised in 1910 and were made the elementary education authority for the province, with certain restricted powers of local government.

Defence.—In 1882, a military revolt, headed by an officer of the Egyptian Army (Ahmed Arabi *Pasha*) assumed alarming proportions, and a British expedition was despatched to re-establish the authority of the Khedive. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation. The defence of Egypt is reserved by the Constitution and remains under British control, the British garrison (under the command of a British general officer) amounting to 3 cavalry regiments, 3 batteries of artillery, 2 companies of engineers, 7 battalions of infantry and 1 armoured car company, a total of 11,420. Service in the Egyptian Army is nominally compulsory on all Egyptian subjects between the ages of 19 and 27, the recruits required each year being chosen

by ballot; but certain classes (professors, students, Government employees, &c.) are exempt, and exemption may also be purchased for £500, if paid before the ballot. Natives of the Sudan are enlisted voluntarily for service in the Egyptian Army, which had a strength of about 11,200 all ranks in 1927.

There is no Navy in the proper sense of the term; there are 3 small cruisers belonging to the Coast Guard and Fisheries service, and 4 vessels under the Ministry of Communications, while the different Government Departments possess steamers on the Nile for inspection purposes.

The Egyptian Police (under the Ministry of the Interior) consists of City and Provincial Police, the former comprising 306 officers (75 Europeans), 476 European constables, and 6,585 men, the latter 359 officers and 6,162 men. There are also 60,850 *ghafirs*, or native night-watchmen.

Education on native lines has long been given in elementary vernacular schools. The native system of education is completed by the more promising pupils at the Azhar University in Cairo, the principal University of the Moslem world. In 1931-32 there were 1,624 *Maktabas* (Indigenous native schools) under Government inspection, with 158,885 pupils. The Government primary schools give a 4-years' course and prepare for admission to secondary, agricultural and other special schools. There are *Colleges* of Medicine, Law, Education, Engineering, Fine Art, Commerce, Veterinary Science and Agriculture at Cairo, and evening classes for workmen. Much assistance is given to education by private enterprise and benevolence and foreign schools abound. The State University, founded in 1908, had 2,322 (168 of them women) students in 1931-32.

Agriculture.—The total area of Egypt is estimated at approximately 222,400,000 English acres, of which about 8,450,000 acres are formed of the alluvium brought down by the Nile from the Abyssinian hills, the remainder being chiefly limestone desert. Only the former are cultivable, and only the portion that can be irrigated from the waters of the Nile. In 1931 the land was held as to 5,321,481 *faddans* by 2,236,042 native owners, and as to 503,819 *faddans* by 6,185 foreign owners. The principal crops grown during *Saif* (summer) are cotton, rice, sugar cane, and Sorgho (a variety of maize). *Nil* (flood) part of *Saif*, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally commences in July. The principal crops are maize and rice. *Chittwi* (winter) commences in November and ends in June. The principal crops are cereals, beans (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba. The total cotton crop and the value of the quantities exported in recent years:—

Year	Kantars	Export value £
1924-25	7,273,974	£57,544,253
1925-26	7,964,645	43,825,564
1926-27	7,652,180	35,961,447
1927-28	6,041,499	45,138,000
1928-29	8,070,000	41,361,000
1930-31	8,015,400	...
1931-32	6,401,000	...

Livestock.—In 1931 the cattle numbered 792,123, buffaloes 821,833, horses 35,714, mules 20,527, donkeys 741,222, sheep 1,239,111, goats 636,026, and camels 152,470.

Minerals.—The riparian districts of the lower Valley of the Nile are ill-provided with workable mineral deposits, with the exception of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploration and development, but of late years considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuit being entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organisation are chiefly foreign.

Manufactures and Industries.—The principal articles of Egyptian manufacture are cotton and woollen fabrics, silks, embroidery, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery and cigarettes. The principal Egyptian industries are dyeing, tanning and cement.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta, and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connexion runs to Wadi Halfa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line, which it is hoped to extend eventually to the frontier at Sollum, thus joining Tripoli to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway) on March 31, 1931, was 3,374 miles (including 155 miles of branch line and 734 miles of siding). 26,937,000 passengers and 5,498,000 metric tons of merchandise were carried during 1930-31, the gross receipts being £7,038,894 and the working expenses £4,076,325. The gauge is standard (4 ft. 8½ in.), with the exception of 138 miles between Luxor and Shellal, which are 3 ft. 6 in. gauge. There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley. In addition to the Government lines, there are 865 miles of light railways exploited by public companies.

Motor Vehicles.—On Dec. 31, 1928, there were 14,122 private motor cars, 6,311 taxi-cabs, and 4,045 lorries and omnibuses.

Caravan Routes.—The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Fār and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qosair being probably the most frequently used.

Shipping.—For the SUEZ CANAL see pages 929-930.—Apart from the three great seaports of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollum and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Iqhrhada in the Gulf of Suez, and Safage, Qosair and Halaib on the Red Sea. The Khedivial Mail Steamship Line

(which is under British management) has its headquarters at Alexandria and a depot at Suez. In 1931, 8,509 steamers (31,428,601 tons) entered and 8,499 steamers (31,426,862 tons) cleared at Egyptian ports.

Posts and Telegraphs.—There were in 1931 4,206 post offices and stations, dealing with 120,190,426 letters, post-cards and newspapers, &c., and a total foreign correspondence of 56,800,000. There were on March 31, 1931, 223,000 miles of telegraph and 220,000 of telephone wire. A system of savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the *sarnif* (village tax-collector).

	1931-32	1932-33
Revenue	£37,378,000	£37,492,520
Expenditure	37,372,000	37,309,639
Imports	£31,528,800	£27,425,741
Exports	27,937,120	26,987,417
Imports from U.K.	£6,838,000	£6,644,000
Exports to U.K.	10,857,000	10,406,000

Debt.—The *Caisse de la Dette*, a body representing the creditors of the Egyptian Treasury, has considerable powers and special privileges. The *Caisse*, appointed during an era of bankruptcy, succeeded in protecting the interests of the bondholders, but as Egypt became solvent and prosperous, its stringent regulations prevented the development of the country out of surplus revenue, a large part of which was held in suspense as contingent security for the service of the debt. Though the *Caisse* still exists, its duties are now limited to receiving the revenues necessary for the interest and for the payment of the coupons as they become due, while it also holds a considerable reserve fund (£37,950,792 on April 30 1931), the interest on which reduces the amount of the Treasury contribution. The Egyptian debt was stated as follows (in £ sterling) on April 1, 1931 and 1932:—

Debt.	1931	1932
Guaranteed Debt, 31 per cent.	3,760,400	3,517,200
Privileged Debt, 3½ per cent.	30,633,980	30,633,980
Unifid Debt, 4 per cent.	55,250,460	55,250,460
Total	89,644,840	89,401,640

The Cost of the Debt (in the Budget for 1932-33) inclusive of £1664,826 assigned to the service of the Ottoman Loans of 1855, 1861 and 1869, which were guaranteed on the Egyptian Tribute, was stated at £24,201,903.

CAIRO, the capital (population 1927, 1,064,567), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century. The bazaars are always interesting, especially the Khān-el-Khalili, the Hamzawi, and the Brass Bazaar, though the Munkī, which leads to them, is fast losing its oriental character.

ALEXANDRIA (population 1927, 573,023), founded B.C. 332 by Alexander the Great, was for over

1,000 years the capital of Egypt. Its great Pharos, or lighthouse, was one of the "Seven Wonders of the World" (see p. 170). It now contains two royal palaces, Ras-el-Tin and Montaza, while almost the entire cotton trade of the country is here controlled by the big dealers and brokers. At the census of 1927 the towns of Tanta (90,014), Port Said (104,603), Mansura (63,696), Assiut (57,132), Faiyūn (52,372), Zagazig (52,351), and Damanhur (51,709), also exceeded 50,000 inhabitants.

CAPITAL, Cairo.

Head of the State, M. Konstantin Pita.
Foreign Affairs, M. Julius Seljamaa.

Minister in London, Dr. Oskar Kallas, 167
Queen's Gate, S.W. 7.
Counsellor of Legation and Consul-Gen., Hans
Markus.
Secretary, V. Ojanson.
Agricultural Attaché, V. Raud.

The most northerly of the Baltic States is bounded on the N. by the Gulf of Finland, on the S. by Latvia, on the W. by the Baltic Sea, and on the E. by Lake Peipus and the U.S.S.R. (along a line roughly parallel with the eastern shore of the lake). The islands of Dagö, Osel and other smaller islands in the Baltic form part of the Republic. It has an area of about 28,632 sq. miles (within the boundary settled by agreement with the U.S.S.R.), with a population (Jan. 1, 1933.) of 1,123,634 (87.8 per cent. Estonians, 8.2 per cent. Russians, 1.7 per cent. Germans). Agriculture and dairy farming are the chief industries, engaging 59 per cent. of the population. The value of the agricultural production in 1926 was £15,000,000, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon, and eggs the chief products of dairy farming. There are important manufactures, including cotton, woollen, paper, timber, matches and distilling, with animal production valued at £7,000,000. There were (1933) 762 miles of broad gauge and 672 miles of narrow gauge railway in operation. The Legislature consists of a single-chamber Assembly (Riigikogu) of 100 members elected for 3 years by universal adult suffrage. The executive is entrusted to a council of Ministers, the Prime Minister being the Head of the State. The supreme organ of the Judicature is the State Court of Justice in Tartu (Dorpat).

(Lai Tannu 17, Tallinn.)

British Minister to Estonia, Latvia and Lithuania, Hugh Montgomery Knatchbull-Hugessen, C.M.G. (1930).

Naval and Military Attachés, see LATVIA.

BRITISH CONSULAR OFFICES.

Tallinn—Consul and Chargé d'Affaires (with local rank of Second Secretary), A. J. Hill.
" Vice-Consul, J. E. P. Leslie
" Pro-Consul, Arthur Halsey.
Pärnu—Vice-Consul, James P. Hicks.

ETHIOPIA.

(Yoithiopia Negisa Negist Wangist.)

Emperor, His Imperial Majesty Haile Selassie I, G.C.B., G.C.M.G., G.C.V.O., LL.D., son of the late Ras Makonnen, Governor of Harar; born July 24, 1891; crowned as Negus Oct. 1928, proclaimed Emperor April 2, 1930; crowned Nov. 2, 1930.
Crown Prince, H.I.H. Prince Asfa Wosan, eldest son of the Emperor, born July 27, 1916; married May 9, 1932, Princess Wolata Israel, daughter of Ras Sayouni.

Minister in London, Bajjford Tekla Hawariat. (Chargé d'Affaires, ad interim, Ato Ephrem Tewolde Medhon.)

Legation, 83 Elm Park Gardens, S.W. 10.

The area of Ethiopia and its dependencies is estimated at 420,000 square miles, with an estimated population of 5 to 6 millions, of whom less than one-half are Ethiopians and the remainder Gallas, negro tribes on the west and south frontiers, and Danakils and Somalis on the east. The political neighbours are the Sudan, the Italian colony of Eritrea, French Somaliland, British Somaliland, Italian Somaliland, Kenya Colony and the Uganda Protectorate.

Ethiopia is volcanic and mountainous, and contains some mineral wealth; iron and coal are not uncommon, and gold is washed in various streams, while mica, platinum, salt, saltpetre, and sulphur are also procurable. The lower country and deep valley gorges are very hot; the higher plateaus are well watered, with a genial climate. In the hotter regions, sugarcane, coffee, &c., flourish; in the middle zone maize, wheat, barley, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, oxen, goats, and sheep, and animals in the lowlands, form a large portion of the wealth of the people.

The Ethiopians are Christian (a branch of the Coptic Church), and their rulers claim descent from Menelik, the son of Solomon by the Queen of Sheba. The government is nominally an autocracy, but the Emperor's power does not yet extend throughout the country. There is very little popular literature, but education shows signs of progress. In addition to foreign mission schools, there are 20 Ethiopian schools in the country, of which 4 are in Addis Ababa. The potential army numbers between 600,000 and 1,000,000. The principal pursuits are agriculture and cattle breeding, the chief exports being coffee, civet, wax, hides and gold. The import duty, except for non-spirituous liquors and for a few articles on the free list, is 20 per cent. *ad valorem*; there are certain heavy consumption taxes collected additionally. A railway, which is

under French control, links Addis Ababa, the capital, *via* Dire Dawa, with Jibuti, 486 miles away. The Government post and telephone administration is under French management, and the Italian Government have a concession that gives them control of a telegraph line from Addis Ababa to Asmara. The principal towns besides Addis Ababa are Dire Dawa, Harar, Gore, Jimma, Deba Markos (the capital of Gojani), Adma (the capital of Tigre), Gondar, Sayo, Aksum, Antalo, Dembecha and Ijube. There are ancient architectural remains at Aksum, Gondar, and Ankober.

CAPITAL, Addis Ababa (population fluctuates, but is ordinarily about 40,000). Harar, in Eastern Ethiopia, has a population of about 25,000.

Total imports (1931) £753,775

Total exports (1931) £21,530

Imports from U.K. 1931 (about) 80,000

Exports to U.K. 1931 (about) 24,900

FLAG Three horizontal bands, green, yellow, red.

BRITISH LEGATION

Envoy Extraordinary, Minister Plenipotentiary and Consul-General, Sir Sidney Baiton, K.C.V.O., K.B.E., C.M.G. (1929) £2,800
1st Secretary, P. M. Broadmead, M.C.
Archivist, A. R. Craig, M.B.E.

BRITISH CONSULAR OFFICES

Addis Ababa—Consul (with local rank of 1st Secretary), William L. Bond.

Pro-Consul, A. Iyer.

Dangila—Consul, Major R. E. Cheesman, O.B.E.

Gore—Consul, Capt. E. N. Erskine, M.C.

Harar—Consul (vacant).

Mega—Consul, Maj. A. T. Miles, O.B.E., D.S.O., M.C.

Maj—Consul, Capt. R. C. R. Whalley.

Addis Ababa is 500 miles from Zerkla, *via* Harar; letters from London are from 20 to 24 days in transit to Addis Ababa; train from Jibuti takes 3 days; in dry seasons through train makes the journey in 36 hours.

FINLAND.

(Suomi.)

President, Pehr Evind Svinhufvud, born 1861,

assumed office, March, 1931.

Prime Minister, T. M. Kivimäki.

Foreign Affairs, A. Hackzell.

Minister in London, G. A. Gripenberg.

Legation, 2 Moreton Gardens, S. Kensington, S.W. 5.

Secretary of Legation, P. O. I. Hjelt.

Naval Attaché, Commander V. L. Kopio.

Commercial Secretary, R. Smedslund.

A country situated on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and united to the Russian Empire, as an autonomous but not sovereign Grand-Duchy, in 1809. When the Russian Empire broke down in 1917 Finland declared herself an independent sovereign state (Dec. 6, 1917). The following year the country sustained severe disturbances on account of the aggression of Russian Bolshevism, but succeeded in restoring order, and the relations between Finland and Russia were finally settled by the Treaty of Dorpat (Oct., 1920).

The area is 149,926 square miles, with a population (1932) of 3,697,595, of whom 89.4 per cent. were Finnish-speaking, 10.1 per cent. Swedish-speaking, and 0.5 per cent. others (mainly Laps,

leading a nomadic life in the north). Nearly all the inhabitants are Lutherans. The *Åland Archipelago*, a group of some 300 small islands at the entrance to the Gulf of Bothnia (area 557 square miles, population about 27,000), forms part of the Republic. There are 3 universities, 1 at Helsinki (Helsingfors) and 2 at Turku (Åbo); the university of Helsinki (founded 1640 at Turku and removed to Helsinki in 1828) has nearly 5,000 students, of whom about 1,000 are women. In addition, there are 1 technical and 3 commercial highschools. The leading crops are rye, barley, oats, potatoes. Saw mills, wood pulp, cellulose and paper manufacture provide the chief industry, and the forests (62,400,000 acres) are a great source of wealth; there is no European country so wealthy in forests except Russia, the exports of sawn timber in 1932 being 732,020 standards; wood pulp, cardboard and paper, and dairy produce are also exported. There are (1931) 3,378 miles of railroad and about 3,900 miles of telegraph, with a well developed telephone system (32 per 1,000 inhabitants). There is railway connexion with Sweden and U.S.S.R., and telephone connexion with most countries of the world. The merchant fleet (1932) consists of 530 steamers (211,805 net tons), 164 motor vessels (19,039 net tons) and 257 sailing vessels (66,810 net tons).

Service in the Army is universal and compulsory, the peace effective being about 25,000 all ranks. There is also a volunteer organisation of Civic Guards with an enrolled strength of about 100,000.

The country was formerly governed by the Finnish Senate of 22 members, with a Diet of 4 estates elected by the people; but under the Constitution of Jan. 1, 1907, there is a single Chamber elected by universal suffrage of both sexes, women being likewise eligible for election to the Chamber. Finland was thus the first country to concede woman suffrage and representation, and it is noteworthy that it was gained without agitation.

Finland was for some years a Prohibitionist country, the only one in Europe, but after popular vote Prohibition was repealed by law as from April 5, 1932.

Finnish and Swedish are the official languages.

FRANCE.

(République Française.)

President of the Republic (1932-1939), Albert Lebrun, born Aug. 29, 1871, assumed office May 10, 1932.

MINISTRY (October 26, 1933)

Prime Minister and Minister of Marine, M. Albert Sarraut
Minister for Foreign Affairs, M. Paul-Boncour.
Minister for War, M. Édouard Daladier.
Minister for Interior, M. Camille Chautemps.
Minister of Finance, M. Georges Bonnet.
Minister of the Budget, M. Palmade.
Minister of Agriculture, M. Henri Queuille.
Minister of Commerce, M. Laurent Eynac.
Minister of Public Works, M. Pagnon.
Minister of Labour, M. Eugène Piot.
Minister of Education, M. Anatole de Monzie.
Minister of Colonies, M. Albert Dalimier.
Minister of Air, M. Pierre Côté.
Minister of Mercantile Marine, M. Rio.
Minister of Public Health, M. Bounevay.

Ambassador in London, Monsieur Charles Corbin, Albert Gate House, Hyde Park, S.W. 1.
Counsellor, M. Roger Cambon.
1st Sec., M. J. de Margerie.
2nd Sec., M. G. Leveillard.
3rd Secretaries, M. Saffroy; M. de Charbonnière.
Attaché, Comte de Limur.
Military Attaché, Col. Voruz.
Asst. do., Commandant Cuny.
Naval Attaché, Commandant Donval.

Asst. Naval Attaché and Air Attaché, Capt. Albertas.

Commercial Attaché, Vicomte du Halgouët.

Financial Attaché, M. Rueff.

Consul-General (attached to the Embassy), M. J. Knecht.

Secretary Archivist, Comte La Combe.

Consulate General, 51 Bedford Square, W.C. 1.

Consul-General, M. Goiran.

Consul at Liverpool, M. de Ledouix.

There are also Consuls at Manchester, Southampton, Newcastle-upon-Tyne, Cardiff, Glasgow, Dublin, and in Jersey.

The most westerly State of Central Europe, extending from 42° 20' to 51° 5' N. lat., and from 7° 45' E. to 4° 45' W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1924) at 207,076 square miles, divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory ceded by the *Treaty of Frankfurt* (May 10, 1871) amounted to 5,602 square miles; that regained by the *Treaty of Versailles* (June 28, 1919) to 5,819 square miles, making the present area of France (exclusive of Algeria) 212,895 square miles, with a population (census of March, 1931) of 41,834,923 (inclusive of Alsace and Lorraine).

Births and Deaths.

Year	Births	Deaths
1927	745,708	676,666
1928	745,325	675,110
1929	728,530	741,104
1930	748,911	649,125
1931	730,249	680,710

	1930.	1931.
Birth Rate	18.1	17.4
Death Rate	15.7	16.3
Marriages (per 1,000 pop.)	15.6	15.6
Do (Number)	342,698	326,358
Divorces (Number)	20,409	21,212

France has always been attractive to foreigners, of whom (1931) 2,800,893 were resident there, including (in 1921) 470,873 Italians, 415,546 Belgians, 303,121 Spanish, 55,456 British, 34,027 Russians, and 30,948 Americans.

GOVERNMENT.—The monarchical system of government was overthrown by the *French Revolution* (1789-1793), and the First Republic endured until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March 20-June 29, 1815), until the Second Republic of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the Third Republic was set up. The head of the Republic is the President, elected for 7 years by the National Assembly of the two houses of the Legislature, the *Senate* of 324 members (elected by indirect vote for 9 years, one-third being renewable every 3 years) and the *Chamber of Deputies* of 612 members (elected by direct vote for 4 years). Members of the legislature receive 62,000 francs a year and travelling facilities over the railways.

PRODUCTION.—The chief agricultural products are wheat, barley, rye, maize, oats, potatoes,

beetroot (for the manufacture of sugar), hops, &c. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The agricultural production is shown in the following table:—

Production (Metric Tons).		
Crop.	1931.	1932
Wheat	7,188,000	9,018,000
Rye	750,000	893,000
Bailey	1,039,000	1,168,000
Oats	4,591,000	5,129,000
Potatoes	16,300,000	15,868,000

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent (1,305,281 gallons of wine were produced in 1931), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important industry, and the production in 1930 amounted to 465,500,000 gallons. The live stock (1931) included 15,433,840 cattle, 9,844,690 sheep, and 6,397,970 pigs, 2,919,700 horses, and 1,500,000 goats. The mineral resources include coal, pig iron, copper, lead, silver, antimony and salt. Under Article 50 of the *Treaty of Versailles*, the coalfields of the *Saar basin* are ceded to France for 25 years, at the end of which time (*i.e.* in 1935), the inhabitants are to decide by a *plebiscite* whether they will remain French, return to Germany, or become a self-governing community. The coalfields abut on Lorraine, and have an area of 217 square miles, with a population of 640,000, and they include the towns of Saarbrück (60,000), Saarouis (16,000), and Metz (20,000), on the River Saar. In 1931 the coal mines of France produced 30,000,000 tons, and the production of the enlarged area reached 52,000,000 tons of coal in 1931. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, woollens, carpets, linen, silk and lace. Glass manufacture and pottery are also important, and the sardine fisheries and the culture of oysters are a source of wealth.

DEFENCE.—The National Army of France consists of the Metropolitan Army, the Colonial Army, the Gendarmerie and Republican Guard, and of the partly native armies of Algeria, Morocco, and Tunis. The peace strength of the Metropolitan Army (1930-31) was 316,992 all ranks, including the (Military) Air Force (36,800). The Naval Air Force (for Coast Defence) is included in the Naval personnel. In the War of 1914-1918 over 80 per cent. of the French people were mobilised, and 9,717,000 all ranks passed into the Armies of France (exclusive of troops from Algeria, Tunis and Morocco). The French Navy was manned in 1930 by 57,415 officers and other ranks. For strength see Tables pp 372 and 373.

ARMISTICE MONUMENT.—In the Forest of Compiègne is a *Carrefour de l'Armistice*, from which the *Clairière de la Victoire* leads to the Armistice Monument, unveiled Nov. 22, 1922. The monument marks the spot where the Germans signed the armistice terms presented by Marshal Foch, and bears the inscription *Ici le 11 Novembre 1918 succomba le criminel orgueil*

de l'Empire Allemand vaincu par les peuples libres qu'il prétendait asservir.

EDUCATION.—The educational system is highly developed. *Central Administration* comprises (a) Ministry of Public Instruction; (b) Superior Educational Council, charged with the actual administration; (c) Consultative Committee (advisory); (d) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (a) Territorial Academies, with inspecting staffs for all grades; and (b) Departmental Councils, presided over by the *prefet*, charged especially with *primary* education. By the Law of July, 1904, all congregationist institutions are to be suppressed within 10 years, and many were at once closed, some re-opening under lay management. (i.) *Primary: Secular, comp and free*. Age 6-13. Schools include (a) infants; (b) lower primary; (c) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. (ii.) *Secondary: p*. State lycées, communal colleges, and many private establishments, 7-yrs. course, either (a) purely classical; (b) purely modern; (c) Latin and sciences, or (d) Latin and modern languages. Degree of Bachelor conferred on completion. For females, a similar organisation, course 5-6 yrs. *Sevices* school and the Sorbonne Association well-known. (iii.) *Special Schools* are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) *Universities* (State universities alone grant degrees, but numerous private facilities and private institutions further higher education) at Aix, Algiers, Besançon, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Montpellier, Nancy, Paris, Poitiers, Rennes, Strasbourg, and Toulouse.

COMMUNICATIONS.—The length of the *Routes Nationales* in 1930 was 41,350 miles. The principal rivers of France are the Seine, Loire, Garonne, and Rhône, the navigable waterways having a length of (1929) 6,200 miles. The system of railroads in France is very extensive; they are almost entirely *conceded*, and become State property after the expiration of the concession. The length of lines of general interest, inclusive of local lines, open for traffic on January 1, 1931, was 25,964 miles, of which over 1,040 miles are electrified. The length of telegraph wires (1930) was 223,000 miles, and of telephone lines 133,000 miles, with 1,113,000 subscribers. In 1928 there were 642,744 private motor-cars registered in France, of which (1928) 541,438 were touring cars. Goods transport vehicles numbered 305,587, cycle-cars 27,450, motor-cycles 232,201, and motor-boats 3,313. In 1932 the passengers carried in civil aircraft numbered 36,892.

Shipping.—The gross tonnage of the French mercantile marine in 1930 was 3,530,879 gross tons, of which 146,911 tons were motor vessels and 60,288 tons were sailing ships. During the year 1932 the tonnage of French and foreign vessels entering French ports amounted to 52,642,000 tons, of which 13,246,000 tons were French; while the total clearings amounted to 44,498,000 tons, of which 11,781,000 tons were French. The chief ports are Marseilles, Cherbourg, Le Havre, Rouen, Bordeaux, Calais, Boulogne, and Dunkirk. A bill was passed by the Chamber in 1921 for the canalisation of the Rhone, which will make the river navigable for 1,300 ton vessels from the sea to

Switzerland, and will also provide electric power and irrigation to the surrounding departments.

Alsace-Lorraine. — *High Commissioner*, M. Mihan (1920). Alsace-Lorraine, formerly a part of the Holy Roman Empire was ceded to France in 1648 at the Peace of Westphalia, and was ceded to Germany by the *Treaty of Frankfurt* (May 10, 1871), after the Franco-Prussian War. At the close of the War, 1914-1918, the Provinces were regained by France under the *Treaty of Versailles* (June 28, 1919). They embrace the fertile plain between the Rhine and the Vosges, and stretch beyond these mountains as far as Luxembourg. Wine, tobacco, hops, iron, and coal are among the leading productions, and the cotton industry is most flourishing. The area is 5,605 square miles; the population in March, 1921, was 1,709,749. Principal towns, Strasbourg (pop. 181,465), Mulhouse (99,534), and Metz (78,767).

Algeria.—The three departments of Algeria—Algeris, Oran, and Constantine—form an integral part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 4° 36' W. to 6° 16' E. longitude, 37° 6' N. to an undetermined S. limit, about 30° N., covering an area estimated at 222,150 square miles, with a population (1921) of 6,553,451, of whom 920,788 were Europeans and 5,632,663 natives. The revenue in 1921 was estimated at frances 1,199,056,329, and the expenditure at frances 1,195,401,883. The bulk of the trade is with France, the exports to France amounting in 1929 to frances 2,923,773,000 (total exports fr. 4,026,589,000), and the imports from France to fr. 4,552,060,000 (total imports fr. 5,849,550,000). The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, zinc and iron ores, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1926 there were 2,696 miles of railroad open for traffic; and in 1928 the number of ships engaged in foreign trade entering Algerian ports was 4,322 of a net tonnage of 6,685,250 tons. The principal town is Algiers, the capital (municipal population, 1921, 257,122), a most important coaling station and much frequented as a health resort; other large towns are Oran (163,743), Constantine (104,902), Bona (68,778), Sidi-bel-Abbas (45,902), Philippeville (47,750), Mascara (31,449), and Tlemcen (46,660). Governor-General, M. Jules Carle (1930).

CAPITAL, Paris, on the Seine. Population (1931), 2,871,039; there are 82,127 houses and 1,149,366 families according to the census of March 1921. Fourteen other cities exceed 100,000—Marseilles 800,881, Lyons 579,763, Bordeaux 262,990, Nice 219,549, Lille 201,568, Toulouse 194,564, St. Etienne 101,088, Nantes 187,343, Strasbourg 181,465, Le Havre 165,076, Toulon 133,263, Rouen 122,957, Nancy 120,578, Roubaix 117,190, Clermont-Ferrand 103,143, Reims 112,820, Mulhouse, Limoges, Dijon,

Grenoble, and Amiens exceed 90,000, and 34 others exceed 50,000.

FLAG: The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

FRENCH COLONIES.

Group.	Sq. kilometres	Population
North Africa	3,770,000	13,000,000
Eastern Group	200,000	2,100,000
West Africa	7,640,000	19,560,000
America	100,000	500,000
Indian Ocean	640,000	5,900,000
Indo-Chinese	740,000	21,000,000
Pacific	20,000	100,000
Total	13,110,000	62,160,000

In ASIA.—*French India* includes Pondicherry, on the Coromandel coast; Chandernagore, on the Hooghly; Karikal, in the Cauvery delta; Yanaon, in the Godavary delta; and Mahé, on the Malabar coast—the total area being 200 square miles with an estimated population of (1922) 268,000. The trade of Pondicherry and Karikal in 1927-8 was valued at £268,529 for imports, £624,648 for exports, and £1,349,135 for re-exports. *French Indo-China* comprises the possession of Cochín-China and the four protectorates of Cambodia, Annam, Tonkin, and Laos. In 1898-9 the port of Kwang-Chow-Wan was also acquired on lease from China. The capital is Hanoi, in Tonkin, and the total area is 309,979 square miles, with a population (1922) estimated at 19,983,203, including the civil European population of about 17,500.

In ASIA MINOR.—The French mandatory sphere of Syria has a total area of about 150,000 square miles, with an estimated population of 4,500,000 (see also pp. 932-933).

In AFRICA.—*Algeria* (see above) is an integral part of France. *Morocco* (see pp. 912-913) is a French (and partly Spanish) protectorate.

Tunisia has been a French protectorate since 1881. It lies between Algeria and Tripoli, and extends southwards to the Sahara, with a total area of about 45,000 sq. miles and a population (Census of 1931) of 2,410,692 (Europeans 195,293, including 91,427 French civilian population, 91,798 Italians). The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The principal minerals are coal, copper, lead, zinc and iron, and phosphates and marble are also worked. The chief exports are phosphates, olive oil, wheat, esparto grass, barley, beans, blankets, sponges, and dates, the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent. of the trade is with France and Algeria. In 1930 the imports were valued at 2,107,455,000 francs and the exports at 1,127,133,000 francs. Tunisia, the capital, has a municipal population of 202,405 at the Census of 1931; other towns are Sfax (39,970), Bizerta (23,206), Sussa (25,324), and Kairwan (11,532). *French West Africa* extends from Mauritania to Dahomey, and has a total area of 1,509,733 square miles, and a population of 13,500,000. It consists of Senegal (74,000 sq. miles, pop. 1,250,500), capital, St. Louis; the trade of Senegal in 1930 was francs 866,000,000 imports,

and francs 668,700,000 exports, the principal export being ground nuts. *Upper Senegal Niger* (304,000 sq. miles), and the *Niger Military Territory* (533,000 sq. miles), which have a total population of about 6,036,200; *French Guinea* (62,600 sq. miles, pop. 1,737,350); *Ivory Coast* (126,100 sq. miles, pop. 1,216,300); and *Dahomey* (38,000 sq. miles, pop. 878,500); adjoining Dahomey is the French Sphere of the former German colony of *Togoland* (23,400 sq. miles, pop. 800,000); while the hinterland of these colonies forms the *French Sahara*, which has an estimated area of 924,160 sq. miles and a population of about 450,000. *French Equatorial Africa* consists of the *French Congo* (513,000 sq. miles, pop. 9,000,000) and of the French Sphere in the former German territory of *Cameroun* (267,000 sq. miles, pop. 2,750,000). *French East Africa* consists of the *Somali Coast* (46,300 sq. miles, pop. 208,000) and of the large island of *Madagascar* (226,000 sq. miles, pop. 3,153,500) with its dependencies (Nosé Bé, Sainte Marie, Réunion, and the Mayotte-Comoro Islands, and St. Paul, Amsterdam, and Kerguelen Islands). Agriculture and cattle raising are the principal industries; the minerals include gold, silver, iron, copper, lead, and zinc. The chief exports are gold, cattle, bark, manioc (for arrowroot), beans, hides, skins, fibre, rice, timber and rubber; the chief imports are cottons, metal manufactures, wines and spirits, coal, clothing, lime and cement. The capital, Antananarivo, has a population of 75,000; other towns are Tananarive (the chief port), Majunga, Diego-Suarez, Maunajary, Tuléar, Audeveranto and Volohmar. Off the south-east coast are the uninhabited islands of St. Paul, Kerguelen and Amsterdam. There is now direct communication across French and British territory in Africa, with posts on the Atlantic and Indian oceans.

In AMERICA.—Off the south-east coast of Newfoundland are two small groups of islands, of which the largest are St. Pierre and Miquelon. In the West Indies, Martinique and Guadalupe, with Basse Terre, Marie Galante, Ile des Saintes, Petite Terre, St. Bartholomew, and St. Martin; and in South America, Cayenne or French Guiana. Included in Cayenne is a group of islands (St. Joseph, Ile Royal, and Ile du Diabolo) known as Iles du Salut. On *Devil's Isle* Major Dreyfus was imprisoned from 1894-1899. The total area of French possessions in North and South America is 35,320 square miles, with a population of 428,850.

SOUTH CHINA SEAS.—In April, 1933, France occupied certain small islands (Spratly, Amboina Cay, Itu-Atu, Deux Iles group, Loaita and Thi-Tu) between 7° 54'-11° 29' N. lat. and 111° 55'-114° 25' E. long.

In OCEANIA.—New Caledonia (7,200 sq. ms., pop. 50,500) is a large island with dependencies, the Isle of Pines, the Wallis Archipelago, the Loyalty Islands (Mahé, Lifou, Uvée, &c.), the Iliou Islands, and Futuna and Alofi. The Society Islands (Tahiti, Moorea, &c.) have an area of about 650 square miles, and a population of about 14,000; the Marquesas (Nukahiwa, Hivasa, &c.) 500 sq. miles, pop. 2,500. Leeward Isles (Huahine, Raiatea, Tahaa, Bora-Bora, Maupiti, &c.); the Gambier Islands (Mangareva, &c.); the Tubuai Islands (Kuruti, Raiavava, Rimatava, &c.); Rapa Island; Makatea; and Malao Island. The New Hebrides are under joint Franco-British administration.

GERMANY.

and Sec., Dr. Gunter Heule; Dr. Theodor M. Auer; Dr. Albert Hilger van Scherpenberg, Herr Werner von Fries.

Military Attache, Col. Leo Freiherr Geyt von Schweppenhurg.

Naval do., Capt. Erwin Wassner.

Chancellor, Herr Friedrich Wilhelm Achilles.

Consular Dept. of the Embassy, 9 Carlton House Terrace, S.W. 1.

AREA AND POPULATION.—The area of Germany is approximately 122,200 square miles, as against 208,800 square miles in 1914. By the *Treaty of Versailles* the "Reichsland" of Klass-Lothringen and the Saar coal basin (temporarily) were ceded to France; parts of Posen and West Prussia to the newly-formed Republic of Poland; North Schleswig to Denmark; and Moresnet and Malmedy to Belgium. Danzig and territory became a Free State. After a plebiscite, part of Upper Silesia passed to Poland. Memel and district went to Lithuania. The Colonies, which had extended over 1,035,086 sq. miles in Africa, 96,220 sq. miles in the Pacific, and 2,943 sq. miles in Asia—a total of 1,134,230 sq. miles, with a population estimated in 1914 at 15,000,000—were renounced, and the delegates to the International Council at Paris allocated Togoland and Kamerun to Great Britain and France; German East Africa to Great Britain; German S.W. Africa to the Union of South Africa; the German Pacific possessions to Japan, Australia and New Zealand. The population on June 16, 1933, was (provisional return) 65,306,130 (without Saar district), of whom 31,699,487 were males and 33,606,643 were females. The population on Dec. 3, 1920, was 64,925,993. Births in 1931 numbered 1,031,508, and deaths 725,983, births being 16.6 per 1,000 of population, deaths 11.2 per thousand. Religious confessions in the present area were in 1925:—Protestants 40,014,677, Roman Catholics 20,933,334, Jews 564,379, others 1,638,229. On June 16, 1933, 41.4 per cent. of all persons with earning occupations were engaged in industry, 30.5 per cent. in agriculture, 16.5 per cent. in trade and communications, 4.7 per cent. in the public services and the professions, 1.8 per cent. in the health services, and 5.1 per cent. in domestic service. There are 52 large towns

with over 100,000 inhabitants, with a population of 19,622,143, or 30.1 per cent. of the total population.

NATURAL RESOURCES.—Forests cover 12,769,092 hectares, consisting to about three-quarters of coniferous trees, and are the basis of a flourishing wood and wood-products industry. Although a great part of North Germany is sandy and infertile, natural conditions in general favour Agriculture. Grown are rye, wheat, spelt, oats, barley, buckwheat, maize, potatoes, beans, leguminous and root plants, including sugar-beet, hops, vegetables, fruits, vines, flax, hemp, rape, and tobacco. The livestock and dairying industries have attained a high degree of perfection. Mineral wealth includes coal, iron, manganese, copper, lead, zinc, tin, nickel, quicksilver, gold, silver, sulphur, antimony, cobalt, arsenic, bismuth, wolfram, uranium, graphite, alum, boracite, pyrites, petroleum, potash, amber, semi-precious stones, and chert clay, and salt, brine-springs, and medicinal waters are abundant. The muette iron mines of Lorraine were lost by the Peace Treaty of 1919, and as the remaining iron ore is insufficient and in part technically unsatisfactory, Germany is largely dependent upon import of iron ore.

CONSTITUTION AND POLITICS.—At the outbreak of war, Aug. 1914, Germany was a Confederate League, bearing the name "German Empire," under the hereditary presidency of the King of Prussia, holding the title of "German Emperor." On Nov. 9, 1918, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. In Jan. 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female). Under the new Constitution of August 11, 1919, the federal legislature consists of a *Reichstag* representing the whole nation and elected by popular suffrage (male and female), with proportional representation, and a *Reichsrat* representing the separate states. Ministries are dependent upon the support of parliamentary majorities. The people possess the right of initiative and the referendum. Bills dealing with economic questions or social issues arising thereout must first be submitted to an advisory Economic Council (*Reichswirtschaftsrat*).

Between the Revolution of 1918 and 1932, the government of Germany and of most of the states was almost continuously conducted by Cabinets supported by the middle and moderate-left parliamentary parties, of which the Social-Democrats and the Catholic Centre were the largest. The extreme (conservative-Nationalist parties and the Communists were in opposition. Successive elections practically obliterated the moderate-conservative People's Party and the Democrats, while the Centre and Social-Democrats remained relatively stable, and the Communists gained. Largely at the expense of the middle parties, the National-Socialistic (Hitlerite) party rapidly increased, gaining great successes at the Reichstag Election of Sept. 1930. In June, 1932, an ostensibly non-party (in reality ultra-conservative) Cabinet was formed with Herr Franz von Papen as Chancellor. Under a form of martial law the Socialist Centre Cabinet of Prussia was expelled from office, and the Reichstag was twice dissolved. In an election of July 31 the Nazis gained 230 seats, but in the

later election of November 6 their number fell to 196. Papen was succeeded in November by General von Schleicher. On January 30, 1933, a joint Nazi-German-National Cabinet was formed with Adolf Hitler as Chancellor, Papen as Vice-Chancellor, and the German-National leader Hugenberg as Minister of Economy. This Cabinet change rapidly took the dimensions of a "National Revolution" of exclusively National-Socialist colour. Hugenberg and his party associates were driven from office, and Herr Hitler's Cabinet, after a victorious Reichstag election in March, pursued a radical policy consisting of abrogation of the Constitutional guarantees, expulsion from office of non-Nazis and monopolisation of all well-paid official posts by Cabinet partisans, expulsion of non-Nazis from profitable positions in private business and replacement with Nazis, persecution of and violence against Jews, Liberals and Socialists, centralisation of control over the states by the creation of "stateholderships," partial arming of the formerly "private" S. A. and S. S. armies, active official propaganda in favour of wars of conquest, and partial repudiation of foreign debts. Party membership of the Reichstag of March 5, consisting of 647 members, was: National-Socialists 288, German-Nationals 52, Centre 73, Social-Democrats 120, and Communists 100, but the Reichstag as a legislative body ceased to exist.

EDUCATION.—Education is in the competence of the states, and according to the Constitution is in principle compulsory until the eighteenth year, but this principle is not uniformly in force. Public elementary schools number (census of 1926-27) 25,785, whereof 28,832 evangelicals, 15,312 Catholic, and 8,559 mixed, with 6,661,794 pupils. Intermediate schools (9 to 10 years course) number 1,548, with 259,290 pupils; continuation and special occupational schools, 29,652, with 2,507,000 pupils; superior schools (between elementary-intermediate school class and universities), 2,858, with 822,600 pupils. For higher education are 23 universities; also high schools, 20 technical, 3 forestry, 4 agricultural, 2 veterinary, 2 mining, 5 commercial, 7 pedagogic, and 11 philosophic-theological, with (1928) 112,300 students, whereof 13,100 women. There are 14 high schools and academies for the graphic arts, and 13 high schools and academies for music.

DEFENCE.—By Article 160 of the *Treaty of Versailles* the German *Military Forces*, as from March 31, 1920, must not comprise more than seven divisions of infantry and three divisions of cavalry, a total force of 200,000 all ranks. By Article 181 of the *Treaty*, the German *Naval Forces* must not exceed 6 battleships of the Deutschland or Lothringen class, 6 light cruisers, 12 destroyers and 12 torpedo boats. No submarine vessels are to be included in the naval forces, and all war vessels in excess of the above numbers were to be broken up or devoted to commercial purposes. Under the Armistice of Nov. 11, 1918, the German High Sea Fleet surrendered to the Allies (Nov. 21, 1918), and was interned in Scapa Flow, where it was scuttled by its crews. By Article 198 of the *Treaty* the armed forces of Germany must not include any military or naval *Air Forces*, and no dirigible balloons, aeroplanes, sea-planes or flying boats. In addition to the limited Army allowed by the Peace Treaty, Germany maintains untrained, equipped, and drilled land

forces, subject to military law, numbering over 1,000,000 men, who since the accession to power of the National-Socialist government have in part been armed. After prolonged negotiations for international regulation of armaments, Germany, on Oct. 14, 1933, withdrew from the Disarmaments Conference and from the League of Nations.

COMMUNICATIONS.—The total length of the *Railroads* at end of 1930 was 58,176 kilometres of which 53,677 kilometres, whereof all except 956 kilometres were full-gauge, belonged to the German Railroads Corporation, which under the *Danew Reparation Scheme* of 1924 acquired all the lines taken over by the Republic from the states in 1921. The number of registered automobiles (July 1, 1933) was 322,209, motor cycles 852,776, and motor lorries 155,219. Length of *Telegraph and Telephone Lines* 302,100 kilometres; telegrams transmitted (1931), 26,597,000; post, telegraph, and telephone offices, 60,950; telephone subscribers, 3,113,700; letters carried, 5,930 millions; value of cash-on-delivery orders, 2,885 mill. m.; money orders, 3,155 mill. m. The number of employees in the service of posts, telegraphs, and telephones was 358,978. In addition to some 6,000 miles of navigable rivers there are over 1,500 miles of canals and 1,600 miles of ship canals. On January 1, 1913, the Mercantile Marine consisted of 2,098 sea-going steamers of 17 65 register tons and upwards (4,380,348 tons gross register), and of 2,420 sailing vessels (447,870 tons gross register), number of seamen, 77,746. As a result of the War and of the Peace Treaty shipping in 1919 sank to 419,000 tons, but there has since been a rapid recovery, due mainly to native building, but partly to purchases from abroad. Finished new constructions of vessels exceeding 100 gross tons were in 1919, 134,535 tons; 1927, 261,105 tons; 1929, 357,600 tons; 1931, 176,735 tons. (On Jan. 1, 1932, shipping had increased to 4,318,000 gross tons. Recovery was helped by the establishment of eleven new yards during the War. The chief ports of Germany are Hamburg, on the Elbe; Bremen, on the Weser; Stettin, on the Oder; Königsberg, on the Pregel; Kiel, on the Baltic. Traffic in the chief ports has increased since the War at a great rate, and now exceeds that of 1913. Arrivals at all ports were: 1913, 34,396,691 net tons; 1931, 40,395,600 net tons. Traffic in the *Kiel Canal* in 1931 was: vessels 48,285, net tonnage 17,757,136.

SOCIAL INSURANCE.—The German scheme of social legislation gives all subordinate bread-winners in Germany a legal right to pecuniary subvention when unfit for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. The National Insurance is based on mutual insurance and self-administration. The Infirmity Insurance Act came into force Jan. 1, 1900. The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentices, domestic servants, laundresses, dressmakers, sempstresses, housekeepers, charwomen, overseers, foremen, engineers, clerks and apprentices in merchants' offices, schoolmasters, schoolmistresses, tutors and governesses, including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons attaining the age of 70, though still capable of work. A comprehensive project

of reform of the State insurance legislation became law in 1911. The new law codified previous legislation, established new Insurance Authorities, reduced working-class influence in the Accident Insurance organisations, provided pensions for widows and orphans, and made other changes of importance. Another Bill extending Insurance benefits to private officials, clerical employes and others above the class of manual workers, became law in 1911. A law establishing Federal Unemployment Insurance for all persons subject to Sickness Insurance and also for seamen, which is financed by equal contributions from employers and employed, came into force on Oct. 1, 1927. During the industrial depression 1930-32 Social Insurance finance suffered badly owing to the decline in receipts and the increase in cost of unemployment relief. Premiums were correspondingly increased and benefits reduced. The National Socialist Cabinet's policy is unfriendly towards Social Insurance, and already the service has been restricted.

PUBLIC FINANCES.—The state financial structure was radically altered after the War. The Reich appropriated the chief direct taxes, including income tax, which had formerly been collected by the states and municipalities, and the states lost the profits from their railways, which were taken over by the Reich. The Reich was thereby compelled to contribute to the state and municipal revenues, mainly out of the yield of income and turnover taxes. The financial relations between Reich and states became a matter of dispute, but the promised definitive regulation has not been effected. Between 1918 and 1924 all public budgets were in confusion in consequence of the currency depreciation. The currency reform of Nov. 1923 reacted favourably on Finance, and the Reich Budget of 1924-25 was balanced. The Reich was materially relieved by the automatic wiping-out of the internal Debt by currency depreciation. Under a later valuation law, holders of public loans were partially compensated, getting 12½ per cent. of the original gold value when they had acquired before July, 1920, and 2½ per cent. when they had acquired later, but no interest was to be paid to the latter class of holders until the Reparations liability had been discharged. After 1926-27 Reich budgets again showed deficits. In consequence of declining revenue due to the trade depression and to the accompanying heavy unemployment relief burden, much larger Reich deficits, and serious difficulties in balancing other public budgets, were experienced after 1929. The net Budget Estimates for 1933-34 (to which are not included the separately financed Railways and Posts, or the shares of taxes paid by the Reich as subventions to the states and municipalities) were:—

	1,000,000 Reichsmarks.
Revenue	5 570
Expenditure	5 570

The German Debt.

The long and short term Debt of the Republic on June 30, 1933, totalled 11,761 million Reichsmarks. Of this sum 682 million marks represented the outstanding liability on the Reparations Foreign Loan of (nominally) 800 million marks, 3,793 million marks represented the depreciated paper mark pre-war and war debts as valorised under the law of July 16, 1925, and

1,377 million marks the international 5½ per cent. (Young Plan) loan of 1930.

The suspension of Reparation payments at the initiative of President Hoover from July 1, 1931 on, materially relieved the Reich Budget. The amount of the reparations due by Germany under the Treaty was fixed in January, 1921 (by the Financial Council of the Allies at Brussels) at 132 milliards of gold marks (£6,600,000,000) payable in bonds, to be redeemed by annual payments of 1 milliard gold marks, together with a sum equivalent to 26 per cent. of German exports. A new *Reparations Scheme* was agreed to by Germany and the Allies in August, 1924, providing for annual payments rising to 2,500 million gold marks, liable to increase according to an index of prosperity, the money to be supplied from (1) taxation, (2) railway bonds, and (3) bonds imposed on private industry. In 1930, by an agreement come to at the Hague, Reparations were again revised. Germany agreed to pay during a term of 37 years annuities averaging 1,989 million marks, and thereafter until 1987-88 annuities varying between 1,711 million and 858 million marks. Under a further agreement, concluded at Lausanne in July, 1932, Reparation annuities were abolished. Germany undertook to hand over to the creditors 3,000 million marks of 5 per cent. bonds, to be marketed as soon as an issue price of 50 became practicable, but no. before three years or after fifteen years. The creditor Governments agreed between themselves to ratify the Lausanne Agreement only if a satisfactory settlement of other international War Debts was attained.

FOREIGN DEBTS.—A short-term foreign debts crisis began in July, 1931, owing to sudden withdrawals of credits to German banks, for which the Reichsbank was unable to deliver gold or exchange. Under a "stand-still agreement" of February, 1932, Germany was protected against any further substantial withdrawals of credits until March, 1933, but she must pay and transfer the interest thereon. This agreement was later prolonged, with some modifications, until February, 1934. A Government census for February 29, 1932, shows public and private indebtedness to abroad at 20,623 million marks, whereof 10,153 millions short-term (maturing before March, 1933), and 10,470 millions long-term. In addition were foreign claims in the shape of holdings of German domestic securities and real property, which bring the total indebtedness to an estimated 25½-26½ milliard marks. Of the 20,623 millions debt proper, 3,125 millions were liabilities of the Reich (mainly Dawes and Young loans), 1,215 state and municipal debts, 6,706 millions bank debts, and 8,785 millions debts by Agriculture, Industry and Communications. The chief creditor countries were:

	Total Claims Marks	Whereof Long Term Marks
U.S.A.	8,352,000,000	5,165,000,000
Netherlands	3,575,000,000	1,914,000,000
Switzerland	2,761,000,000	1,146,000,000
Great Britain	2,415,000,000	1,126,000,000
France	955,000,000	482,000,000

The annual cost of service of the foreign debt (in the 12 months ending March, 1933) was returned at 1,438 million marks, whereof 1,225 millions for interest and 213 millions for regular amortisation. Including certain capital repayments of non-recurring kind, the debt-service

liability to abroad in the 12 months was approximately 1,700 million marks. In consequence of repurchases at low prices and of the depreciation of creditor countries' currencies, the present capital debt and the interest thereon are lower than the above figures. In June, 1932, Germany nevertheless defaulted on her whole foreign long-term debt by prohibiting transfer into foreign currencies for its service. In July an agreement was come to with the bondholders whereby under 50 per cent. of the interest but no amortisation instalments should be transferred until the end of 1933, the full service of the Dawes Loan, however, being maintained.

CURRENCY AND CREDIT.—In 1919-23 the mark currency rapidly depreciated. In November, 1923, was put through a *Currency Reform*, consisting in the creation of a *renten-mark*, nominally worth 1 gold mark, and in the stabilisation of the depreciated paper-mark at 1 billion paper-marks to 1 gold mark. The stabilised paper mark notes have since been withdrawn from circulation, and the *renten-marks* are being gradually replaced by *reichsmarks* of pre-war gold value, issued by the Reichsbank as reconstituted under the Reparations settlement of 1924. Currency conditions were satisfactory until the debts-withdrawal crisis of July, 1931, which led to a suspension of internal gold payments, and to the subjection of payments to abroad to official restriction. Foreign currency in German hands was expropriated against compensation in reichsmarks. By these means the stability of the reichsmark at gold parity was maintained; but the Reichsbank's reserves (gold and foreign exchange) fell between May, 1931, and June, 1933, from 2,576 to 274 million marks, and legal cover for circulation to under 20 per cent. (normal legal minimum, 40 per cent.) Owing to the foreign and home run, the Darmstädter und National and some other banks failed. By emergency decrees the Government drastically regulated credit, and attained in banking a dominant position. The effect of the credit crisis on industry and trade was less serious than anticipated, and in 1932 confidence began to return, but payments to abroad remained subject to official sanction. Bankruptcies, after reaching a maximum of 1,425 in October, 1931, declined in September, 1933, to under 300, and the number of bill protests fell heavily. The internal value of the currency increased, the wholesale-prices index falling from 121.6 in July, 1928, to 91 in January, 1933, the cost-of-living index from 156.5 in March, 1929, to 128.4 in August, 1933.

EMPLOYMENT.—Employment is subject to sharp seasonal fluctuations, being lowest in the summer and highest in the late winter. In 1922, under the influence of the inflation-activity of industry, the number of unemployed fell to 16,000. After the currency stabilisation, unemployment in general increased, but in the prosperous year 1927 fell to 250,000, after which a new increase followed. In February, 1930, were 3,366,000 unemployed; February, 1931, 4,971,000; February, 1932, 6,128,000; February, 1933, 6,047,000; September, 1933, 3,850,000; but the great improvement shown by the last figure is questioned.

AGRICULTURE.—Agriculture is the leading German occupation. The cultivated area in 1932 (omitting forests) was 29,369,576 hectares, of

which 4,450,129 h. were rye, 2,280,351 h. wheat, 3,884,524 h. oats, 1,568,210 h. barley, 2,879,233 h. potatoes, and 276,665 h. sugar-beet. The meadow area was 5,501,294 h. Owing to high wheat duties and other protective measures, the area under and yield of wheat has greatly increased, whereas cultivation of rye has declined. As against an average wheat crop of 3,700,000 metric tons in 1912-14 (on the present area), the estimated crop of 1932 was 5,100,000 tons; and in wheat Germany is now self-sufficing, and may have an exportable surplus. Area under orchards is (1932) 53,129 h., vineyards 82,781 h. The area under flax, hemp, and other industrial plants is smaller than in 1912. The livestock census of Dec. 1930 showed: horses 3,521,530, cattle 18,470,390 pigs 23,440,460, sheep 3,504,355. Agriculture has been financially weakened by the price-fall, and has debts totalling 22,500 million m.

INDUSTRY.—Industry is highly developed in all the larger German states. Prussia leads in coal-mining, iron and steel, metalwares, machinery, and electro-technical articles, but manufactures comprise practically all branches. The cotton works are extensive, and there are numerous manufactories of silk, mixed cotton and linen fabrics, including shawls, carpets, &c., and woollens. With leather, earthenware, glass, paper, and tobacco manufactures, as well as chemicals and brewing. Bavaria produces machinery, jewellery, scientific instruments, pottery, wood-products, paper, leather, textiles, and beer. Special manufactures of Saxony are machinery, yarns and cloth, knitted goods, hosiery, furs, pottery, glass, and musical instruments. Württemberg has manufactures of textiles, paper, leather, firearms, clocks, and tobacco; Baden of chemicals, jewellery, and cigars. The toys industry of Thuringia is important.

Intense industrial activity prevailed during the inflation years 1919-23, and after a reaction a new high level was reached in 1927, after which production in the finishing branches somewhat declined, while the heavy branches, including iron and steel, enjoyed prosperity throughout 1928 and 1929. In 1930, under the influence of the world-depression, a rapid decline in the output of all branches began. At the beginning of 1932, current industrial production was 40.9 per cent. below that of the last prosperity years, the decline for steel being 60.8 per cent., machinery 57.5 per cent., motor-cars 38.5 per cent., pottery 55.7 per cent., paper 22.5 per cent., finished textiles 31.9 per cent., footwear 28 per cent. The production decline in the heavy industries was very great:

	1932.	1927.
Metric Tons.		
Coal	104,740,331	153,597,600
Pig-iron	3,923,541	13,102,500
Ingot steel	5,751,127	16,305,300

The financial stability of industry was badly shaken by three years of trading losses, and numerous companies were obliged to reduce their capital in order to restore equilibrium to their balance sheets. A revival of industry set in in September, 1932, and has continued.

FOREIGN TRADE.—Foreign-trade policy has been increasingly Protectionist. Immediately after the War, import duties on many articles were sharply raised; and in 1925 a new part

tariff increased the duties on numerous industrial articles, and restored the foodstuffs duties, which had been suspended in August, 1914. A Bill reducing duties, drafted in accord with the recommendations of the Geneva Economic Congress of 1927, was dropped; the duties on foodstuffs were repeatedly raised, and supplemented by compulsion to mill native grain; and in 1932 duties on numerous agricultural and industrial products (including English yarns) were heavily increased, and the introduction of import-quotas for certain agricultural products was announced. The Nazi Government has continued the same policy, repeatedly increasing duties on articles of necessity.

Germany's chief imports, in approximate order of value, are: oil-fruits, fruit, cotton, wool, dany products, yarns, mineral oils, coffee, fodder, hides, eggs, cloth, tobacco, copper, furs, iron-ore, and wood. Chief exports: heavy iron and steel goods, textiles and clothing, machinery, chemicals and dyes, electrical apparatus, non-ferrous metal-wares, paper and wares thereon, leather and wares thereon.

The foreign-trade balance was increasingly passive until 1927, whereafter import surpluses declined. Equilibrium was reached in 1929. The years 1930 and 1931 witnessed large and increasing active balances, causes being the cessation of credit-financed import, the reduced demand, owing to the depression, for foreign raw materials, the increasing independence of foreign foodstuffs, and the repayments of foreign debt. The years 1927-31 witnessed a shift of £300,000,000 from the passive to the active side of the trade balance. The movement of imports and exports (including Reparation deliveries in kind) was:—

	Imports Marks.	Exports Marks.
1927	14,228,000,000	10,801,000,000
1928	13,447,000,000	13,483,000,000
1929	6,632,000,000	9,600,000,000
1932	4,666,000,000	5,739,000,000

Trade with Great Britain —

	1931 Marks	1932 Marks
Imports from	453,000,000	258,000,000
Exports to	1,134,000,000	466,000,000

In the first half of 1932 import was 2,387 mill. m., export 2,989 mill. m.

SECURITIES MARKETS—All stock exchanges were closed between July 11 and Sept. 3, 1931, and between Sept. 18, 1931, and April 12, 1932. The official securities index, based on 100 for average quotations of 1924-25, showed for Sept. 1933: for stocks, 62.48; for fixed-interest securities, 78.17.

FEDERATED STATES.

PRUSSIA.

The Republic of Prussia comprises the larger portion of Germany, with a total area in 1924 of 113,750 sq. miles and a population on June 16, 1925, of 38,120,173 (Saar district excluded).

The number of births in 1931 was 634,593, against 1,209,500 in 1913. The number of deaths in 1931 was 440,705, against 656,490 in 1913. Marriages were 325,680, against 323,709.

	1,000,000 Reichs-marks.
Budget (net), 1933-34	1,800
Debt	599

The whole of the old *Funded Debt of Prussia* was taken over by the Republic under the arrangement for transfer of the Prussian State Railways.

CAPITAL, Berlin, on the Spree. In 1920, by fusion of suburban municipalities and of some adjacent rural communities, was created Great Berlin with a population on June 16, 1925, of 4,013,588.

Other largest cities are Cologne, on the Rhine (698,064), Breslau, on the Oder (554,801), Essen, on the Ruhr (468,696), Frankfurt, on the Main (461,849), Düsseldorf, on the Rhine (431,096), Hannover, on the Leine (422,435), and Dortmund, on the Emscher (320,256).

BAVARIA.

The Republic of Bavaria is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16'—50° 34' N lat. and 9° 01'—13° 50' E long.; the western part, forming the Palatinate, on the left bank of the Rhine. The total area is 29,486 sq. miles, and the population on June 16, 1925, 7,411,589. The Thuringian Duchy of Coburg was incorporated in Bavaria in 1921.

	1,000,000 Reichs-marks.
Budget (net), 1932-33	606

CAPITAL, Munich, on the Isar. Population (1925), 680,704. Other large towns are Nürnberg, N.W. of Munich (392,494), and Augsburg, on the Wertach-Lech (165,522).

SAXONY.

The Republic of Saxony has an area of 5,856 English square miles, with a population on June 16, 1925, of 4,980,689. Its chief towns, after the capital, are Leipzig (pop. 679,322), the great book-market, Plauen (pop. 111,398), and Chemnitz (pop. 331,641), the Manchester of Saxony.

	1,000,000 Reichs-marks.
Budget (net), 1932-33	417

CAPITAL, Dresden. Pop. (1925), 618,684.

WURTEMBERG.

The Republic of Württemberg has an area of 7,534 English square miles, and a population (in 1925) of 2,595,114, of whom 30 per cent. are Roman Catholics.

	1,000,000 Reichs-marks.
Budget (net), 1932-33	245

CAPITAL, Stuttgart. Population (1925), 341,461.

MINOR STATES.

Baden has an area of 5,819 square miles, with a population (1925) of 2,336,498. More than half the population are Roman Catholics. Capital, Karlsruhe, pop. (1925) 145,664.

Land Thuringen. The Thuringian States, Saxe-Weimar-Eisenach, Saxe-Meiningen, Saxe-Altenburg, Schwarzburg-Rudolstadt, Schwarzburg-Sondershausen, Reuss-Greiz, Reuss-Gera, and Gotha, have been constituted into a single state under the title Land Thuringen, with an area of 4,541 square miles, and a population of 1,628,398. Capital, Weimar (46,028).

Hesse has an area of 2,968 square miles and a population (1925) of 1,358,445, of whom more than half are Protestants. Capital, Darmstadt, pop. (1919) 89,095.

Mecklenburg-Schwerin, between the Elbe and the Baltic, has a total area of 5,068 square miles.

with a population (1925) of 686,938. Capital, Schwerin, pop. (1925) 48,157.

Oldenburg, area 2,479 square miles, with a population (1925) of 553,670. Capital, Oldenburg, pop. (1925) 52,187.

Brunswick, 1,418 square miles, pop. (1925) 508,660. Capital, Brunswick, pop. (1925) 146,654.

Anhalt, 906 square miles, pop. (1925) 251,692. Capital, Dessau, pop. (1925) 70,316.

Lippe, 470 square miles, pop. (1925) 166,023. Capital, Detmold (16,171).

Mecklenburg-Strelitz, area 1,130 square miles, with a population (1925) of 112,055. Capital, Neustrelitz, pop. (1925) 12,338. Fusion with Mecklenburg-Schwerin is announced.

Schleswig-Lippe, 130 square miles, pop. (1925) 48,660. Capital, Büchelburg (6,745).

Hildesheim was incorporated in Prussia in 1928.

The *Free Hanse Cities* are *Lübeck*, on the Trave (area 115 square miles, pop. 127,540), *Bremen*, on the Weser (area 99 square miles, pop. 332,547) and *Hamburg*, on the Elbe (area 160 square miles, pop. 1,128,753).

Flags: The flags of the Reich are black, white and red; and the N.S. Party's swastika (*Hakenkreuz*) flag.

CAPITAL OF THE GERMAN REALM, BERLIN.

BRITISH EMBASSY.

(Wilhelmstrasse 70, Berlin W. 8.)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir E. C. E. Phyllips, K.C.M.G., C.V.O. (1933) £7,800

Consul-General, E. C. Newton, C.M.G.
1st Secretary, I. A. Kirkpatrick.

2nd Secretary, W. I. Mallet.
3rd Secretary, G. P. Young.

Press Officer (with local rank of *First Secretary*), T. F. Breen, C.B.E., M.C.

Commercial Counsellor, J. W. F. Thelwall, C.M.G., M.C.

Commercial Secretary (Grade II.), R. P. F. Edwards, D.S.O.

Financial Adviser, G. H. S. Piment.

Naval Attaché, Capt. G. C. Munhead-Gould, D.S.C., R.N.

Asst. Dir., Eng. Cons., F. V. Stopford, R.N.

Military Attaché, Col. A. F. A. N. Thorne, C.M.G., 1940.

Air Attaché, Wing-Commander J. H. Herring, D.S.O., M.C.

Chaplain, Rev. R. H. Cragg.

Archivist and Accountant, J. K. O'Donoghue, M.B.E.

Asst. Archivist, R. T. Callender; C. H. F. Hardy.

BRITISH CONSULAR OFFICES.

Berlin—*Consul*, G. Lyall.

GREECE.

(Hellas.)

President of the Hellenic Republic, Alexander Zaimis, born Oct. 28, 1855, elected Dec. 14, 1929.

THE MINISTRY (March 10, 1933)

Prime Minister, M. P. Tsaldaris.

Justice, M. Taliadourous.

Foreign Affairs, M. D. Maximos.

Interior, M. J. Mountsomidis.

Communications, M. P. Rhallys.

Public Instruction, M. T. Tomikavas this.

Finance, M. S. Loverdos.

War, General Condylis.

Marine, Admiral Hadjikyriakos.

Agriculture, M. J. Theotokis.

Education, M. J. Rhallys.

National Economy, M. G. Peshmazgion.

Health and Social Service, M. J. Macropoulos.

Envoys Extraordinary and Ministers Plenipotentiary in London, Monsieur D. Caelamianos.

Legation, 51 Upper Brook St., W. 1.

Counsellor (vacant).

Secretary, M. P. Almannachos.

Naval and Air Attaché (vacant).

Vice-Consul (in charge of Consulate-General), George Seteriadis, 131 Gower Street, W.C. 1.

A maritime Republic in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Ionian Sea, and on the E. by the Aegean and Turkey, with an estimated area of 50,271 sq. miles and a population (census of May 15, 1928) of 6,204,684.

Government.—Greece became independent in 1830, after a successful insurrection against the Turkish government, to which the country had been subjected since the 15th century, and after a succession of rulers of the Glucksburg dynasty was declared a Republic by the Constituent Assembly on March 25, 1924. The legislature consists of a Senate of 120 members, and of a Chamber of Deputies (or *Bouli*) of 250 members, elected for 4 years by universal manhood suffrage.

From the Balkan Wars of 1912-13 the area was less than 25,000 sq. miles, the addition of portions of Macedonia and Epirus, Crete (2,050 sq. miles, pop. 336,151), and certain Aegean Islands increasing the area to 43,522 sq. miles. During the War of 1914-1918 Greece eventually declared for the Allies against the Central Powers, and her territories were increased by the occupation

of *Thrace* (including the monastic republic of *Mount Athos*), and the islands of *Imbros* and *Tenedos*. Greece received under the *Treaty of Sèvres* a mandate for the occupation and administration of the town and district of *Smyrna*, but military operations by forces of the Angora Government, under *Mustapha Kemal Pasha*, recovered the mandated region in Sept. 1922, the Greek forces being annihilated, and *Smyrna* was evacuated on Sept. 8 1922, and that part of the Greek population of Asia Minor which escaped massacre by the Turks took refuge in Greece. By the *Treaty of Lausanne* (1923) Greece lost Eastern *Thrace* (that part lying E. of the *Maritza* river) and the islands of *Imbros* and *Tenedos*, which were retroceded to Turkey. The country is thus composed of a continental portion (the southern part of the Balkan Peninsula), and of islands in the Aegean, Mediterranean, and Ionian Seas. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented.

Production.—Agriculture is the principal industry and employs more than half the population. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and cranberry-vine. The principal minerals are silver, lead, zinc, emery, copper, magnesium, sulphur, salt, and marble. The chief manufactures are smelting, textiles, and shipbuilding. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. The exports consist of wine, olives, olive oil, tobacco, currants, figs, cognac, hides, lead, iron ore, magnesite, iron pyrites, chrome ore, emery, marble, sponges and carpets.

Defence.—Service in the Army is universal and compulsory between the ages of 20 and 57. Both the land and sea forces were reorganised during the War of 1914-1918, and about 150,000 all ranks fought with the Allied Armies. The Navy consists of 1 armoured cruiser, 1 cruiser-minelayer, 8 (4 modern) t.b.-d., 7 torpedo-boats, and 6 submarines, with 5 patrol vessels (small torpedo-boats).

Education is free and compulsory, maintained by local taxation supplemented by State grants. Secondary education is somewhat backward, particularly in the country districts. The University at Athens is of some repute.

Finance.—The debt in 1912 was 1,040,900,000 *drachme*, and the Balkan Wars of 1912-13 added 354,960,000 *drachme*, the Great War added 1,028,000,000 *drachme*, and subsequent military operations to March, 1921, were responsible for 1,776,140,000 *drachme*. On March 31, 1923, the total was stated at 43,148,184,550 *drachme*, (375 dr. to £1). The amount provided for fractional payment of the service in the budget of 1923-34 was 1,238,000,000 dr.

Communications.—There were (1928) 1,993 miles of railroad open for traffic. There is a ship canal cutting through the Isthmus of Corinth for ships up to 1,500 tons. The post office numbers 1,146, telegraphs, 4,960 miles. The mercantile marine consists (1921) of 547 steamships (1,407,808 tons) and 759 sailing ships (58,508 tons). The principal harbours are the Piræus (port of Athens), Syra, Patras, Salonica, Volo, Corfu, Calamata, Laurium, Cavalla, and Canea (Crete).

Budget, 1923-34.

Total estimated receipts *Drachmae* 7,966,797,890
Total estimated outgoings 8,291,936,132

Total imports	£99,024,955	£23,230,000
Total exports	15,782,416	12,680,000
Imports from U.K.	3,691,232	3,301,051
Exports to U.K.	1,970,176	1,022,128

CAPITAL, Athens. Population (1928), 425,920. Other large towns are Salonica (236,530), Piræus (251,330), Patras (61,280), Corfu (32,220), Candia (25,000), Canea (27,600), Volo (30,000), Cavalla (50,000).

GUATEMALA.

República de Guatemala.

President (1921-1927), General Jorge Ubico, born Nov. 20, 1878, assumed office Feb. 14, 1921. Minister of Foreign Affairs, Señor Don Alfredo Skinner Kice.

Minister in London (vacant).

Charge d'Affaires and Consul-General in London, Señor Dr. Don Francisco A. Figueroa, 444 Mansion House Chambers, 22 Queen Victoria Street, E.C. 4.

* Figures are for 9 months (Jan-Sept) only

Guatemala, the most northerly of the Republic of Central America, is situated in N. lat. from 13° 45' to 17° 49', and in W. Long. from 88° 12' 40" to 92° 13', 43", and comprises an area of 42,367 square miles, and an estimated population (Dec. 31, 1932) of 1,195,242. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,800 ft.) was destroyed by an upheaval in Dec., 1917. The country is well watered by numerous rivers; the climate is hot and somewhat malarious near the coast, but very temperate and healthy in the higher regions. 737 miles of railway were open for traffic in 1932. There were 4,049 miles of State telegraph and 3,782 of State telephone working on Dec. 31, 1932. The chief ports are San José de Guatemala and Champerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, other articles being bananas, *chicle* (chewing gum), hides, honey and timber. Spanish is the language of the country.

Estimated Revenue.....	*Quetzals 1932-33 7,980,000

HAITI.

(République d'Haiti.)

President, Stevie Vincent, assumed office Nov. 28, 1930.

Foreign Affairs, M. Leon Laleau.

Minister in London, M. René Tancredi Auguste. Consul, W. Haines, 4, Denmark Street, W.C. 2.

The Republic of Haiti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the "West India"

Islands. Formerly a French colony it was proclaimed independent on Jan. 1, 1804, and is governed under a Constitution ratified in 1932. The legislature consists of a Senate and a Chamber of Deputies. The President is elected by the legislature for a period of six years. In 1925 a treaty was entered into with the U.S.A. whereby certain public services of the Republic were to be controlled by U.S. officials. The Treaty expires in 1936. On Oct. 1, 1931, the U.S. officials in charge of Public Health, Public Works, and the Agricultural Technical Service, were withdrawn, and the *Garde d'Haiti* is to be completely Haytianised and turned over to Haitian officers on Oct. 1, 1934. The Financial service remains under U.S. control; there is a Fiscal Representative and a Deputy Fiscal Representative appointed by the President of Haiti upon the nomination of the President of U.S.A.; the Fiscal Representative has under his control the customs service, and may employ not more than 18 Americans. The internal revenue service will be turned over Oct. 1, 1934.

The area of the Republic of Haiti is estimated at 10,204 square miles, with a population estimated (Jan. 1, 1927) at 2,300,000 inclusive of white foreign residents and military forces of the United States. The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits; it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sisal, sugar, honey, gums, and oilseeds, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. The principal foreign trade is carried on with the United States, Great Britain and Greater Britain, France, and Germany; the principal articles imported from Great Britain are piece-goods, jute bags, hardware, and agricultural tools. There are about 135 miles of railway. In 1931-32 the entries and clearances at Port-au-Prince were 595 steam vessels (1,206,351 tons). French is the official language of the country, but most of the people speak a debased dialect known as Creole French.

Revenue.....	1930-31 \$6,249,316	1931-32 \$5,604,748
Expenditure	7,038,014	6,577,622

HEJAZ, *see* Arabia.**HONDURAS.**

(República de Honduras.)

*President (1933-1937), Dr. Tiburcio Carías, assumed office Feb. 1, 1933.**Consul-General in London, Señor Don Basilio de Telepnef, 15 Union Court, Old Broad St., E.C.4.*

The Middle State of Central America, stretching in N. lat. between 13° 10' and 16°, and W. long. between 83° 10' and 88° 40'; containing 44,775 English square miles, with a population estimated at 775,000 (1930).

Christopher Columbus landed at Cape Honduras in 1502, and in 1524 the country was settled by the Spaniards. In 1525 *Hernando Cortes* founded the city of Puerto Cortes, and from 1530 to 1821 the country formed part of the Captaincy-General of Guatemala. From 1821 to 1839 Honduras was included in the Confederation of Central America.

The Republic of Honduras has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Truxillo, Puerto Castilla, Puerto Cortes, Omoa, Roatan, Tela, and La Ceiba; but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala, on Tiger Island; port on mainland is San Lorenzo, 2 hours in gasoline launch from Amapala. From San Lorenzo by auto to capital, Tegucigalpa, 88 miles, fair road, 5-6 hours. Road from Tegucigalpa to the Atlantic coast has now been completed as far as Potrerillos, the terminal station of the unfinished Inter-oceanic but is in poor condition. The journey to the lake takes from 9 to 10 hours in automobile; the lake is crossed in 1 hour by auto-ferry and thence to the head of the railway at Portrerillos the road is completed, cars taking from 2 to 3 hours. Potrerillos is 2 hours by rail from San Pedro Sula, and 3 hours from Puerto Cortes. By taking express automobiles and express car on the railway, it is now possible (though difficult and uncertain) to make Puerto Cortes from Tegucigalpa in 24 hours, thus reaching New York in 5 or 6 days. There is an aeroplane service between the capital and most of the principal towns in conjunction with Pan-American Airways, and aeroplanes are available to carry passengers to Tela and La Ceiba (on N. coast) to connect with steamer sailings. There are railway connections between San Pedro Sula, and Tela and La Ceiba; air travel is recommended for most journeys in Honduras, and 23 towns are provided with landing fields. The country is mountainous, being traversed by the Cordilleras. The soil in the valleys and tablelands is very fertile, the products being bananas, coc nuts, mahogany, fruit, cattle, sugar, rice, tobacco, coffee, sarsaparilla, hides and skins, cedar, fustic, rose, and Lima wool (Kopok). There is an immense amount of uncultivated land. The number of cattle is estimated at 500,000. The forests are extensive, but there is a lack of communications and transport. Its mineral wealth is great, the value of gold and silver exported in 1930-31 being £304,000. In 1929 there were 1,438 kilometres of railway open, all on the North Coast. The language of the country is Spanish.

	1930-31.	1931-32.

Finance, Béla de Imrédy.

Minister in London, Count Laszlo Szechenyi, 35 Eaton Place, S.W. 1.

Office of Legation and Passport Office, 75 Chester Square, S.W. 1.

By unanimous vote of the National Assembly, Hungary was re-constituted a Kingdom in 1920, after having been declared a Republic on Nov. 17, 1918. The area of present-day Hungary is about 36,179 sq. miles, its territories being decreased from the area of the former Kingdom of Hungary (which was united to the Austrian Empire by the identity of sovereigns) through the transfer of Transylvania to the Rumanians and of Croatia and Slavonia to the new Yugoslav Kingdom (q.v.) and of Slovakia and Ruthenia to Czechoslovakia (q.v.). The population (almost entirely Magyar) was 8,683,740 (Dec. 1930). The political neighbours are Czechoslovakia on the

* In 1925 the Government of Honduras ratified an agreement concluded with the Council of Foreign Bondholders providing for the liquidation of the Foreign Debt by annual payments of £40,000 over a period of 30 years, and these payments are regularly made.

† Bearing 3 per cent. interest.

N., Yugoslavia on the S., Rumania on the E., and Austria on the W.

On the declaration of Republican institutions in 1918, Count M. Károlyi assumed office as Provisional President, but on March 22, 1919, Count Károlyi resigned, and was succeeded by a "Bolshevik" administration with a "Soviet" (Workers' Council), in which Bela Kun (or Cohen) was the dominant personality. This administration was driven out of power by the successes of the Rumanian military forces (which invaded Hungary and occupied Budapest) and was followed by a Socialistic Government under Julius Pöldel (Aug. 1, 1919). Six days later the Socialistic Government was superseded by an administration appointed by the Archduke Joseph, who accepted office as Provisional President, Aug. 7, 1919, but resigned in consequence of the protests of the Supreme Council in Paris.

On March 7, 1920, Admiral Nicholas von Horthy of Nagyvárad was elected Governor of Hungary by vote of the National Assembly, which gave him sovereign rights, with certain restrictions.

In 1921, the ex-king Karl made two efforts to regain the throne, remaining in the country from March 26 to April 5, and from Oct. 21 until removed under escort. On each occasion the Hungarian Government was informed that a Hapsburg restoration would not be tolerated by the European Powers.

All religions are tolerated; the greater number of Magyars are Roman Catholics, but there is a large Protestant minority. The parceling out of the great estates, which was forcibly attempted during the Károlyi régime, has been continued to a small extent, but on an economic basis; a land-reform bill aiming at "a more equitable distribution of landed property," was carried out in 1920-1923, reducing by about 20 per cent. the total area of large estates.

A single chamber National Assembly (introduced Jan. 4, 1920), was replaced in Dec., 1926, by a Parliament composed of a Chamber of Deputies elected by universal suffrage, and an Upper Chamber, which corresponds in a modified form to the Chamber of Magnates as it existed before the revolution of 1918.

The greater part of the area of present Hungary consists of the Alföld or Great Plain, parts of which may be considered as among the most fertile for agricultural purposes in the world, producing grain of excellent quality and supporting a number of horses, cattle and swine. The mountainous districts having been ceded to surrounding states by the Peace Treaty, Hungary has lost the greater part of the forests and mines, which formerly contributed so largely to the national wealth.

No part of Hungary touches the sea. The length of navigable rivers is 689 miles; there are about 5,000 miles of railways and 5,800 miles of telegraph in the present Kingdom.

ICELAND.

(Island.)

King, Christian X. (see Denmark).

President of Al-thing, T. Thorhallsson.

Iceland is a large volcanic island in the North Atlantic Ocean, extending from 63° 23' to 66° 23' N lat., and from 13° 22' to 24° 35' W. long., with an estimated area of 40,497 square miles, or greater than that of Ireland. The population was estimated at 120,000 in 1931.

An Act for the creation of a Danish-Icelandic Federal Constitution, Denmark and Iceland to be free and independent States under the same Sovereign, came into force on Dec. 1, 1918, but since the constitution granted in 1904 the assembly (Al-thing) had been more or less independent of the Government at Copenhagen in internal questions. The principal products of the island are sheep, cattle, ponies, and fish, and the imports consist of almost all the necessities of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods, tobacco, spirits, hardware, and timber. Total imports (1930): £3,249,120; exports, £2,713,116. Iceland is in direct telegraphic communication with Great Britain.

CAPITAL, Reykjavik. Population, about 30,000.

Other towns are Isafjörður, Akureyri, and Seyðisfjörður.

FLAG: Blue, with white-bordered red cross.

IRAQ.

(Mesopotamia.)

King of Iraq, Ghazi I., born March 21, 1912, acceded (on the death of his father King Faisal I.) Sept. 1, 1932.

Prime Minister, Rashid Peg al Gili.

Minister for Foreign Affairs, Nuri Pasha as Said, G.C.V.O.

Minister in London, Jafar Pasha al Askari, G.C.V.O.

Secretary of Legation, Atta Beg Amin.

Legation, 22, Queen's Gate, S.W. 7.

Iraq, or Mesopotamia, "the land between the rivers" (Euphrates and Tigris), extends from Kurdistan on N. and N.E. to the Persian Gulf on the S. and S.E., and from Persia on E. to Syria and the Arabian Desert on W. the approximate position being between 37° to 48° E. long., and from 37° to 30° N. lat. The territory was freed from Turkish rule during the War of 1914-18 by Anglo-Indian and British Dominion troops under Generals Nixon, Maude, and Marshall (Gen. Maude succumbing to cholera after the capture of Baghdad). Under the Treaty of Lausanne, ratified on Aug. 6, 1923, Turkey renounced the sovereignty over Mesopotamia, and its future administration was entrusted to Great Britain by the Supreme Council of the Allies. A provisional Arab Government was set up by the High Commissioner in Nov. 1920 and in Aug. 1922 the Emir Faisal (3rd son of ex-King Hussein of the Hejaz) was elected King of Iraq, to be crowned on Aug. 23, 1921. In March, 1924, a Constituent Assembly met in Baghdad, and passed an organic law and an electoral law for the election of a Chamber of Deputies. The constitution thus instituted is a Constitutional Monarchy, hereditary in the family of King Faisal, with a Senate of 20 members nominated by the King, and a Chamber of Deputies of 88 members elected by manhood suffrage. The first Parliament under this Constitution was opened by King Faisal on July 16, 1925. An application for admission to the League of Nations came before the Assembly in 1932, and Iraq was freed from all Mandatory control through admission to the League on October 3, 1932. On June 30, 1930, a new Treaty was signed at Baghdad by the High Commissioner and the Prime Minister. This Treaty is of 25 years' duration from the entry of Iraq into the League, and regulates the relations between Great Britain and Iraq during that period on the basis of an alliance between two equal and independent States.

The total area of Iraq is about 126,000 sq. miles, the distance from Basra in the south to Mosul in the north being approximately 500 miles. Population (Census 1920):—

Baghdad vilayet	1,360,304
Basra vilayet	785,600
Mosul vilayet	703,378

Total 2,849,282

Baghdad includes the Baghdad, Samarra, Diyala, Kut, Diwaniyah, Hillah and Dulaim Divisions (*Liwas*); *Basra* includes the *Liwas* of Basra, Amara and Muntafik; and *Mosul* includes Mosul, Arbil, Kirkuk and Suleimani. (Mosul covers a great part of the ancient kingdom of Assyria, the ruins of Nineveh, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul.)

Of the total population there were in 1920 1,146,685 Sunni Muhammadans, 1,494,012 Shi'ite Muhammadans, 87,488 Jews, 78,792 Christians, and 43,302 other religions.

The country is capable of supporting a population many times in excess of its present inhabitants if irrigation is developed and extended. In 1908 certain works were undertaken, following on the report of Sir W. Willcocks, and during the British occupation notable improvements were effected, the Irrigation Department is at present confining itself to small and immediately remunerative schemes, but plans are in preparation for several large works of development on both rivers, the cost to be met from oil royalties receivable from the Iraq Petroleum Company. Apart from the valuable revenues to be derived from oil the wealth of the country depends upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley and beans, and rice, and Indian corn; wheat averages 464 lb. per acre, barley 621 lb., and rice over 1,000 lb. In 1918-19 there were 1,547,000 acres (deriving their water from the Tigris and Euphrates) under general cultivation, an increase of 64 per cent on the previous year. Cotton growing has proved a disappointment after a promising beginning, and the area now under cotton is negligible. Much headway has been made in popularising the local use of the indigenous tobacco plant. A concession for the exploitation of the oil in the Bagdad and Mosul vilayets was granted to the Turkish Petroleum Company (now the Iraq Petroleum Company), in March, 1925, and was extensively revised in 1931. By this concession the Company, which is international in construction, undertakes to complete before December 31, 1935, a pipe line to the Mediterranean and guarantee an annual payment of £400,000 to the Government on account of royalties, etc. Another concession has been granted covering the West of the Tigris to the B. D. D. Company, with effect from April 20, 1932. The Khanaqin Oil Company (a subsidiary of the Anglo-Persian Oil Company) holds a concession which is confined to the Transferred Territories (an area on the N.E. frontier transferred from Persia to Turkey in 1913-14), which is an adaptation of the D'Arcy concession held by the A.P.O.C. The Khanaqin oil Company have opened a refinery near to Khanaqin town which produces sufficient petrol, kerosene and crude oil for the needs of Iraq.

The *Euphrates* (which has a total length of 2,800 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (425 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Fint Su (275 miles), the latter rising in the north west of Erzerum in the Dumlul Dagh. The *Tigris* has a total length of 1,250 miles from its source to its junction with the Euphrates at Garinat Ali, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the vilayets of Diarbekir, Van and Bitlis join.

Communications and Trade.—The country is being rapidly opened up and communications improved and secured, particularly in the hitherto inaccessible northern districts. The port of Basra is well equipped and able to

handle expeditiously all sea-borne trade. Continuous dredging of the Shatt-al-Arab has provided a navigable channel of 22½ feet at low water (as compared with 9 feet before dredging was begun) giving easy access to the Port at all times. The desert route between Bagdad and the Mediterranean was opened up in 1923 and is now a main traffic artery. Surveys are proceeding for a projected railway line between Bagdad and Haifa. The chief imports are textiles, sugar and tea, and the chief exports are dates, wool and grain.

The Bagdad Railway.—In 1899 the Anatolian Railway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Konieh (the eastern terminus of the Anatolian Railway) to the Persian Gulf at Koweit, *via* Bagdad, a total length of 1,550 miles, with a single track of 4 ft 8½ in. gauge. Its projected course was from Konieh to Adana, thence S.E. to Aleppo, Jerusalem (where it would cross the Euphrates and enter Iraq), and Mosul, and thence S. down the right bank of the Tigris to Bagdad and the Persian Gulf. The section Konieh-Eregli-Bulgurlu (124 miles), was opened in Oct. 1904, and at the outbreak of the Great War about 1,200 miles (out of the total of 1,550 miles) were in operation, with gaps in important sections (notably in the hills N.W. of Aleppo, and in the desert W. & S. of Mosul). The line crosses the Euphrates at Jerusalem and is open to goods and passenger traffic as far as Nisibin. The track actually extends a further 20 miles into Syrian territory in the direction of Mosul. Railheads at Nisibin and Kirkuk are connected by a motor service, and through bookings by this route from Europe to Bagdad are obtainable. The first through train from Basra to Bagdad left Basra on Jan. 13, 1920; since the War lines have been laid from Bagdad to Kerbala and Bagdad to Kirkuk. The line to Kirkuk will be extended to Mosul. The total length of line now open is 922 miles.

Capital.—The chief city is Bagdad, the former capital of the Abbassid dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Bagdad has an estimated population of over 300,000, other towns being Basra, 85,000, and Mosul (opposite the site of Nineveh), 90,000.

	1921-22	1922-23

Asst. do., Signor Giuseppe Massone.
Chanceller, Signor Giuseppe de Grossi.
Royal Consul-General, Signor Carlo Bossi, 68 Portland Place, W. 1.
Vice-Consul, Signor Antonia Traversi.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 70 minor islands (with certain dependencies hereinafter noted). It is bounded on the N. by the Republics of Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, &c., and on the W. by France and the

* Signor Benito Mussolini (born 1874) is the leader of Fascism (which has been in power since the "March to Rome," Oct. 22, 1922), the Fascists representing a revolutionary movement against the inactivity of post-War Italian statesmen. The uniform of the movement is a black shirt, and the name is derived from *fascio* or band (cf. the *fascis* of the Roman lictor) in which the movement was organised.

Ligurian and Tyrrhenian Seas. The total area of the kingdom of Italy in 1914 was 110,623 sq. miles, and by the *Treaty of Versailles* (June 28, 1919) Italy gained from Austria-Hungary the Trentino (about 4,000 sq. miles) and Trieste (with about 1,000 sq. miles of the Adriatic Sea-board).

The total area of the Kingdom of Italy was estimated (Dec. 1927) at 119,743 square miles, with a population at the census of March 29, 1931, of 42,158,817. There is a large settled and floating population of Americans and English.

By a treaty signed at Rome (Jan. 27, 1924), the *Free State of Fiume* came to an end. Yugoslavia's sovereignty over Port Baros and the Delta is established by the treaty, and Italy acquired the town and harbour works of Fiume, together with a narrow strip of hinterland. Italy agreed to lease to Yugoslavia the *Thion di Revel* quay at a rental of one gold lira for 50 years, the railway station being established as an international frontier station. Fiume is now the capital of the newly created Italian Provincia del Carnaro, and has the status of an Italian provincial town.

The Italian peninsula is traversed throughout its length by the chain of the Apennines; the Alps form its northern limits, dividing it from France, Switzerland, Germany, Austria and Yugoslavia. *Mont Blanc* (15,782 feet), the highest peak of the Alps, is in the French Pennine Alps, but within the Italian borders are Monte Rosa (15,217 feet) and several peaks from 12,000 to 14,000 feet. The chief rivers are the Po, the Adige, the Tiber, and the Arno.

GOVERNMENT.—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848-1870, in which the great patriots *Mazzini* (born 1805, died 1872) and *Garialdi* (born 1807, died 1882) were the principal figures. It was completed when Lombardy was ceded by Austria in 1860 and Venice in 1866, and through the evacuation of the Papal States by the French in 1870. In 1870 the King of Italy entered Rome, and that city was declared to be the capital. The government was that of a constitutional monarchy with a legislature of two houses—the *Senate* (of 385 life members appointed by the King), and the *Chamber of Deputies* of 536 members (elected by adult manhood suffrage). Under the reforms instituted by Signor Mussolini an entirely new and complex form of government has been built up—the Fascist "syndical-corporative" state. The Senate and Chamber are retained, but the latter are elected *en bloc*, a list being drawn up by the Fascist Grand Council and submitted to the electorate for acceptance or rejection as a whole. The basis of the composition of the list is roughly equal representation of capital and labour, the essence of the "syndical-corporative" idea being that the State should take charge of the economic development and functioning of the country.

PRODUCTION.—Agriculture (including the growing of grapes, olives and chestnuts) is the principal industry. Italian wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari; while fruit abounds and is largely exported. The cultivation of the silkworm forms an important industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia,

and some gold in the Alps. Salt and tobacco are Government monopolies.

The principal exports are cotton, silk and woolen tissues, motor cars, olive-oil, wine, candied citron, sienna earths, pastes, coral, rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry, chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, motor cars, rubber tyres and tubes, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption.

DEFENCE.—The Army consists of 30 Infantry Divisions and a *Ducunni Crleri* (Cavalry and Cyclists) organized in 21 Army Corps, but a large number of Units and Services, *e.g.*, Bersaglieri, Alpini, Tanks, &c., are not included in these formations. During summer months (with two classes of conscripts with the colour) the strength is about 400,000; in winter months 200,000 (with one class). Age of liability for recall to Military service was raised in 1909 and brings total numbers available in case of war to 4,000,000-4,500,000 men. The National Militia (Black Shirts) are also part of the Land Forces of Italy. Their establishment is 300,000, but only a small percentage are on permanent service, the remainder being in civil employ, ready for duty whenever required. The Militia supplies 4 Battalions to each Infantry Division in war. On May 24, 1915, Italy declared war on Austro-Hungary, and on Aug. 27, 1916, a state of war was declared to exist with Germany. The cost of the war to Oct. 31, 1918, amounted to 48 milliards of lire (£1,200,000,000). During the War of 1914-1918, over 25 per cent. of the population were mobilised, and 5,500,000 men passed into the Armies of Italy. The Navy includes 6 modern and 1 pre-destroyer battleship, 28 cruisers, 1 aircraft carrier, 21 flotilla leaders, 79 destroyers, 30 torpedo boats, 60 submarines, 12 gunboats, and despatch vessels, 2 river gunboats, and 46 minesweepers and minelayers. The peace personnel of the Italian Navy is about 54,000 all ranks. Spezia and Pola, the chief naval and military ports of the kingdom, are securely fortified. The Air Force consists of 120 squadrons of aircraft, of which 20 are employed in the colonies. The personnel for 1933 was 24,650 (all ranks), the expenditure for 1933-34 being 754 million lire.

EDUCATION.—Primary Education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the Universities are of very ancient foundation.

COMMUNICATIONS.—On July 31, 1932, there were 14,200 miles of railway open for traffic, 1,210

being electrified and 200 in course of electrification; the post-offices (1932) numbered 10,867, and there were (1932) 41,000 miles of telegraph line. The sea-going commercial marine (1932) consisted of 1,092 steamers (3,331,304 gross tons) and 232 sailing vessels (59,268 tons). In 1930 251,708 ships (79,723,000 net tons) entered Italian ports; the clearances were 251,635 (79,521,000 net tons).

ITALIAN COLONIES, &c.

Libia.—The Turkish vilayet of Tripoli and the mutessarrifat of Benghazi on the northern coast of Africa, were occupied by Italy in 1911-12, and under the Treaty of Ouchy (Oct. 1912) the sovereignty of the province was transferred to the King of Italy, the spiritual headship over the Muhammadan population being retained by the Caliph. Tripoli is the most easterly of the Barbary States, extending from the frontiers of Tunis to those of Egypt, a distance along the coast-line of nearly 1,100 miles, and inland to the south a distance of about 800 miles. The transferred territory comprises the four sub-provinces or Mutesarriflik of Tripoli, Khoms, Jabel-el-Gharb, and Fezzan, and also of Benghazi or Cyrenaica, a total area of 820,000 square miles, with a population of about 1,000,000; Oweinat, the highest peak in the colony, was ascertained (1933) to exceed 6,000 ft. There are no rivers in the country, and the rainfall being precarious, a good harvest can only be reckoned on every four or five years. Barley, dates, olives, oranges, lemons, and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Borun, and the Western Sudan, whither caravans proceed from Tripoli. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, wool, cattle, and horses. The ancient ruins in Cyrenaica, i.e., at

Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli; a four-sided arch erected to the Emperor Severus and a Roman market place were uncovered in Leptis Magna in 1931-32. The population of Benghazi consists of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests. The capital of "Tripolitana" is Tripoli (population 60,000), and of Cyrenaica, Benghazi (population 35,000).

Governor of Libia, General Italo Balbo.

Eritrea is a Red Sea colony, and extends from Ras Kasar, 18° 2' N., to Ras Demorra, 10° 42' N., and is bounded on N.W. by the Anglo-Egyptian Sudan, on S. by Abyssinia, and on E. by French Somaliland. It consists of a triangular portion of barren and sandy lowland with a coast-line along the Red Sea of about 700 miles, and covers a total area of 64,000 square miles, with a population of about 550,000, of whom about 3,500 are Europeans. The capital is Asmara, Massawa being the chief port, where there is a good harbour. The principal products are potash, skins, and salt, of great value as being the monetary currency of Southern Abyssinia.

Governor of Eritrea, H.E. Duke Astuto di Lucchesi.

Somaliland.—Italian Somaliland comprises a coastal strip on the Gulf of Aden and the Indian Ocean, from 12° N. lat. to the Equator, and is bounded on the N. by the Gulf of Aden, on E. by the Indian Ocean, and on W. by British Somaliland, Abyssinia, and British E. Africa. The total area, including the territory of Jubaland (and the port of Kisumu) transferred from Kenya by Great Britain in 1925, is about 220,000 sq. miles, and the population is estimated at 900,000. Agriculture and camel and cattle rearing are the principal industries. The capital is Mogadisho, on the Indian Ocean.

Governor of Italian Somaliland, Signor M. Rava Tientsin.—Italy obtained in 1902 a concession of land fronting the Pesho river (China), with a total area of 20 square miles and a population of about 10,000 natives.

Asian Dependencies.—*Rhodes, Egge and the Dodecanese* (12 islands occupied by Italy in 1912 during the war with Turkey, viz.: Stampalia, Scarpanto, Caso, Piscopi, Nisiro, Callimno, Lero, Patino, Cos, Simi, Calchi, and Lipso). The seat of administration is at Rhodes (Rodi) and the total population is about 100,000.

JAPAN.

(Nippon.)

Emperor (Tennō) of Japan, His Imperial Majesty Hirohito, K.G., G.C.B., G.C.V.O., born April 29, 1901; succeeded Dec. 25, 1926; married (1924) Princess Nagako (born March 6, 1903), daughter of the late Prince Kunyoshi Kuni (died Jan. 27, 1929), and has issue three daughters:—

(i) H.I.H. Princess Shizuko.

(ii) H.I.H. Princess Kazuko.

(iii) H.I.H. Princess Atsuko.

Brothers of the Emperor:—

(i) H.I.H. Prince Yasuhito Chichibu, born June 25, 1902, married Sept. 28, 1928 Setsuko Matsudaira (born Sept. 9, 1909).

(2) H.I.H. Prince Nobuhito Takamatsu, born Jan. 3, 1905, married Feb. 4, 1930, Kikuko Tokugawa, grand-daughter of the late Shōgun Tokugawa.

(3) H.I.H. Prince Takahito Sumi, born Dec. 2, 1915.

CABINET (May 25, 1932).

Prime Minister, Admiral Viscount M. Saitō.

Minister of Foreign Affairs, K. Hirota.

Minister for Home Affairs, Baron T. Yamamoto.

Minister of Finance, K. Takahashi.

Navy, Admiral M. Osami.

War, General S. Araki.

Justice, M. Koyama.

Education, I. Hatoyama.

Commerce and Industry, Baron K. Nakajima.

Agriculture and Forestry, F. Goto.

Communications, H. Minami.

Railways, C. Mitsuichi.

Overseas Affairs, R. Nagai.

Ambassador in London, Tsuneko Matsudaira, G.V.O., 10 Grosvenor Square, W. 1.
Chancellor of the Embassy, 37 Portman Square, W. 1.

Counsellor, Sotomatsu Kato.

1st Secretary, Kanzo Shiozaki.

2nd Secretary, Kunichi Yamamoto, Takashi Mori; Shun-ichi Kaminuma; Yutaka Ishizawa.

Attaches, Akira Miyazaki, Hisanaga Shimadzu, Hisanaga Yamada, Shigenobu Shima; Toshio Katsube; Shiro Ishiguro; Takezo Toko.

Military Attache, General Rikichi Ando.

Asst. Military Attache, Major Sadayoshi Nakajishi.

Naval Attache, Capt. Arata Oka.

Asst. Naval Attache, Comdr. Keizō Komura.

Financial Attache, Junichi Tsuchida.

Commercial Counsellor (1 Broad Street Place, E.C. 2), Shimjiro Matsuyama.

Chancellors (37 Portman Square, W. 1), Iwao Kakegawa; Masatsugu Yamashita; Yoshio Sumi.

Consul-General (London), Shimjiro Matsuyama, 1 Broad Street Place, E.C. 2.

Consul (Liverpool), Jitsunosuke Noda.

" (Manchester), Maj. W. P. Groves (hon.).

" (Middlesbrough), Alfred W. Bulmer (hon.).

" (Cardiff), R. H. Evans (hon.).

" (Glasgow), A. Scott Younger (hon.).

" (Dublin), A. M. Weatherill (hon.).

This ancient and extensive Empire consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Honshū, Shikoku, Kyūshū, Hokkaido or Yezo, situate to the north of the main island, from which it is separated by the Tsushima Straits, and Formosa, called by the Japanese, Taiwan. The Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo, but in diminishing numbers. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-Kiu) Islands under the name of "Prefecture of Okinawa." The empire, with its dependencies, comprises an area of 260,783 square miles, with a population (1930 Census) of 90,396,043. The population of the mainland only on Oct. 1, 1930, was 64,450,005. The island are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fuji-no-yama, the loftiest and most sacred

mountain of Japan, about sixty miles from Tokio, is 12,370 ft. high, and has been dormant since 1707. Japan is also liable to frequent, and occasionally disastrous, earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, sulphur, lead, manganese, tin, tungsten, molybdenum, antimony, zinc, agate, cornelian, and rock crystal are found. Gold is found in the Island of Sado, and silver mining is prosecuted on a small scale; while there is a good supply of muddling coal. Petroleum is also being produced in quantities, especially in the Province of Echigo. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the *Cryptomeria japonica*, *Pinus Massoniana*, and *Zelkova Kaki*; the *Paulownia* imperialis is largely used for fancy boxes and works of art; the maple is merely for ornament. Chestnut, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, about 347,500,000 bushels being consumed annually in Japan proper (home-grown crop 1930, 65,305,430 *koku*; *koku*=5 bushels, approximately). Agriculture, upon which the Japanese bestow great care, is their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat; European fruits, such as apples, strawberries, pears, grapes, figs, and peaches are produced, and the American navel orange is extensively grown.

Commerce and Industry.—The chief manufactures are silk and cotton woven goods, cotton yarn (220 cotton spinning mills were in operation in Dec., 1928), matches, paper, glass, cement, chemicals and fertilisers, sugar, brushes, flour, insulated electric wire, woollen fabrics, rubber goods, soap, lacquer ware, porcelain, earthenware, mats, matting, hemp-braids, knitted goods, vegetable oil, crude camphor, camphor oil, straw-plaits, and bronze, while shipbuilding is an important industry in the yards. The chief imports are raw cotton from India, U.S.A., Egypt, and China; wheat from Canada, Australia and U.S.A.; oil cake from Kwantung Province and China; wool from Australia; crude rubber from Malaya; lumber from U.S.A.; and piece goods, metals, manures, woolsens, wool, drugs, rails, locomotives, and machinery from the U.S.A. and Europe. Sugar is largely imported from the Dutch East Indies, Philippine Islands and Formosa; kerosene oil from U.S.A. and the Dutch Indies; beans, peas, and pulse from China, Kwantung Province, and Korea; and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton fabrics, cotton yarns, tea, refined sugar, knitted goods, matches, coal, camphor, straw-plaits, porcelain, earthenware, marine products, paper, glass and toys.

Communications.—There were 13,496 miles of Government and private railroad (steam and electric) on Dec. 31, 1931, in addition to

4,950 miles open in Korea, 657 miles in Formosa and 302 in Saghalien. The mercantile marine of Japan and her dependencies consisted in 1932 of 193 steamers and motor vessels of 4,225,012 gross tons, in addition to small craft and wooden ships. The total tonnage entered at the chief ports in 1931 was 17,930 vessels (56,812,222 tons), the clearances being 18,842 vessels (58,325,204 tons). The three great ports are Kobe, Yokohama and Osaka, the first named having a large transhipment trade, in addition to direct imports and exports. In March, 1931, there were 11,296 post offices dealing with about 4,400,000,000 postal packets annually, and 222,650 miles of telegraph line carrying 61,150,000 messages.

Defence.—Service in the Army is universal and compulsory between the ages of 20 and 40. The Army is divided into a first line (*Gen-eki*), and its reserve (*Yobi*); a second line (*Kobe*), and its reserve (*Kokumin*), with a third line to make good the wastage of war (*Hoji*). The peace strength of the first line is 12,786 officers and about 220,000 other ranks. The military Air Force is organized in 8 flying regiments and a balloon corps; the Naval Air service consists of 17 shore-based squadrons, in addition to machines carried by aircraft-carriers and other ships, with 4 small air-ships and a balloon section. The Navy includes 6 battleships, 4 battle cruisers, 4 (10,000 ton) cruisers and 28 others, 5 aircraft carriers, 109 destroyers and 66 submarines. Japan declared war against Germany on Aug. 23, 1914, and captured the German fortress of Tsingtau in November, 1914.

Education is in the lower grades free and compulsory. High schools are State-aided, and prepare for a 3 years' course at the Universities. There are high schools for girls, and the technical and special schools are well attended. There are six State Universities of Tokio (2), Kyoto, Tohoku (at Sendai), Hokkaido and Kyushu (at Fukuoka), and 5 medical universities.

Finance:—

	1932-33
Revenue (Budget)	Y'en 1,273,500,000
Expenditure (do.)	1,397,100,000
Debt (March 31, 1932):—	
Internal	Y'en 4,715,078,200
External	1,472,579,275
Floating Debt	641,605,254
Total	Y'en 6,829,262,729

Trade of Japan:—

	1931 1 cn.	1932 1 cn.
Imports	1,235,675,000	1,431,461,000
Exports	1,146,981,000	1,409,992,000
Imports from U.K.	26,311,000	25,842,000
Exports to U.K.	27,209,000	26,692,000

Formosa.—The island of Formosa (Taiwan) was ceded by China to Japan (June 2, 1895) in accordance with the Treaty of Peace. On the E. coast of the island are the highest known sea cliffs in the world, 8,000 feet sheer above the water. Its total area is 13,890 square miles, with 4,592,537 inhabitants (1930). Imports, Y'en 145,522,123; exports, Y'en 20,972,866, in 1931. The colony has been self-supporting since 1906, producing 26,580,000 bushels of rice in 1930, and it is the principal source of the world's camphor supply. Estimated rev. and exp. (1932-33), Y'en 98,090,800. Capital, Taihoku; pop. (1928), 219,566.

Saghalin (Karafuto).—The southern half of this island was ceded by Russia at the close of the Russo-Japanese war. The ceded territory has a total area of about 24,000 sq. miles with a population (1930) of 295,196. The Japanese Government is encouraging the settlement of agriculturists, and there is a large fishing industry. Estimated revenue and expenditure (1931-32) Yen 23,092,628.

The **Kwantung Peninsula**, which had been leased to Russia by China, was similarly leased to Japan after the Russo-Japanese war. Area, 1,440 sq. miles; population (1930) 1,328,011. The port of Dairen provides Japan with a mainland port, ice-free all the year round, and the peninsula is fertile. Imports (1931), Yen 97,934,730; exports, Yen 192,872,735. Estimated revenue and expenditure (1932-33), Yen 22,736,016. Capital, Port Arthur (Ryojunki); chief port, Dairen; pop. (1930), 369,767.

The **Pescadores (Bokoto)** consists of about 63 islands, with a total area of 85 square miles, and a population (1928) of 62,606.

Korea (Cho-sen).—By a treaty of Aug. 23, 1910, Korea was annexed to Japan and became part of the Japanese Empire.

Korea is situated between 32° and 38° E. long., and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Quelpart. Total length, 600 miles from north to south, and greatest breadth 135 miles from east to west, with an area of about 85,156 square miles. Population 21,058,305 (1930). The soil is fertile, but the arable land is limited by the mountainous nature of the country. The staple agricultural products are rice and other cereals, beans, cotton, tobacco, and hemp; fruit-growing is making progress and sericulture is thought to have a bright future. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision at Songdo (Kaio), and, being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. There are extensive forests in the extreme north. The principal exports are rice, beans, silk, fish, fish-oil and manure, iron and iron ore, raw cotton, livestock and hides. Manufactures are as yet in a primitive condition, but are growing including cotton yarn, silk-reeling, sugar, paper, artificial fertilizers, cement, flour (output at present small in each case). The greater part of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the proper lighting of the coast. Estimated rev. and exp. (1932-33), Yen 215,456,407.

Capital, Seoul (Keijoju); pop. (1930) 350,426

Imports into Korea, 1931 ... Yen 270,466,000

Exports from Korea, 1931 ... „ 261,799,000

Pacific Islands.—Under the *Treaty of Versailles*, 1919, Germany renounced the sovereignty of all her over-sea possessions, and the German Pacific Islands N. of the Equator have been placed under Japanese mandate. These islands, in Micronesia, are (1) *The Marshall Islands* (pop. 9,708), with seat of government at Jaluit; (2) *The Caroline Islands* (pop. 39,718), with seats of government at Truk and Ponapé (Eastern group) and Palau and Yap (Western group); (3) *The Ladrone, or Marianne Islands* (pop. 69,530),

with seat of government at Sipan. Estimated rev. and exp. (1931-32) for the Pacific Islands, Yen 4,953,453.

CAPITAL OF THE JAPANESE EMPIRE, Tokyo, formerly called Yedo, the residence of the Emperor; population estimated at 5,312,000 (1932). On Sept. 1, 1923, a disastrous earthquake destroyed great portions of the cities of Tokyo and Yokohama, but the work of reconstruction is now completed. The chief cities are—

Osaka	2,586,300	Sendai	206,800
Tokyo	5,312,000	Sapporo	177,800
Nagoya	961,800	Hakodate	120,300
Kyoto (ancient capital)	1,001,700	Kure	198,600
Kobe	820,200	Kumamoto	176,000
Yokohama	661,500	Ofaru	149,000
Hiroshima	282,500	Kanazawa	161,800
Fukuoka	224,900	Kagoshima	124,100
Nagasaki	211,000	Yawata	184,100
		Okayama	154,500

FLAG: White, charged with rising sun (red).

President, Alberts Kvelsis, born 1881, assumed

office April 11, 1920.

Prime Minister, Adolfs Biedricks.

Minister of Foreign Affairs, Voldemar Salnais.

Envoy Extraordinary and Minister Plenipotentiary in London, Karlis Zarins, 87 Eaton Place, S.W. 1.

1st Secretary, M. Pauls Alberts.

Agricultural Adviser, Monsieur Emils Zolmanis.

Vice-Consul, Charles E. Jumutz.

A Baltic Republic at the eastern and southern shore of the Gulf of Riga, formerly part of the Russian Empire, its area being about 25,000 sq. miles, with a population of about 2,000,000. Latvia was proclaimed an independent state on Nov. 18, 1918. Its frontiers are common with Estonia, Russia, Poland and Lithuania. The constitution is that of a democratic republic, with universal suffrage and proportional representation. Parliament (*Saeima*) consists of a single chamber of 100 members.

The surface of the country is generally flat, with marshy areas, interspersed with many lakes. Agriculture and dairy farming are the principal occupations of the people, and there are many flourishing industries. The fisheries are also of importance. The chief exports are flax, timber, butter, paper and glass; chief imports are agricultural machinery and implements and wood and metal machinery. The tonnage of ships entered in 1932 was 1,274,815 tons. The chief ports are Riga, Libau and Windau. In 1930 there were 1,860 miles of railway in operation.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the rivers Cavalla, S.E., and Mano, N.W., a distance of about 350 miles, with an area of about 43,000 square miles, and extending to the interior to latitude 8° 50', a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised since 1847 as an independent State. The population is estimated at 1,000,000 to 1,500,000, including about 12,000 Americo-Liberians. The principal exports are palm-kernels, piassava, palm-oil, coffee, cocoa, ivory and kola nuts. The chief imports are dried fish, rice, tobacco, Manchester goods, provisions, splits, salt, hardware, glass and earthenware and building materials. The executive power is vested in a President elected for four years, assisted by a ministry; there are two houses of Legislature, the Senate, with 20 members elected for six years, and the House of Representatives with 22 members elected for four years. There is no regular army, but there is an enlisted frontier force of about 400 men under American and native officers. In 1927 arrangements were made with the Finance Corporation of America for a loan of 5,000,000 dollars, of which one-half has been issued. The previous 1922 loan, in which British financial interests preponderated, was paid off from the proceeds of the new loan, which is secured by a first lien on customs revenues and head moneys. The Loan Agreement also provides for financial supervision by American officials. There are 15 ports of entry, including 4 river ports, along the 350 miles of coast and 12 interior ports. In 1932, 526 vessels (1,334,649 net tons) entered and cleared at all ports; of these 163 (475,940 net tons) were British.

Revenue	U.S. \$476,268
Expenditure	235,080
External Debt, 1932 (Bonds)	2,192,000

1st Secretary, J. Kajackas.

2nd Secretary, J. Zmudzinas.

The independence of the Lithuanian Republic (Lietuva) was proclaimed at Vilna on Feb. 16, 1918. The Republic consists of the former Russian Government of Kovno and portions of the Suwalki and Vilna Governments, and is bounded on the N. by Latvia, on the S. and E. by Poland and on the W. by Germany and the Baltic Sea, the total area included in the Republic (including Memel Territory) being about 20,000 sq. miles, with an estimated population of 2,400,000. Under the *Treaty of Versailles* Germany renounced the sovereignty over the town and territory of Memel, and a French High Commissioner, with a small garrison, governed the Territory in the name of the Allies until Jan. 1923, when the Territory was invaded and occupied by the Lithuanians. The sovereignty of the Territory has been transferred to Lithuania, as set out in the Convention signed at Paris (May 8, 1924) and ratified Aug. 1925. The total area administered is 945 square miles, with a population of about 150,000, of whom about 35,000 inhabit the town of Memel.

The legislature consists of a single chamber Assembly (*Seim*), elected by universal adult suffrage, the Executive being entrusted to a council of ministers. In April, 1927, the *Seim* was dissolved by decree of the President, and since that date no elections have taken place.

The chief industries are agriculture and forestry, the chief products of the Republic

being rye, wheat, barley, oats and potatoes; the exports are bacon, dairy produce, cellulose, timber, flax and livestock; the chief imports are herrings, cement, coal, metals, textiles and machinery.

LUXEMBURG.

(Grand-Duché de Luxembourg.)

Grand Duchess, H. R. H. Charlotte, born Jan. 23, 1896, succeeded (on the abdication of her sister) Jan. 9, 1919; married, Nov. 6, 1919, Prince Felix of Bourbon-Parma. *Heir Apparent*, Prince Jean, born Jan. 5, 1921.
Minister of State, Joseph Bech.

Consulate General in London, Moorfields House, Tenter Street, E.C. 2.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815–66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23, 1890, it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the commencement of the war in 1914, but was liberated in 1918. By the *Treaty of Versailles*, 1919, the country is declared to be free from all ties with Germany. The area is 900 square miles; the population (1930) 200,000, nearly all Roman Catholics. The Grand Duchy is rich in iron-ore. The revenue in 1932 was estimated at 447,041,506 francs, expenditure 413,593,657 francs; debt (Jan. 1, 1932) 486,726,987 francs. There are 328 miles of railway. The army numbers about 300 men. The capital, Luxemburg (population 54,250), is a dismantled fortress.

FLAG: Red, white, blue.

BRITISH LEGATION.

British Envoy Extraordinary and Minister Plenipotentiary, The Rt. Hon. Sir George R. Clerk, G.C.M.G. (1933) (*Ambassadeur at Brussels*).

BRITISH CONSULAR OFFICES.

MANCHURIA.

(Manchukuo.)

President (Chih-Cheng = Administrator) of the Manchurian Republic, Henry P'u, born Feb. 7, 1905 (succeeded as Chinese Emperor Nov. 10, 1909; decree of abdication by Dowager Empress, Feb. 12, 1912). Installed as President of Manchuria, at Changchun, March 9, 1932.

Manchuria lies north-east of China proper, and is bounded north and north-east by Siberia, west by Inner Mongolia, south-east by Cho-sen (Korea), and south by the Gulf of Pechihli; the Yellow Sea and "The Great Wall of China." The new state comprises the following provinces:—

Province.	Sq. Miles.	Est. Population
Liaoning	71,508	15,151,630
Kirin	103,379	9,191,980
Heilungkiang	224,744	5,321,370
Jehol	60,550	4,670,000

Total..... 460,381 34,244,980

The province of Heilungkiang occupies the greater part of Northern Manchuria, with Taitshar as capital. Kirin lies to the north-east, with its capital at Kirin. Liaoning (formerly Feng-tien) occupies the southern part, with Mukden as capital, and is separated from Korea by the Yalu river, with a seaboard washed by the Gulf of Pechihli and the Yellow Sea. Jehol (annexed to Manchuria in 1933) extends from the Western boundary of Liaoning to the Great Wall of China, with Jehol (formerly Cheng-te-Fu) as capital.

Manchuria consists mainly of fertile agricultural land, and about half the cultivable land is worked, principally under soy beans and other pulse, kaoliang (the main food of the people) millet, maize, wheat and rice; cotton and tobacco are also grown. The live stock (1930) included 1,605,000 cattle, 2,438,000 horses, 5,647,000 sheep and 7,507,000 pigs; wool and furs are largely exported, and lumbering is an important industry. Mineral products include salt, coal, iron ore, lead, copper, gold and manganese. There are several well-equipped factories, including oil and flour mills, iron works, and silk and other factories. The principal articles of export are soy beans, bean cake, coal, millet, bean oil, wild raw silk and pig iron. The principal imports are flour, cotton fabrics, tobacco leaves, kerosene and raw cotton. The *South Manchurian Railway* (leased to and worked by Japan), the Chinese Eastern Railway, Peiping-Mukden Railway and other lines have a total length of 4,125 miles.

The principal towns are: Mukden, with a population estimated in 1930 at 408,000, Dairen (390,000), Harbin (384,000), Kirin (192,000), Antung (143,000), Port Arthur (135,000), KSHINKING the capital, in the province of Kirin (128,000), Newchwang (120,000) and Taitshar (90,000). The principal harbours are Dairen (Japanese), Port Arthur and Antung (on the Yellow Sea), and Newchwang (or Yingkow) and Hulutao (on the Gulf of Pechihli).

The finances of the provinces are estimated in 1929 as under in silver *Yuan* (about 2s. in 1929):—

	REV.	EXP.
Liaoning	35,000,000	32,600,000
Kirin	23,500,000	15,000,000
Heilungkiang...	10,222,000	6,354,000
Jehol	—	—

The foreign trade of Manchuria in 1930 was stated at 306,334,620 *Haikwan Taels* for Imports, and at 325,714,056 for Exports and Re-Exports, a total of 702,058,676 H.T. In 1930 the exports and re-exports were taken as under:—

Japan	H.T. 159,331,631
China	102,257,518
Russia	50,796,448
Gt. Britain	27,683,245
U.S.A.	8,701,761
Germany	3,386,919
Belgium	1,638,484
Denmark	293,860
Netherlands and N. East Ind.	40,855,136
Other Countries	11,545,054

Total..... 396,714,056

CAPITAL, Hsinking.

Minister in London, Señor Don Alberto Mascareñas, 48 Belgrave Square, S.W. 1.

Consul-General in London, Señor Don Gustavo Unders de Negri, 8 Halkin Street, S.W. 1.

Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15° to 32° 30' N. lat. and 87° to 117° W. long., and comprising one of the richest and most varied zones in the world. It comprises 27 states, 3 territories, and the federal district of Mexico, making in all 31 political divisions, comprehending an area of 758,823 square miles, with a population (1930) of 16,404,030. Mexico is rich in archaeological remains, and work is proceeding in every district to remove the earth covering which for many centuries has kept them from view. Near the City of Mexico are a number of pyramids built to a great extent with boulders from the river beds. The *Pyramid of the Sun* (now called "Tonatihu") is 761 feet from N. to E., and 725 feet from E. to W., and rises to a height of 216 feet. The *Pyramid of the Moon* (now called "Mextli") is 426 feet X 511 feet, and rises to 150 feet. The staircases

vary in construction between terrace and terrace and are found to be intact. Other places of interest are near Oaxaca, Papantla, Zempoala on the Continent, and Uzuul, Chichén-Itza and other points on the E. side of Yucatan.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of California, with a mountainous surface, separated from the mainland by the Gulf of California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Cuicatpetl ("El Nevado de Toluca") on the east. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet); the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 5,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 5,000 feet). The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, which runs from Lake Chapala to the Pacific. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "harrancas." The largest fresh-water lakes are Chapala (70 miles long and 20 miles wide), and Patzcuaro and Xochimilco. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude, the rainy season lasting from June to October. Yellow fever sometimes occurs at Merida, Yucatan.

The earliest invaders, or *Toltecs*, gave place in the 13th century to the *Aztecs*, who were conquered in the 16th century by Spanish adventurers under *Hernan Cortes*. Spanish rule was established at *Tenochtitlan*, a 14th century Aztec city (now Mexico), and Mexico remained a Spanish dominion until its freedom was asserted by a revolutionary war, 1810-1821. From 1821-1848 the province of Texas gave rise to hostilities with the United States, terminating in a three years' war and a cession of the disputed territory to the victorious northern States. In 1820 a Republic was proclaimed, but Iturbide declared himself Emperor in 1822. He was shot in 1824, and a Republic was again established. In 1862 the French troops came to Mexico, and in 1864 an Empire under Ferdinand Maximilian of Austria was declared. In 1867 the downfall of the Empire and the death of the Emperor gave rise to the new Republic, which has endured to the present day. The most prominent of modern Presidents is *Porfirio Diaz*, who ruled (except during 1900-4) from 1876 to May 25, 1911. Since the fall of Diaz internal disturbances, in which eleven Presidents have figured, have continued with varying degrees of intensity, and considerable friction (amounting almost to a state of war) has arisen with the United States. On

* The remains of *Hernan Cortes* have been definitely located in the Temple of Jesus, Mexico City. They are contained in a marble vault, with the funeral garments.

July 15, 1914, Venustiano Carranza assumed control of the executive, but his anti-foreign attitude and legislation, together with the seizure of many properties (a few of which belonged to British subjects) led to a refusal of the British Government to grant recognition of his administration. The degree to which Carranza departed from his declaration of neutrality during the Great War undoubtedly influenced the British Government when this policy was adopted. Carranza was overthrown by a further revolution in 1920, and is believed to have been shot by the insurgents. After the fall of Carranza the executive power was assumed by de la Huerta as provisional President, and on Dec. 1, 1920, General Obregon, whose *coup d'état* had caused the downfall of Carranza, became head of the Republic. The determination of the new government to uphold the Carranza constitution of 1917, which has led to confiscatory measures in connection with nationalization of the petroleum of the country, and contains (among other deputations from the accepted comity of nations) provisions which restrict the rights of foreigners, caused the British, American, French and Belgian governments to adopt a policy of non-recognition of the Obregon administration. The expropriation, without payment of compensation, of several hundreds of private properties, in pursuance of the Obregon agrarian policy, called forth strong protests from foreign Powers, but all the Powers except Great Britain eventually recognised the Obregon administration. General Obregon was afterwards assassinated. In 1925 relations between Great Britain and Mexico were re-established, and an Anglo-Mexican Special Claims Commission has since met and concluded its labours in February, 1928.

Vera Cruz, Tampico, Progreso, and Puerto Mexico are the chief ports on the Atlantic or Gulf of Mexico, and Acapulco, Manzanillo, Mazatlan, Salina Cruz, and Guaymas on the Pacific. There were 16,112 miles of railroad open on Sept. 1, 1925, and 54,670 miles of telegraph. The railroads have in a large measure been built by American and English companies. The Highway Commission of Mexico had constructed (to Dec. 31, 1925) 247 kilometres of road, finished with asphaltic treatment; 332 kilometres lacking only bituminous treatment, and 700 kilometres open to traffic, but still in various stages of construction. There is a network of 50,000 kilometres of old roads, of which about 12,000 are impassable. It is proposed (1925) to spend 230,000,000 pesos on the completion of 6,000 kilometres of highways throughout the Republic. The international highway from Laredo, Texas, to Mexico City is passable during the dry season (Nov. to May) only. The city of Mexico is linked with Puebla, Tampico, Vera Cruz, Toluca, and Saltillo by telephone; the line is now extended to the U.S. border and thence is connected to Canada and Europe. The city is connected by wireless to U.K. and Europe. The principal air routes from Mexico City are to Brownsville and El Paso (Texas), to Merida (Yucatan) and to Mazatlan (Sinaloa) *via* Torreon.

The principal agricultural crops are maize, beans, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of tropical fruit. The maguey, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax

and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines, and Mexico produced 50,150,610 barrels of petroleum in 1928. The mineral production is stated at:—

Mineral	Kilograms	
	1930	1931
Gold	20,808	19,700
Silver	3,272,288	2,730,652
Lead	332,930,625	231,848,320
Copper	73,411,608	55,542,754
Zinc	124,083,519	124,781,093
Mercury	166,241	259,262
Antimony	3,032,211	5,653,722
Arsenic	9,976,791	6,747,308
Graphite	5,854,507	3,258,175

Petroleum Production

Year	Barrels	Cent.	Barrels
1927	64,120,000	1930	39,600,000
1928	50,151,000	1931	33,050,000
1929	44,688,000		

Woollen and cotton spinning and weaving, the making of footwear, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 20 per cent. consist of silver and gold, while 25 per cent. represents the value of petroleum and its derivatives, mainly shipped from Tampico. Other important exports are copper, lead and zinc, also sisal hemp (henequen), coffee, cotton, resins, fresh vegetables and dried vegetables.

The monetary system has now been placed on a silver basis, with a silver peso = 50 cents U.S. currency or 24.58d., but in actual fact is worth less than 30 cents U.S. gold; there is a large amount of silver currency in circulation. In Sept. 1922, the Mexican Government undertook to set aside for the service of the debt the sum of 30,000,000 gold pesos in 1923, rising by 5 million gold pesos annually to 50 million gold pesos in 1927. However, this agreement with the International Commission of Bankers was amended in 1925, after the Government had found it necessary to suspend the service of the debt in June, 1924. The effect of the 1925 agreement was to eliminate the debt of the National Railways of Mexico from the public debt, thereby reducing this from 1,561 million Mexican gold pesos to 820 millions, as at Dec. 31, 1925. Furthermore, the 1925 agreement provided for the postponement of payment of the 75 million pesos (which had not been met in 1924 and 1925) until 1928-1935. Service of the debt was resumed in 1926, but again suspended; a further agreement was signed on Dec. 22, 1931, providing for resumption of payments on Jan. 1, 1934. In addition to the 820 millions above mentioned, other items which had not been included in the debt agreement of Sept. 1922, as amended in 1925, amounted to 128 millions as at Dec. 31, 1925, thus making a grand total of 948 million pesos Mexican gold. A total sum of \$45,000,000 has been received by the committee of bankers. The

total debt, funded and floating and interest, was stated to be \$1,253,105,699 as at Dec. 31, 1928.

The language of the country is Spanish.

Estimated revenue	(1932)	\$213,074,000
Estimated expenditure	(1932)	215,277,481

MOROCCO.

(Moghreb el akas "The Farthest West")

French Protectorate, and Spanish and International Tangier Zone.

Sultan, Sidi Mohamed, born 1911; proclaimed Nov. 20, 1927.

Morocco, the largest of the Barbary States, is situated in the north-west of the African Continent, between 27° – 36° N. lat. and 1° $11'$ – $40'$ W. long., with a total area estimated at 228,525 square miles, and a population of about 5,300,000. Morocco is traversed from the Atlantic coast in the south-west to the Algerian frontier in the north-east by five parallel ranges, known generally as the *Atlas Mountains*. Between the various ranges lie well-watered and fertile plains, the lower slopes of the northern flanks of the mountains being well wooded, while the southern slopes are exposed to the dry winds of the desert and are generally arid and desolate. The most northerly point of Morocco is the peninsula of Ceuta, which is separated from the Continent of Europe by the narrow strait of Gibraltar. The Jebel Musa dominates the promontory, and with the rocky eminence of Gibraltar was known to the ancients as *The Pillars of Hercules*, the western gateway of the Mediterranean. Between 32° N. and 36° N. is the headland Ghr, which encloses a bay containing the Gulf of Agadir, formerly known as the "Gate of the Sudan."

The climate of Morocco is generally good and healthy, especially on the Atlantic coast, the country being sheltered by the Atlas Mountains from the hot winds of the Sahara. The extremes of temperature in Tangier and Mogador are 92° Fahrenheit in the summer and 37° in the winter, with a rainy season from November to April, but the summer-heat figures at all the intervening ports (Laâche, Kenitra-Mehedia, Rabat-Sale, Fedalah, Casablanca, Mazagan, and Safi)

are markedly higher; the last-named port being the hottest. The Mediterranean coast is drier and less temperate, but not unhealthy, while the plains of the interior are intensely hot.

Government.—France is the paramount power, and represents the Sultan of Morocco in all foreign relationships, but the country is divided into three zones—the *French Zone*, the *Spanish Zone*, and the *International Tangier Zone*. Spain has had relations with Morocco for many centuries. The northern portion of Morocco, as defined in the Franco-Spanish Treaty of 1912, forms a Spanish "sphere of influence" which extends over the whole of Northern Morocco, with the exception of the International zone round Tangier. In this sphere occurred the joint Franco-Spanish military operations against Abd el Krim, the Rif leader, which culminated in the surrender of Abd el Krim in May, 1926, and the final pacification of the French and Spanish zones in the following year. Ceuta (on the Mediterranean coast, opposite Gibraltar), in 35° $54'$ N. lat. and 5° $18'$ W. long., has been a Spanish possession since the close of the 16th century, and forms part of the administrative province of Cadiz, and the adjacent Alhucema and Zaffarin islands are Spanish possessions. A special international régime was designed for Tangier before the War by negotiations between the British, French and Spanish Governments, but the outbreak of the War prevented this régime from being put into operation. A new Convention instituting the *International Zone of Tangier* was, however, signed by the three governments at Paris on Dec. 18, 1923, and was brought into force on June 1, 1925. The Convention was modified by a Protocol signed at Paris, July 25, 1928, by the three Powers and Italy, who thereby adhered to the Convention. Both instruments have been adhered to by Belgium, The Netherlands, Portugal and Sweden, but the United States have not yet (Aug., 1930) signified their acceptance, and therefore retain their Capitulatory rights in the International Zone. The Convention provides for a complete international administration of the zone, except as regards native affairs, which are reserved to the Sherrefian authority.

Production, Industry, &c.—Among the agricultural products are wheat, barley, maize, beans, peas, brisseed, linseed, coriander, cummin, fenugreek, espato, and hemp, and the northern slopes of the Atlas produce many fruits, principally figs, almonds, pomegranates, lemons, olives, oranges, and grapes, the latter growing also in the plains. The live stock includes large quantities of horses, cattle, sheep and goats, while the egg industry is of importance. Important deposits of coal, manganese, iron ore, lead and zinc, as well as other minerals in smaller quantities, have been prospected, but their exploitation awaits transport facilities. Gold and silver are also found. Phosphates are exported in increasingly large quantities and constitute a great source of wealth for the French zone. The trade of Morocco is chiefly with France and Algeria, Great Britain, Italy and Spain, the chief imports being cottons, sugar, motor vehicles, petroleum, building materials, and soft goods, the exports being grain, phosphates, eggs, hides and skins, and wool. The unit of currency in the French protectorate is the Moroccan franc, which is closely allied to the French franc, while in the Tangier zones the franc, the *peseta* and the *Tunisian peseta*

are all current, and in the Spanish zone the two last of these currencies.

Communications.—The French Protectorate authorities are engaged in the serious development of normal gauge railways in their zone, and (Oct. 1931) 1,140 kilometres of normal and 1,300 kilometres of narrow gauge track are in working order. In addition, the completion of the Tangier-Fez full gauge system gives through service between Tangier and the principal towns of the French zone. Telegraphic communication is established by submarine cables from Tangier to Cadiz, Gibraltar, Rio Martin, Melilla, Tarifa and Oran, also between Casablanca and Brest. There are wireless stations at Tangier, Tetuan (military), Rabat, and Casablanca; inland lines have been built by the French connecting all important places in their zone, as well as to the borders of the Spanish zone, and the latter line is being extended to Tangier. The chief roads in the Tangier and Spanish zones are those linking Tangier to Ceuta *via* Tetuan in the North, and to Arzila, Larache, and the French zone in the South. The French zone is well equipped with good main and secondary roads. *Air Services* are maintained between Casablanca and Toulouse (daily), and Casablanca and Dakar (weekly).

The principal *Harbours* are Casablanca, and Ceuta (for Tetuan), Tangier, Larache, Rabat, Mazagan, Safi, Kenitra, and Mogador.

External Trade.—The imports into the French Zone in 1931 were valued at 2,083,922,000 francs, and exports from French zone, 1931, 166,042,000 francs. The imports into the Tangier Zone (1931) were valued at 92,229,030 francs and the exports from the zone at 22,276,275 francs. No customs statistics for the Spanish Zone have been published for many years.

CAPITAL of French zone, Rabat, population 52,000 (Fez in the North, and Marrakesh in the South being the old capitals of the Sultans). The French Resident-General is M. Henri Ponsot.

CAPITAL of Spanish zone, Tetuan, population 30,000 (principal ports, Larache and Rio Martin, for Tetuan).

CAPITAL of International zone, Tangier, population 45,000.

Other towns (with populations exclusive of French army of occupation) are Fez (107,843), Marrakesh (193,582), Meknes (56,770), Salé (25,821), Casablanca (161,113), Rabat, with Salé (77,821), Mazagan (19,602), Safi (26,158), and Oudjda (29,220).

BRITISH CONSULAR OFFICERS.

Tangier—Consul-General (with personal rank of Minister Plenipotentiary), E. F. Gye, C.M.G.

„ Consul, A. J. Gardener.

„ Vice-Consul, W. B. G. W. Forester.

Rabat—Consul-General, W. S. Edmunds, C.M.G., O.B.E.

„ Vice-Consul, T. Wikeley.

„ Pro-Consul, E. N. Dempster.

Casablanca—Consul, F. H. W. Stonehewer-Bird, O.B.E.

„ Vice-Consuls, R. H. Broome, M.B.E.; R. E. Ellison; J. W. Blanch (acting).

„ Pro-Consul, S. J. Lasry.

Marrakesh—Consul, J. F. R. Vaughan-Russell.

Mazagan—Vice-Consul, T. R. Spilney, M.B.E.

Fez—Vice-Consul, A. H. King.

Tetuan—Consul, G. E. A. C. Monck-Mason.

NETHERLANDS (or HOLLAND).

(Nederland.)

Queen, Wilhelmina Helena Pauline Maria, born August 31, 1880, succeeded her late father, King William III., Nov. 23, 1890; mar., Feb. 7, 1901, H.R.H. Prince Henry, Prince of the Netherlands and Duke of Mecklenburg.

Heiress Apparent, Princess Juliana of Orange-Nassau, Duchess of Mecklenburg, born April 30, 1909.

Queen-Mother, Emma, Princess of Waldeck and Pyrmont, born August 2, 1858; married the late King, Jan. 7, 1879, who died November 23, 1890; acted as Regent 1890-1898.

MINISTRY (May, 1933).

Prime Minister and Minister of the Colonies, Dr. H. Colijn.

Interior, Dr. J. A. de Wilde.

Finance, Dr. P. J. Oud.

Foreign Affairs, Jonkhoeur Dr. A. C. D. de Graeff.

Social Affairs, Prof. J. R. Slotemaker de Bruïne.

Defence, Maitre Dr. L. N. Deckers.

Ways and Communications, Dr. J. A. Kalf.

Education, Science and Art, Dr. H. P. Marchant.

Economic Affairs, Maitre T. J. Verschuur.

Minister in London, Jonkhoeur Maitre R. de Maere van Swinderen, 21 Portman Square, W. 1.

Chancery, 21A Portman Square, W. 1. Counsellor of Legation, J. B. Bosch Chevalier de Rosenthal.

Commercial Attaché, F. B. s' Jacob.

Consul-Gen., Th. H. de Moester, 28 Langham Street, W. 1.

Consul, A. Merens.

Agricultural Adviser (20 Cleveland Square, W. 2), B. Gerritzen.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46'–53° 34' N. and long. 3° 22'–7° 14' E., consisting of 11 provinces, and containing a total area of 13,214 square miles, with a population Dec. 31, 1931, of 8,061,808. The majority, about 55 per cent., belong to the several Reformed Churches, and the remainder are Roman Catholics, with about 115,000 Jews. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The highest point is at Vaals, 656 ft. above mean sea level, but almost half the country is below the mean level of the sea. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief native products are herrings and other fish, cattle, horses, swine, sheep, poultry, eggs, seed, potatoes,

oats, rye, wheat, barley, beans, peas, buckwheat, sugarbeet, chicory, flax, hemp, tobacco, bulbs and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, glass bottles and ware, sugar, chemical and pharmaceutical products, matches, perfumery, bicycles, boots and shoes, starch, potato flour, engines, metal substances, iron and steel, wireless sets and parts, works of art in gold and silver, incandescent lamps, wireless apparatus and parts, machinery, motors, paper, cardboard, printing, oils, beer, "geneva" and other liqueurs. Coal production (1932) 12,756,000 tons. Diamond-cutting employs numerous hands in Amsterdam.

Communications.—The total extent of navigable rivers and canals is 4,687 miles. There were 2,290 miles of railroad in open 1930, 1,005 miles of telegraph cable, and 4,175 miles of telephone cable. The mercantile marine, on Jan. 1, 1932, consisted of 926 steam and motor vessels of 6,907,000 cubic metres gross. In 1930 about 20,000 vessels (84,714,000 tons) entered and cleared at the various ports. An Act for the damming and draining of the Zuider Zee was passed in 1918; the dam was completed in 1932.

Defence.—The Home Forces consist of a conscript army, with an annual levy of 19,500 men, producing a first-line army of 270,000, or (including reserves) 350,000 all ranks. The Royal Navy consists of 11 protected and 58 unprotected vessels.

Education.—Private State-aided primary instruction is encouraged rather than public, though the latter is provided if required, by local taxation. The average attendance at primary schools is 96 per cent. Secondary schools for working classes are numerous, well equipped and attended. The principal Universities are at Amsterdam, Groningen, Leiden, Nijmegen (R.C.), and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (commercial), Wageningen (agriculture), and Utrecht (veterinary).

NETHERLANDS COLONIES.

I. Netherlands East Indies:—

" Netherlands India " comprises the islands of Java and Madura, the island of Sumatra, the Rionne-Lingga Archipelago (which with Karimbon, Anambas, Natuna Islands, Tambelan, and part of Sumatra, forms the "Residency of Rionne"), the islands of Bangha and Billiton, part of the island of Borneo, Celebes Island, the Molucca Islands (Ternate, Hulmbahera, Buu, Ceram, Banda, Timor-Laut, Larat, Bachian, Obl, Kef, Aru, Bahur, Leti and Wetar), part of New Guinea, part of Timor Island, and the islands of Bali and Lombok, with a total area of 730,000 sq. miles, and a population estimated at 53,000,000. The administrative capital is Batavia (pop. about 260,000).

Governor-General, Jonkheer Dr. B. C. de Jonge, appointed 1931.

Java and Madura (51,000 sq. miles, pop. 1930, 40,000,000) furnish sugar, tobacco, tea, coffee, tin, rubber, and other products for exportation. The "outlying" islands are frequently administered by their own princes, subject to the directions of a Netherlands Resident. There was (1929) a colonial army of 1,233 officers and 37,100 men. The colonial revenue for 1931 was estimated at fl. 833,524,000 and the expendi-

ture at fl. 887,102,000. The trade of Netherlands India was valued in 1929 at fl. 1,487,801,000 for exports and at fl. 1,166,305,000 for imports. The trade with Great Britain in 1930 was valued at £4,520,400 for imports from, and at £6,586,271 for exports to Great Britain.

BRITISH CHAMBER OF COMMERCE FOR NETHERLANDS E. INDIA, Batavia, Java (and King William Street House, Arthur Street, London, E.C.4).

II. *Netherlands' West Indies*—

"Netherlands' West Indies" comprise the mainland colony of *Surinam* ("Dutch Guiana") in South America, and certain islands in the West Indies known as the "Colony of Curaçao" (Curaçao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba) with a total area of 400 sq. miles, and a population estimated (1929) at 65,750. The administration capital of Surinam is Paramaribo (pop. 50,000); the capital of Curaçao is Willemstad (pop. 21,000).

NICARAGUA.

(*República de Nicaragua*.)

President (1933-1936), Señor Doctor Don Juan Bautista Sacasa, assumed office Jan. 1, 1933 (until Dec. 31, 1936).

Minister in London, Señor Don Eduardo Pérez-Triana, 4 Moorgate, E.C.4.

Vice-Consul, F. V. Cock, 15 Union Court, E.C.4.

The largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situated between 9° 45'—15° N lat. and 83° 40'—87° 38' W. long., containing an area of 51,660 English square miles and a population (1930) of about 750,000, of whom about three-quarters are mixed blood and the rest Indians, including the Mosquitos, who dwell on the Atlantic littoral and were formerly under British protection.

Nicaragua was discovered by Columbus in 1502, and was overrun by the Spaniards under Davila in the first quarter of the 16th century, forming part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution rests on the fundamental law of Nov. 20, 1921 (amended 1923) and is that of a centralised republic. The President is elected by direct suffrage for four years.

The chief products are coffee, bananas, sugar, timber (cedar, mahogany, rosewood, &c.), tobacco, maize, rice, beans, cocoa, hides, gold and silver. Considerable quantities of foodstuffs are imported as well as cottons and other manufactures, principally from the United States, which also take the greater part of the exports.

There are (1933) 200 miles of railway, 2,824 miles of telegraph and 3,216 miles of telephone, and a powerful wireless station was completed at Managua in 1924. Good roads are very few, and transportation, especially in the rainy season (May-Nov.), is attended with great difficulties.

Corinto, on the Pacific coast, is the chief port of the country, handling about 70 per cent. of the total trade. Bluefields and Puerto Cabezas, on the E. coast, are mainly concerned with the shipment of bananas and timber to New Orleans. Owing to defective communications the Atlantic littoral is practically isolated from the rest of the Republic and the chief centres of population. Education is backward, at least 60 per cent. of the population being illiterate.

The official language of the country is Spanish.

Secretary, Rolf Andersen.

Consul-General, G. Conrad.

Vice-Consul, Stig Tholroer Olmer.

Norway, an independent kingdom, founded in 872 (fundamental law of May 17, 1814), was united with Sweden under the same King from Nov. 4, 1814, to June 7, 1905, when the union was dissolved. The Parliament of 150 members is called the "Storting," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odelsting" and "Lagting." Norway, the western

* C\$ = Córdoba, worth 5 U.S.

† As at Feb. 1, 1933. Figures include Consolidated debt only and do not include claims presented to the Mixed Claims Commission, and other debts which amount to approximately C\$14,000,000, the awards on which will be reduced to a very considerable extent.

and northern portion of the Scandinavian peninsula, is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or fylker, and comprises an area of 124,455 sq miles with a population (1932) of 2,845,079. The coast-line is extensive, deeply indented with numerous fjords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. The cultivated area is about one-fortieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

The chief industries are agriculture and forestry, manufactures, fisheries and shipping. Agriculture and forestry gave employment to one-third of the population. Manufactures are aided by great resources of water power, estimated at 9,200,000 kw., of which 73 per cent. are utilized. In normal years the quantity of fish caught by Norwegian fishing vessels is greater than that of Gt. Britain, and more than 60 per cent. of the whale oil production of the world is from Norwegian Companies. The imports consist chiefly of foodstuffs, raw materials for the manufacturing industries and coal and fuel oil. The chief exports are fish, oil, and other products of the fisheries, tinned goods, pulp, paper, iron ore and pyrites, stone, cement, calcium carbide, nitrate of soda, aluminium, ferro-alloys, nitrate of lime, zinc, cyanide &c.

Defence.—Service in the National Militia is universal and compulsory. The peace strength is about 10,000 all ranks. In time of war all males between the ages of 18 and 45 are liable for service. The Navy consists of 4 monitors, 17 torpedo-boats, 3 destroyers, 9 submarines, and several minelayers. There are 60 seaplanes and aeroplanes.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. The attendance is high. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Oslo was attended in 1932 by 3,734 students.

Communications.—The total length of railways open in 1932 was 2,407 miles, of which 229 miles were private lines. The length of telegraphs and telephones in 1932 was 36,032 miles (State, 22,583) with 607,780 miles of wire (State, 434,310 miles). The mercantile marine, Jan. 1, 1933, consisted of 4,023 vessels, of 2,460,700 net tons. The gross earnings of the Norwegian mercantile marine in foreign traffic amounted in 1932 to about 363,800,000 kroner.

SVALBARD.

(Spitzbergen and Bear Island)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitzbergen (“Pointed Mountain”) Archipelago was recognised by the Great Powers and other interested nations, and on Aug. 14, 1925, the Archipelago was officially taken over by Norway.

The Svalbard Archipelago lies between 74°-82° N. lat. and between 10°-35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as West Spitzbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Baren's and Edge Islands, separated from the mainland by Stort Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the

M.; with many similar islands in the neighbourhood of the main group. The principal mineral is coal. In 1932 the coal export was about 215,952 tons. The wintering force in 1931-32, was 436 strong; the archipelago is also visited by hunters for seal, foxes and polar bears.

Svalbard revenue (1933-34) kroner 96,000
do. expenditure (1933-34) " 96,000

South Cape is 370 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsø, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsø to Green Harbour (the postal station, with a high-power Telefunken wireless station) $\frac{1}{2}$ to 3 days; from Aberdeen 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean ($70^{\circ} 49' - 71^{\circ} 9' N.$ lat. and $7^{\circ} 53' - 9^{\circ} 5' W.$ long.) was joined to Norway by law of Feb. 27, 1930.

BOUVET ISLAND, in the Antarctic ($54^{\circ} 26' S.$ lat. and $3^{\circ} 24' E.$ long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER 1st's ISLAND, in the Antarctic ($68^{\circ} 50' S.$ lat. and $90^{\circ} 35' W.$ long.) was declared a dependency of Norway by resolution of Government, May 1, 1931.

PANAMA.

(República de Panamá.)

President (1923-1936), Señor Dr. Don Harmodio Arias, born July 3, 1887; assumed office Oct. 1, 1932.

Secretary of Government and Minister of Justice, Señor Colonel Don Juan Antonio Jiménez.

Foreign Affairs, Señor Don Juan Demóstenes Arosemena.

Minister in London, Señor Dr. Don Belisario Porras (resides in Paris).

Consul-General in London, Señor Don I. J. Valdés, Jr., 233 Finsbury Pavement House, E.C. 2.

Panama, formerly one of the nine Departments of Colombia, revolted in Nov. 1903, and established a separate Government. The area of the Republic is 31,800 square miles, the population 467,450 (excluding Canal Zone). The soil is extremely fertile, but there is little cultivation and nearly one-half of the land is unoccupied. The chief crops are bananas, coconuts, cacao, coffee, and cereals. The imports are almost entirely manufactured goods and foodstuffs. A railway 47 miles in length joins the Atlantic and Pacific oceans.

1933-34.
Budget Revenue \$21,848,945
Budget Expenditure 11,848,945

1932
Imports \$8,247,167
Exports 2,005,586
Imports from U.K. 730,126
Exports to U.K. 60,644

The language spoken is Spanish.

CAPITAL, Panama. Population (1930), 82,827.
Colon (1930) 33,460.

FLAG: Quarterly, white with blue star, red, blue, and white with red star.

BRITISH LEGATION.

PAPAL STATE, The. (Stato Città Vaticana.)

Sovereign Pontiff (66th), His Holiness Pope Pius XI. (Achille Ratti), born at Deslo, March 31, 1857, elected Pope (in succession to Benedict XV.) Feb. 6, 1922.

The office of the ecclesiastical head of the Roman Catholic Church is vested in the Pope of Rome, who is the Sovereign Pontiff of the Western Church. The Papal States were incorporated with Italy from 1860 to 1870, and the territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel Gandolfo. In 1870 the incorporation of the Papal States in Italy left the temporal power of the Pope in suspense until the treaty of Feb. 11, 1929, which recognised the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and of the Catholic Church in Italy and agreeing to pay 750,000,000 lire in cash and the income at 5 per cent. on 1,000,000,000 lire state bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power.

LIST OF POPES.*

Sovereign Pontiff	Family Name	Elected.
Innocent IX	Facchinetti	1591
Clement VIII	Aldobrandini	1592
Ieo XI	Medici	1605
Paul V	Borghese	1605
Gregory XV	Judovisi	1621

Pius X	Sarto	1903
Benedict XV	della Chiesa	1914
Pius XI	Ratti	1922

* Adrian IV (Nicholas Breakspear, the only Englishman elected Pope) was born at St. Albans, elected Pope, on the death of Anastasius IV 1154; died 1155.

BRITISH LEGATION,

(Via 4 Fontaine sq, Rome 5.)

British Envoy Extraordinary & Minister Plenipotentiary to the Holy See, Sir Robert Clive, K.C.M.G. (1933).

1st Secretary (vacant).

Temporary Secretary, R. Thynne.

PARAGUAY.

(República del Paraguay.)

President (1923-36), Dr. Eusebio Ayala.

Vice-President, Dr. Raúl Casal Ribello.

Interior, Dr. Narciso Méndez Benítez.

Foreign Affairs, Dr. Justo Pastor Benítez.

Finance, Don Benjamin Banks.

Justice and Instruction, Dr. Justo Prieto.

Defence, Dr. Víctor Rojas.

Economy, Dr. Luis A. Riart.

Minister in London (vacant).

Consul-General in London and Chargé d'Affaires, Señor Dr. Don Rogelio Espinoza, 22 Russell Square, W.C. 2.

An inland State of South America, situate between 20°-6° 30' S. lat. and 54°-62° W. long. The area of Paraguay (exclusive of the Chaco) is computed at 61,600 square miles, and it contains a population estimated in 1930 at about 850,000.

Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain, and from 1814-1840 was governed by Francia, a Paraguayan despot, who was succeeded by López, 1840-1862. In 1862 Francisco Solano López succeeded his father, and in 1864 declared war against Brazil, Argentina and Uruguay being involved in the struggle. Against these three nations López conducted a five years' war, which terminated in his defeat and death at the *Battle of Cerro Corá*, March 1, 1870. This dogged struggle reduced the country to complete prostration, and the population, which was 800,000 in 1857, is alleged to have fallen in 1870 to 250,000, of whom barely 30,000 were men. The present constitution was adopted at the close of the war, and under its provisions the head of the executive is the President, elected by an electoral college for four years and ineligible for office for eight consecutive years after the expiration of his term. A Vice-President is similarly elected, and succeeds automatically in the case of the death, expulsion or absence of the President. There is a Cabinet of 5 members.

Paraguay proper consists of a series of plains, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draft. Many of the tributary streams are also navigable for much of the year. The Pilcomayo river is navigable for small craft for 180 miles from Asunción; but is liable to shrink unduly with drought. Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucu," or endless, is drained by *Lake Ypoa*, a large

lagoon, south-east of the capital. The Chaco, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, forms the subject of a long standing dispute with that country and led to war in Sept., 1932; it is practically a dead level, though a slight and uniform rise westward is now known to exist, and suffers much from floods and still more from drought.

The chief agricultural products are tobacco, oranges and cassava (manioc), maize, rice, sugarcane, ground-nuts, and other tropical and sub-tropical plants. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad. Stock-raising, lumbering, cotton and tobacco growing, and the gathering of *Yerba Mate* (Paraguay tea), are the principal industries. The chief articles of export are hides, timber, yerba mate, tobacco, quebracho extract, cattle and meat products, oranges, and petit grain oil. The Army numbers 3,000 to 3,000 men. A railway, 232 miles in length, which belongs to an English company, connects Paraguay with the Argentine railway system. The journey from Asunción to Buenos Aires (985 miles) occupies 51½ hours. Train ferries enable the run to be accomplished without break of bulk. River steamers also connect Buenos Aires and Asunción (3 to 5 days). The language is Spanish.

	1931-32. Actual.	1932-33. Estimated.

Honorary Commercial Attaché, Nubar Sarkis Gulbenkian.

Consulate-General, 10 Prince's Gate, S.W. 7.

[Kens 3341.]

Consul, (vacant.)

Persia—called by the natives Iran—comprises an area of 688,000 sq miles, with a population estimated at 10,000,000.

Persia is mostly an arid table-land, encircled, except on the east, by mountains, those in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert. The only navigable river is the Karun, which was opened to foreign navigation from Mohammerah to Ahwaz in 1888. Caravans and pack-animals are also being superseded by motor transport of passengers and goods on the road between Tehran-Khauku, Tehran-Pahlavi (Enzeli), Tehran-Tabriz, Tehran-Meshed, Meshed-Zahedan (Duzdab), Tehran-Bushire and Tehran-Salehabad. There are 334 miles of railway open, including 80 miles in the North from Alahad Shahi to Bander Shah, and 159 miles in the South from Bander Shahpur to Salehabad.

The chief products are cereals, cotton, gums, dried fruits, silk, tobacco, and opium. The minerals (little worked) are salt, iron, coal, copper, lead, sulphur, &c., with turquoises. Oilfields in Southern Persia have been successfully worked by an English company since 1902. The only important manufacture is that of woollen carpets (mostly a domestic industry), but shawls, silks, and cotton fabrics are also produced. There are extensive forests in the north and west. Sheep and goats are numerous, and good wool is produced. The Persians are mostly Shiah Muhammadans; but there are many adherents of Bahaiism (an eclectic form of Deistic religions), and Armenian Christians. The laws and popular education are based on the precepts of the Koran, but efforts are being made to approximate the educational system more closely to European models. Persia is divided into provinces, of which the principal are under Governors or Governors-General.

Owing to increasing popular discontent with a corrupt and incompetent administration

and an extravagant Court, a nationalist movement began in Dec. 1905. In Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. He was succeeded in 1907 by his son Muhammad Ali Shah, who was deposed by the National Assembly in 1909, to be succeeded by his son, Sultan Ahmad Shah (under the regency of Nair-ul-Mulk, until 1914). As a result of the energy of Prime Minister H.H. Reza Khan the authority of the Persian Government was re-established over almost the whole of Persia by means of a disciplined army of 8,000 cavalry and 22,000 infantry, with 94 guns and 200 machine guns, and a number of aeroplanes and armoured cars. On Oct. 31, 1925, the Shah Ahmed Mirza, who had been absent from the country for some time, was deposed by the National Assembly which handed over the government to the Prime Minister. On Dec. 13, 1925, the Constituent Assembly elected Reza Khan Pahlavi, Shah of Persia. The Shah took the oath on Dec. 15 and was publicly proclaimed, and was crowned on April 25, 1926.

The revenue is mainly derived from land tax, Crown lands, customs, duties and from monopolies of sugar, opium, matches, tea and tobacco. The oil royalties are kept apart from the general revenue. Part of the proceeds from the sugar and tea monopolies is earmarked for the construction of railways; the actual expenditure out of the fund for administration and construction of the North to South Railway was stated at *Rials* 366,420,732 on March 20, 1933. British commercial interests in Persia exceed those of any other country, the trade between the British Empire (including India) and Persia amounting to 36½ per cent. of the total trade of the country (1931-2), inclusive of oil.

The leading imports into Persia are cotton fabrics, tea, sugar and motor vehicles; the principal exports are heavy oils, petrol, carpets, opium, gum, fruits, cotton and rice. All foreign trade was in Feb. 1931 declared to be a State monopoly, and restrictions on imports and on exchange transactions were imposed.

	<i>1931-32.</i>
Revenue.....	<i>Rials</i> 506,912,227
Foreign Debt (Aug., 1933).....	£1,069,397
Imports	7,887,102
Exports	20,459,320
Imports from Brit. Empire	1,102,830
Exports to Brit. Empire	5,934,437

Defence.—Persia now possesses an army, well equipped on modern lines, of approximately 80,000 all ranks and a small fleet in the Persian Gulf.

Foreign Relations.—By the Anglo-Russian Convention of Aug., 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Persia while marking out certain regions in S.E. and N.W. Persia respectively in which each had, for geographical and economic reasons, special interests.

In March, 1921, Persia signed a treaty with the Russian Soviet Republic, which provides (*inter alia*) for mutual diplomatic and consular representation, restores to Persia Miruzeh and Ashurada, annuls all concessions previously granted to Russians in Persia, hands over the Russian Discount and Loan Bank to the Persian Government, cancels all Persian debts to Russia, denounces all previous Russo-Persian

treaties, abolishes the "capitulations" as regards Russian subjects in Persia, and denounces all treaties made between Russia and third Powers regarding Persia. Further treaties were signed in 1927 and 1931.

In 1928 the Persian Government engaged a number of American advisers (under Dr. Mills-paugh) for the supervision and direction of the country's finances. Considerable strides were made by the country under this new régime, a balanced budget and a programme for gradual development of the country's resources having been evolved; Dr. Mills-paugh's contract came to an end. A State Bank was started in 1929 under German control; a certain number of Belgians are employed in the Ministry of Finance and in the Customs Administration.

In May, 1928, the capitulatory régime came to an end; at the same time a new Tariff Convention was signed, giving Persia Tariff autonomy.

CAPITAL, Tehran (pop. 220,000); other large towns are Tabriz (180,000), Isfahan (80,000), Meshed (60,000), Kerman (50,000), Yazd (60,000), and Shiraz (60,000).

Consul-General, Señor Don S. Marron.

Con.-Gen. at Liverpool, Señor Don Manuel Casio.

Consul, Glasgow, Señor Don José Varela Arias.

Do. Cardiff, (vacant)

Peru is a maritime Republic of South America, situated between 1° 31' 29" and 19° 13' S latitude and between 69° and 81° 29' W. The territory between 17° 47' S and 19° 13' S. was occupied by Chile, as the result of the Pacific War of 1879-1882. In 1929 the Province of Tacna was returned to Peru, (Chile retaining the Province of Arica. The area of the Republic (1929) is 482,616 square miles, and the population (1927) was estimated at 6,147,000. It is bounded on the north by Ecuador and Colombia, as the latter claims a territory in the Amazonian basin; on the east by Brazil and Bolivia, and on the south by Chile and Bolivia.

Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541), who subjugated the Incas (a tribe of the Quichua Indians), who had invaded the country some 500 years earlier, and for nearly three centuries Peru remained under the Spanish rule. A revolutionary war of 1821-1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1826 (amended in 1860, 1919 and 1933), and is that of a democratic Republic under a newly drawn constitution of 1919. The President is elected for five years by direct vote of the people.

The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points being *Huascarán* (22,050 feet), *Huandoy* (21,100 feet), *Aréquipa* (or *Misti*) volcano (20,013 feet), *Hualcan* (20,000 feet), and *Lirima*, *Tucora*, and *Saragura*, all over 19,000 feet. There are four distinct regions, the *costa*, west of the Andes, the *sierra* or western slopes of the Andes, the *peñas* or mountainous wastes below the region of perpetual snow; and the inward slopes (*montaña*) and boundless forests of the Amazonian basin. The coastal area, lying upon and near the Pacific, is not tropical, though close to the equator, being cooled by the Humboldt-Current; its chief products are sugar, cotton, petroleum, wool, hides and skins, and it contains the chief towns and most of the white population. In the barren mountain section are to be found minerals in great richness and variety which await improved transport facilities before their production can be considerably increased; it is inhabited by Indians in a low state of civilization. Upon the eastern slope of the Andes are to be found very large tracts suitable for cultivation and stock raising, at present almost wholly unexplored owing to lack of communication, but efforts have been made in recent years to open up air routes. This part of the country should show most interesting developments in the future. The tropical lowlands lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. There are here dense jungles, of which the principal commercial product is wild rubber. The mineral production in 1931 was valued at **126,839,359 soles**, with 1933 employees and 16,809 workmen, the minerals including gold, silver, copper, lead, zinc, vanadium, antimony and petroleum. The *Isobos* and other islands on the Pacific coast provide guano (95,000 tons in 1930).

The principal imports are foodstuffs, cotton, woollen, linen and silk goods, drugs, earthen and stone wares, machinery, explosives, metal and manufactures thereof, stationery, paper manufactures, timber and wheat. The chief exports in 1932 were petroleum and derivatives (77,188,000 soles), cotton (33,938,000 soles), and sugar (25,952,000 soles).

The total length of the railways open (1929) was 2,821 miles, of which 1,195 miles are under the control of the Peruvian Corporation. There is also steam navigation on Lake Titicaca and the River Desaguadero. The eastern rivers are also navigated to some extent by steam craft. Wireless telegraphy stations have been established in many places. There is considerable activity in air services. The Naval Air Force maintains services to Iquitos and other places in the interior. The coast district is served by a national company and by the Chile-U.S.A. route *via* Peru. National Air Mails are carried by Peruvian military machines.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 8,000 of all ranks; the Navy includes 2 cruisers built at Barrow, 3 destroyers and 4 submarines. There is a military aerodrome at Chorillos (near Lima) and a seaplane station at Ancón.

Language.—Spanish is the official language of the country, but native dialects (of which Quichua is the most important) are spoken by a considerable portion of the Indian population.

POLAND.

(*Republika Polska*.)

President, Monsieur Ignacy Mościcki, born Dec. 1, 1867; elected June 1, 1926; re-elected May 8, 1933.

MINISTRY (May, 1933).

Prime Minister, and Minister of Education, M. Janusz Jedrzejewicz.

Interior, M. Bronislas Pieracki.

Foreign Affairs, Joseph Beck.

War, Marshal Pilsudski.

Justice, M. Czeslas Michalowski.

Finance, Prof. W. Zawadzki.

Agriculture Reform and Agriculture, M. Bronislas N. koniecznikow-Klukowski.

Industry and Commerce, General Zarzycki.

Communications and Public Works, M. Michel Butkiewicz.

Labour, General Hubicki.

Posts and Telegraphs, M. Emile Kalinski.

Ambassador in London, His Excellency Konstanty Skirmunt.

Embassy, 47, Portland Place, W. 1.

1st Secretaries, M. Jan Wszelaki; M. Leon Orłowski.

2nd Secretary, M. Joseph Zaranski.

Commercial Counsellor, M. Tadeusz Goppert.

Consul-General, London, M. Witold Hulanicki (acting), 2, Upper Montague Street, W.C. 2.

1 Service on External Debt suspended May, 1932. The *Kommerzial-Finanz-Kommission*, which came to Paris in Jan. 1932, has issued a number of Reports and Recommendations.

2 Stabilized May, 1932, at 28 U.S. cents; Rate of Exchange, Sept. 1, 33 Notes 22 s = 57.

The Republic of Poland was proclaimed at Warsaw in November, 1918, and under the *Treaty of Versailles* (June 28, 1919) the assentors to the Covenant of the League of Nations, and the signatories of the Treaty of Peace, guarantee the independence of the Republic, which is reconstituted within the limits of the 18th-century "Polish Commonwealth." This State extended in the year 1779 over an area of about 286,000 sq. miles, and included a population of about 13,000,000. The political boundaries of the Republic are the Baltic Sea, Germany (East Prussia), and Lithuania, in the N.; Czechoslovakia to the S.; Rumania in the S.E.; Soviet Russia in the E.; and Germany in the W. The present area of the Republic may be estimated at 150,000 sq. miles, with a population estimated (Jan. 1, 1932), at 32,132,936 (of whom 22,208,076, or 69½ per cent., are Poles, and 9,924,860, or 30½ per cent., other nationalities). The predominant religion of the people is Roman Catholic, but all faiths enjoy equality, and there are a considerable number of Protestants and a very large number of Jews.

In 1919 hostilities broke out between Poland and Soviet Russia, and after initial successes the "Red" armies of Bolshevik Russia appeared (in August, 1920) likely to deal a crushing blow at Polish independence, the capital (Warsaw) being in peril of capture. A dramatic counter-attack by the Polish troops at the critical period reversed the nature of the campaign, and Poland was enabled to conclude peace on favourable terms.

Government.—A Republican form of government was adopted by the Constituent Assembly in 1919, the Chief of State exercising the executive authority through a Ministry responsible to the Legislature. The Legislature consists of a Diet (*Sejm*) elected by universal adult (male and female) suffrage, and of a Senate elected by adult (male and female) suffrage of those over 30 years of age. The Constitution voted on March 17, 1921, is very Liberal. Since Marshal Piłsudski's *coup d'état* of May 12, 1926, amendments have been inserted in the Constitution conferring on the President of the Republic the power of legislation by decree at times when the Diet is not sitting, subject to subsequent ratification by the Diet.

Production.—Mining, cotton, metal work, agriculture, sugar, forestry and stock raising are the principal industries, the chief crops being rye, wheat, oats, barley, potatoes, and sugar-beet; the live stock includes cattle, horses, sheep, and pigs. There are valuable coal mines in Upper Silesia, Congress Poland, and Little Poland (Galicia); iron, zinc, lead, ore, mineral and potassum salts, and in Galicia (Boryslaw) are famous oil fields; the output of crude oil (1932) was 257,000 metric tons. The chief manufactures are textiles, those of minor importance being machinery and metal works, chemicals, and leather. The exports are principally coal, timber, spelter, agricultural produce and textiles, the imports being raw wool, cotton and jute, woollen and cotton goods, and machinery.

Defence.—The peace effective of the army is 17,000 officers and 250,000 other ranks. A small navy, for coastal defence, has been organized.

Education.—Education is compulsory and free, and there is considerable voluntary effort in addition to the work of the State. Secondary education is conducted on a high level, with good attendances, and there are universities at

Cracow (founded 1364), Warsaw, Lwow, Poznan, Lublin, and Wilno; Polytechnics at Warsaw and Lwow, and an Academy of Science at Cracow.

Communications.—There are about 15,000 miles of railway and over 15,000 miles of telegraph line, with well-developed telephone systems in all the large centres. Over 4,000 miles of navigable waterways exist on the Vistula, Narw, Bug, Warta, and Pilica, of which about 1,100 are navigable by steamers. The free city of Danzig is within the Polish Customs area, free transit for Germany being guaranteed. A purely Polish port is also being constituted at Gdynia, north of Danzig, with a total water area of 750 acres, and an estimated maximum handling capacity of 6 to 7 million tons a year, when complete. During 1932 Gdynia handled 5,194,287 tons of goods. Direct railway communication is being built linking Gdynia with Upper Silesia and Czechoslovakia on the one hand, and with Rumania and the Black Sea on the other.

	1932-33

Portugal lies between 36° 58'—42° 9' 12" N. lat. and 6° 12' 48"—9° 29' 45" W. long., being 302 miles in length from N. to S., and averaging about 127 in breadth from E. to W. Continental Portugal contains an area of 34,500 square miles, with a population in 1930 of 6,190,000, and the Portuguese Colonies a total area of 800,400 square miles, with a population estimated at 10,384,381.

From the close of the eleventh century the government of Portugal was a monarchy, and for many centuries included the Vice-Royalty of Brazil, which declared its independence in 1822. In 1910 an armed rising in Lisbon drove the King and Royal family into exile, and the National Assembly of Aug. 21, 1911, sanctioned a Republican form of government and adopted a constitution, with a President elected by Congress for 4 years, a Congress of two chambers, and an executive appointed by the President, but responsible to the Legislature. (Ex-King Manoel, of the House of Braganza, was born Nov. 15, 1859, and succeeded on the assassination of his father Feb. 1, 1908; died at Fulwell Park, Twickenham, Middlesex, July 2, 1932.)

The chief agricultural products of continental Portugal are wheat (now grown in sufficient quantity to provide for the requirements of the country), barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, vines, and almonds. There are extensive forests of oak, chestnut, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last, from its hardness and purity, is in demand. Its manu-

factures consist of gloves, silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 30 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, tin, copper-ore, fruits, oil, sardines, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. The mercantile marine (1931) numbered 43 steam vessels (above 1,000 tons), with a tonnage of 188,871. Railways 2,145 miles in extent were open for traffic in 1931, and there were 5,742 miles of telegraph line in 1930.

Defence.—Service in the militia is universal and compulsory. The peace effective is about 35,000. War strength, about 150,000. The Navy consists of a few small ships of old pattern. Air Fleet, 84 aeroplanes.

Education is free and nominally compulsory between the ages of 7 and 15, but is not strictly enforced, and about 54 per cent. of the population above 7 years old are illiterate. Secondary education is conducted in State lycées. There are also military, naval and other special schools. There are Universities at Coimbra, Lisbon and Oporto.

	1933-34

MADEIRA AND THE AZORES.

Madeira and The Azores are administrative parts of Portugal.

The *Madeiras* are a group of islands in the Atlantic Ocean about 520 miles west of Lisbon, and consist of Madeira, Porto Santo and 3 uninhabited islands (Deserta). The total area is 314 square miles, with a population of 210,220 (1930). Funchal in Madeira, the largest island (270 square miles), is the capital, with a population of 50,000.

The *Azores* are a group of 9 islands (Flores, Corvo, Terceira, São Jorge, Pico, Fayal, Graciosa, São Miguel and Santa Maria) in the Atlantic Ocean, with a total area of 922 square miles and a population of 253,596 (1930). Angra, in Terceira, the capital of the group, had a population of 10,057 in 1920.

PORTUGUESE COLONIES.

CAPE VERDE ISLANDS, off the west coast of Africa, have an area of 1,525 square miles and a population of 148,300. Estimated revenue and expenditure 1930-31 £116,210; imports (1930) £622,310; exports, £41,620; shipping entries (1929) 1,593 vessels (702 British).

SÃO THOMÉ AND PRINCE ISLANDS, in the Gulf of Guinea (area 442 square miles, population 50,060. Estimated revenue (1930-31), £121,860; expenditure, £121,630; imports (1929), £450,060; exports, £739,850.

PORTUGUESE GUINEA, on the west coast of Africa, has an area of 14,000 square miles and a population of 806,973. Estimated revenue (1930-31), £249,150; expenditure, £248,970; imports (1931), £168,450; exports, £270,350.

ANGOLA (Angola and Kabinda) on the west coast of Africa has an area of 486,000 square

miles and a population estimated at 3,000,000. Estimated revenue (1930-31), £1,827,620; expenditure, £1,898,090; imports (1931), £1,348,310; exports, £1,874,400.

A transcontinental railway from *Benguela* (Lobito lay) in Angola, traversing the Katanga mineral district of the Congo and thence running southwards through Rhodesia to Bulawayo and eastwards to Beira is being developed under British, Belgian and Portuguese control. This line makes through communication from Lobito lay on the Atlantic to Beira on the Indian Ocean.

MOZAMBIQUE, in East Africa (Delagoa Bay, Gazaland, Inhambane, Mozambique, Nyassa, Quilimane, and Tete) has a total area of 287,756 square miles, with a population of 3,514,612. Estimated revenue and expenditure, 1930-31, £3,319,820; imports (1931), £4,490,000; exports, £1,999,260.

PORTUGUESE INDIA has a total area of 1,470 square miles, with a population of 548,222, and includes Goa, Daman, and Diu. Estimated revenue and expenditure (1930-31), £502,540; imports (1930), £1,272,100; exports, £297,300.

MACAO, in China, on the Canton River, has an area of 4 square miles and a population of 157,178. Estimated revenue (1930-31), £294,280; expenditure, £293,580; imports (1930), £1,904,760; exports, £1,019,000.

PORTUGUESE TIMOR (the northern portion of the island), in the Malay Archipelago, has an area of 7,450 square miles, with a population of 394,518. Estimated revenue (1930-31) £78,480; expenditure, £78,280; imports (1929) £120,350; exports, £152,350.

RUMANIA.

(Romania.)

King, Carol (Charles) born Oct. 15, 1893, succeeded June 8, 1930.

Heir Apparent, H.R.H. Prince Mihail (Michael), Grand Voivode of Alba-Iulia, born Oct. 25, 1921, succeeded his grandfather as King, July 30, 1927 (until the return of King Carol).

*CABINET (October, 1933).

President of Council, A. Vaida Voivod.

Foreign Affairs, M. N. Titulescu.

Home Office, M. G. G. Miromirescu.

Finance, M. M. Madgearu.

Agriculture, M. Voicu-Nitzescu.

M. Gregoire Co. stănescu.

Interpreter, M. Frédéric Francke.

Military and Naval Attaché, Com. Gheorghe

Niculescu.

Air Attaché, Com. Ernil Gheorghiu.

° Resigned, November 12, 1933.

Commercial Secretary, M. Arthur Holban.
 Consul-General, (vacant).
 Consul-Gen. (Hon.), M. G. N. Gologan, 5-7 St.
 Mary Axe, E.C. 3.

Rumania is a kingdom of South Eastern Europe formerly the classical *Dacia* and *Scythia Pontica*, territory roughly defined by the three great rivers Danube, Theiss, and Dniester, whose central point is the line of the Carpathians. The kingdom is divided into the 7 Provinces of The Banat, Transylvania, Bukovina, Bessarabia, Muntenia, Oltenia and Moldavia. Rumania has its origin in the union of the Danubian principalities of Wallachia and Moldavia (and the addition thereto of a strip of Southern Bessarabia) under the *Treaty of Paris* (April, 1856). The principalities remained separate entities under the suzerainty of the Turkish Empire until 1859, when Prince Alexandru Ion Cuza was elected Prince of both Principalities, still under the suzerainty of the Porte. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown is now vested. By the *Treaty of Berlin* (July 13, 1878) a new Principality (consisting of the two above mentioned) was recognised as an independent State, and part of the Dobruja (which had been occupied by the Rumanians) was incorporated in the new Principality. On March 27, 1881, the former Principality was recognised by the Great Powers as a Kingdom. Rumania is not a "Balkan" State. She took no part in the military operations of the Balkan League against Turkey in 1912-13. Her unexhausted military power secured for her a readjustment of her south-eastern (Dobruja) frontier in 1913. In the War of 1914-1918, Rumania fought on the side of the Allies from Aug. 27, 1916, and after many vicissitudes (due mainly to the sudden collapse of the Russian Armies in 1917), she emerged in triumph at the cessation of hostilities. Her territories were greatly increased as a result of the War, and the *ante bellum* area of the Kingdom (74,461 sq. miles) may now be estimated at 123,000 sq. miles, and the 1915 population of 7,897,311 has been increased to 18,057,074 (1930 census). The dominating religion is that of the Greek (Orthodox) Church.

GOVERNMENT.—The government is that of a Constitutional Monarchy, the legislative assembly consisting of a Senate (56 members) elected for 4 years, and of a Chamber of Deputies (361 members) elected for 4 years by universal suffrage, provision being made for the proportional representation of minority parties. The executive is entrusted to a council of ministers.

PRODUCTION.—The soil of Wallachia, Bessarabia, and Moldavia is among the richest in Europe. The agricultural produce consists of wheat, maize, millet, oats, barley, rye, beans, and peas. The wheat crop for 1932 was 1,511,476 metric tons, rye 267,013, maize 5,992,669, barley 1,469,147, and oats 642,671 metric tons. Vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp, and the rich lands of Bessarabia produce wheat, maize, barley, flax, tobacco, water melons, fruit, and grapes. Agriculture and sheep and cattle raising are the principal industries of the kingdom, but the climate of this part of South-Eastern Europe is of the Continental character, with intense

winter cold and summer heat, and fierce summer droughts sometimes defeat these principal industries. The forests of the mountainous regions are extensive (17,851,401 acres), and the timber industry is important. The country is rich in minerals, and produces petroleum, salt, coal, lignite, iron, gold, and mica; the workers in the oilfields are the largest single unit of workers in any one industry; the production of crude oil was 1,885,225 metric tons in 1913, 3,666,354 metric tons in 1927, 4,300,000 metric tons in 1928, 4,827,276 metric tons in 1929, 5,792,311 in 1930, 6,756,034 in 1931, and 7,339,466 in 1932. Manufactures are in their infancy, and the imports are chiefly manufactured goods, textiles, machinery and metals; the exports consist principally of wheat, barley, maize, oats, petroleum, timber, cattle, salt and hides. All large estates have been expropriated and divided among the peasants.

DEFENCE.—Service in the Army is universal and compulsory. In the War of 1914-1918 over 900,000 all ranks passed into the Armies of Rumania, and of this number over 25 per cent. were killed or returned as "missing." At the resurgence of Nov. 1918, an army of 400,000 was again in the field. This force was the deciding factor in the Rumanian-Hungarian question, and it drove the Bolshevik dictator (Bela Kun) into exile from Buda Pest. There is a small Navy on the Black Sea and on the Danube (30 vessels).

EDUCATION is free and nominally compulsory, there being 14,900 primary schools with 1,451,800 in attendance. Secondary schools are well attended. There are also special schools and Universities at Bucharest, Jassy, Cluj, and Cernauti. A Government High School of Commerce was opened in 1913.

COMMUNICATIONS.—In 1932 there were 7,364 miles of railway open for traffic in the whole kingdom; railway communication requires great development in order to cope with the problem of carrying the cereal crops to the shipping ports. There are 23,000 telegraph and telephone offices. The mercantile marine consists of about 200 steamers and 600 sailing vessels. The Black Sea ports are Sulina and Constantza; the latter is linked with the interior by a railway.

SALVADOR.

(República de El Salvador)

President (1923-1925), General Maximiliano
Herández Martínez, assumed office Dec. 3, 1923.

Vice-President (vacant).

Foreign Affairs, Education, and Justice, Señor

Dr. Don Miguel Ángel Araujo.

Interior, Development, Agriculture, Labour,

Health, and Charity, General Salvador

Castaneda Castro.

Finance, Public Credit, Industry and Commerce,

Señor Dr. Don Carlos Menéndez Castro.

War, Marine and Aviation, Colonel Carlos

Borromeo Flores.

Counsil-General, Señor Don Samuel Jorge

Dawson, 7 Union Court, Old Broad St., E.C. 2.

The Republic of Salvador extends along the

Pacific coast of Central America for 170 miles,

with a general breadth of 43 miles, and contains

an estimated area of 13,176 square miles, with

a population estimated (Dec. 1923) at 1,522,126.

It is divided into 14 departments.

Salvador was conquered in 1525 by Pedro de

Alvarado, and formed part of the Spanish viceroyalty

of Guatemala until 1821. In 1840 the

Republic broke away from the federation of

Central American States. The government is

based upon a written constitution and is com-

posed of (a) the Executive power, which is

exercised by the President; (b) the Legislative

power, which is in the hands of the National

Assembly, and (c) the Judicial power, which rests

ultimately with the Supreme Court. Elections

take place once every four years, and the Presi-

dent is ineligible for a successive term.

The surface of the country is very mountain-

ous, many of the peaks being volcanoes. The

highest peak is the Santa Ana volcano (8,300

feet). Much of the interior has an average

altitude of 2,000 feet. The lowlands along the

coast are generally hot and unhealthy, but

towards the interior the altitude tempers the

severity of the heat and much has been done in

recent years to improve sanitary conditions and

services. There is a wet season (winter) from

May to October, and a dry season (summer)

from November to April. Earthquakes have

been frequent in the history of Salvador, the

most recent being that of 1919, when great

damage was done to the capital and other towns.

The principal river is the Rio Lempa. There is a large volcanic lake (Ilopango) a few miles to the east of the capital, while further away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the present Santa Ana volcano. The eastern spur of this volcano forms the peak of Izalco, which is in an almost constant state of volcanic activity, and (on account of its visibility from the ocean) is known as "The Lighthouse of the Pacific."

The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes; cane sugar is also produced, as well as maize, indigo, rice, balsam, &c. Cotton-growing on a large scale was commenced in 1924, but on account of the ravages wrought by insects it was practically abandoned after two seasons. In the lower altitudes towards the east henequen is produced and used in the manufacture of coffee and sugar bags. The principal exports are coffee (sometimes over 90 per cent. of total value), sugar, indigo, balsam, henequen, hides and skins. The chief imports are cotton textiles, flour, iron and steel goods, lard, motor cars, manures, jute sacks, chemical products, cement, petrol, thread. A British railway nearly 100 miles in length connects Acajula with the capital and with the important coffee centre of Santa Ana. A line from the port of La Unión (on the Gulf of Fonseca) to the capital was opened in 1922. Two new lines were opened in 1927, one from the capital to Santa Lucia, a suburb of Santa Ana, tapping the upper Lempa Valley; the other from the coffee centre of Ahuachapán to Santa Lucia. A new line from Santa Lucia to Zacapa (in Guatemala) was opened to traffic in 1930 and affords continuous railway communication between San Salvador and Guatemala City and Barrios. During 1924-25 the re-draining and re-paving of most of the capital were completed, and plans have been made for the macadamizing or paving of several hundred miles of rural roads, many of which are now impassable during the rainy season. There is a good motor road between the port of La Libertad and the capital, while motor transportation is usually possible in the dry season between the capital and Guatemala City, over the International road opened in 1929. The Pan-American Airways maintain regular services connecting San Salvador with the U.S. *via* Guatemala-Mexico-Brownsville, and *via* Havana-Miami, and connecting with Panama *via* Honduras, Nicaragua, Costa Rica.

There are 202 post-offices and 257 telegraph offices. There is a wireless (receiving and transmitting) station at the capital, and during 1926 a broadcasting station was inaugurated.

The language of the country is Spanish.

(*ad interim*), R. G. Goldie.

Vice-Consul, Sydney M. Stadler.

Acapulca—Vice-Consul, Capt. L. H. J. C. Dale, M.C.

Cutervo—Vice-Consul, Capt. John E. Griffiths.

La Libertad—Vice-Consul, H. J. Towning.

Salvador is 5,700 miles from London; routes (a) New York, New Orleans, Puerto Barrios (Guatemala) and thence by rail; (b) New York and direct steamer to La Libertad; (c) direct steamer to Panama Canal and thence by steamer to La Libertad. The first route is the quickest.

SAN MARINO.

Regents, Two "Capitani Reggenti."

Consul-General for San Marino in Great Britain, Grand-Uff. Melvill A. Jameson, 42 Pall Mall, S.W. 1.

Vice-Consul, Comm. Giovanni Sovrani.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mission of Valmadrin in the 4th century, and governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October), being thereafter eligible for office for three years. The area is 38 square miles, the population 13,585. There is an army of about 1,000. The city of San Marino (pop. 2,000) occupies the slope of Mount Titano, and has an impregnable castle, where King Borengar of Lombardy took refuge in 950 A.D., a fine church and Government palace, and a theatre. The principal industries are wine, cereals, cheese, oil and cattle raising, in addition to the utilization and export of gravel from Mount Titano and production of white and hydraulic lime at Serravalle. A Treaty of Extradition was concluded between the Governments of Great Britain and the Republic of San Marino on Oct. 16, 1899. An electric railway runs from Rimini (25 minutes).

FLAG: Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

British Consul-General, W. C. Randolph-Rose (Loughorn, Italy).

SARRE TERRITORY.

Under the *Treaty of Versailles* Germany renounced the government of the Sarre Basin in favour of the League of Nations, the government being entrusted to a commission of 5 members nominated for one year by the League. At the expiration of 15 years from Jan. 10, 1920, the population will be called upon to decide by a plebiscite the government under which they wish to be placed. The total area is about 743 square miles, with a population of about 774,546. The chief towns are Sarrebruck (125,020), Neunkirchen (41,931) and Saint Ingbert (20,817).

SERBIA. See Yugoslavia.

SIAM.

(Muang T'ai.)

King, Prajadhipok, born Nov. 8, 1893; succeeded Nov. 26, 1925.

Foreign Minister, Phya Abhithal Rajmaitri.

Envoy Extraordinary & Minister Plenipotentiary in London, Phya Subaru Sonpati, 23 Ashburn Place, S.W. 7.

The Kingdom of Siam, or Muang T'ai (area about 195,000 square miles; population, 1929, 11,506,207), is a buffer State between British Burma and French Indo-China, and its integrity is guaranteed by the British and French Governments by the Anglo-French Agreement of April, 1904. Until the middle of 1932 the King was an absolute monarch, but in June, 1932, a revolution broke out in Bangkok, various leading Princes were seized as hostages, and an invitation was sent to the King to rule in future as a constitutional monarch. In response to the invitation a temporary Constitution Act was promulgated (June 27) under which the King remains the Head of the State, with greatly reduced powers, and there was established a People's Senate of 70 members, a deliberative and legislative body, while the executive power is in the hands of a Committee of 25, drawn from the People's Party. A permanent Constitution is in course of preparation. A number of English, French, Italians, Danes, and Americans are employed in the various State departments. There is an army of nearly 50,000 men, and a few small gunboats; compulsory military service has been introduced. The Kingdom contains many Chinese (largely engaged in trade and industry), besides Shans, Laos, Malays, Burmese, and Cambodians, and over 1,500 Europeans. The principal religion is Buddhism. There are 364 Government schools and 4,124 schools of all kinds, attended by 448,380 children. The Chulalongkorn University is organised with faculties of medicine, political science, engineering, and literature and science.

The upper part of Siam is mountainous, the lower flat. Bangkok is the only much-frequented port. Eighty-five per cent. of Siamese sea-borne trade, which centres at Bangkok, is with the British Empire, and is largely in the hands of British firms or of Chinese trading from Singapore and Hong Kong. Norwegian shipping holds the lead in tonnage, followed closely by British. The chief products of Siam are rice, teak, and tin (from Lower Siam). The area under rice is being much enlarged by irrigation and by railway extensions, bringing the provinces into closer touch with the capital. There is a large number of rice mills, mostly in or near Bangkok. The teak industry in the great forests of N. Siam is mainly in English hands. In 1931-32 rice constituted 57.8, tin 10 and teak 3.7 per cent. of the exports from Siam; while hides and marine products are also exported. Among imports are treasures, cotton goods and yarn, silk goods, provisions, gummy bags, kerosene, sugar, opium, metals and metal wares, machinery, &c. The general tariff rate is 20 per cent. *ad valorem*, but special rates (ranging from 5 to 60 per cent. *ad valorem*) are imposed on specified articles. Burma imports teak and cattle overland from Siam, and exports thither cotton and silk goods, &c. Except tin, wolfram, rubies

and sapphires, there are no important mineral products as yet. About 1,880 miles of railroads (mostly State-owned) are now open for traffic. Railways from Bangkok run to Varuad (357 miles N.E.), Chienquai (462 miles N. of Bangkok), Arauya Prades (159 miles E.); the southern line to Trang, on the west coast of the Malay Peninsula, was open to traffic in October, 1916, and in July, 1918, was completed to the Kelah border, where junction with the Federated Malay States Railway system was effected. The E. coast line to Sungai Golok (Kelantan) has also been opened to traffic. There is through railway connexion between Bangkok and Penang and Singapore. Good roads are few. There are 5,858 miles of telegraph lines.

Consul, Señor Don German Baráiban.

A Republic situate in the south-west of Europe, between 36°—43° 45' N. lat. and 4° 25' E.—9° 30' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees, and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles 712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 196,700 English square miles, and an estimated population, in Dec. 1931, of 22,940,152—to the square mile. The interior of the peninsula consists of an elevated tableland surrounded and traversed by mountain ranges the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Duero, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho.

Government.—After the union of Aragon and Castile in the last quarter of the 15th century, Spain was ruled by sovereigns of the Aragon, Habsburg and Bourbon lines (with the intervention of a Republic 1873-75), Alfonso XIII. succeeding at birth in 1886. On April 14, 1931, following the results of the Municipal Elections, which showed anti-monarchical feeling to be extremely high in all the chief towns of Spain, King Alfonso XIII. left the country and the Queen and other members of the Royal Family on the following day. A Republic was immediately proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, was formed. Elections for a Constituent Assembly were held on June 28; the Assembly met on July 14 and passed a vote of confidence in the Provisional Government. In December a Presidential Election was held.

Production and Trade.—Spain is rich in iron, copper, and lead; its mineral resources are only partially exploited, and principally by foreign capital under foreign direction. In 1930 the coal production was 7,547,094 tons, of which 6,546,824 were pit coal, 380,204 lignite, and 620,066 anthracite. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante. The principal articles imported are raw cotton, spices, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, raisins, oranges, cork, esparto grass, wool, salt, quicksilver, grapes, &c. Trade was for many years mostly confined to France and Great Britain, but Germany had, before the War, become a serious competitor, while the United States and Belgium share an increasing proportion of Spanish trade. Home manufacture is protected by high customs duties.

In 1929 there were 10,197 miles of railway open and 70,000 miles of telegraph line. The sea-going mercantile marine over 50 tons, on Jan. 1, 1931, consisted of 1,276 steamers (1,189,655 tons) and 394 sailing vessels (50,277 tons). In 1929, 22,094 vessels of 33,627,024 tons entered and 19,534 vessels of 31,722,245 tons cleared at Spanish ports.

Defence.—In 1931 the Army was reduced from 16 Divisions to 8 Infantry Divisions and 1 Cavalry Division, having an authorized Peace establishment of 4,942 officers and 98,124 men for the Spanish Peninsular Army and of 1,876 officers and 45,849 men for the Army in Morocco.

The Navy consists of 3 (15,700-ton) battleships and 3 modern cruisers, with 1 old battleship and 4 old cruisers; there are also 7 torpedo-boat destroyers, 20 torpedo-boats, 7 submarines, and 21 gunboats.

Education. (The educational System is under revision, legislation having recently been passed to forbid Religious Orders to give primary and secondary instruction.) At present (Dec. 1933) Primary is nominally compulsory and mainly free, and is State-aided, the public schools being maintained by local taxation. Many private schools are under clerical control, and supervision is lacking. Secondary High Schools are in each province, but the curriculum is defective. Universities at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid.

BRITISH CHAMBER OF COMMERCE FOR SPAIN,

8 Rambla de los Estudios, *Barcelona* (Branch,

9 Calle Marqués de Cubas, *Madrid*).

Madrid, 1,150 miles; transit, 45 to 50 hours.

The Balearic Isles, Ceuta, Melilla and the

Canary Islands, are integral parts of Spanish territory.

The BALEARIC ISLES are an archipelago of 13 islands in the Mediterranean, the largest

being Majorca, Minorca, Ibiza, and Formentera; the total area is 1,935 square miles, with a population (1923) of 324,462. The archipelago forms a province of Spain, the capital being Palma in Majorca.

CRUTA, which forms part of the Province of Cadiz, is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 miles, with a population of 35,219.

MELILLA is a town on a rocky promontory of the Riff coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492 and is an integral part of Spanish territory. The population is 50,170.

The **CANARY ISLANDS** are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 473,497. The Canary Islands form two Provinces of Spain.

Las Palmas (consisting of Gran Canaria, Lanzarote, Fuerteventura and the islets of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos), with seat of administration at Las Palmas in Gran Canaria; and **Santa Cruz de Tenerife** (consisting of the islands of Tenerife, Palma, Gomera and Hierro), with seat of administration at Santa Cruz in Tenerife.

Spanish Colonies.

The Spanish Colonies consist of certain settlements in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population exceeding 275,000.

FERNANDO PO (Fernando Pó) lies in the Bight of Biafra in 5° 12' N. lat. and 8° 48' E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,300 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. With its dependencies it has an area of about 800 square miles, and a population estimated at 24,000. The capital is Basile, and the largest town Port Clarence (1,500 inhabitants). Dependencies are 1—

Annobon Island (Anno Bom), in the Gulf of Guinea, in 2° 24' S. lat. and 5° 35' E. long.; population 1,391.

Corisco Islands, consisting of Corisco, Elobey Grando, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce. Total population 96,072.

RIO DE ORO AND ADRAH (Capital, Villa Cisneros) is a possession on the north-west coast of Africa, between Cape Bogador and Cape Blanco, or approximately between 21° 20'–26° N. lat., and extending eastwards to about 13° W. long. The territory is part of the waterless Sahara, with a sparse population of wandering Muhammadan Arabs; population 223.

Rio Muni (or Spanish Guinea) is a coastal settlement of West Africa between Cameroon and French Congo (1° N.—2° 20' N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at Bata on the coast.

SPANISH MOROCCO.—Spain exercises a protectorate over a part of Northern Morocco

(see "Morocco"), and on the Moroccan seaboard are certain Spanish *presidios*, formerly used as convict settlements.

Alhucemas is a settlement on the bay of that name, and includes six islands; population 322.

Peñon de la Gomerá (or Peñon de Vélez) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 398.

Spanish Southern Morocco.—**Irni**, on the Atlantic coast of Morocco, about 100 miles south of Agadir, affords access to the interior of south-west Morocco, but has no great trade at present.

The Chafarinas (or Zafarinas) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 318.

THE SUEZ CANAL.

The Suez Canal.—**The Compagnie Universelle du Canal Maritime de Suez** (1 Rue d'Asbourg, Paris VIII) is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from the Khedive in 1875 a total of 176,608 shares (cost £4,000,000, value March 31, 1933, £65,522,154). Since 1924 each 500 franc share has been divided into two 250 franc shares.

The Suez Canal was opened in 1869. The total length of the canal is 102 miles, with a minimum width of 45 metres (147 ft. 8 in.), the maximum draught of water allowed for vessels using the canal is 10.05 metres (33 feet). The average time for the transit through the canal is 13 hours 15 minutes. By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 33 administrators, of whom 10 are British (three representing H.M. Government and seven the shipowning interest).

British Commercial Directors, T. Harrison Hughes (Vice-President of the Company); Sir Alan G. Anderson, K.B.E.; Sir John Cadman, G.C.M.G.; Sir August Geyzer, Bt.; Rt. Hon. Sir E. S. Horne, G.B.E., K.C., M.P.; Sir E. Wyldborne-Smith; Sir Thomas Royden, Bt., G.H.

Representing H.B.M. Govt., Sir Ian Malcolm, K.C.M.G.; Sir J. T. Davies, K.C.B., G.V.O.; The Earl of Cromer, G.C.B., G.C.I.E., G.C.V.O.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal since 1922, with the percentage of British vessels:—

Year.	No. of Vessels	Net Tons	British Tonnage.
			%
1922	4,345	20,743,215	64.5
1923	4,621	22,730,162	62.8
1924	5,122	25,109,882	59.7
1925	5,337	26,761,935	59.9
1926	4,980	26,060,377	57.4
1927	5,545	28,968,048	57.1
1928	6,084	31,905,902	56.8
1929	6,274	33,466,014	57.2
1930	5,761	31,668,759	55.58
1931	5,366	30,027,966	55.36
1932	5,032	28,340,290	55.47

The tonnage of the merchandise carried was 25,776,000 tons in 1913; 27,047,000 tons in 1920;

and 23,632,000 tons in 1932. Details of the nationality of the vessels passing through the Canal in 1932 are appended:—

	No of Vessels	Net Tons	Per cent (Tonnage)
British	787	15,721,204	55.47
German	431	2,505,826	8.84
Netherlands	342	2,364,185	8.34
French	332	2,037,086	7.19
Italian	316	1,600,119	5.63
Japanese	262	1,439,626	5.08
Norwegian	179	860,956	3.04
United States	82	525,712	1.86
Danish	79	437,938	1.55
Swedish	91	411,398	1.45
Russian	78	274,235	0.97
Greek	32	17,753	0.06
Danish	3	25,450	0.09
Finnish	4	16,924	0.06
Portuguese	3	12,822	0.04
Yugoslavian	6	10,655	0.04
Chinese	1	5,967	0.02
Venezuelan	1	2,429	0.007
Persian	2	975	0.003
Totals	5,032	28,340,290	100.00

The transit receipts in 1870 were 5,718,756 fr. (gold), and in 1932 795,921,033 fr. (paper).

The rate of transit dues as from Nov. 15, 1931, is 6 fr. (gold) per ton, and 3 fr. (gold) for vessels in ballast.

The net dividends for the year 1932 amounted on the ordinary 250 fr. shares to 389 fr. 01 c. (427 fr. 58 c. *au nominatif*), and on the Actions de Jouissance to 341 fr. 54 c. (376 fr. 26 c. *au nominatif*).

The 5,032 vessels included in the total for 1932 are grouped under the following categories:—

	No	Net Tonnage
Merchant vessels (laden)	2,598	13,382,860
Mail steamers	1,436	10,554,030
Warships and transports	265	925,097
Government chartered vessels	30	213,209
Merchant vessels in ballast	703	3,265,094
	5,032	28,340,290

SWEDEN. (Sverige)

King of Sweden, of the Goths and the Wends, Gustaf V., born June 16, 1858; suc. December 8, 1907; mar. Sept. 20, 1881, Victoria, dau of Grand Duke of Baden (born August 7, 1862, died April 4, 1930) and has issue two sons.

Heir Apparent, Gustaf Adolf, Duke of Skåne, Crown Prince, born Nov. 11, 1882; married (1) June 15, 1905, H.R.H. the late Princess Margaret of Connaught (died May 1, 1920). (2) Nov. 3, 1923, Lady Louise Mountbatten, Princess of Battenberg, born July 13, 1889.

CABINET (Sept. 24, 1932).

Prime Minister, P. A. Hansson.

Foreign Affairs, R. J. Sandler.

Justice, K. J. D. Schlyter.

Finance, E. J. Wigforss.

Interior, F. G. Möller.

Defence, I. T. Vennerström.

Communications, H. V. Leo.

Public Worship & Instruction, J. A. Engberg.

Commerce, J. F. Ekman.

Agriculture, P. E. Skold.

Ministers without Portfolio, B. O. Undén; K. S. Levinson.

Envoy Extraordinary and Minister Plenipotentiary in London, Baron E. K. Palmstierna, C.O.V.O.

Legation, 27 Portland Place, W. 1.

Counsellor of Legation, Baron A. W. C. Leijonhufvud.

Attaché, M. J. H. Fripp.

Military Attaché, Lt.-Col. C. J. M. Björnstierna.

Naval Attaché, Capt. E. A. Öberg.

Air Attaché, Col. E. Mossberg, C.B.E.

Agricultural Counsellor, M. W. F. de Wachenfelt.

Representative of the Press, O. U. K. Thorsing.

Chancellor, J. Stille (Vice-Consul).

Chaplain, Rev. F. J. D. Holmgren.

Consul-General, E. G. Sahlén, 329 High Holborn, W.C. 1.

Vice-Consuls, K. E. J. Lundberg; Baron

L. A. V. Rappe.

Attaché, T. H. F. Grounwall.

Chancellor, O. Gad.

Swedish Church, Harcourt Street, Marylebone Road, W. 1.

Sweden comprises the eastern half of the Scandinavian peninsula, and comprises the capital and 24 governments, "Län," with an area of 173,352 square miles, and a population, Dec. 31, 1930, of 6,190,364, nearly all Protestant. This area includes the great lakes of Vänern, Vättern, Mälaren, and Hjälmarén. Nearly 40 per cent of the population are devoted to agriculture, about 250,000 being owners and 80,000 tenants of the land they cultivate. The country may be divided into three separate districts, the northern, forest; central, mining and agriculture; the southern, agricultural. The climate in the south is favourable for producing grain. The principal articles of cultivation are oats, wheat, rye, barley, potatoes, roots and grasses. The forests are very extensive, covering over one-half of the surface of the country, and consisting chiefly of pine, birch, fir; these are of great importance, supplying timber, pitch, and tar, and the chief fuel of the country, in addition to sulphate and mechanical wood pulp for the paper-making industry. The mineral products are extremely rich: iron of excellent quality; lead, zinc, sulphur, manganese, arsenic, granite, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gällivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic; coal is being worked in Scania (Skåne). The chief imports are coffee, tobacco, and other ordinary colonial produce, corn, coal, machinery, motor cars, mineral oils, cloth, cotton, wool, manures, skins, iron, copper, and yarn. The chief articles of export are timber, wood pulp, paper, machinery, iron ore, matches, butter, pork, and stone. In 1932 the exports of wood pulp and paper were 1,970,796 tons.

Railroads 10,423 miles in length (of which 4,274 are the property of the State) were open on Jan. 1, 1933; and 26,268 miles of telegraph (inclusive of 17,488 railroad telegraph), 130 control stations, and 1,935 railroad and 1,821 other telegraph stations. There were at the same date 702,471 miles of telephone.

Defence.—Service in the Army is universal and compulsory, about 24,500 being trained annually; war strength about 400,000. The Navy consists of 77 fighting vessels over 100

tons (350 guns), 22 being ironclads and 20 submarines.

Education.—(i.) *Primary*: Compulsory and free. Illiteracy rare. Maintained by local taxation, with State grants. Attendance good. (ii.) *Secondary*: Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technique, commerce, and navigation. (iv.) *Universities* Uppsala, Lund, and private faculties in Stockholm and Gothenburg.

The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'–47° 48' N. lat. and 5° 58'–10° 30' E. long. It is composed of 22 Cantons, of very dissimilar size, united under a Constitution dated 29 May, 1874, and comprises a total area of 15,950 square miles, with a population of 4,066,400 in 1930, who are divided between Roman Catholics, 41 per cent., and Protestants, 57 per cent., Jews numbering 21,000, and others 43,000. The population is formed by three nationalities, distinct by their language, as German 71 per cent., French 21 per cent., Italian 6 per cent., and Romansch (Grisons), 1 1/2 per cent. It is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, rising from 5,000 to 15,213 feet in height, not only along its southern and eastern frontiers, but throughout the chief part of its interior; and the Jura mountains in the north-west. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables are grown. The forests cover about one-fifth of the whole surface. The chief industries comprise the manufacture of silks, artificial silks and silk ribbons, wool, cotton and cotton ribbons, linen, embroideries, strawplait, machines, paper, chemicals, chocolate, condensed milk, dyestuffs, and tobacco; while the metallurgical, electrical and pharmaceutical industries are also extensive; clocks and watches have long been the staple products of Geneva and Neuchâtel. In 1932 there were 3,650 miles of

*The President is elected in December, and remains in office from 1 Jan.—31 Dec.; he is generally succeeded by the Vice-President.

railway in operation, 21,740 miles of telegraph and telephone line (333,971 telephone subscribers) and 2,004 post-offices.

The legislative power is vested in a Parliament, consisting of two Chambers, a National Council of 135 members, and a Council of States of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of 35,000 francs; the Vice-President and other members of the Federal Council 22,000 francs each. The members of the Federal Council are elected for four years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for four years. Not more than one of the same canton may be elected member of the Federal Council.

Defence: Militia. Active Army, 12 yrs.; initial trg., 65-90 days. Subsequently 11 days per ann.; then Landwehr, 8 yrs.; 1 trg., 11 dys. for dismt. branches only; then [Landsturm to age 48]. **War Strength, Militia, 140,600; Landwehr, 65,000; Landsturm, 57,000.**

Education.—Control by cantonal and communal authorities. No central organ. Illiteracy rare in Protestant cantons. (i.) *Primary:* Free and nominally compulsory, but attendance is not strictly enforced in the essentially Roman Catholic cantons. School age varies. (ii.) *Secondary:* Age 12-15 for boys. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities:* Bâle, Berne, Fribourg, Geneva, Lausanne, Zurich, and Neuchâtel.

SYRIA AND LEBANON.

Syria.—British forces, together with small French and Arab detachments, drove the Turks out of Syria and Lebanon in 1918, and occupied those districts and the district of Cilicia. By decision of the Supreme Council of the Allies the districts in question were entrusted to France, to be administered under a mandate (Cilich was restored to Turkey by the French in 1922).

The Emir Feisal (son of the ex-King of the Hedjaz and, since 1922, King of Iraq) had from the outset assumed the administration of the districts of Aleppo, Hama and Homs, which had been assigned as independent Arab districts under an earlier agreement of May, 1916, between France and Great Britain (the *Sykes-Picot Agreement*), and it was intended to allow the Emir to remain under French guidance, but on March 2, 1920, the "Syrian Congress" at Damascus declared Syria independent, and the Emir Feisal was crowned King of Syria. The action of the Syrian Congress did not receive the sanction of the Allied Powers, and General Gouraud occupied Damascus, Aleppo, Hama and Homs. The Emir Feisal left the country, and afterwards became King of Iraq (q.v.). The French Mandatory Zone was first divided into the four autonomous states of Great Lebanon, Damascus, Aleppo and the Alaouites (the region round Latakia), each having a French adviser responsible to the High Commissioner at Beyrout. The latter three States were later grouped together to form the *Syrian Federation*, with a nominated Council. The Federation has now been abolished. **Damascus and Aleppo** have been amalgamated into a single State, and the *State of the Alaouites* (now known as the *Government of Latakia*) is again independent. The *Jebel Druze* forms a small independent State. The form of government differs in each of the actual States, but the guiding principle in each is French control.

Syria is a geographical term for part of the former Turkish territories in Asia Minor, its political neighbours being Turkey, Iraq and Palestine on the north, east and south, with a western coastline washed by the Mediterranean Sea. The estimated area is about 60,000 sq. miles, with a population of about 3,000,000.

of whom the greater number are Orthodox Muhammadans, with a proportion of Shilites and Druses. The products of Syria are wheat, tobacco, fruit, wine, silk, liquors, copper and brass goods; there is little cultivation without irrigation, the inland districts being cut off from the moisture-laden winds by a mountain barrier running parallel with the coast. The mineral wealth is believed to be unimportant, but there is a certain amount of bitumen. The principal Syrian towns are Damascus (est. pop. 300,000), Aleppo (250,000), Homs (70,000), and Hama (60,000). Damascus contains the Mosque of the Ommayyedes and the tomb of Saladin, and in the south-western quarter is "The Gate of God," through which the pilgrimage to Mecca used to pass, while the "street called Straight" (Acts ix, 12) runs E. to W. through the city. Damascus is an important commercial centre, and among its industries are metal work and mother-of-pearl inlay, and also native-made silk and cotton stuffs. At *Baalbek* (Heliopolis), on the western slopes of the Anti-Lebanon range (35 miles N.N.W. of Damascus), are ruins of 1st to 3rd century Roman temples (the Circular Temple, the Great Temple and the Temple of Bacchus), and in the vicinity of the ruins is the largest cut stone in the world (60 x 27 x 14 feet), weighing 1,500 tons. The railway system consists of a line from Beyrout to Damascus (narrow gauge), with a connexion at Rayak for Homs, Hama and Aleppo (standard gauge). The line from Tripoli to Aleppo, *via* Homs, was reopened in 1921. A narrow-gauge tramway runs from Beirut to Mameltein along the coast. From Damascus there is railway communication with Palestine and with Transjordan, and the Syrian railways link up with the Baghdad railway at Aleppo. Road communications between Beyrout and Baghdad, *via* Damascus, have been developed by the opening up of the desert motor routes. Baghdad is now within 24 hours of Damascus by car, and a weekly air service has been opened for mails and passengers.

In the autumn of 1925, following a revolt of the Jebel Druze in the Hauran, rioting took place in Damascus on Oct. 28, and the city was bombarded by French artillery, when part of the Azm palace and parts of the "Street Called Straight" were destroyed by shell fire or burned. Soon after the receipt of news of the disturbances in Syria, the High Commissioner (Gen. Sarraïl) was recalled by the French cabinet. A long period of disorder followed, but in Sept., 1927, public security was practically normal. In June, 1930, the French High Commissioner promulgated a new republican constitution for the State of Syria. After somewhat difficult negotiations between the French and the Nationalists elections were eventually held in 1932 and the Parliament elected.

Beirut is the residence of the French High Commissioner and the capital of the Lebanese Republic. *Damascus* was the Federal capital, and has become that of the new State of Syria. *Latakia* is the capital of the Government of that name, formerly known as the State of the Alawites.

The *Lebanese Republic* (the former Turkish provinces of Lebanon and Beirut), was declared a State by the High Commissioner, under the title of *Etat du Grand Liban*, in 1920, but the consti-

tution was suspended as a measure of economy in 1932. M. Debbas remaining in control without the assistance of Parliament. The State extends along the Mediterranean littoral from the Palestine frontier to Nahr el Kebir (15 miles N. of Tripoli) and is bounded on E. by the Great Central Depression, known as the Bekaa, in which flow the rivers Orontes and Litani. Its total length is about 120 miles, and its width varies from 30 to 35 miles. The estimated area of the Lebanese Republic is about 4,300 square miles, with an estimated population of 579,778. The products of the soil are olives, wheat, grapes, oranges and mulberry trees. Great efforts are being made to develop the district as a summer resort. The capital is Beirut (pop. 150,000), which is the chief seaport and commercial centre, and the seat of the French mandate. Tripoli, the next important town and seaport, will be one of the Mediterranean termini of the Iraq Petroleum Company's pipe line, now under construction. Minor ports are Jounieh, Tyre and Sidon. The national flag is the French tricolour with a Cedar of Lebanon on the white band.

Trade of Syria, 1932.

Pro-Consul, Joseph Teen.

TURKEY.

(*Türkiye Cumhuriyeti*.)
President of the Republic, His Excellency Gazi ("The Victorious") Mustafa Kemal, *br 11* 1881; assumed office Oct. 29, 1923; re-elected Nov. 1, 1927; re-elected, May 4, 1931.

MINISTRY (Sept. 28, 1930).

Names as spell in new Turkish characters.
Prime Minister, Ismet Paşa.

Minister for Foreign Affairs, Dr. Tevfik Rüşdî Bey.

National Defence, Zekâî Bey.

Interior, Sükrî Kaya Bey.

Justice, Saracoğlu Sükrü Bey.

Finance, Mustafa Abdullhalik Bey.

Public Instruction, Hikmet Bey.

Public Works, Fuat Bey.

Public Health, Refik Bey.

Economic Affairs, Celal Bey.

Agriculture, Muhlis Bey.

Customs and Monopolies, Ali Rıza Bey.

President of the National Assembly, Kâzım Paşa.

Turkish Ambassador in London, His Excellency Mehmet Münir Bey, 69 Portland Place, W. 1.

Counsellor, Nurettin Ferruh Bey.

1st Secretary, Muzaffer Kâmil Bey.

3rd Secretary, Cemil Vâh Bey.

Commercial Counsellor, Kurtoglu Faik Bey.

Archivist, İrfan Niyazi Bey.

Consul in London, Durri Mazhar Bey, 20 Lower Sloane Street, S.W. 1.

Chancellor, Abat Bey.

The Turks belong to the Turanian Race, which comprises the Manchus and Mongols of North China, the Finns, and the Turks of Central Asia. Their numbers probably exceed 50,000,000, with the same language, religion and culture, but the actual Turkish State occupies only a small part of the area inhabited by the Turkish Race, the remainder being in Soviet Russia, China, Afghanistan and Persia. Under the Seljuks (Turkish rulers in Anatolia) the conquest of Asia Minor was completed in the 11th century. The Seljuks were succeeded, early in the 14th century, by the Osmanli dynasty, which remained in power until the Great War.

During the 15th, 16th and 17th centuries the Ottoman Empire was one of the strongest Powers in the world, extending from the Caspian Sea to the Adriatic and Hungary, and from the Indian Ocean to Morocco and the Sudan. It comprised Asia Minor, half of Soviet Russia, the Ukraine, the Crimea, the Balkan States and the whole of Arabia. The Black Sea, the Mediterranean, the Red Sea and the Aegean were dominated by Turkish ships, and the Ottoman dominions included not only the Byzantine Empire, but the greater part of the whole Roman Empire.

For two centuries preceding the Great War disintegration had reduced the power and extent of the Turkish Empire, and during the Great War its boundaries were further restricted, Iraq, Syria and Arabia passing into other hands. Attempts to wrest further territory were defeated by Gazi Mustafa Kemal, who won a decisive battle at Afion, the results of which were confirmed at the Lausanne Conference.

Turkey now extends over an area of 470,000 sq. miles, from Adrianople to the Caucasus and Persia, and from the Black Sea to the Mediterranean, Syria and Iraq.

Turkey in Europe (31,975 sq. kilometres = 9,256 sq. miles) consists of Eastern Thrace, including the cities of Istanbul (Constantinople) and Adrianople, and is separated from Asia by the Bosphorus at Constantinople and by the *Dardanelles* (Hellespont)—about 40 miles in length, with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia (738,761 sq. kilometres = 285,246 sq. miles) comprises the whole of Asia Minor or *Anatolia* ("Land of the Rising Sun" or Orient), and extends from the Aegean Sea to the western boundaries of Georgia, Eriwan and Persia, and from the Black Sea to the Mediterranean, and the northern boundaries of Syria and Iraq.

Population.—The first general census of Turkey was taken on Oct. 28, 1927, and showed the population of the Republic to be 13,660,275,

the excess of women over men being approximately 500,000. The population of each of the 8 Regions into which the country is divided was given as follows:—

Region.	Sq. Kil.	Population	Per Sq. Kil.
Black Sea	73,621	2,174,425	29
Marmora & Aegean	92,744	2,746,069	29
Mediterranean ..	56,279	753,639	13
Turkey in Europe	23,975	1,044,306	43
Western Anatolia.	71,180	1,303,114	18
Central Anatolia...	228,791	3,499,707	15
S.E. Anatolia	40,125	604,303	14
Eastern Anatolia	176,621	1,534,712	8
Total.....	762,736	13,660,275	18

Government.—Sultan Muhammad VI., the last of the Osmanli rulers, fled from Constantinople to Malta on Nov. 20, 1922, and the Sultanate was abolished by the National Assembly. On Oct. 29, 1923,* the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal President. On March 2, 1924, the Assembly passed a law abolishing the office of Caliph and ordering all members of the Ottoman dynasty to leave Turkish territory. The Grand Assembly is a single-chamber legislature elected for four years, and delegates its executive power to ministers acting in its name and responsible to it for their actions.

Religion.—The majority of the inhabitants are Moslems. There are numerous Christians (of the Latin and Eastern rites) in Istanbul (Constantinople) and a considerable number of Jews. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic. On Nov. 1, 1928, the Grand National Assembly passed a bill establishing the neo-Latin alphabet in place of Turkish characters. Education is nominally compulsory and free. There are primary schools, training schools for teachers, and at Istanbul a university, founded in 1900.

Production.—Although the soil of Asia Minor is generally fertile, agriculture is still very primitive in centres that are not served by railways. The peasant is, however, gradually adapting himself to the more modern methods, particularly in the vilayet of Aydın, Adana, and Mersin. *The live stock in 1929* was 2,124,031 sheep, 8,878,406 goats, 2,804,685 mohair goats, 4,718,803 cattle, 496,954 horses, 849,485 asses, 74,803 camels and 496,060 buffaloes. Cereals are abundantly produced, as well as tobacco, raisins, figs, cotton, opium, beet-sugar, nuts, olives, valonea and liquorice root, and many varieties of fruit are grown. *Samsun* is the chief centre of the tobacco-growing industry, which is also of importance at Izmir (Smyrna), Işmit and Bursa (Brusa). The export of merchandise is considerable and consists principally of opium, tobacco, cotton, carpets, gums, mohair, wool, hazel-nuts, raisins and figs. The forests should be a source of wealth, but scientific exploitation is disregarded: beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple are among the chief varieties of trees. The mulberry is planted for the silk-worm industry,

* TURKISH NATIONAL HOLIDAY—Oct. 29 is observed throughout the Republic as a National Holiday.

which centres round Bursa and Iamit, and this industry, which declined after the war, is now reviving. The mineral wealth of Asia Minor is stated to be considerable, but is almost undeveloped. Chrome ore, zinc, manganese, antimony, copper, borax, corundum (emery), coal and lignite, silver and arsenic, are among the minerals produced.

Communications.—In Europe Turkey has about 208 miles of railway, known as *The Oriental Railway* and run by a French Company. In Asia Minor the position as regards railways is the following:—

Lines under Exploitation.

	Klm
Izmir-Aydin (British)	610
Smyrna-Kasaba (French)	703
Hozanti-Aleppo-Nisibin	632
Mudanya-Bursa (narrow gauge)	41
Anatolian Railway	1,031
Mersin-Tarsus-Adana	67
Baghdad Railway	445
Angora-Kayseri-Sivas	590
Samsun-Sivas	380
Kütahya-Balıkesir	280
Fevzi Paşa-Malatya	253
Samsun-Çarşamba, narrow gauge	37
Ulu Kışla-Kayseri	180

There is also a line from Sari Kaniş to the Russian frontier (78 miles, Russian broad gauge) and a narrow gauge line from Sari Kaniş to Erzurum (156 miles), but both lines are in a bad state of repair.

Lines under Construction.

Filios to Irmak.

Malatya to Argana Maden.

A contract has now been placed with a Turkish group for the construction of the Sivas-Erzurum railway (about 300 miles) and it is the intention of the Turkish Government to construct the following lines: Eregli—Filios (about 35 miles); Afyon Karahisar—Antalya; Adana-Pazari—Bayındır (about 160 miles). There are electric trams in Istanbul, Scutari and Izmir. In 1932 the mercantile marine consisted of 215 steam and motor vessels, with a total net tonnage of 132,784.

	1932-33	1933-34
Revenue (Budget)	£159,354,800	£170,477,000
Expenditure (do.)	£169,146,747	£170,474,394
National Debt		
Internal Loan	£1,550,000	
Floating Debt	£1,200,000	
External Loan (Turkish-American)	\$8,600,000	
	1932	
Total Imports	£11,620,000	
Total Exports	13,700,000	
Imports from U.K.	1,440,000	
Exports to U.K.	1,348,000	

Note.—The National Debt figures include Turkey's share of the repartitioned Ottoman Public Debt. The agreement reached between the bondholders and the Turkish Government for the resumption of the services of the Ottoman Public Debt was ratified by the Grand National Assembly on November 30, 1928. This agreement has been revised (April 22, 1933) and now provides for the creation of new Turkish Debt bonds for the capital amount of francs 968,636,000. The new bonds are of 500 franc denomination, bearing interest at 7½ per cent.

The Ottoman Public Debt is administered by a Council: S. C. Wyatt (*Delegate of British and Netherlands Bondholders*); M. F. de Closières (*French*); M. B. Nogam (*Italian*); Vacant post (*Turkish*); A. H. Reid (*Ottoman Bank*). *Commissary*, Zekai Bey; *General Manager*, M. Morel (*acting*). Mr. Wyatt and M. de Closières preside alternately.

CAPITAL OF TURKEY, ANKARA (Angora), an inland town of Asia Minor, about 200 miles E.S.E. of Istanbul, with a population (Census 1927) of 74,784. Ankara (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple dedicated to Augustus (now in ruins) contains the *Monumentum (Marmor) Augurum*, inscribed with a record of the reign of Augustus (Cesar). A new city is being laid out on modern lines, with parks, statues and avenues. **ISTANBUL** (Constantinople), the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire A.D. 364; population (Census of 1927) 673,029 (Istanbul 261,504, Pera 286,970, Scutari 124,555). Other cities are Izmir (Smyrna) 153,845, Adana 72,652, Bursa (Brusa) 61,451, Konya 47,286, Gazı-Aynıtap 39,571, Kayseri (Cesarea) 39,544, Edirne (Adrianople) 34,669, Eskişehir 32,103, Diarbekir 31,511, Erzurum 30,802, and Samsun 30,333. There are also 14 localities with 20 to 30,000 inhabitants, 39 with 10 to 20,000, and 79 with 5 to 10,000 inhabitants.

FLAG: Red, with white crescent and star.

BRITISH ENMBASSY.

Counsellor and Chargé d'Affairs, Dr. Don Roberto E. MacKachen.

2nd Secretary, G. A. Rey-Alvarez.

Consulate-General, 35 Harrington Gdns., S.W. 7 [Ken. 7268].

The smallest Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30°-35° S. and long. 53° 25'-57° 42' W., containing an area of 72,180 square miles, and a population on Dec. 31, 1932, of 1,970,355.

Uruguay resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 200 years later the Portuguese settlements were captured by the Spaniards. From 1765-1824 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1824 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. On Aug. 25, 1825, through the heroism of the 33 Liberators (whose memory is perpetuated in the name of the province of *Treinta y Tres*), the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated, with a Constitution of Sept. 30, 1830. The President is elected by the legislature for a term of 4 years and is ineligible for a consecutive period of office. By an amendment to the Constitution (which came into force March 1, 1929) an administrative council was appointed to share the Executive power with the President. As a result of the *coup d'Etat* of March 31, 1933, this council was abolished, and was replaced for the time being by a Junta of seven members as an advisory body. It is President Terra's desire to give his country a more elastic, a less expensive, and a more vital Constitution, and with this end in view a Constituent Assembly was elected on June 25, 1933, in order to draft a new Constitution, to be ratified by the people before November 24, 1934.

The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which crosses the Brazilian boundary and extends southwards to the Cuchilla

Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the *Rio Negro* (with its tributary the *YI*), flowing from north-east to south-west into the Rio de la Plata. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Quequay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merim. The climate is extraordinarily healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic and the geographical position causing a high thermometer in winter.

Wheat, barley, and maize are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (7,127,912 in 1930) and sheep (20,558,124 in 1930), the wool of which is of excellent quality. Gold mines exist at Cuapirid. The exports are entirely animal products, and include frozen and preserved meat, wool, hides, horn, hair, tallow, and jerked beef; the imports are principally machinery, textiles and clothing, food substances and beverages, coal, oil, timber, fuel and bloodstock. The principal imports from the U.K. are woollen and cotton goods, hardware, and coals. There are 1,729 miles of railway open (1929), of which 1,564 miles are in British hands, and three short lines owned by the State; 45 kilometres of the State line from San Carlos to Garzón have been opened and 73 kilometres from San Carlos to Rocha are now open to traffic; and (in 1930) 7,508 miles of telegraph, with 48,375 miles of telephones. There were 995 post-offices, dealing with 136,053,701 letters and packets. The language spoken is Spanish.

	1931-32	1932-33
Revenue.....	\$65,095,726	\$59,232,698

Consulate-General, 3 Rosary Gardens, S.W. 7.

The Union of Soviet Socialist Republics.—The federal system was adopted by the 10th All-Russian Congress of Soviets on Dec. 31, 1922. The Soviet Union covers the greater part of the area of the former Russian Empire, from which the independent states of Finland, Poland, Estonia, Latvia and Lithuania have also been formed. The greater part of the remaining territory forms the Russian Socialist Federal Soviet Republic (R.S.F.S.R.), which is in union with other Soviet Republics in Russian territory to form the Soviet Union. Prior to the War of 1914-18 the Russian Empire of the Tsar Nicholas II. covered more than 8,500,000 square miles, with a population of about 183,000,000.

Area and population of the constituent Republics of the Soviet Union are:—

Republic.	Sq. miles	Population
I. R.S.F.S.R. (Moscow).	7,638,004	111,630,000
II. Ukraine (Kharkov) ...	274,378	31,608,000
III. Transcaucasia (Tiflis)	71,899	6,517,000
IV. White Russia (Minsk)	49,041	5,250,000
V. Turkmenistan		
(Politortak)	188,609	1,156,000
VI. Uzbekistan (Tashkent)	63,640	4,754,000
VII. Tajikistan		
(Stalinabad)	56,108	1,188,000
	8,841,673	162,143,000

The rural population forms 80 per cent. of the whole.

According to the latest census returns (Jan. 1, 1928) the total population was 146,964,366, of whom 71,020,659 were males and 75,953,707 females. The returns include 29,498 persons over 100 years of age (12,240 men, 17,258 women).

The Union is governed by the Congress of Soviets of the Union, and during the intervals of sessions the supreme authority is vested in the Central Executive Committee of the Union, which consists of the Council of the Union and the Council of Nationalities. The regular session of the Union Soviet Congress is convened by the Central Executive Committee ("Tsik") of the Union once a year. The Council of the Union consists of 371 members elected by the Soviet Congress of the Union from among the representatives of the several constituent republics, counted in proportion to the population of each republic. The Council of Nationalities is formed of representatives of the constituent and autonomous Soviet Socialist Republics on the basis of 5 representatives from each, and of representatives of the autonomous Provinces of the R.S.F.S.R. on the basis of 1 representative from each. The composition of the Council of Nationalities as a whole must be confirmed by the Congress of Soviets of the Union.

(The autonomous Republics of Abkhazia and Abkhazia and the autonomous Province of Southern Ossetia send one representative each to the Council of Nationalities.)

The regular sessions of the Tsik meet three times a year, and in the intervals the supreme authority is vested in its Presidium, formed by the Tsik of the Union, of 21 members, amongst whom are included the whole of the Union-Council Presidium and the Presidium of the Council of Nationalities.

Chairman of Presidium, Michael Ivanovitch Kallulu (R.S.F.S.R.); G. I. Petrovsky (Ukraine); H. Minshekov (Transcaucasia); A. G. Chervakov (White Russia); N. Altakoff (Turkmenistan); M. Falsula-Khodzhaleff (Uzbekistan); M. Nusratula (Tajikistan). Secretary, A. S. Yenukidze.

Representatives are elected to the Soviet Congress of the Union by indirect voting, each village Soviet sending representatives to a Volost Soviet, the Volosts to Uyezd (district) Soviets, the Uyezds to Government Soviets, and the last-named to the Congress of Soviets of the Union. The cities and townships Soviets send representatives to the Congress of Soviets Union on the basis of 1 deputy for each 25,000 electors, whereas the provincial Soviets send 1 deputy for each 125,000 inhabitants.

The principal executive and administrative organs of the Tsik of the Union are: The Council of People's Commissaries, the Council of Labour and Defence, and the Supreme Court of the Union.

The People's Commissariats of the Union are divided into (1) Federal People's Commissariats for the entire Union, and (2) Joint People's Commissariats of the Union. Federal People's Commissariats of the Union are: (1) War and Marine, (2) Foreign Affairs, (3) Foreign Trade, (4) Transport, (5) Post and Telegraph. The Joint People's Commissariats are: (1) Supreme Council of National Economy, (2) Finance, (3) Internal Trade, (4) Labour, (5) Workers' and Peasants' Inspection. The Federal Commissariats have their representatives in the constituent republics, who are directly subordinated to them. The Joint Commissariats exercise their functions

through corresponding Commissariats of the several constituent republics on their territories.

Each of the constituent republics has within its territory its own Congress of Soviets, its Central Executive Committee (*Tsik*), and Council of People's Commissaries (*Sovnarkom*), the latter consisting of Chairman, Vice-Chairman, and the following Commissaries: (1) Chairman, Supreme Council of National Economy, (2) Finance, (3) Internal Trade, (4) Labour, (5) Workers' and Peasants' Inspection (all these are subordinate to the People's Commissaries of the Union), (6) Agriculture, (7) Education, (8) Health, (9) Social Welfare, (10) Justice, (11) Internal Affairs (the latter six independent), and also including, with an advisory or deciding vote, according to the decision of the respective *Tsik*, the representatives of Federal Commissariats of the Union, i.e., of Foreign Affairs, Foreign Trade, War and Marine, Transport, Post and Telegraph.

The Council of Labour and Defence (*Soviet Truda i Oborony*, or *S.T.O.*) is attached and subordinate to the *Sovnarkom*, and in addition to a general direction of commissariats in their economic and military activity, has the power to ratify statutes of joint-stock companies and trusts.

The Supreme Court of the Union is attached to the Central Executive Committee, and has power and jurisdiction (1) to promulgate authoritative opinions on questions concerning general Federal legislation to the constituent republics, (2) to adjudicate controversies between the constituent republics, (3) to try charges against high officials of the Union for offences committed in the discharge of their duties. The Supreme Court consists of 11 members.

To the Council of People's Commissaries (*Sovnarkom*) of the Union is attached a Joint State Political Department, formerly known as the *Tcheka*, but since 1922 as the O.G.P.U. (*Obiedinennoye Gosudarstvennoye Politicheskoye Upravleniye*), which is designed to combat political and economic counter-revolution, espionage and brigandage. The Chairman of the O.G.P.U. is a member of the Council of People's Commissaries of the Union. The O.G.P.U. is directed by special rules and regulations, which have not been promulgated. The control of the legality of the acts of the O.G.P.U. is exercised by the Attorney-General of the Union in accordance with a special decree issued by the *Tsik*.

I. SOVIET RUSSIA (R.S.F.S.R.)

Rossiyskaya Sotsialisticheskaya Federativnaya Sovetskaya Respublika—The Russian Socialist Federal Soviet Republic.

President of the Council of People's Commissars, D. E. Sulimov.

Vice-Presidents, D. Z. Lebed; T. R. Ryskulov. *Chairman of Supreme Council of National Economy*, M. K. Striyski.

Labour, M. M. Romanov.

Finance, V. N. Yakovleva.

Workers' and Peasants' Inspection, N. I. Ilin.

Central Statistical, N. P. Gorbunov.

Internal Affairs, V. M. Tolmachev.

Justice, N. V. Krylenko.

Education, A. S. Rubnov.

Health, M. F. Vladimirov.

Agriculture, M. K. Murakov.

Social Welfare, I. A. Nguvitzin.

Communal Economy, N. P. Komarov.

The R.S.F.S.R. consists of 50 Governments and includes 11 Autonomous Republics and 10 Autonomous Provinces. *Autonomous Republics*: Bashkir, Tartar, Kirghiz, Mountain, Daghestan, Turkistan, Crimea, Yakut, Karelia, Buriat-Mongol and Volga German. *Autonomous Provinces*: Chuvas, Kalmuck, Mari, Voliak, Zyrian (Komi), Oirad, Kabardin-Balkarak, Karachai-Circassian, Adighe - Circassian, Tchetchen. From the economic point of view this vast territory is usually divided into "Black Soil" and "Other Zones." The *Black Soil Zone* being subdivided into (1) Central Agricultural Region, (2) Middle Volga Region, (3) Lower Volga Region, (4) Northern Caucasus, (5) Siberia, (6) Kirghiz Autonomous Republic, (7) Crimea; while the *Other Zones* are (1) Western Region, (2) North-Western Region, (3) Central Industrial Region, (4) North-Eastern Region, (5) Basins of the rivers Viatka and Vetluga, (6) Ural.

Local Government was, and still remains, highly developed. The villages in Imperial Russia had their assemblies (*skhod*) under the presidency of a mayor (*starosta*); they were grouped into "volosts," the latter into districts (*uyezd*), and these into governments (*guberniya*). The districts and governments had their elective councils (*zemstvo*) for the administration of local affairs. Combined with this system of village communities was a highly organised system of co-operative trading, the population being grouped into voluntary local associations usually corresponding with local government areas. The produce of the soil was disposed of in return for manufactures obtained by the society and distributed at the co-operative shops. Municipalities were also administered by elective councils (*dumas*) under the presidency of a mayor (*golova*); but in many cases the local authority of such municipalities and local land councils (*zemstvo*) was overshadowed by the superior authority of the *bureaucratic* governor. After the Revolution, the village and other administrative units set up *soviets* of workers and peasants, and the provincial councils send representatives to the All-Russian Congress, municipalities having a double representation from their own *soviet* and from that of the province (or district) in which the municipalities are situated.

Education.—Under the Bolshevik régime popular education is administered by a commissary, in whose charge have been placed all educational institutions, theatres, museums, and galleries. Beyond this, the State has monopolised the photo-cinematographic industry and the publishing of manuals for schools of all types; and as the Soviet Government possesses almost all the printing houses, it practically controls the printing and publishing trades. The education of the workers in the towns is facilitated by lectures and school teaching; but among the peasants in the rural districts even the inadequate provision formerly made has in many places been discontinued. In 1921 there were stated to be 20,000,000 pupils in the schools as compared with 8,000,000 in 1914; the number of students attending higher educational centres was stated at 350,000 in 1921; there are two universities in Moscow and 21 in other large centres.

Religion.—The Orthodox Church was disestablished by the Bolsheviks and all its property confiscated. All ecclesiastical schools, seminaries

and academies have been abolished, and the teaching of religion to persons under 18 years of age forbidden. But the law did not forbid the exercise of religion, and churches remained open in virtue of contracts concluded between the congregations and the local authorities. A recent questionnaire addressed to the soldiers of the Red Army shows that 70 per cent. of them believe in a Deity. The clergy live on voluntary donations from their parishioners. On Feb. 14, 1928, the Soviet Government adopted the Gregorian (Western) Calendar. A *Godless Five Year Plan* was embodied in a decree issued by the Council of Peoples' Commissaries in October, 1928, with the object "not to leave a single house of prayer on the territory of the U.S.S.R., and to extinguish in the minds of the people the very notion of God."

Soviet Union Budget, 1932-33.

Revenue..... *Roubles* 35,020,900,000
Expenditure..... " 33,230,900,000

Debt.—The outstanding Foreign Debt of Russia on Jan. 1, 1917 (before the Revolution), may be stated as under:—

	Debt.
To Great Britain	£622,674,406
To France.....	Francs 3,050,000,000
To U.S.A.	\$282,000,000
To Japan	Yen 256,000,000
To Italy	Lira 36,123,836

Since the revolution various loans have been raised, and these were stated to amount on Oct. 1, 1932, to 8,504,500,000 roubles.

Defence.—The Red Army, recruited by universal military service, consists of about 800,000 all ranks, including 37 cavalry brigades of about 3,000 men, and about 30,000 sailors serving on land. It was reported that the *Red Air Fleet* was to comprise an organisation of 10,000 aeroplanes for the year 1924; in 1932 it was stated to consist of about 1,500 aeroplanes. The *Red Navy* is believed to consist of 4 battle-ships, 5 old cruisers, 17 destroyers, and 16 submarines. *Civil Aviation* statistics will be found on p. 647.

The Five Year Plan.

The Soviet Five Year Plan (1928-1933)—The avowed object of the Five Year Plan was to increase the industrial and agricultural production of the U.S.S.R. so that it might overtake and outstrip all other nations. For this purpose the territory was equipped with factories, railroads, steamships, telegraphs, motor vehicles and tractors. The land was to be made to produce food, houses were to be built, and opportunities for recreation provided, so that the population might have these amenities in greater abundance than the peoples of capitalist nations. The Plan had the political aim of making the U.S.S.R. a far more powerful industrial, economical and political State, and the political aim was pursued at the expense of the people, the products of the soil being employed primarily in payment of imports required for industrial development, even if starvation was thus imposed on the people. The principal industries undergoing development are *asbestos* (at Azbest), *steel* (at Magnitogorsk), *manganese* (at Chiaturi), *tractors* (at Chelabinsk, Stalingrad and Khar'kov), *wheat* (at Gigant and Verblud), *petroleum* and *crude oil* (at Baku), and *tea and oranges* (at Chakwa). The factories are to be provided with electric energy from Dniepostroy, where a dam

is under construction, the work being under the superintendence of U.S. engineers. The political development of the Plan appears to be abreast, in most particulars, and in some directions ahead, of the time schedule; and in April, 1932, M. Kuibyshev, Chairman of the State Planning Commission, stated that the Five Year Plan would be completed in 1932 (one year ahead of the schedule), and the Government had therefore decided to begin work on a new Five Year Plan for 1933-1938.

Agriculture—The Soviet Board of Statistics publish the following particulars of the harvests:—

Crop.	Metric Tons.	
	1929.	1930.
Rye	20,359,140	24,556,670
Wheat	18,877,820	28,360,070
Barley	7,213,530	7,270,000
Oats	15,739,000	17,446,470
Maize	3,018,660	3,057,470
Millet	3,112,670	3,237,000
Buckwheat.....	1,513,800	1,599,590
Other Cereals..	1,906,630	1,836,550
Potatoes	45,629,700	49,772,100

The Live Stock are stated at:—

Animals.	1929.		1930.	
Cattle	66,700,000	58,600,000		
Horses	34,000,000	31,200,000		
Sheep and Goats	147,200,000	89,000,000		
Swine	20,900,000	12,200,000		

Industry.—The natural riches of Russia in coal, iron-ores, copper, manganese, gold, platinum, timber, naphtha, and so on, are enormous. The value of the industrial output is stated at:—

Ores.	Metric Tons.	
	1929-30.	1930-31.
Iron	10,012,000	10,731,000
Manganese	1,550,000	900,000
Copper	1,080,000	1,168,000
Coal	46,700,000	55,860,000
Refined Oil	14,836,500	22,322,000

External Trade.—The external trade of the U.S.S.R. for 1931-32 is stated as under in thousands of roubles.—

Exports from)	Countries.	{ Imports into Russia from
134,311. ...	Great Britain	90,932
58,061. ...	Germany	34,411
17,014. ...	U.S.A.	31,665
28,536. ...	France	3,879
26,012. ...	Italy	27,144
1,372. ...	Czechoslovakia	10,283
9,623. ...	Latvia	5,770
25,368. ...	Persia	49,940
4,695. ...	Poland	5,821
5,391. ...	Turkey	5,700
41,395. ...	Mongolia	19,278
23,784. ...	China	18,197
10,099. ...	Japan	4,786
20,800. ...	Netherlands.....	5,432
18,572. ...	Belgium	
3,819. ...	Norway	14,137
6,141. ...	Sweden	21,521

According to the Soviet Customs Returns there was a Balance of Trade in 1929-30 *adverse* to the U.K. of 159,233,000 roubles, and in favour of the U.S.A. (235,780,000 roubles) and of Germany (20,135,000 roubles). The U.K. contributed 9.4 of the Imports and took 27 per cent. of the Exports, whereas the U.S. contributed 33.3 and

took 5, and Germany contributed 28 and took 24 per cent.

Board of Trade figures for transactions between Russia and Great Britain:—

	1931.	1932.
Imports from U.K.	£9,044,000	£10,498,000
Exports to U.K.	34,179,000	19,097,000

Communications.—Length of railroads in use:

Year.	Miles.
1925-6	46,255
1926-7	47,088
1927-8	48,083
1928-9	48,236

The principal railway lines are the main *European* network from Leningrad, through Moscow to Astrakhan and across the Urals *via* Perm, Ufa, Samara and Saratov, with northern extensions to the Kola Peninsula and to Archangel and running southwards to the Baltic, the Crimea and the Caucasus; the *Trans-Siberian Line* from Chelyabinsk, on the Ural frontier, to Omsk, and round Lake Baikal to Chita and Stryetensk. From Chita the line crosses the Manchurian frontier (as the Eastern China Railway) to Haibin and Vladivostok, where a northward extension runs to Khabarovsk. The *Amur Railway* connects Stryetensk with Khabarovsk, and the *Trans-Siberian line* thus connects the western and eastern limits of Russia on Russian territory. The *Trans-Caspian Railway* runs from Krasnovodsk (opposite Baku) to Askabad, Merv, Bokhara, Samarkand, Khokand and Andijan, with a 200-mile branch from Merv to Kushk (near Herat) on the Afghanistan border. The *Orenburg-Tashkent line*, from the European boundary, across the Kirghiz Steppe to Kazalinsk, Perovsk and Tashkent, whence a short line connects with the *Trans-Caspian system*. The *Trans-Caucasian line* runs through Georgia, Azerbaijan and Armenia, from Batum and Poti, on the Black Sea, *via* Tiflis, to Baku, on the Caspian, where it is met by the European system of Rostov

on the Don. From Tiflis branches run to Kars, and *via* Erivan to Mount Ararat on the Armenian frontier, and to the Persian frontier at Julfa. There are in the *Soviet Union* (1927) 228,600 miles of inland waterways, of which 54,500 are navigable by steam vessels, and nearly 110,000 miles by rafts. The principal seaports are Leningrad and Kronstadt on the Gulf of Finland, Sevastopol and Novorossiysk (Black Sea), Archangel on the White Sea, and Ekaterininsk in the Kola River (Murmansk), Vladivostok (Sea of Japan), and Petropavlovsk in Kamchatka.

Posts and Telegraphs.—In 1929 the post offices handled about 650,000,000 letters and postcards; the length of telegraph lines was stated at 156,000 miles, with over 8,000 offices.

Capital.—On March 14, 1918, the seat of Government was transferred from Petrograd to Moscow, which had a population in 1931 of about 2,800,000. LENINGRAD (before the war "St. Petersburg," and until the death of Lenin, "Petrozgrad"), the former Capital, founded by Peter the Great on the banks of the Neva in 1703, had a population in 1931 of 2,783,000. Other centres are Saratov (220,000), Rostov (300,000), Samara (190,000), Nijni-Novgorod, re-named Gorky in 1932, (190,000), Voronezh (100,000), Kazan (180,000), Krasnaya, formerly Ekaterinodar (150,000), Astrakhan (180,000), Orenburg (120,000), Irkutsk (104,000), Tomsk (90,000), Omsk (170,000), Vladivostok (100,000). Archangel had about 40,000 inhabitants in 1920.

II.—THE UKRAINE. (Ukraine.)

President, V. J. Tchubar.

On Nov. 21, 1917, the greater part of "Little Russia," consisting of the former governments of Chernigov, Kharkov, Kieff, and Poltava (with Ekaterinoslav and Kherson in "South Russia," and Podolia and Volynia in "West Russia"), was encouraged by Germany to declare itself independent as the *Republic of the*

Ukraine. The new Republic was invaded by Germany in 1917-18, and subsequently overrun by Bolshevik forces, and a military and economic alliance was concluded between Soviet Russia and the *Ukraine Socialist Soviet Republic* (Dec. 28, 1920). The majority of the inhabitants belong to the Greek Orthodox Church. The chief town and seat of government is Kharkoff (pop. 1923, 312,000), other large centres being Odessa, the great port on the Black Sea (with a population in 1923 of 316,000), Kieff (pop. 1923, 406,000), Ekaterinoslav (pop. 1923, 127,000), Nikolayev (81,000), Poltava (88,000), and Taganrog (100,000). The Ukraine is the great cereal-growing district of Russia, and before the Great War the harvests exceeded 2,000,000,000 poods; during the Civil War the production was reduced to 385 million poods, but in 1923 it had increased to 700 millions. In 1922-3 there were 122 sugar-beet factories (200 in 1925) producing 10,000,000 poods (500 millions in 1924-25). The Ukraine also contains large deposits of iron ore and coal, and is the principal source of the European supply of quicksilver. Agriculture is the principal industry, and there are large iron and steel works. Before the Great War the exports from the Ukraine (grain, sugar, hides, textiles, quicksilver, and wool) were of the annual value of about £75,000,000, and the imports (manufactured goods and machinery) about £50,000,000.

CAPITAL, Kharkoff. Population (1930), 530,600. Other towns: Dnepropetrovsk, 233,000; Kieff, 514,000; Nikolief, 105,000; Odessa, 481,000; Poltava, 92,000.

III.—TRANSCAUCASIA. (Zakavkarskaya F.S.S.R.)

President of the Council of People's Commissars,
M. D. Orakhelashvili.

The Transcaucasian Federation consists of three Socialist Soviet Republics:

Republic.	Sq. miles.	Population.
Armenia	15,065	1,339,969
Georgia	25,470	2,135,033
Azerbaijan	33,570	2,463,008
	74,105	5,938,100

Armenia, or Hyastan. (S.S.S.R.A.)

President of the Council, M. S. Hambartsumian.

Armenia occupies the uplands between the Iranian plateau and Asia Minor, and is bounded by the Black Sea on the N., by Kurdistan on the S., by Azerbaijan on the E., and by Turkey on the W. Until the outbreak of the Great War it was shared between Turkey (35,600 sq. miles), Russia (20,587 sq. miles), and Persia (6,518 sq. miles). The rivers Euphrates, Tigris, Aras, Kur, and Tchokrokh take their rise within its boundaries, and at the meeting of the former Turkish, Persian, and Russian boundaries is *Mount Ararat* (17,160 feet), the traditional resting place of "Noah's Ark." In the uplands the climate is severe, but in the valleys and plains the soil is fertile, producing all kinds of cereals, cotton, rice, sesame, hemp, flax, and tobacco. Sericulture (silkworm breeding), sheep-breeding, and fruit growing are capable of great development. Armenia has great mineral resources hardly as yet developed. Naphtha, sulphur, bitumen, and nitre abound, while the mountains yield salt (mineral and in solution), gold, silver, copper,

lead, iron and valuable marbles; there are also numerous hot and cold mineral springs (similar in nature to those of Vichy); more than half the supply of copper from Russia was derived in 1914 from Soviet Armenia, and the value of carpets manufactured in 1914 exceeded 10,000,000 gold roubles. The Armenian Church is the oldest established Christian church, Christianity having been recognised as the State religion in 300, and from the 6th century there is a national language and literature. On account of their religion the Armenians have suffered a general persecution by Islam, particularly in the *vilayet* of Sivas, Bitlis, Diarbekir, Mamuret-el-Aziz, Van, and Erzerum, where massacres have frequently occurred. In 1915-17 there were wholesale deportations and massacres of the Christian population of Turkish Armenia, while the Armenian Christians of Azerbaijan and of Russian Armenia were similarly treated by Turkish and Kurdish hordes. In 1918 the Supreme Council of the Allied Powers recognised the independence of the *Republic of Armenia*. Under the Treaty of Peace with the Allies (May 11, 1920), Turkey recognised the independence of Armenia, with its capital at Erivan. In 1920 a Bolshevik movement set up the *Armenian Socialist Soviet Republic*, on the lines of the Moscow government.

CAPITAL, Baku; population, 65,000. Leninkan (formerly Alexandropol) 43,000.

Georgia, or Sakartvelo. (G.S.S.R.)

President of the Council, M. Ivanoff Kavkazsky.

The Socialist Soviet Republic of Georgia includes two autonomous Republics (Abkhazia and Adjara), and one autonomous Province (Southern Ossetia).

Georgia, a former Kingdom in Transcaucasia with a history of more than 2,000 years as a State, was annexed by Russia in 1801 in violation of the Treaty of Alliance of 1783. At the beginning of 1918 it regained its independence, but in 1921 the country was occupied by Bolshevik forces and became a member of the Transcaucasian Federation. *Soviet Georgia* is bounded on the N. by the Caucasian Mountains, on the S. by Armenia, on the E. by the Republic of Azerbaijan, and on the W. by the Black Sea. There are 970 miles of railway, the trunk line connecting the Black Sea ports of Poti and Batumi with Baku, on the Caspian. Batumi and Baku are also connected by a petroleum pipe-line. The manganese ore beds are the richest in the world, more than one-half of the world's supply being derived from the Tchiatury mines (in the district of Sharopausky) in 1914. There are also abundant supplies of coal (5 million poods in 1914) and over 500 mineral springs partly unexploited. Wine is produced in considerable quantities, and the tobacco plant (chiefly in Abkhazia) yielded 800,000 poods in 1914, a great deal of which was imported by Egypt and produced as local grown. Timber (especially box) is an important industry. Oil wells with unproved quantities of crude oil have been discovered in many places, particularly in the Shirak Steppe. The chief town and seat of government is Tiflis, population 300,000; the administrative centre of Abkhazia being Sukhum (62,000), and of Adjara, Batum (32,000); other large centres being Kutais (50,000) and Poti (21,000).

CAPITAL, Tiflis. Population (1925), 400,000.

Azerbaijan.
(A.S.S.R.)**President, M. Musoabekoff.**

Azerbaijan, on the south-western shore of the Caspian Sea, extends from the Caucasus in the north to Persia in the south, and from the Caspian on the east to Armenia and Georgia. It includes the provinces of Baku, Hanjlin (Elisavetpol), the district of Zakatal and the autonomous territories of Nakhichevan and Nagorno-Karabach. More than 75 per cent. of the people are Muhammadans. The *Azerbaijan Socialist Soviet Republic* entered the Union as a Member of the Transcaucasian Federation on Dec. 31, 1922. The Republic is very rich in minerals (naphtha, magnetic ironstone, and manganese), but oil is the principal industry, concentrated in the Baku region, the production being 466,800,000 poods in 1914, and 213,000,000 poods in 1922-3. Fishing is also important, and 15,000,000 poods of caviare were produced in 1922. The principal crop is cotton.

The CAPITAL is Baku (pop. 460,000) on the shore of the Caspian Sea, the centre of the petroleum industry. Baku is connected by railway with Batumi (Georgia) on the Black Sea, via Tiflis, and with Moscow, via Rostov. Other towns are Hanjlin (60,000), Kuba (14,000) and Nucha (23,000).

IV.—WHITE RUSSIA.**(Byelorussia.)****President (and Chairman of the Central Executive Committee), A. G. Tcheravakoff.**

The independence of White Russia was recognised by Soviet Russia in 1919, and a military and economic alliance was concluded Jan. 16, 1921. The independent republic covers the former government of Minsk and parts of Vitebsk and Moghilev. The political neighbours are Lithuania and Poland on the west, and the Ukraine on the south. The capital is Minsk (pop. 131,530), where there is a University founded by the Soviet Government; other towns are Gomel (87,000), Bobruisk (51,000) and Moghileff (50,000).

CAPITAL, Minsk. Population, 131,530.

V.—TURKMENISTAN.**(T.S.S.R.)****President, M. Atabaeff.**

Turkmenistan is bounded on the west by the Caspian Sea and on the south by Persia with Afghanistan as a south-eastern neighbour. Eighty-five per cent. of the inhabitants are Muhammadan Turkomans, with about ten per cent. Muhammadan Uzbeks and five per cent. Russians of the Orthodox faith. The seat of administration is temporarily at Poltarask (formerly Achabad), other centres being Merv (22,000) and Kericli (20,000). Krasnovodsk is a port on the Caspian and a railway terminus on the Trans-Caspian line.

CAPITAL, Poltarask (52,000).

VI.—UZBEKISTAN.**(U.F.S.R.)**

	Sq. miles	Population
Bokhara	50,000	2,000,000
Khiva	13,640	400,000
	63,640	2,400,000

President, Achun Babaeff.

Bokharalies between Turkmenistan (on the W.), the Kara Kalpak territory of the R.S.F.S.R. (on the N.), and is bounded on the south by Afghanistan. The majority of the inhabitants are Muhammadan Uzbeks. The former capital (old Bokhara) is a station on the Russian Trans-Caspian Railway. The principal products are rice, wheat, fruit, hemp, cotton, silk, and carpets. Exports (mainly to Russia) are agricultural products and silk and cotton manufactures; imports are principally manufactured goods and sugar. The Emirate was abolished in 1920 and the Emir fled to Afghanistan. A Soviet Republic of Bokhara was established and its independence was recognised by Soviet Russia by treaty of March 4, 1921.

Khiva, or *Khorezm*, formerly the Khanate of Khiva, lies between Bokhara and the Kara Kalpak territory of the R.S.F.S.R., and has a population of whom about half are nomads, and nearly all Muhammadans. The country occupies the fertile delta of the Oxus and is highly productive (rice, wheat, cotton, silk, fruit, hemp).

CAPITAL OF UZBEKISTAN, Tashkent (population 700,000). Other towns: Samarkand (106,000); Andijan (80,000), Bokhara (50,000), Kokand (70,000), Namagan (71,000). Khiva has about 20,000 inhabitants.

VII.—TAJIKISTAN.

Tadzhik.—The autonomous Soviet State of the Tadzhik lies between Bokhara (on the W.) and the Kara Kirghiz territory of the R.S.F.S.R., with Afghanistan as a southern neighbour. The inhabitants are largely nomads, and almost all are Muhammadans. The estimated area is 56,108 square miles, with a population of about 2,000,000.

CAPITAL, Stalinalbad; population, 6,000. Other centres, Kojent 38,000, and Dura-Tube 22,000.

BRITISH EMBASSY.

(Soliskaya Naberezhnaya 14, Moscow.)

British Ambassador, His Excellency The Rt. Hon Viscount Chilton, K.C.M.G. (1933)

Counsellor of Embassy, N. H. H. Charles, M.C. £5,000

1st Secretary, E. O. Cooke.

3rd Secretaries, J. M. K. Vyryan; W. G. Walton.

Commercial Counsellor, G. P. Paton, C.B.E.

Archivist and Accountant, G. W. Vincent, M.B.E.

BRITISH CONSULAR OFFICES.

Leningrad—Consul-General, R. W. Bullard, C.M.G., C.I.E.

Vice-Consuls, Leslie Pott; A. J. Cave. Moscow—Consul, T. C. Rapp, M.C.

Pro-Consul, H. V. Bostock.

VENEZUELA.

(Estados Unidos de Venezuela.)

President, Gen. Juan Vicente Gómez, elected June 19, 1931.

Interior, Dr. Pedro Rafael Tinoco.
Foreign Affairs, Dr. Pedro Iriago Chacin.
Hacienda (Treasury), Señor Efraim Gonzalez.
Fomento (Public Development), Señor R. Cayama Martinez.
Public Works, Dr. Luis Velez.

Education, Dr. R. Gonzales Rincones.
War and Navy, Gen. E. Lopez Contreras.
Public Health and Agriculture, Señor H. Toledo Trujillo.

Envoy Extraordinary in London, Dr. Diógenes Escalante, 50, Pall Mall, S.W.1.

Counsellor, Oscar Aguilar.

and Secretary, J. V. Lopes Rodriguez.

Attaché, José Rafael Falcon.

Commercial Agent, Ra'ael José Cayama.

Vice-Consul, C. Gurtubay.

Consul-General, Liverpool, Alivio Parra Marquez.
 Consulates at Birmingham, Cardiff, Glasgow, Newcastle-upon-Tyne, Leith and Hull.

The most northerly Confederation of South America, situated approximately between $2^{\circ}40'$ S. lat. and $12^{\circ}26'$ N. lat. and $59^{\circ}52'$ — $73^{\circ}15'$ W. long. It consists of 20 States and a federal territories. The best authorities calculate the actual present area to be approximately 363,728 square miles. The census of 1925 gave the population as 3,026,878.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia (with which Republic the boundary is in dispute), east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being *Margarita*, which is politically associated with Tortuga, Cubagua and Coche to form the newly constituted State of *Nueva Esparta*. *Margarita* has an area of about 400 square miles.

Venezuela was visited by Columbus in 1498, and in 1499 by Alonso de Ojeda and Amerigo Vespucci, the former naming the Gulf of Maracaibo Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Caracas, and the country remained under Spanish rule until the revolt under *Simon Bolivar*, a native of Caracas, who defeated the Spanish forces in the battles of Pastoquanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolivar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre, Venezuela, Ecuador and Colombia (Upper Peru) achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830, at the age of 47, and his remains were re-interred at Caracas in 1842. Venezuela formed part of the Federal Republic of Colombia from 1822-1830, since which time it has been independent. There have been many revolutions since 1846, particularly in 1849, 1868, 1889, 1891, 1900, and 1908. In 1854 President Monagas liberated the African slaves, and in 1864 President Falcon divided the country into States and formed them into a Federal Republic. The present constitution rests upon the fundamental law of June 13, 1929, under which the government is that of a Federal Republic of twenty autonomous States, a Federal District, and two Territories, with a President elected by the Federal Congress for seven years; a new Con-

stitutional law of 1925 left that position unchanged.

The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picoacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima and on the eastern border the Sierras de Rincote and de Usupamo enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parima contains Yapurana (7,175 feet) and Duida (8,120 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (8,530 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly *llanos*, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the north-western mountains of the republic to its outflow in the deltaic region of the north-east. The Orinoco is navigable for large steamers from its mouth for some 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles further up stream. Among the many tributaries of the main stream are the Ventuari, Caura and (aroui from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are Zulia (290 square miles), south-west of Maracaibo, and Valencia (226 square miles), about 1,400 feet above sea-level in the Maritime Andes. The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot wet season lasts from April to October, the dry cooler season from November to March.

The principal industries are agriculture and cattle raising. The oilfields are of increasing importance, the production being 18,770,000 barrels in 1931, and 19,596,522 barrels in 1932.

The principal imports are cotton prints and shirtings and cotton drill, mainly from the U.K., and hardware, principally from the U.S. The principal articles of export are petroleum (113,201,361 barrels in 1932), coffee (41,218 metric tons in 1932); cacao (15,526 metric tons in 1932); goatskins, asphalt, sugar, hides, and balata. The U.S. is the principal customer.

There are about 680 miles of railway in operation.

Spanish is the language of the country.

Revenue	1931-32. £7,330,518
Expenditure	6,529,014

Counsellor of Legation, Dr. Vojislav M. Jovanović.
Legation, 295 Queen's Gate, S.W. 7.

Secretaries, Vladimir M. Vonkmirovitch;
Dr. Vojislav M. Radovanovitch.
Military Attaché, General Nenadović.

Yugoslavia consists of the former Kingdoms of Serbia and Montenegro and of Croatia and Slavonia, part of the Banat, Bosnia, Herzegovina, part of Carniola, and part of Styria, and has an estimated area of 248,050 square kilometres (94,230 square miles), with a population (Census 1931) of 13,930,918. It is divided (by the Constitution of Sept. 3, 1921) into 9 Banovinas—Dravska, Savska, Vrbaska, Primorska, Drinska, Zetska, Dunavska, Moravska and Vardarska.

Montenegro (Crna-Gora) was, before the Turkish occupation of the remaining territory, a province of the Serbian Empire. Its independent existence ended with the decision of its Parliament (Nov. 29, 1918) to depose King Nicholas and reunite with Serbia. The chief towns are Cetinje (pop. 5,000) and Podgorica.

Pre-War Serbia had no seaboard, but the inclusion of Croatia, Dalmatia and Montenegro in the Kingdom of Yugoslavia gives access to the Adriatic down a lengthy coast. The principal Yugoslav ports are Sušak, Split, Dubrovnik and Kotor, and by an agreement with the Greek Government Yugoslavia has a free zone at the port of Salonika. In 1923 there were 7,285 miles of normal gauge and 3,122 of narrow gauge railway in operation. The Danube forms a great commercial highway, and the tributary rivers Sava and Tisa provide other important shipping routes; the port of Belgrade is now the second busiest on the Danube. The Paris-Istanbul Service of the French Aviation Company (via Prague, Vienna, Budapest) calls daily at Belgrade, which has also regular air services to Bucharest; a national company connects the chief towns with the capital and also maintains services with Vienna and Salonika. The Army on a peace footing consists of 230,000 officers and men, the war strength being about 250,000.

The Greek Orthodox, Roman Catholic, Protestant, Muhammadan and Judaic faiths are recognised by the State; nearly 47 per cent. of the population is of the Greek Orthodox faith. Education is compulsory and elementary education is free. In 1930 there were about 10,000 elementary schools, with 21,000 teachers and 1,000,000 pupils; about 20,000 attend continuation schools, and some 70,000 receive instruction at technical colleges. There are Universities at Belgrade, Zagreb, Ljubljana and Skopje.

The principal industry is agriculture, over 80 per cent. of the population being engaged therein. In 1932 about 2,125,007 hectares under wheat yielded 14,545,319 quintals of wheat; maize (2,625,532 hectares, 47,000,650 quintals), barley (2,175,750 hectares, 3,915,140 quintals), oats (2,42,635 hectares, 2,692,282 quintals), rye (2,49,637 hectares, 2,125,341 quintals); 121,728 hectares are under vines, which yielded 4,387,136 hectolitres of wine in 1932. The live stock in 1930 included 3,730,000 cattle, 2,121,000 horses, 7,735,000 sheep, and 2,700,000 swine. The mineral resources include coal (output 6,000,000 metric tons in 1929), iron, copper, lead, chrome ore, antimony, &c. The principal exports are maize, wheat, timber, live stock and meat products, prunes, eggs, poultry, skins and minerals; the imports are chiefly textile manufactures, machinery, food products and coal.

Gt. Britain & N. Ireland	60,000,000	<i>See pages 627-8.</i>
Isle of Man	121,000	80,000 arable and grass.
Channel Islands	48,000	About 30,000 potatoes, roots, grass, tomatoes.
Irish Free State.....	17,000,000	1,406,000 oats, potatoes, &c.; 2½ mill. hay, 8 mill. pasture.
Canada.....	2,131,000,000	61,000,000 field crops, 700,000,000 forest.
Newfoundland & Labrador	176,000,000	Some oats, barley, hay and potatoes.
Australia.....	1,903,000,000	22,000,000 cropped, of which 14,700,000 wheat (120 mill. sheep).
New Zealand	66,000,000	19,000,000 farmed, incl. 600,000 grain (29 mill. sheep).
Indian Empire.....	996,000,000	180,000,000 food grains, 160,000,000 forest (15½ mill. cattle).
Burma.....	150,000,000	2,000,000 rice, ground-nuts, &c.
Cyprus.....	2,253,000	466,000 wheat, barley, vines, &c.; 448,000 forests.
Malta.....	78,000	33,000 wheat, barley, potatoes and cotton.
Ceylon.....	16,000,000	3,176,000 coconut, paddy, rice, rubber and tea.
Malaya.....	36,000,000	4,300,000 rubber, rice, coconut, pineapples, tapioca, &c.
North Borneo.....	20,000,000	187,000 rubber, rice, sago and pepper.
Union of South Africa...	300,000,000	7,500,000 maize, wheat, oats, sugar, &c.
Rhodesia, North.....	184,000,000	67,000 maize, tobacco, &c. (Europeans' cultivation).
Rhodesia, South.....	96,000,000	420,000 maize, tobacco, &c. (Europeans' cultivation).
Bechuanaland.....	176,000,000	Feeds 420,000 cattle.
Basutoland.....	7,500,000	Feeds sheep, cattle and horses (natives').
Swaziland.....	4,300,000	29,000 maize, cotton and tobacco.
Kenya.....	147,000,000	635,000 maize, sisal, coffee, wheat, tea, &c. (Europeans').
Uganda.....	41,500,000	21,000 coffee, rubber, &c.; 3,000,000 timber.
Nyasaland.....	25,000,000	68,000 tobacco, tea, maize, &c.; 5,000,000 timber.
Somaliland.....	43,000,000	Produces sorghum on coast, cedar forests inland.
Nigeria.....	235,000,000	589,000 palm-kernels, ground-nuts, cacao, 155 mill. forest.
Gold Coast.....	59,000,000	930,000 cacao, yams, cassava, kola, maize, millet, ground-nuts.
Sierra Leone.....	19,800,000	430,000 rice, cassava, yams, sweet potatoes, maize.
British West Indies.....	8,000,000	500,000 cacao, sugar-cane, coconut, &c.
British Guiana.....	57,000,000	126,000 rice, sugar and coconut, also timber, greenheart, &c.
British Honduras.....	5,500,000	5,000,000 timber, mahogany, cedar, &c.
Papua.....	58,000,000	9,000 rubber also cotton and hemp.
Sarawak.....	27,000,000	260,000 rubber.
British Cameroons.....	22,000,000	Rubber, ground-nuts, palm kernels, cacao, bananas.
Palestine.....	6,600,000	360,000 wheat, barley, vines, tobacco, &c.
South-West Africa.....	206,000,000	19,500 maize, also potatoes and tobacco.
Tanganyika.....	235,000,000	1,436,000 maize, sisal, rice, coffee, and 2,000,000 forest.
British New Guinea.....	58,000,000	200,000 coconut, also tobacco, cotton, sisal, coffee, &c.
Sudan.....	645,000,000	1,800,000 millet, cotton, sesame, &c., also timber.

(Villa Borghese, Rome.)

THE International Institute of Agriculture at Rome was founded in 1905 as the result of a Convention made between the representatives of 40 different countries. The number of nations subscribing to the Convention is 72, and the Institute may be regarded as the pioneer of official international institutions, and as the most representative of all. It is estimated that the countries and colonies adhering to the Institute represent over 95 per cent. of the population of the world.

The following is a complete list of the countries that have adhered to the Convention of 1905, and therefore have rights of representation at the Institute, and are pledged to contribute to its funds:—

Argentina.	Italy.
Austria.	Eritrea.
Belgium.	Cyrenaica.
Belgian Congo.	Italian Somaliland.
Bolivia.	Tripoli.
Brazil.	Japan.
Bulgaria.	Latvia.
Chile.	Lithuania.
China.	Luxemburg.
Colombia.	Mexico.
Cuba.	Netherlands.
Czechoslovakia.	Netherlands East
Denmark.	Indies.
Ecuador.	Nicaragua.
Egypt.	Norway.
Estonia.	Panama.
Ethiopia.	Paraguay.
Finland.	Peru.
France.	Poland.
Algeria.	Portugal.
French West Africa.	Rumania.
Indo-China.	San Marino.
Madagascar.	Siam.
Morocco.	Spain.
Tunisi.	Sweden.
Germany.	Switzerland.
Great Britain and	Turkey.
Northern Ireland	United States.
Australia.	Hawaii.
British India	Philippine Islands.
Canada.	Porto Rico.
Irish Free State.	Virgin Islands.
Union of South	Uruguay.
Africa.	U.S.S.R.
Greece.	Venezuela.
Guatemala	Yugoslavia.
Haiti.	
Hungary.	

The essential objects of the Institute are defined in Article 9 of the Convention and may be summarised as follows:—

The Institute, confining its activities to the international sphere, shall:—

Collect, examine and publish, with the least possible delay, statistical, technical and economic information with regard to farming, crop and live-stock production, trade in agricultural products and the prices current on the different markets;

Indicate the wages paid for farm work;

Record any new diseases of crops which may have appeared in any part of the world, showing the countries affected by such diseases, their progress and, where possible, any effective measures for their control;

Study questions concerning agricultural co-operation, insurance and credit in all their

forms; collect and publish all information that may be useful in the various countries for the organisation of systems of agricultural co-operation, insurance and credit;

Submit, should occasion arise, for the approval of the various Governments, measures for the protection of the common interests of farmers, and for the improvement of their conditions.

The Institute has its seat in Rome, in a palace in the Villa Borghese, specially erected through the munificence of H.M. Victor Emmanuel. The Governing Body consists of a General Assembly of Delegates of the adhering Governments, meeting once every two years, and of a Permanent Committee of Delegates, mostly resident in Rome, acting as its executive. Apart from the General Secretariat to which, in addition to the ordinary administrative offices, the Section of Agricultural Legislation is attached, there are special bureaux dealing with General Statistics, Agricultural Science (including Forestry), and Agricultural Economics, respectively.

The Library of the Institute is one of the largest and best stocked of libraries specialised in agriculture, particularly on the statistical and economic side. In addition to purchases it receives a number of gifts from Governments, institutions and from private sources, and all the material is arranged and catalogued in accordance with the most modern systems. Up to the present the growth of the Library has resulted in severe pressure on the space originally provided in the main building. A remedy has now been found in the construction of special premises for which funds have been supplied by a Royal Commission, which administers certain properties on behalf of the Institute. The Library building has now been completed, and was inaugurated early in October, 1933. The installation of all the plant and material will necessarily take a further period to carry out, but it is expected that all will be in working order during 1934. It will then be possible to utilise, with far greater convenience than for some years past, the unique facilities for the study of agricultural problems that the Institute through its Library has to offer and offers freely to all duly accredited students, as well as to the members of its own international staff.

Information on agricultural questions is supplied by the Institute mainly through its various publications, issued in English and French and, in some cases, also in other languages. The regular publications have for many years included two Year-Books, the *International Year-Book of Agricultural Statistics* and the *International Year-Book of Agricultural Legislation*, as also the *International Review of Agriculture*, published monthly, and in four separate sections, dealing respectively with *Agricultural Statistics*, *Agricultural Science and Practice*, *Agricultural Economics and Sociology*; and *Plant Protection*.

A new volume of the Economic Commentary on the Year-Book of Agricultural Statistics, which is issued each year under the title of *The Agricultural Situation*, was published early in the year and covers the agricultural year 1933-34. In general plan it follows closely the lines of its two predecessors, but the chapter on international meetings for the discussion of agricultural problems has on this occasion been

omitted, relatively few such meetings having been held during the period. On the other hand, in view of the financial crisis, which occurred at the beginning of the agricultural year 1931-32, and of its effects on the whole trend of economic life, the chapter relating to the agricultural depression has been extended. A further issue of *Farm Accountancy Statistics*, being that for 1929-30, appeared towards the end of the year. Statistics are given for 20,000 farms belonging to 20 countries, mainly European, but data for the Punjab (and Colonies are this time inserted, and it is hoped that future issues will include more results from overseas countries. An important feature in the current volume is an appendix, in which the representative character of the published data is analysed statistically.

Forestry Statistics have for some years past been given in the Statistical Year book, but the growth of the material led in 1932 to the issue of a separate volume, and in 1933 a quite independent Statistical Yearbook for Forestry has appeared for the first time. The data included have special reference to forest composition and production and to the international trade in timber.

During 1933 the preparation of lists describing experiment stations and similar institutions, together with institutions for training in agriculture, has been continued, and two new volumes have been published, one on agricultural experiment stations in temperate countries and the other on establishments specialising in animal husbandry. A third volume on dairying institutions is in preparation. The Institute also published in 1933, in connection with the World Poultry Congress, a comprehensive monograph under the title of "*L'Anciculture dans le Monde*," in three volumes, dealing respectively with the general world situation and research work, the situation in European countries, and the situation in extra-European countries, in respect of poultry husbandry. In addition a bibliography of tropical agriculture has been issued for a second year, and a monograph "*Coffee in 1931 and 1932*" has been completed for publication in English and French.

The various publications of the Institute may be obtained in London from Messrs. F. S. King and Son, Westminster, or may be ordered direct from the Institute or through any bookseller.

The economic work of the Institute comes under the purview of its expert *Agricultural Economic Committee*, which advises on the economic and statistical programme in its international aspects in general, with special reference to the requirements of the Economic Consultative Committee of the League of Nations. The establishment of this Committee completes the list of advisory bodies required to give the cachet of authority to the Institute's work. The *International Agricultural Scientific Council*, through the expert members of its various Commissions, is in a position to advise on any purely technical questions that may arise, and the *Permanent International Commission of*

Agricultural Associations provides means for ascertaining the views of practical agriculturists. At the same time liaison with other bodies interested in agriculture is maintained by the *International Commission for Co-ordination in Agriculture*.

For general financial and other reasons, including the special work of preparation for the Monetary and Economic Conference, the public activities of the Institute in connection with special Conferences and Congresses were again somewhat curtailed in 1933. Early in the year, however, the Institute was requested to hold a small conference of various important international bodies for the discussion of the agenda of the Monetary and Economic Conference so far as it related to agriculture. In September, hospitality was given to the World's Poultry Congress in the palace of the Institute.

In October, 1934, the General Assembly of the Institute, being the XIth of the series, will take place, the precise date to be fixed later.

The Institute was represented in London at the Monetary and Economic Conference by a Delegation, consisting of the President, Vice-President, and the Delegates of Great Britain and Northern Ireland, India, Argentina, Portugal, the Netherlands and Rumania. Sir Bhupendra Nath Mitra, Delegate of India, acted as Leader of the Delegation, and the Secretary General and the Chief of the Economic Bureau were also present. The Institute contributed a comprehensive documentation in the form of a *Memorandum on the Agricultural Aspects of the Problems before the Economic and Monetary Conference* (London, 1933) with six special appendices bearing the following titles: Report of the Special Advisory Meeting of Representatives of International Agricultural Organisations held at the International Institute of Agriculture on 7-10 April, 1933; Credit Conditions and the Indebtedness of Agriculture in Central and Eastern European Countries; Documents referring to the Project of the International Agricultural Credit Bank; Tariffs and Trade Restrictions (Development of Tariffs and Restrictions on International Trade in Cereals); The Migration Problem in its Relation to Agriculture; Scheme of International Collaboration in the Campaign against Unemployment submitted by Senator De Michelis to the Commission for the Study of European Union in May 1931; Statistical Documentation concerning Wheat and other Cereals.

President: (From October 1933) Principe Ludovico Spada Potenziani (*Delegate of Italy*).
Vice-President: M. Louis-Dop (*Delegate of France*).

British Delegate: H. L. French, C.B., O.B.E. (*Ministry of Agriculture and Fisheries*).

Delegate of the Irish Free State: J. Radcliffe.

Delegate of the Indian Empire: Sir Bhupendra Nath Mitra, K.C.S.I., K.C.I.E. (*High Commissioner for India*).

Delegate of the United States of America: Dr. Henry C. Taylor.

Secretary General: Prof. Alessandro Brizi.

THE WEATHER OF 1932-33.

(1932) *October*.—Very unsettled conditions persisted throughout the month, the most noteworthy feature being the frequent and excessive rains. Cool, northerly winds, accompanied by showers and bright periods, prevailed for the most part, but a trough of low pressure over England caused milder conditions at first in the south and some rain in south-east and east England on the 1st. The 4th was a bright day in south and east England. The fair weather was broken by a depression moving south-east from Greenland. This system caused a period of unsettled conditions until the 10th. Rain was particularly heavy on the 7th and 8th, and widespread strong winds or gales occurred on the 8th. Then followed a period of unsettled weather, with heavy local rain and some bright periods. A notable wet period occurred in England from the 20th-23rd. An inch or more of rain fell at many places in southern England on the 20th and 23rd, and gales occurred locally in the English Channel. From the 26th onwards a series of depressions caused a drop in temperature. Snow fell in Scotland on the 29th, and lay to a depth of a few inches on high ground. Monthly pressure means were everywhere below the normal, ranging from 10.5 mb. at Aberdeen to 3.7 mb. at Calicut. This caused a fairly steep gradient for westerly to north-westerly winds, and in most districts winds from between west and north were unusually prevalent. Local gales occurred on several days. Strong winds or gales occurred on 23 days at the Scilly Isles, and on 22 days at Holyhead and Spurn Head. The mean temperature for the month was below the normal in all districts. The coldest spells occurred around the 4th, and from the 26th to the end of the month. The extreme temperatures for the month were: (England and Wales) 62° F. at Shinfield on the 1st, 25° F. at Bromyard, Appleby and Leyland on the 29th; (Scotland) 61° F. at Kilmarnock on the 21st, 22° F. at Eskdalemuir on the 29th; (Ireland) 66° F. at Ballinacorra and Cork on the 16th, 29° F. at Markree Castle on the 10th, at Armagh on the 25th, at Birr Castle on the 29th, at Mountmellick on the 4th, and at Kilkenny on the 4th and 29th. With the exception of west and south-west Ireland, and at isolated places elsewhere, rainfall was everywhere above the normal, and expressed as a percentage of the normal for the period 1881-1925 the values were: British Isles 128, England and Wales 153, Scotland 169, and Ireland 105. In many parts of Scotland rain was recorded on every day of the month. It was the wettest October at Aberdeen (6.66 ins.) and Arbroath (6.28 ins.) since 1866, at Greenwich since 1882, at Newquay (7.39 ins.) in 40 years, and at Southend in 52 years observations. Thunderstorms were fairly frequent. Sunshine aggregates were variable, well above the normal on the whole in Ireland, below in Scotland, and generally below in England. Some good daily records were obtained, particularly on the 4th, when 20 hours or over were recorded locally in south and east England. Aurora was observed in Scotland on eight occasions, and the solar halo at Oxford on 14 days. A lunar rainbow was visible on the 8th at Lynton, Hampshire. Fog was reported on several days, while it was dense locally in the Glasgow area on the 24th and 30th.

November was unusually dull in England, and dry except in some western and northern districts of Scotland. The unsettled weather of October persisted during the early days of the month. Conditions were very mild with temperatures rising to 60° F. locally in England on the 2nd and 3rd, while heavy rain fell in some places in the west on the 3rd. From then until the 12th, with a slight break on the 8th and 9th, an anticyclonic distribution was maintained over the British Isles. Subsequently the country came under the influence of deep depressions, mostly centred off our northern coasts and moving eastwards. Very disturbed conditions prevailed from the 22nd onwards, with strong winds or gales from between south-west and north-west, and heavy local rain at times. At some places in southern England 7 hours or more of bright sunshine were recorded on the 21st and 28th. Mean pressure for the month was everywhere a few millibars above the normal. The anticyclonic distribution of pressure also accounted for the unusual prevalence of easterly winds. During the period of gales at the end of the month gusts of 80 m.p.h., 75 m.p.h. and 73 m.p.h. were registered at Kirkwall, Lerwick and Bilsdon respectively on the 27th, 78 m.p.h. at Bell Rock, 74 m.p.h. at Dunfanaghy, 72 m.p.h. at Tree on the 26th and 71 m.p.h. at Pendennis Castle on the 30th. The mean temperature differed only slightly from the normal. A warm south-westerly current which spread from about the Azores was responsible for the mildest spell, which occurred during the opening days. The extreme temperatures for the month were: (England and Wales) 64° F. at Rhyl on the 2nd, 21° F. at Rickmansworth on the 22nd; (Scotland) 59° F. at Stonehaven on the 2nd, 21° F. at Dalginis and Eskdalemuir on the 6th, and at Logie Coldstone on the 7th; (Ireland) 62° F. at Kilkenny on the 2nd, 25° F. at Markree Castle, Hazelhatch and Mountmellick on the 6th. The general precipitation expressed as a percentage of the normal was British Isles 77, England and Wales 69, Scotland 85 and Ireland 28. Along the eastern coastal districts of Scotland from Aberdeen to the Borders the month was one of the driest on record locally. Some heavy falls were recorded, and at Kinlochquich and Glenquich there were ten and nine days respectively with more than an inch of rain. Thunderstorms occurred in Scotland during the last week of the month. In England and southern Ireland the month was distinguished by a marked deficiency of sunshine. At Kew Observatory the total was only 26 hours, and at several places it was the driest November on record. Fog occurred fairly frequently in England and southern Scotland. Aurora was observed in Scotland on the 4th, 5th, 16th and 22nd. At Oxford solar haloes were observed on seven occasions, and on the 9th a short sun pillar was noted.

December was very mild after the 12th, and mainly dry in England and northern Scotland. Rain fell at times and was heavy in Scotland on the 1st and 2nd. The 4th was a beautiful day in England, several places in the south recording 7 hours or more sunshine. A small anticyclone, situated south-east of Ireland, on the 5th moved south-south-east and increased in intensity, and

cold conditions were maintained over most of the British Isles until the 12th or 13th. Snow or sleet in small amounts fell daily during this period in the south-east, and on the 12th sleet was reported in the south-west and at the Scilly Isles. Subsequently weather became unsettled and very mild, with pressure high for the most part over central and south-east Europe, and depressions moving north or north-east off our west or north-west seaboard. Very disturbed conditions, with heavy rain and strong southerly winds or gales at times, prevailed in the west and north from the 15th to the 22nd. Meanwhile, over a large part of England very little rain fell and much sunshine was enjoyed locally, particularly between the 18th and 22nd. A very intense depression, centred on the Atlantic west of Ireland, and moving north-east, caused gales in western and northern districts on the 23rd. Mean pressure for the month was everywhere above the normal. Winds were mainly moderate to strong, with gales in many places. At Pendennis Castle there was an almost continuous mean hourly velocity of more than 28 m.p.h. from 9 h. on the 6th to 1 h. on the 12th. Among the highest gusts recorded during the month were 94 m.p.h., 87 m.p.h., 79 m.p.h. and 74 m.p.h. at Lerwick, Butt of Lewis, Edinburgh and Paisley respectively on the 17th, 26 m.p.h. at Kirkwall on the 2nd, and 83 m.p.h. at Lerwick on the 18th and 24th. On the 31st a gust of 96 m.p.h. was recorded at Valentia Observatory; this is a record speed in a gust at that station. Monthly means of temperature were above the normal in all districts. The extremes for the month were: (England and Wales) 60° F. at Llandudno on the 16th and 27th and at Bromley on the 22nd, 19° F. at Newport, Salop, on the 7th; (Scotland) 60° F. at Cupar on the 16th, 12° F. at Dalwhinnie on the 8th; (Ireland) 62° F. at Dublin City and Trinity College, Dublin, on the 27th, 27° F. at Aldergrove on the 31st. The total rainfall expressed as a percentage of the normal was England and Wales 47, Scotland 122, Ireland 138, British Isles 81. With the exception of Cumberland, rainfall in England was markedly deficient, less than 20 per cent. being recorded in Kent, Essex, and parts of Sussex and Berkshire. Among the heavy daily falls were 131 mm. at Borrowdale on the 16th and 103 mm. on the 17th, while at Watendlath 121 mm. and 83 mm. respectively were recorded on the same days. Thunderstorms were reported during the period and to 4th and on the 15th. The last month of a dull year was on the whole sunny. Apart from the east and north of Scotland and in south-west England sunshine exceeded the normal. Fog occurred fairly frequently in England and southern Scotland. Aurora was observed in Scotland on seven occasions and a lunar rainbow was seen at Eskdalemuir on the 4th. Solar haloes were observed at Oxford on 30 days.

THE YEAR 1932 was chiefly distinguished by its lack of sunshine. Other noteworthy features were the extreme mildness of the first three weeks of January, the droughts of February and June, the excessive wetness of May in England and Wales, and of October in eastern Scotland and parts of England, and the exceptional warmth of August in England. For the year as a whole, mean temperature was everywhere a little above the normal, and rainfall was slightly above the normal, except in Ireland. Sunshine

aggregates were below the normal in all districts. January was on the whole very mild. During the last week pressure rose to an abnormal height, and exceeded 30.5 mb. locally on the 26th. February was abnormally dry and exceptionally sunny in western Scotland. By far the highest pressure means of the year were recorded, the excess being roughly 15 mb. to 25 mb. above the normal. March was dull in the northern half of the country and wet in north-eastern districts, but over most of the southern half of the country the month was mainly fair and cool, with deficient rainfall. April was wet and cool and mainly dull, particularly in England. May was cool and unsettled, and excessively wet in England and Wales, with destructive floods in the Midlands and Yorkshire. June was remarkable for its dryness, and was in most districts the sunniest month of the year. July was dull and wet, with widespread thunderstorms, one of the most remarkable being that at Cranwell, in Lincolnshire, on the 11th, when 126 mm. fell in 120 minutes. August was exceptionally warm in England and dry on the whole, but the amount of rainfall was very variable owing to local thunderstorms. There was a small excess of sunshine in south-east England. September was mainly wet, while sunshine was mainly deficient. There were short warm spells about the 2nd, and from the 14th to 17th. October was very unsettled and rather cold, with an abnormal frequency of north-westerly winds. In most districts the month was wet, excessively so in eastern Scotland. November, on the other hand, was dry, except in some western and northern districts of Scotland, with a marked deficiency of sunshine in England and southern Ireland. December, as in 1931, was mild, particularly after the 15th. The extreme temperatures for the year were: (England and Wales) 97° F. at Halesowen, Camden Square, Regent's Park, Enfield and Tottenham on August 16th, 12° F. at Rickmansworth on January 1st and March 13th; (Scotland) 83° F. at Aberdeen on July 10th, 11° F. at Dalwhinnie on March 13th; (Ireland) 61° F. at Newcastle (Wicklow) on July 6th, 18° F. at Markree Castle on February 19th. During the year gales were recorded at Brit of Lewis on 47 days (highest gust 87 m.p.h. on December 17th), Lerwick 41 days (94 m.p.h. on December 17th), Pendennis Castle and Bell Rock 40 days (84 m.p.h. on January 6th and 95 m.p.h. on January 13th respectively). Aurora was observed in Scotland during each month except June, July and August.

(1933) January.—During the first ten days the weather was mild, after which it became colder, and outdoor skating became general for the first time since the cold spell of February to March, 1929. Widespread strong winds and gales from south or south-west occurred on the 2nd and 3rd, while heavy rain fell at times in western and northern districts. Snow or sleet was reported between the 3rd and 6th, and thunderstorms locally (mainly in the west and north-west) between the 2nd and 7th. Temperature was high for the time of year. From the 11th-16th troughs of low pressure passed eastwards over these islands, and from the 17th-19th a shallow depression over England moved north-east and filled up. During this period temperature was rather low and weather unsettled. Fairly good sunshine records were obtained in places on the 11th and 12th. Snow was wide-

spread from the 16th to 18th, and gales occurred on the 24th. From the 20th a period of dry cold weather set in with easterly winds in the south and southerly to south-westerly in the north. Records of sunshine were particularly good from the 25th-28th. This dry spell was broken on the 29th. Snow or sleet fell in many places on the 30th, and snow lay to a depth of from 6 to 9 inches for a short time in the Glasgow area. Glazed frost occurred in the Bristol area on the night of the 30th, and caused many accidents. Gales were reported in the west and north on the 31st and heavy rain fell in parts of Scotland, Ireland and northern England on the night of 31st. Monthly pressure means were everywhere above the normal. Winds were mainly moderate to strong, while gales were reported on several days. (Butt of Lewis 20 days, Bell Rock 8 days, Lerwick 7 days.) Among the highest gusts were: 80 m.p.h. at Butt of Lewis, 79 m.p.h. at Lerwick on the 2nd, 77 m.p.h. at Scilly on the 4th and Dunfarnaghy on the 8th, and 75 m.p.h. at Penderennis Castle on the 4th. Monthly means of temperature were below the normal in all districts. The extremes for the month were: (England and Wales) 60° F. at Llandudno on the 2nd, 11° F. at Rickmansworth on the 23rd; (Scotland) 50° F. at Fort William on the 2nd and at Dunbar on the 8th, 4° F. at Logie Colinton on the 19th; (Ireland) 59° F. at Trinity College, Dublin, on the 2nd, 18° F. at Kilkenny on the 26th. The general precipitation expressed as a percentage of the normal was: British Isles 95, England and Wales 92, Scotland 102, and Ireland 90. Rainfall was rather variable, for while more than twice the normal fell at Ettrick Manse in Selkirk, little more than half the normal was recorded along the east coast of England. One of the outstanding features of the month was the excess of sunshine. At Birmingham it was the sunniest January since records began in 1857. At some isolated stations, however, there was a decided deficiency. At Wakefield it was the dullest January in 34 years' records, apart from 1909 and 1917. Aurora was observed in Scotland on nine occasions, and at Oxford solar haloes were noted on ten days, and the Zodiacal Light was observed on the 22nd.

February.—Mild, unsettled weather persisted during the first nine days, with pressure high over southern Europe, and depressions passing east or north-east along our north-western or northern seaboard. Strong winds and heavy rain occurred at times, and widespread gales were recorded on the 1st and 2nd. A change occurred between the 9th and 10th. There was a sharp fall in temperature, and heavy rain and local thunderstorms occurred in south-east England. There ensued a spell of moderately cold weather, but really wintry conditions only began on 17th, when pressure became highest in east Greenland. On the 23rd a small depression appeared in the polar current over the extreme north of Ireland. This disturbance moved south and increased in intensity, causing widespread heavy snowstorms, and strong, squally winds and local gales. A thaw set in in the south about the 25th, and spread slowly northwards. Precipitation was very heavy in places from the 24th to 26th inclusive. Mean pressure for the month was mainly above the normal in the west and north, and a little below in the south-east and east. Broadly speaking, winds from between south and east prevailed until

the 10th, when a northerly type of weather set in, and persisted on the whole until the 23rd. Subsequently winds from between south and east were experienced in most districts. Among the highest gusts were 89 m.p.h. at Lerwick and 75 m.p.h. at Kirkwall on the 13th, and 77 m.p.h. at Butt of Lewis and 71 m.p.h. at Bell Rock on the 2nd. Monthly temperature means were generally above the normal. The mildest weather occurred during the first two weeks, when temperatures of 58° F. or 59° F. were recorded at several places. The extremes for the month were: (England and Wales) 59° F. at Worksop and Sidmouth on the 6th, at Rhyll on the 1st, at Colwyn Bay on the 4th, and at Cannington on the 6th, 11° F. at Sprowston on the 20th; (Scotland) 57° F. at Edinburgh on the 2nd and at Dunbar on the 8th and 9th, 11° F. at Dalwhinnie on the 24th; (Ireland) 59° F. at Trinity College, Dublin, on the 8th, 20° F. at Glasnevin, Dublin, on the 23rd. The general precipitation of the British Isles expressed as a percentage of the normal was 120, while the values for the constituent countries were: England and Wales 160, Scotland 123, and Ireland 109. Rainfall was below the normal at some places in east and south-east England, and also at Holyhead and some places in Scotland. Elsewhere there was an excess, some places had more than 200 per cent., while locally, in Yorkshire, more than 300 per cent. was recorded. During the heavy snowstorm of the 23rd-26th drifts of 12 to 14 feet occurred on the moors at Castleton. At Huddersfield, where the average depth was 30 inches, it was reported as the heaviest fall in living memory. Heavy rain and melting snow caused severe flooding in many districts. In England, southern Ireland, and western Scotland the month was on the whole sunny but in other districts sunshine totals were below the normal. It was the sunniest February at Southport since before 1881. An unusually sunny period occurred from the 13th-23rd. Fog was reported between the 3rd and 6th, 24th to 26th, and on the 28th. Aurora was observed in Scotland on nine occasions, and at Oxford solar haloes were observed on six days and the Zodiacal Light on four occasions.

March was an exceptionally warm and sunny month with notably high day temperatures. During the first week the weather was very unsettled, but a period of abundant sunshine and high temperatures set in by the 8th. This fine weather began to break up about the 15th, and rain fell generally with the advance of a system of depressions south-eastwards from Greenland to Scotland and Ireland. Towards the close of this unsettled period cold winds from north-west and north swept across the country during the night of the 19th to 20th, to be followed by southerlies on the 21st and another spell of mainly fine anticyclonic weather with high day temperatures. This only changed during the last two or three days of the month to a period of local showers and bright intervals. With the exception of central and eastern parts of England and in the Shetlands mean pressure was below the normal. During the first ten days strong winds and gales were frequent in the west, and another windy spell for most districts extended intermittently from the 15th to about the 23rd. Among the highest gusts were 77 m.p.h. at Butt of Lewis on the 15th, and 79 m.p.h. at Penderennis Castle and 78 m.p.h.

at Scilly on the 19th. It is extremely rare to find such a persistent tendency for high day temperature as was experienced in nearly all districts this month. At Kew and Greenwich temperature failed to reach 50° F. only on the 20th. In the Greenwich record, that goes back to 1847, there is no other month with such persistent warmth by day. About the 27th the nights were very cold. At Rickmansworth on the 28th a reading of 19.2° F. in the early morning was followed by one of 66.9° F. just before 1.30 p.m., a rise of nearly 48° F., while at Thetford the range was 49° F. on the same day. At Southport it was the warmest March in 62 years record. The extremes for the month were: (England and Wales) 69° F. at Attleborough, Birmingham (Sparkhill), Park End, South Farnborough and Welshpool on the 28th, 17° F. at Thetford on the 28th; (Scotland) 68° F. at Gordon Castle on the 28th, 21° F. at Balmoral on the 21st; (Ireland) 60° F. on the 28th at Kilkenny, 20° F. at Glasnevin on the 2nd. Precipitation, expressed as a percentage of the normal, was British Isles 101, England and Wales 119, Scotland 64, and Ireland 99. In the English counties north and west of Yorkshire there was a general deficiency, while around Inverness only about 20 per cent. of the average fell. Most of the largest falls occurred between the 2nd and 8th, among these being 1.77 ins. at Holne (Devon) on the 2nd, 1.64 ins. at Treacastle (Brecon) on the 5th, and 1.50 ins. at Inverchaulin (near Firth of Clyde) on the 8th. Thunderstorms occurred in the south on the 6th and 7th, and again locally near the middle and end of the month. Over England, Wales, eastern Ireland and most of Scotland the duration of bright sunshine was above the average, while in many places in the south and east of England it approached the normal for June. Fog was frequent locally in the north of England and southern half of Scotland. Aurora was observed in Scotland on seven occasions, the display on the 19th being the most widely reported. At Oxford the solar halo was observed on 18 days and a lunar halo every evening from the 3rd to the 9th; parhelia and arcs of contact frequently accompanied the haloes.

April was mainly dry in the north-west of Scotland, and warm apart from a cold spell between 17th and 22nd. Weather conditions were dominated over the greater part of the British Isles during the first ten days by an anticyclone, which moved slowly eastward. Heavy rain fell in north and north-west Scotland on the 2nd and 8th. During this period temperatures of about 70° F. were recorded in east and south-east England. On the 11th and 13th a depression moved east across the British Isles, but anticyclonic conditions were re-established on the 13th and persisted in the south. A change occurred on the 16th, and a spell of cold weather with wintry showers prevailed. It was particularly cold around the 19th. On the 22nd heavy rain fell in south-west Ireland and south-west England, and unsettled conditions spread later throughout the country. Unsettled weather, with occasional rain and bright sunshine, prevailed until the end of the month. Thunderstorms occurred on each of the last three days. Pressure means were everywhere in excess of the normal, ranging from 2.2 mb. at Stornoway to 6.5 mb. at Portland Bill. Winds were mainly between south and west, but a

spell of north-easterlies prevailed from 17th-21st. Among the heaviest gusts were 78 m.p.h. at Kirkwall and 71 m.p.h. at Lerwick on the 12th. Mean temperatures for the month were everywhere above the normal. In eastern Scotland it was the mildest April since 1924, and at Eastbourne the mean maximum temperature, 54.5° F., was the highest in April since 1921. The extremes for the month were: (England and Wales) 73° F. at Norwich, Bungay and Rickmansworth on the 11th, and at Eufield on the 8th, 21° F. at Thetford on the 14th, at Chopwell-wood on the 21st and at Rickmansworth on the 23rd; (Scotland) 68° F. at Stonehaven on the 9th, 20° F. at Wollsele on the 21st; (Ireland) 67° F. at Rathfarham on the 7th and 27° F. at Aldergrove and Kilkenny on the 22nd. The general rainfall over the British Isles and constituent countries, expressed as a percentage of the average was 75; England and Wales 70, Scotland 95, Ireland, 65. A notable feature of the month was the drought experienced over the wide area in the Midlands, many stations reported an absolute drought from the 1st-22nd inclusive. Several heavy daily falls of rain occurred, the heaviest being in west and north Scotland on the 2nd; on that day 79 mm. was measured at Glenquoich, 91 mm. at Glen Elvie, 105 mm. at Kluchoquoich, and 165 mm. at Dunhilldale, Loch Carron. Easter daily falls than the latter have only been reported for a rainfall day in Scotland on four occasions since 1865. During a thunderstorm on the 29th at Fyvie Castle hail fell and was lying to a depth of six inches in places. Sunshine aggregates were, with the exception of south-east England, below the average, and in places was as much as 1½ hours a day below. The month was sunnier than usual in south-east England. At Eastbourne the total of 247 hours was the highest for April since 1921. In southern England the Easter holiday period was exceptionally bright; at Totland Bay, Isle of Wight, the total for the four days, Friday 14th to Monday 17th, was 44½ hours, the largest amount for any Easter since 1900. Aurora was observed in Scotland on six occasions during the month, and at Oxford solar haloes were noted on 17 days, and a sun pillar on the evening of the 19th.

May was a warm but dull month, with frequent thunderstorms. Weather conditions during the first week were mainly dominated by a depression which moved northward. Rain was reported daily from the 1st-10th, and thunderstorms occurred at times. After the 10th weather was rather unsettled in the west and north, and mainly fine, warm weather in the south and east. During the period 22nd-29th thunder was frequently reported, and heavy local rain occurred at times, but good sunshine records were also obtained. On the 30th a large depression on the Atlantic spread eastward and caused fairly heavy rain in the south of Ireland. Pressure was generally a little below normal, except in the extreme north-east of Scotland. Strong winds occurred at times during the unsettled period from the 2nd-10th, and again on the 25th. An easterly gale was recorded locally in England and Ireland around the 2nd. In Scotland no gales were recorded, and the month was in many areas one of the quietest Mays on record. For the third month in succession mean temperature in all districts was well above the normal, a notable feature being the mild nights. The warmest spell occurred gener-

ally between the 19th and 23rd. The extremes for the month were: (England and Wales) 82° F. at Stroud Green, London, on the 23rd, 59° F. at Rickmansworth on the 15th; (Scotland) 73° F. at Perth on the 21st and at Ruthwell and Kilmarnock on the 22nd, 55° F. at Dalwhinnie and Balmoral on the 2nd; (Ireland) 72° F. at Waterford on the 28th, 33° F. at Markree Castle on the 14th, 26th and 29th. Rainfall over the British Isles as a whole was below the average, the percentage values of the constituent countries being: England and Wales 97, Scotland 69, Ireland 114 and the British Isles 94. Monthly totals were very irregular owing to numerous thunderstorms. Among these may be mentioned those of the 2nd, 6th, 9th, 22nd, 23rd, 28th and 29th. The storm on the 23rd was accompanied by heavy downpours in Surrey: at Brookwood 66 mm. fell in 3½ hours, and at Woking 58 mm. in about a hour. The month was decidedly dull, sunshine aggregates being appreciably below the normal in all districts except the Channel Islands. Conditions improved during the latter part of the month, and after the 18th good daily records were often recorded. For example, 15½ hours at Trece on the 30th, 14½ hours at Scilly and Valentia on the 22nd and at Falmouth and Scilly on the 23rd. Fog occurred frequently during the month. The aurora was observed in Scotland on the 1st and 2nd, and solar haloes were noted on 17 days, and a sun pillar was reported at Hastings on the 15th. A small but violent whirlwind crossed the Observatory grounds at Eskdalemuir from north to south at 13h. 22m. G.M.T. on the 14th.

June was mainly sunny and warm, with frequent thunderstorms in Great Britain, but dull on the whole in Ireland. The month opened with rather unsettled weather in the west and north, meanwhile fine, warm weather was maintained in the east of England. By the 4th the fine weather had spread throughout the country, and temperatures of 85° F. and over were registered at many places in England and Scotland between the 4th and 7th. Some rain and local thunder occurred in the west and north on the 7th. Temperature fell rapidly around the 9th and 10th, and weather became unsettled with local thunderstorms. On the 12th and 13th appreciable rain fell in the east and south-east of England. Strong, squally winds and local gales prevailed between the 16th and 18th. The period 14th-26th was notable for the thunderstorms which occurred daily in England. With the approach of an anticyclone from the Atlantic a spell of northerly or north-westerly winds and mainly fair weather occurred after the 26th. Pressure was everywhere below the normal for the month, and winds were mainly northerly or north-westerly. Among the highest gusts were 65 m.p.h. at Butt of Lewis on the 16th, 57 m.p.h. at Scilly on the 18th and 56 m.p.h. at Bidston on the 17th. Mean temperature for the month was above the normal in all districts, especially in east and north of Scotland. The warmest days occurred between the 4th and 7th, and the coldest around the 11th and 18th. The extremes for the month were: (England and Wales) 86° F. at Camden Square on the 5th, 32° F. at Rickmansworth on the 12th; (Scotland) 86° F. at Gordon Castle on the 4th and at Forres on the 7th, 28° F. at Dalwhinnie on the 12th; (Ireland) 78° F. at Malin Head on the 4th and at Hazlehead on

the 4th and 7th, 42° F. at Aldergrove and Hillsborough on the 12th. Rainfall over the British Isles and constituent countries as a whole was below the normal and expressed as a percentage of the normal were: British Isles 90, England and Wales 92, Scotland 85 and Ireland 94. Thunderstorms were frequent and heavy rain was recorded at several places, including 60 mm. in an hour at Ovington, Hants, on the 15th, 60 mm. in less than an hour at Poltmore, Devon, 43 mm. in just over an hour at Dartford, Kent, on the 22nd and 10 mm. in four minutes at Winchester on the 26th. Several people were killed by lightning, while at Bootle a cyclist was drowned by the floods on the 20th. Snow was recorded at Chopwellwood on the 12th and at Giggleswick and Bellingham on the 17th. With the exception of Ireland, sunshine aggregates were above the normal. A daily average of over 10 hours was registered at Jersey. The first eight days were exceptionally sunny in eastern districts of England—at Croydon 12½ hours were recorded, while at Norwich there was an average of 13 hours a day from the 4th to 8th. On the 12th a few places recorded 16 hours or more, while Lerwick had 17 hours on the 24th. Fog was reported on several days, mainly between the 1st-8th, 13th-16th and 20th-25th. Solar haloes were noted at Oxford on 16 days, the one on the 17th having very bright parhelia.

July was a notably warm month, with much sunshine, and was very dry in eastern England. The month opened with light variable breezes of an anticyclone. The second hot spell of the summer commenced in Scotland on the 2nd and reached the south of England the next day, and temperatures above 80° F. continued until the 8th, when widespread rain was followed by a spell of generally unsettled weather, with winds from the south-west. An improvement occurred about the 15th, and then commenced a long spell of mainly fair and very warm weather in the south, but wet at times in the north. The wet weather became general on the 17th, a day which at first was extremely hot over most of England. No general improvement occurred until the 30th, when a wedge of high pressure began to spread north-eastwards over the British Isles. With the exception of the north of Scotland monthly pressure means were slightly above normal. The period of highest winds occurred towards the end of the month. Among the highest gusts were 67 m.p.h. at Liverpool and 66 m.p.h. at Southport on the 31st, while a mean hourly speed exceeding 40 m.p.h. occurred at several places on that day. The month was notable for the number of unusually high temperatures in England and Scotland. In Scotland it was the warmest July for over 30 years. In addition to the frequency of hot days, the absence of cold nights was also notable, while in Scotland it was the first month for a long time during which there was no ground frost. The monthly temperature mean was everywhere well above the normal. The extremes for the month were: (England and Wales) 94° F. at Cambridge and Margate on the 27th, 36° F. at Rickmansworth and Usk on the 1st; (Scotland) 88° F. at Ruthwell on the 5th, 40° F. at Wick on the 29th; (Ireland) 86° F. at Kilkenny on the 4th, 44° F. at Kilkenny on the 30th. General precipitation of the British Isles expressed as a percentage of the normal was 90; the corresponding figures for the constituent countries

were: England and Wales 82, Scotland 108 and Ireland 90. Rainfall was unevenly distributed, for while it was the wettest July (170 per cent.) at Edinburgh since 1926, only 34 and 35 per cent. fell at Scarborough and Skegness respectively. Thunderstorms were frequent in southern Scotland and northern England. Among the heaviest daily falls were 63 mm. at Giggleswick on the 7th, 54 mm. in less than an hour at Aspley Guise on the 13th and the same amount in about half an hour at Woolmans Wood on the 21st. Except in the north of Scotland, sunshine aggregates were above the normal, and stations recorded daily values during the month of from 14 to 16 hours on several days. Fog was dense around the Shetlands early in the month, and was rather frequent along the south coast of England during the second half of the month. Solar haloes were observed at Oxford on 14 days, and parhelia with the halo on the 12th.

August was an unusually warm and sunny month, and with the exception of north-west Scotland and locally in north-west Ireland it was notably dry. Mainly fair and warm weather continued during the first five days of the month. From the 5th to 6th shallow troughs of low pressure passing across the country caused occasional rain, mainly in the north and west; meanwhile over the greater part of England the weather continued fair and very warm. Thunderstorms occurred in southern England on the 11th and 12th. From the 14th to 19th depressions moving eastward off our northern seaboard caused a spell of unsettled weather generally. After the 19th these disturbances took a south-easterly track, and conditions continued unsettled. After the 24th a period of very warm, sunny weather ensued over most of England, but unsettled conditions, with rain at times, prevailed in Scotland and Ireland. Heavy rain, locally in Scotland and Ireland on the 27th and in Wales and north-west England on the 28th, was associated with a secondary depression which developed off the west of Ireland and moved east. Temperature during this second warm spell reached its highest point in eastern districts of England on the 28th or 29th. Except in extreme north and north-west Scotland monthly pressure means were everywhere above normal. Gales occurred on several days during the month, and among the highest gusts were 64 m.p.h. at Kirkwall on the 8th and Lerwick on the 28th, 62 m.p.h. at Dunfanaghy and 66 m.p.h. at Butt of Lewis on the 17th. For the sixth successive month mean temperature was well above the normal in all districts. In Scotland and in many parts of England it was the warmest August since the record August of 1921. At Greenwich Observatory the mean temperature, 66.5° F., was the highest for August since 1841 apart from the value of 67.5° F. attained in August 1921. At New Observatory there were 12 days with a maximum temperature above 70° F. The extremes for the month were: (England and Wales) 95° F. at Rickmansworth, Camden Square and Wisley on the 6th, 37° F. at Rickmansworth on the 17th; (Scotland) 84° F. at Kelso on the 5th, 32° F. at Dalwhinnie on the 12th; (Ireland) 82° F. at Mountmellick and Kilkenny on the 5th, 30° F. at Maikree Castle on the 7th. The general precipitation of the British Isles expressed as a percentage of the average for the period 1852-1925 was 51, and for the constituent countries England and

Wales 38, Scotland 75 and Ireland 58. As far as can be ascertained at present the value 38 for England and Wales is the lowest for August since 1828, when it was only 20. In Scotland rainfall was unevenly distributed. Locally in the east it was the driest on record, and in some places in the west it was the wettest. Thunderstorms were fairly frequent, particularly from 5th-6th, 10th-14th, and 20th-23rd. Torrential rain caused severe flooding in Scotland and Ireland on the 27th. Unusual falls in short periods included 43 mm. in 1 hour at Fowey on the 11th and 26 mm. in 20 minutes at Yaxley, near Eye, Suffolk, on the 6th. Abundant sunshine was one of the noteworthy features of the weather of the month, and it was only at a very few isolated places that less than the normal was recorded. At a number of places the monthly aggregate was the highest on record for August, and in many parts of England there was no single day with a complete absence of bright sunshine. Local fog occurred frequently, particularly in England. Aurora was observed at Baltasound on the night of the 20th, and at Oxford solar haloes were noted on 15 days.

September was an exceptionally warm and sunny month, and was dry except in southern and eastern districts of England. The month opened with an anticyclone situated off our south-west coasts, and maintained warm, fair weather. On the 6th a new high pressure system joined up, and anticyclonic conditions prevailed until the night of 11th-12th. A depression moving up from the Bay of Biscay caused rain in the south of England, and heavy falls occurred on the 12th and 13th. This break was only temporary, however, and anticyclonic conditions were re-established over most of the country until the 16th. Weather then began to deteriorate, and from the 19th to 26th depressions passing across the country caused unsettled weather, with heavy local rain at times, accompanied locally by thunder. Thereafter anticyclonic conditions were renewed generally, with occasional rain in the south. Mean monthly pressure was generally above normal, while winds were mainly north-east or east, and light to moderate in force. Gales occurred in exposed places on the 5th, 10th, 14th, 17th, 20th and 24th. Among the highest gusts were 57 m.p.h. at Butt of Lewis on the 18th and at Bell Rock on the 24th, 56 m.p.h. at Pendennis on the 20th and 55 m.p.h. at Spurn Head on the 14th. Mean temperature was again well above the normal. In Scotland it was the warmest September since 1898. The fair weather of the first week provided, as a rule, the highest temperatures of the month, while the coldest nights occurred at several places during the period 14th-16th. The extremes for the month were: (England and Wales) 85° F. at Attenborough on the 4th, 20° F. at Rhayader on the 16th; (Scotland) 79° F. at Stouchan on the 6th, 30° F. at Dalwhinnie on the 10th and 28th; (Ireland) 79° F. at Hazelhatch on the 3rd, 32° F. at Birr Castle on the 14th. The general precipitation expressed as a percentage of the average was: British Isles 70, England and Wales 64, Scotland 41 and Ireland 45. At several places in Scotland it was the driest September since 1894, but in England it was very variable, for while considerable areas had less than the normal, over 200 per cent. was recorded at some places in the southern counties. Among the heaviest daily falls were: Fleet (Home Wood) 131 mm. in four

hours, Monkton Park, near Chippenham, 109 mm., most of which fell in two hours, and Crookham 108 mm. These falls occurred during a thunderstorm on the 26th. Abundant sunshine was a notable feature of the month, and aggregates were above the normal in all districts. At several places the highest aggregates since records began were set up, including Valentin

since 1880, and Bailluacurra, co. Cork, since 1865. Fog occurred frequently, particularly during the first week, on the 11th, 12th, 15th, and between the 23rd and 30th. A waterspout was observed on the afternoon of September 23rd over Eday Sound, Orkney. Aurora was observed in Scotland on 12 occasions during the month, and at Oxford solar haloes were noted on 9 days.

STORMS AND FLOODS IN 1932-33.

(1932) *October 1.*—The waters of a cloudburst, rushing down a narrow cañon, near Bakersfield, California, in a solid wall 40 feet high, swept away 15 bridges and 100 feet of the Southern Pacific and Santa Fé Railways. Over 80 persons were drowned. 5. A severe thunderstorm which occurred in Palestine caused much damage in Rishon-le-Zion and Tel Aviv. 12. About 150 houses were unroofed by a hurricane which swept the village of Laudenbach, situated in the tourist centre of the Bergrasse.

November 6.—The Grimsby trawler *Golden Deep* was lost, with 13 of the crew, during a severe gale on Soro Island, off the north-west coast of Norway. 8. Strong winds and heavy rain over Jamaica caused much damage to banana plantations. It is estimated that at least 2,000,000 trees were destroyed. 9. A cyclone, with a wind velocity of 125 m.p.h., swept Cuba, and about 2,000 people were killed. Many sugar mills were destroyed. 14. Thirty-five thousand houses were flooded in Tokyo, and several hundreds wrecked by a severe typhoon. The wind reached a force of nearly 100 miles an hour at the height of the storm.

December 6.—The Japanese destroyer *Sawarabi* foundered in a storm, and over 100 of the crew were lost. 12. Torrential rains caused the Douro and Tagus to overflow. Much flooding occurred in the low-lying areas of Oporto. 18. Much flooding occurred in France and Spain following torrential rains. 30. Considerable rain, which was very welcome, fell in Central and Southern Arabia.

(1933) *January 3.*—Heavy weather in the North Atlantic caused much delay to shipping. 4. Damage to the Norwegian fishing industry estimated at more than £50,000 was caused by a violent storm off the western coast of Norway. 10. At Calgary a dust storm darkened the skies for several hours, covering the city with a layer of dirt. 13. Rain fell throughout Central Iraq for the first time since last May. The winter rains usually start early in November. 24. A north-easterly gale, with a snowstorm, raged in the Black Sea and in European Turkey. 29. Storms and flood tides did extensive damage along the New England coast, smashing sea walls and washing nearly 100 houses out to sea.

February 11.—There was a heavy snowstorm throughout the Eastern States of America. In New York City 30,000 men were employed clearing the streets. 24. For the first time since February, 1929, Canada was covered in snow to a depth of half an inch.

March 2.—A dense sandstorm in the Suez Canal delayed all shipping. 6. The Hull trawler *Lord Deramore* foundered off Hornø, near Vardø, in a snowstorm. A tornado struck Leopoldville, Belgian Congo. The roof of the prison was blown off. 12. One of the planes

belonging to the Mount Everest Expedition was lost in a sandstorm. 15. A tornado swept Nashville (Tennessee). Thirty-six persons were killed and 200 injured. 21. Floods occurred throughout the valley of the Ohio River. At New Richmond the water was 10 feet deep in the streets. 29. At least 10 people were killed and scores of people injured by a tornado which swept East Texas and extended into Arkansas. High winds were accompanied by violent thunderstorms.

April 4.—During a severe thunderstorm the United States naval airship *Akron* crashed into the sea 15 miles off Barnegat Light, on the New Jersey coast. Over 70 of the crew were lost. 8 and 9. A severe hurricane passed over the northern end of the Central Islands of the New Hebrides, doing serious damage to property and crops. 26. A hurricane travelling at 125 miles an hour struck Bermuda, doing considerable damage in a few minutes. Many houses were unroofed.

May 4.—Twenty-one persons were killed in a tornado which swept over Western Alabama. "The heaviest cloudburst in living memory" occurred in Tipper Allgan, Southern Germany.

June 1.—Heavy rains in South-West India caused the worst floods for 50 years in the State of Travancore. 2. A heavy hail and thunderstorm broke over Rome and continued for an hour, and many streets were flooded. 4. The monsoon in Lower Burma was particularly heavy this year, and extensive floods occurred in the Pegu district. 7. Hail and electrical storms caused damage in Eastern and South-Western Ontario. The hailstorm was the severest for over 30 years, and over £20,000 damage was done. 11. Torrential rain did great damage in Anatolia, and many parts of the country were flooded. 15. Storms which swept the district surrounding San Sebastian caused serious damage in several towns by flooding. 21. At Bombay the monsoon set in with heavy rain. 23. During a violent storm at the Lake of Varese, Italy, a waterspout burst on the shore and let fall a rain of fish. As the result of heavy rains during the month much flooding occurred in the Yangtze Valley. 27. A hurricane, accompanied by violent rainstorms, struck South Trinidad. The estimated damage was \$3,000,000. Several people were killed.

July 3.—The hurricane reached Cuba, and considerable damage was done. 11. A severe thunderstorm broke over the Aiguilles Rouges, near Chamonix. 14. A brief but violent tempest fell upon the Isola Bella, the world-famous island in Lake Maggiore. 19. Heavy rains caused serious floods throughout southern Germany. 22. Four persons were killed in a heavy storm which broke over the Pirna district in Saxony.

August 1.—Heavy rain (13 ins. in 45 hours) fell in Bombay and Western India, causing severe floods. The rain continued, and at Poona was the heaviest for many years. 3. Cherry Creek, which runs through Denver, Colorado, overflowed as the result of a cloudburst, and much flooding occurred. Burma experienced severe floods, as a result of severe monsoon weather, along the railway between Rangoon and Mandalay. 12. Baroda had 15 inches of rain in 18 hours. The Vishwamitri River overflowed its banks, and low-lying areas were from 4 to 10 feet under water. Violent thunderstorms in many parts of Austria brought a prolonged drought to a close. 14. Much damage was caused by violent thunderstorms which broke over Paris and the surrounding country. 16. Severe floods occurred in Kingston, Jamaica, as a result of the worst thunderstorm for some time past. 23. The Yellow River caused havoc in Honan, where over 500 villages in the district of Hwahsien were flooded and 300,000 people were homeless. A severe gale swept the Atlantic coast from

Norfolk, Virginia, to New York. Business was brought to a standstill by the heavy rain in Washington. Seven inches fell during the day. Forty-seven people lost their lives, and the damage was estimated at \$20,000,000.

September 1.—A severe hurricane caused many deaths and considerable damage in the West Indies. The wind reached a force of 120 miles per hour. 4. A hurricane and great wave struck Southern Texas, resulting in extensive damage to property and loss of life. 22. Tampico, the great northern port of Mexico, was practically "wiped off the map" by a hurricane which visited it, and raged for 12 hours. The wind blew at the rate of 106 miles per hour and never dropped below 80 miles per hour. Torrential rain caused much flooding. 28. Severe storms swept through Provence, causing floods in many places, and interfered with road and railway communications. 30. The River Loire rose nearly 8 feet owing to violent rainstorms near Charolles, and the Tarn rose 15 to 20 feet above its summer level.

LONDON PASSENGER TRANSPORT ARBITRATION TRIBUNAL.

Columbia House, Aldwych, W.C. 2.

The Tribunal is appointed by the Lord Chancellor under the London Passenger Transport Act, 1933, to determine certain questions arising out of the transfer to the London Passenger Transport Board of transport undertakings and the conferring of powers on the Board by that Act.

President, Joshua Scholefield, K.C.

Members, Sir James Martin, M.B.E., J.P., F.S.A.A., Sir Philip Nash, K.C.M.G., C.B.

Clerk (Part-time Appointment), Paul C. Davie

LANGUAGES OF THE U.K.

GIRLS' LIFE BRIGADE (Inc.).

An organisation founded by the National Sunday School Union in 1902, with the supreme purpose of keeping girls in close touch with the Church and Sunday School, and of training them for useful and noble Christian womanhood. Its four-fold programme covers every phase of a girl's life: Spiritual, Physical, Educational and Social. This interdenominational-temperance Movement has an international membership which is rapidly increasing. — *Headquarters*, 56 Old Bailey, London, E.C. 4.

LONDON FEDERATION OF BOYS' CLUBS Incorporated. (FOUNDED IN 1887.)

Patron: H.R.H. Prince Arthur of Connaught, K.G.

President: The Right Hon. The Lord Desborough, K.G.

The objects of the Federation are: (a) To consolidate and extend the important work of Boys' Clubs in London. (b) To promote competitions and friendly intercourse between the members of affiliated clubs. (c) To promote opportunities for those interested in the management of London Working Boys' Clubs to interchange opinions as to the best way of conducting them. There are now 170 Clubs affiliated—the total membership of these clubs, of boys between 14 and 28, amounting to approximately 15,000. The Federation is almost entirely dependent upon voluntary subscriptions, although a certain amount of support is obtained from affiliated Clubs by means of registration fees and entrance fees for competitions. — *Offices*, 222 Blackfriars Road, S.E. 1.

BRITISH ASSOCIATION.—The annual meeting of the British Association for the Advancement of Science was held at Leicester from Sept. 6 to Sept. 13, 1933. The President was Sir Frederick Gowland Hopkins, F.R.S., who succeeded Sir J. Alfred Ewing, and delivered an inaugural address on "Some Chemical Aspects of Life," in which he reviewed the recent triumphs of biochemistry. He showed with a wealth of illustration that "in passing from its earlier concern with dead biological products to its present concern with active processes within living organisms, biochemistry has become a true branch of progressive biology. It has opened up modes of thought about the physical basis of life which could scarcely be employed at all a generation ago." The President asked the question, so important for biology, "Can the living organism be adequately treated as a physico-chemical system?" To this question a cautious answer was given. He claimed only that on the chemical level the activities of the organism can be fully interpreted in physico-chemical terms alone, and added that there are other and higher levels of organisation where it is by no means certain that physico-chemical concepts will suffice.

The Presidents of the various sections, and the subjects of their addresses, were as follows: *A*, Mathematics and Physics, Sir Gilbert Walker, "Seasonal Weather and its Prediction"; *B*, Chemistry, Prof. H. Robinson, "Natural Colouring Matter and their Analogues"; *C*, Geology, Prof. W. G. Fearnside, "A Correlation of Structures in the Coalfields of the Midland Province"; *D*, Zoology, Dr. J. Gray, "The Mechanical View of Life"; *E*, Geography, Lord Meston, "Geography as Mental Equipment"; *F*, Economics, Prof. J. H. Jones, "The Gold Standard"; *G*, Engineering, Mr. R. W. Allen, "Some Experiences in Mechanical Engineering"; *H*, Anthropology, Lord Raglan, "What is Tradition?"; *I*, Physiology, Prof. E. D. Adrian, "The Activity of Nerve Cells"; *J*, Psychology, Prof. F. Aveling, "The Status of Psychology as an Empirical Science"; *K*, Botany, Prof. F. E. Lloyd, "The Types of Entrance Mechanisms of the Traps of *Utricularia* (insectivorous plants)"; *L*, Education, Mr. J. L. Holland, "The Development of the National System of Education"; *M*, Agriculture, Dr. A. Lauder, "Chemistry and Agriculture."

The Meeting in 1934 will be held at Aberdeen on Sept. 5-12, under the Presidency of Sir William Hardy.

APPLES IMPROVED IN COLOUR.—A method of improving the colour of dessert apples after picking, by means of a process called "sun-dewling," is described by Mr. H. Goudie in the "Journal of the Ministry of Agriculture." The fruit, eyes upward, is packed on trays lined with clean wood wool or moss and placed in an exposed position, preferably facing south, but protected from birds and slugs. Water is then sprayed over the fruit, which must not be allowed to become dry at any time during the treatment, or shrivelling will set in. Exposure at night forms part of the treatment; if frost occurs it should be washed off the fruit before the sun's rays reach it. Colouring will probably be effected after ten days, and the resulting fruit can then be stored in the usual way. The keeping quality of "sun-dewled" apples is improved, and they show a pronounced resistance

to store-rot troubles. Cox's Orange Pippin, Ellison's Orange, Allington Pippin, and Laxton's Superb have been treated successfully, but apples with a greasy skin do not respond, and others, such as Worcester Pearmain and Norfolk Royal, are apt to develop a bleached appearance. The maximum cost is one shilling per cwt.

ARMOURPLATE GLASS.—Messrs. Pilkington Brothers, Ltd., of St. Helens, have produced an armourplate glass, which, they claim, will bend and twist before it will break, and take hard knocks and withstand the heat of the oven. An elephant weighing $3\frac{1}{2}$ tons was invited to test a piece of the new armourplate glass. It refused, so a lorry was substituted which weighed $3\frac{1}{2}$ tons, plus a 5-cwt. chain, a 1-cwt. sling, and the weight of several men sitting on it. This weight was suspended from a piece of armourplate glass 44 ins. by 24 ins. by $\frac{1}{2}$ in. thick. To see what the glass would stand, other men were added to the load. It took twelve without giving way, but the thirteenth man broke the glass.

ATMOSPHERIC POLLUTION.—Sir Frank Baines, in a paper read before the Smoke Abatement Society, dealt with the effects of atmospheric pollution on buildings, vegetation, and public health. While he was Director of Works and Buildings at H.M. Office of Works he had exceptional opportunities for studying the effects on national buildings of impurities in the atmosphere due to the burning of coal, and for estimating what it costs the nation in deterioration of buildings and repairs due to this cause alone. He gave this cost for the last 25 years as a minimum of 55 million pounds sterling. All legislation hitherto devised to cope with the contamination of the atmosphere, he said, had failed to deal with sulphur gases, the greatest destructive agents of all. To these agents he attributed the rapid deterioration of the stonework of the Houses of Parliament, Westminster Abbey, and other great national buildings. Sedimentary stones are peculiarly subject to the attack of atmospheric sulphuric acid formed by the action of moisture on sulphur effluents; but even the surface of granite in buildings is completely destroyed by this acid. Bricks, cement, lime mortars, metal, paints, and composite materials of all kinds vary in susceptibility to this attack, but the general effect is to make it probable that the readings of history in all our national monuments will be rendered unintelligible.

ATLANTIC NINE MILES DEEP.—A new Atlantic depth of 44,000 feet, almost nine miles, has been discovered by Dr. Paul Bartsch, of the Smithsonian Institution, while carrying out a marine expedition at Nares Deep, 75 miles north of Porto Rico. The Nares Deep has not been sounded since the *Challenger* expedition, commanded by the British explorer, Sir George Nares, in 1870-74. Nares, using hempen rope, discovered depths of 27,972 feet, which remained for many years the only authenticated record. The Bartsch expedition's discovery sets a new world's record for ocean depths. Previously the greatest known depth was reported by the German cruiser *Endeavour*, which announced a depth of 34,426 feet in the Pacific between Celebes Island (Dutch East Indies) and Nagasaki (Japan). The range between the bottom of the

ocean and the highest point on land (Mount Everest) is now 73,442 feet, or $13\frac{1}{4}$ miles.

BAOTERIA IN AEROLITES.—The presence of living bacteria deep inside aerolites is reported by Prof. Charles B. Lipman, of the University of California. After scrubbing several aerolites with soap and water and treating them with mercuric chloride of superoxol, he soaked them in alcohol and finally subjected them to flame in order to destroy any micro-organisms which might be on the surface or in cracks of the aerolites. Then, under sterile conditions, he ground them to powder. In nine out of twenty-four cultures made with this powder he obtained globose bacteria, and in all the aerolites found organic nitrogen on which they might feed. In explaining how these germs had survived their fiery journey through the sky Prof. Lipman said that the heat generated by a meteorite passing through the earth's atmosphere was not sufficient to kill all bacteria, as the passage is made so fast that the interior of the piece is relatively cool, although the exterior may be glowing.

BALLOON NEARLY TWELVE MILES UP.—After soaring into the stratosphere to what is claimed to be the greatest height ever attained by man (19,000 metres, or approximately 12 miles), the Soviet balloon "U.S.S.R." landed safely at Kolomna, about seventy miles from Moscow, on the afternoon of Sept. 30. The balloon had a capacity of 250,000 cubic feet, and a diameter of 222 feet. The temperature inside the gondola at a height of 22 miles was 72° F.; outside it was 88° F. below freezing. If the instruments registered correctly the balloon would appear to have set up a new world's altitude record, surpassing that of Professor Piccard by over a mile. Professor Piccard ascended from Zurich in August, 1932, reaching a height of 16,202 metres (10.72 miles), or 2,799 metres below the altitude claimed for the Soviet balloon.

BIRDS IN A CITY SANCTUARY.—Mr. Eric Hardy has completed a day-to-day census of the birds of the Liverpool Cathedral wild birds' sanctuary, which was established in 1927 in an old quarry, now a cemetery, in the heart of the city slums and five miles from the nearest open country. Thirty species are recorded, including the house-sparrow, starling, robin, blue tit, hedge-sparrow, song thrush, blackbird, wren, greenfinch, domestic pigeon, great tit, mistle-thrush, chaffinch, rook, jinnel, redwing, herring-gull, common gull, kestrel, jackdaw, coal-tit, yellow-hammer, goldcrest, chiffchaff, willow-wren and whitethroat, the first twelve of which nest. The goldcrest has become a regular spring passage migrant since the establishment of food tables, though the first specimen was recorded in March, 1932, while the willow-warbler soon established itself as a regular passage migrant in spring and autumn.

BRAGGITE.—The first new mineral to be discovered by X-ray methods of investigation has been identified at the Natural History Museum, South Kensington, among a series of minute crystals presented by the firm of Potgieteraarst Platinum, Limited, from their workings in the Transvaal. Its principal constituents are platinum and palladium, and it has been named Braggite, in honour of Sir William Bragg.

CAVE HUNTING IN DERBYSHIRE.—The research committee of the British Association appointed to explore the caves in the Derbyshire district reported at the Leicester meeting that the excavation of the Pin Hole Cave, Creswell Crags, had been continued by Mr. Leslie Armstrong. Breccia was removed from the whole area of the passage on the east side of the main chamber and in the trefoil-shaped terminal chamber, revealing four large cavities in the rock floor, one coinciding with the width of the passage and extending seven feet along it. These were entirely filled with cave earth of Monstesian age, which yielded the greater portion of the skull and jaw of a young mammoth with complete dentition, and two large fragments of the lower jaw of a giant deer. The large cavity showed evidence of human occupation in a small hearth and a stone pounder, animal bones, split and charred, and crude artefacts of quartzite and crystalline talgamite. Similar tools were found in the smaller cavities at the rear of the chamber. Several work-d bone tools included a bone knife and two awls.

CAVE PAINTING IN THE PYRENEES.—M. Norbert Casteret, while exploring in the Pyrenees, discovered the prehistoric painting of a horse in a cave near the village of La Bastide, Hautes Pyrénées. At the entrance of the cave were intact Magdalenian hearths, and on the walls were a number of engravings and polychrome paintings, including human figures, and as the central object a polychrome painting of a horse. The horse is described as "superb," and is an artistic production comparable with the famous horse of the Altamira cave at Santander. The figure is more than six feet long, and is executed in red with black muzzle. The mane is erect, the eye, ear and nostril being delicately engraved. High lights are indicated on shoulders, stomach and flanks.

CHARCOAL GAS.—Experiments with charcoal gas as a substitute for power oil have been successfully concluded in Australia, and it is suggested that as a result the primary producers of the Commonwealth may be saved millions of pounds and a new and valuable industry established. It has been shown that while it now costs 3s. 6d. an acre to operate a kerosene-driven tractor hauling a seven-furrow plough, the cost of charcoal gas to do exactly the same work is 4s. 4d. Further, the efficiency of tractors made specially for charcoal power is increased by 25 per cent. A gum tree, eight feet in diameter, was converted into 21 tons of charcoal at a cost of £222. 6d. a ton. As 24 lb. of charcoal gives the power of one gallon of kerosene, the tree, therefore, yielded the equivalent of 3,360 gallons, which, at the country rate of 2s. 3d. a gallon, is worth £378. Sump oil has been proved to last 300 hours in charcoal-using tractors, compared with only 60 hours in kerosene-driven tractors, of which there are thousands in daily use in Australia.

CHIMNEY SMOKE MEASUREMENT.—Major C. E. Prince, in a lecture to the Junior Institution of Engineers, on the practical application of light-sensitive apparatus, described the effects produced by a beam of light when projected on vapours, the particles of which, like drops of water, have reflective and refractive powers. The most useful effect for observation is the

deflection or scattering of the beam. In the case of smoke, the interruption of the light by the particles of carbon gives the easiest and best method of measurement. Major Prince showed apparatus in which a beam projected through smoke and then on to a light-sensitive element gave a continuous quantitative record on a moving chart of the diminution of light due to the smoke. One difficulty was to interpret the readings in terms of a definite unit, as the cut-off varies with the depth of the column penetrated by the light. The problem is of importance, as it gives a method by using indicating or recording instruments for proving or refuting a contention that excessive smoke had been allowed to issue from industrial chimneys. The present method of visual observation takes little or no account of the size of the chimney, and consequently of the volume apart from the density of the issuing smoke. It neglects also the direction of the wind and its effect on the apparent density of the smoke. The density of smoke at a given distance should be defined more clearly, and by using a selenium or a photo-electric cell this is possible.

CHROMADOR STEEL.—Messrs. Dorman, Long & Co. have announced the successful production of a new and improved quality of structural steel, to be sold under the name of "chromador" steel. It has been evolved as the result of nearly ten years of continuous research at the company's Middlesbrough research department. Chromador steel, it is stated, is a high-tensile steel suitable for all structural purposes. It has at least 50 per cent. greater strength than the usual quality, with much greater resistance to corrosion, whilst its price is only 20 per cent. in excess of that of mild steel. The researches which led to its production began with the production of a silicon high-tensile steel for use in the Sydney Bridge.

COLD RECORD.—A new record of artificially acquired cold has been reached by Prof. W. J. de Haas, assisted by Dr. E. C. Wiersma and Prof. H. A. Kramers, in the Kamerlingh Onnes laboratory at Leyden. They announced that they have obtained a temperature only eight-hundredths of a degree above absolute zero, which corresponds to about 491 deg. of frost in the Fahrenheit scale. This temperature is the lowest ever reached by man. Kamerlingh Onnes himself was the first to liquefy helium, and reached a temperature of 0.82 deg. K. by reducing the vapour pressure of liquid helium. Using the same method, his colleague, Prof. Keesom, who was the first to solidify helium, reached 0.71 deg. K. By another method Prof. Haas and Prof. Kramers got down to a temperature certainly below 0.57 deg. K. The same experimenters have now got to only 0.08 deg. above the absolute zero, where a body would have no heat at all, and where all atomic motion would cease. At very low temperatures metals appear to lose their specific heat and their electrical resistance, and a current can go round and round a circuit for days with no apparent diminution of energy.

COMET STRIKES THE EARTH.—Dr. F. A. Mallon and Dr. William Schriever, of the University of Oklahoma, have put forward the theory that between 200,000 and 1,000,000 years ago a giant comet, larger by one-third than Halley's comet,

struck the earth in what are now the States of North and South Carolina. The comet was smashed to pieces a ter it had devastated an area of about 200,000 square miles. This, it is urged, is the most possible explanation of the elliptical depressions, averaging half a mile in length, which are to be found in numbers in the Carolinas. Dr. Mallon and Dr. Schriever have photographed the depressions from the air and measured them on the ground. They point out that the long axes of all the elliptical depressions are, as far as can be seen, parallel, running from north-east to south-west; that elevated rims completely encircle some of the depressions; and that there is a general increase of ellipticity with size. These facts and many others, they say, seem to permit the interpretation that the depressions were made by a shower of meteorites striking the earth at an angle.

ECHOMETER SOUNDING FOR FISH.—At a meeting of one of the Marconi companies in London it was stated that at least 350 British trawlers had placed orders for a device called the Echometer, which gives the depth of water under a ship and the hard or soft nature of the bed of the sea. By indicating the depth of water below, it enables the fisherman, from his own experience and knowledge of the various fishy tribes, to draw his own conclusions as to the particular variety he may expect to find in any spot where he happens to be. The apparatus is extremely simple in operation. Soundings can be obtained instantaneously merely by pressing a button, and the presence of this gear on board ship undoubtedly encourages the taking of soundings frequently, even during the most adverse weather conditions. Fifty per cent. of the losses of vessels have, it is stated, hitherto been caused by strandings and kind ed causes, many of which might have been prevented by the use of apparatus capable of giving soundings instantaneously and in quick succession.

EGYPTIAN TEXTS REVEALED BY INFRA-RED.—The British Museum has been making experiments to decipher illegible texts by means of infra-red photography. The first attempts were made on papyrus, and a number of very much discoloured Greek texts written on this material were photographed with encouraging results. Entirely fresh ground was then broken by experimenting with early Egyptian texts on leather, which have hitherto been impossible to read at all. The leather had curled and bubbled into a dark mass on which letters could be seen, but too dimly and too sparsely to be deciphered. A fragment about 20 in. by 6 in. was photographed first on an ordinary panchromatic plate, then on an ordinary panchromatic plate with a red screen, and finally on the new infra-red plate. While the red screen gave a slightly more distinct appearance to the leather, it was still impossible to read, but with the infra-red plate the writing became as clear as when it was first written. These results encouraged the Museum authorities to have the whole of this particular text on leather photographed on infra-red plates. In each instance the text became perfectly legible. It is written on 12 pieces of leather, all of roughly the same size, and the contents have been found to be a religious text, presumably of the same nature as the Book of the Dead, dating from somewhere in the second millennium B.C.

"EGYPT'S" GOLD RECOVERED.—During the summer of 1933 salvage operations were continued to recover the gold from the *P. & O. liner Egypt*, which was sunk in collision in 1922, at a depth of 66 fathoms, 75 miles south-west of Ushant. The chief diver, Signor Mario Raffaelli, devised an apparatus for recovering this treasure by means of suction. It consisted of a strong steel cylinder about 4 feet in diameter and 12 feet in length overall, weighing more than four tons. It is capable of withstanding greater external pressure than that which exists at a depth of 400 feet—namely, 120 lb. to the square inch. At the top it is closed. At the bottom a circular glass, 10 in. in diameter, is sealed to the cylinder. The glass is less than half an inch thick, but strong enough to withstand the enormous pressure. When struck by a detonator, operated electrically from the salvage vessel, the glass is shattered. The pressure at 400 feet causes a violent inrush of water, which carries with it anything within reach. A simple device inside the cylinder prevents any objects sucked up from falling back into the bullion-room. At its first trial the tube recovered more than 6,000 sovereigns, several small bars of gold, and one bar of silver, weighing more than 10,000 ozs.

ELECTRIC "GRID" COMPLETED.—When the electricians climbed down from a 70-foot-high steel tower near Fordingbridge, on the outskirts of the New Forest, on Sept. 5, 1933, the "grid" system of the Central Electricity Board, which is to carry light and power to every corner of Great Britain, was completed. The five-and-a-half years' scheme has cost £27,000,000 and provided employment for 200,000 workmen. Altogether there are 26,265 towers (pylons), with 4,000 miles of transmission lines, 2,894 miles representing lines operating at 132,000 volts, the remainder operating at 33,000 and 66,000 volts. The majority of the 26,265 towers are from 70 feet to 80 feet in height and average 6,500 lb. in weight, but much taller and heavier ones have had to be used for river crossings. Those linking up the grid south of the Thames with Dagenham, which are 487 feet high and weigh about 290 tons each, are the largest of their type in the world. Altogether the 273 transforming and switching stations in the grid will have a transforming capacity of 11,000,000 horsepower. The national transmission system has been split up into nine main areas. Towards the end of 1934 the whole system will be working, carrying a wholesale supply of electricity to almost every corner of Great Britain. It is estimated that the grids will be loaded to the extent of 70 per cent. in 1935 and fully loaded in 1940, when the output of electricity will be 25,000,000,000 units.

ELEPHANT TUSKS.—The trustees of the British Museum (Natural History) have become possessed of an exceptionally fine African elephant tusk, weighing about 212 lbs. It is one of a pair which belonged to a very old elephant killed by an Arab in the Kilimanjaro district many years ago. The tusks were purchased in Zanzibar for 5,000 dollars by an American firm and were exhibited in New York for a period. After two years they were sent to London, and were then found to weigh 226½ lbs. and 216 lbs. respectively, each tusk having lost about 10 lbs. in weight owing to the ivory drying. The heavier tusk was purchased for the Museum in 1901, and

the smaller one has now been acquired. The pair are thus now together again. Each of the tusks exceeds 10 feet in length. These are the heaviest tusks known, the next best tusks being one of 198 lbs. owned by Major Powell Cotton and one in the collection of the late Sir Edmund G. Loder, which weighs 184 lbs.

EVEREST FLIGHT.—The Houston air expedition to Mount Everest succeeded on April 3 in its object of flying over the peak of Mount Everest. The decision to make the flight was taken on the advice of the Indian Government Meteorological Station at Purnea, which reported winds of 57 m.p.h. velocity, without undue bumpiness, at 33,000 feet altitude. Air-Commodore Fellowes, the leader, made a preliminary reconnaissance in his Puss Moth machine before making the final decision to start. The flight, beginning at the Lalbalu aerodrome, occupied three hours, over a distance of 160 miles, including two circuits of the peak, and reached more than 31,000 feet altitude, and actually cleared the top by only 100 feet. The two machines, a Houston-Westland and a Westland-Wallace, flew in company and carried out a concerted programme of duties. It was impossible to adhere to the prepared scheme of observations from landmarks owing to a heavy dust haze extending up to 19,000 feet. The crews also met with severe down currents due to the deflection of the west wind over the mountain, causing a loss of altitude of more than 1,500 feet in a few seconds in one case. The crews were afterwards examined by the expedition's doctor, who found that they were tired, but not unduly exhausted.

FINGER-PRINTS ON COLOURED BACKGROUNDS.—Prof. Henry Rose and Mr. G. G. Winslow, of University College, Nottingham, have invented a method of bringing out finger-prints on a multi-coloured or highly patterned background, which should be of considerable service to the police in the detection of criminals. Hitherto, if a lunger left his finger-prints on an article of an ordinary colour it was quite easy to photograph them after the article had been dusted with powder. But if finger prints were left on a highly-coloured article it was found that when this was photographed the reproduction of finger-print characteristics was not at all clear and could not be definitely used by the police. Therefore the culprit escaped. Prof. Rose and Mr. Winslow discovered that if a fine powder of anthracene or phosphorescent zinc sulphide is sprinkled on the ridge of an imprint on a highly-coloured article and then exposed to dark ultra-violet rays, the powder retains the ultra-violet light. It thus becomes phosphorescent, and when a photograph of the article is taken the phosphorescent light negatives the highly-coloured background, and the finger-print ridge characteristics are clearly reproduced. The phosphorescent powder has also been found useful in the police in the detection of forged notes. The phosphorescent rays show up certain characteristics in a genuine note which fail to appear on a forged one.

FIVE-THOUSANTH OF A SECOND MEASURED.—A clock more accurate than the earth itself, independent of the earth's motion and of gravitation, is being tested at the Natural Physical Laboratory. It consists of a wooden box containing a metal rod, mounted on insulating material

and surrounded by a vacuum, which vibrates in its own natural period, that only a change in temperature can affect. Nothing more is required to ensure perfect time than to keep it at exactly the same temperature. Outside the vacuum, and to prevent any passage of heat across it, runs a stream of water perpetually maintained at the same temperature. Second signals can be taken from the clock with such accuracy that, when transmitted to a special chronograph, time observations can be made to within one five-thousandth of a second.

FLOOD-LIGHTING AND BIRD LIFE.—Flood-lighting on land seems to have given rise to the same problems as lighthouses at sea, the birds in both cases being attracted to or dazzled by the light, so that they strike blindly against the structure. Since the great marble shaft of the Washington monument at Washington has been flooded with strong light after dark, small birds have been found dead at its base in the mornings. Several hundreds were picked up during the southward migration, some merely stunned, but others killed outright, or so injured that they died. It is not likely that the destruction of the birds will result in the withdrawal of the flood-lights, for not only do these add to the beauty of the monument, but they also serve as a guide and a warning to aeroplanes, which in approaching the commercial air-port just across the Potomac River were incommoded by the proximity of a pinnacle 555 feet high.

GLASSHOUSES DISINFECTED WITH SULPHUR.—Investigations have been made by Mr. W. H. Read and Mr. O. B. Orchard, of the Chestnut Research Station, into the use of burning sulphur in disinfecting vacant glasshouses. Such a method has often resulted in damage to a subsequent chrysanthemum crop, and the injury could not be traced to any fungal, bacterial, or insect pest. It has now been shown that the scorching and wilting of the plants is due to zinc sulphate, formed on the overhead galvanised wires and painted surfaces, and conveyed to the plants in drops of condensation water. Confirmation of the cause of damage was obtained by the production of similar injury when solutions of zinc sulphate were applied directly to the plants, 1 part of the salt in 300 of water being the maximum amount tolerated without visible injury resulting. No trouble was experienced if a lead or barium paint were substituted for "zinc white" or if the atmosphere were kept very dry. The substitution of a fumigant such as naphthalene or formaldehyde is to be preferred. The use of sulphur as a dusting powder, on the other hand, is quite safe, as it is only when burnt that the formation of zinc sulphate takes place.

HORNED TOAD AT THE ZOO.—The Zoological Society in London has become possessed of a horned toad, or "crying frog." This creature is a native of northern Argentina and Paraguay, where it is known as the "Escuerzo." It is one of ten species noted for their singular coloration and habits. The coloration is protective, and of considerable beauty. The greenish-yellow background is relieved by large dark green patches on the back, decreasing in size on the flanks. Each of these isolated patches is surrounded by a narrow line of white and yellow dots, interspersed with lines of rusty

brown or red, producing a carpet-like pattern perfectly concealing the half-buried body. If there is not sufficient green vegetation the toad throws earth upon its back by the aid of the hind feet, and at the same time the skin wrinkles and assumes a duller coloration. Extremely sluggish, it lies in wait for its victims, which include smaller members of its own species, as well as frogs, which are said to form its staple diet. Horned toads are said to inflate the body when angry, and to hop backwards and forwards uttering a succession of loud cries, hence they are also known as "crying frogs." As the cause of their excitement is removed they slowly deflate the body and relapse into silence.

INFLUENZA VIRUS ISOLATED.—That the primary cause of influenza is a filter-passing virus is the conclusion reached as a result of experiments carried out by three British doctors—Dr. Wilson Smith, Dr. C. H. Andrews and Dr. P. P. Laidlaw—at the National Institute for Medical Research. They discovered that ferrets, which were used for the first time in this line of research, are susceptible to infection with human influenza. In this way they isolated the virus of the disease, which is so small that it will pass through the pores of unglazed porcelain. It was also found that ferrets which had recovered from the disease were thereafter immune from it, and that the serum of human convalescents was capable of neutralising the virus of the ferret disease.

IRAQ PIPE LINE.—A pipe-line is being laid, at a cost of £30,000,000, by the Iraq Petroleum Company from the Iraq oilfield at Kirkuk to the Mediterranean. The object of the undertaking is to avoid the dues of the Suez Canal, which must be paid by the tankers that have hitherto brought the produce of the Anglo-Persian oilfield from Basra through the canal to the west. There are two lines of pipes, one running 620 miles to Haifa in Palestine, the other running about 540 miles to Tripoli in Syria. They run together from the oilfield as far as Haditha, on the Euphrates, and there they diverge. For the greater part of the way the line is constructed of 24-inch steel pipes, but in certain places, in order to regulate the pressure, it is carried in two pipes of 10 inches or 8 inches. At intervals, pumping stations will give the necessary impetus to the westward flow of the petroleum along the pipes, and tanks will take off the overflow if more is coming through the pipes than the adjacent station can handle.

LARGEST GRANARY IN SOUTH AMERICA.—The largest granary in South America has been built by Messrs. Henry Simon, of Manchester, for the Buenos Aires Great Southern Railway at the port of Bahia Blanca, Argentine, at a cost of about £1,000,000. The plant consists of an unloading station for the discharge of grain from the railway wagons, a ferro-concrete granary of 80,000 tons capacity, a loading jetty and shipping galleries. For the transport of the grain there are 120 conveyors, having more than 12 miles of conveyor and elevator belting. The whole plant is driven electrically, current being supplied from a sub-station to some 240 electric motors of an aggregate horse power of about 20,000. While the grain can be unloaded continuously at the rate of 1,000 tons

an hour, on the outgoing side six ocean-going ships can each be loaded simultaneously at the same rate.

LIBRARY ROBOT.—The London School of Economics is the first institute in this country to adopt the robot book-carrier, an American invention intended to simplify library work. In all establishments where the departments are far removed from the library there is a waste of time in conveying books to and from readers. The new apparatus does this automatically and speedily. It is worked by electricity, and the carriers, which respond to the pressing of a button, convey the reader's filled-up form direct from his department to the library, whence the book required is forwarded to him by the librarian, who presses another button at his desk. The only thing the machine does not do is to pick the book from the shelves and replace it there. The books are carried in perpendicular or horizontal shafts according to the structural requirements of a building, and may be taken underground to premises on the other side of the street. The machine does not eliminate the librarian, but it cuts out all the intermediate labour of fetching and carrying books to and from readers.

LONDON FARTHER FROM NEW YORK.—Once every 24 hours London moves 63 feet farther from New York, like the end of a stretched elastic band. The distance depends on the position of the moon, according to a paper read before the Association for the Advancement of Science by Mr. Alfred Loomis and Dr. Hylan Stetson, of Ohio Wesleyan University. Sometimes, they say, the Atlantic Ocean is stretched 63 feet wider by the moon. There is, according to them, a flexible bump on the earth's surface, caused by the moon, which travels round the globe every 24 hours, making New York farther apart from London at one time of the day than at another. The bump, which stretches solid rock as though it were rubber, was discovered by the difference—sometimes of one-tenth of a second—in time signals, determined from the stars, and sent out from Greenwich Observatory and from the Naval Observatory in the United States.

LONDON SUBSIDENCE.—The influences involved in the subsidence of London have been enumerated in a paper by Capt. T. E. Longfield, published by the Ordnance Survey. It finds in the first instance that there is a general and gradual lowering of the land surface in the south-east of England, of which there is some evidence from the level of Roman remains of habitation. There is a more local subsidence of the London area, especially in central London, of which there is measurable evidence at least since 1865. This appears to be confined to the thickly built-over areas where gravel or alluvium overlies the clay, and may be due to the water-proof covering of stone, cement and asphalt that allows the underlying surface to drain and so contract. The seasonal subsidence and uplift caused by changes in the water-content of the London clay is evidenced in the disturbance in walls after a long dry spell. Subsidence is also caused by the draining or pumping of water and sand from the gravel, which is known to disturb adjacent buildings, and there is a rhythmic land movement due to fall and rise of tide. Records show

that Waterloo Bridge and the County Hall, Westminster, thus rise and fall. Underground tunnelling may cause local sinking but not a widespread subsidence.

METEOR DUST AT 500,000 MILES AN HOUR.—What is believed to be the first definite evidence of the arrival of meteors from outside the solar system is reported by the Joint Telescopic Meteor Survey of Harvard and Cornell Observatories. Great streams of meteor dust were observed, some of which appeared to be travelling at fully 140 miles a second, fast enough to encircle the earth in less than three minutes. A speed of this magnitude definitely implies that the meteor dust could not have come from within the solar system. Other meteors have at various times been suspected of having an outside origin, but definite proof has been lacking. It is also stated that on very clear nights about ten times as many meteors can be seen through the telescopes used as with the naked eye. The minute size of the particles of this meteor dust can be judged from the fact that the smallest of visible meteors is estimated to be no larger than a grain of sand.

MOTH THAT CHEWS TOBACCO.—A new tobacco pest in the United Kingdom has recently caused serious alarm in the trade, as its ravages have inflicted losses of nearly £100,000 in 12 months. It is the *Ephestia fluitella*, or cacao moth, brownish grey in colour and scarcely half an inch across with its wings extended. It has an overwhelming preference for bright-leaf, kiln-cured tobacco. Mr. H. S. Woodington, of the Imperial College of Science, has discovered methods of dealing with the pest. He said *Ephestia* was a moth which was to be found out of doors in the warmer parts of Europe. They had records of its association with *cacao*, with which it had actually entered this country, but in 1915 it was found on cured tobacco in Russia; it was next observed in Bulgaria, and in 1929 in London warehouses. Since then it had been found in East and South Africa and America. One way of dealing with the pest was by "reconditioning," which consisted of subjecting the tobacco to steam. If done thoroughly, this would kill the moth. It could also be frozen out. Another method was fumigation. But these methods only killed the pest, which would not be eradicated until all countries took legislative action, and unrestricted imports of infected tobacco from abroad were forbidden.

MUSK-RAT MENACE.—The regulations under the Destructive Imported Animals Act, which have been made to control the distribution of the musk-rat in this country, have been carried out with considerable success. Earl de la Warr, Parliamentary Secretary to the Board of Agriculture, stated in the House of Lords that in the 700 square miles of Shropshire where trapping operations had been carried on, 2,053 musk-rats had been killed, in Sussex 125 had been captured, in Surrey 22. The greatest number caught in a week in Shropshire was 117 (week ending March 25, 1933), and since then the numbers had fallen, so that with 28 trappers at work the weekly average had decreased to 22. The Ministry of Agriculture was satisfied that the menace generally had been much reduced, and that there was now no necessity to introduce new machinery to deal with the matter. In

Scotland the evidence pointed to the presence of musk-rats in considerable numbers only in the counties of Perthshire and Stirlingshire. The cost of the campaign during the last financial year was £2,873 in England and about £1,340 in Scotland. The Irish Free State Department of Agriculture announced that a musk-rat had been shot near the mouth of the Nenagh River. About four years ago a pair were imported into Ireland, but in the course of a few weeks escaped from confinement. A campaign against the pest was to be undertaken.

NOISE SCALE FOR ARCHITECTS—Following on the experiments in the measurement of noise, which were described in WHITAKER'S ALMANACK in 1932, the Department of Scientific and Industrial Research has issued a "sensation scale" of the intensity of sounds in the ear. The scale, which is of common noises and typical localities, is as follows:—

Standard rooms and localities.	Intensity above threshold in decibels.	Common noises
	120	(Threshold of feeling).
Aeroplane cabin.....	110	Aeroplane engines at 10 ft.
Printing press-room	100	Express train at 12 ft.
Tube train	90	Pneumatic drill at 20 ft.
Typing-room	80	Motor horn at 20 ft.
Fairly noisy restaurant	70	Average busy street, London.
Ordinary room with conversation	60	Loud conversation.
Fairly quiet city office	50	Average quiet street, London.
Average suburban house-room	40	Quiet conversation.
Very quiet room.	30	Average quiet street, suburbs.
	20	Whisper, at 4 ft.
	10	Rustle of leaves in slight breeze.
	0	(Threshold of audibility).

Explaining the meaning of the "decibel" unit, the report points out that the human ear is capable of functioning over a scale which ranges in intensity from one to a million millions. Sounds of intensity of 10, 100 and 1,000 produce in the ear sensations proportional to 1, 2 and 3 respectively. The decibel scale in the table expresses this fact, and would be represented by 20, 30 and 40 decibels respectively. The object of the bulletin is to make recommendations to architects as to the best means of reducing noise in rooms. A sound-resisting structure must provide against air-borne noises, and also against sound transmissions due to a diaphragm action of walls, floors, doors or windows. While most of the sound striking glass is reflected back, the small part of sound energy which is not reflected back is able to vibrate the panes and the window as a whole, causing them to act themselves as sources of sound. The heavier and more rigid the window-frames and the thicker and smaller the panes, the less the diaphragm effect would be.

PADDINGTON'S TIME-TABLE CLOCK.—What is claimed to be the largest clock with moving figures in the world has been erected in Paddington Station. The numerals consist of silvered glass reflectors attached to an endless belt of steel slats, and move on the roller-blind

principle. The numeral on the right-hand side, showing the minutes, is changed every minute, the centre numeral every 10 minutes, while the numeral on the left-hand side, indicating the hours, is changed each hour. The steel roller-blind on which the hour numerals are shown is 37 ft. long, and the three blinds together weigh about three-quarters of a ton. The moving figures also weigh three-quarters of a ton. The change of the numerals occupies eight seconds, this being the time taken for the belt to move a sufficient distance to bring another numeral into position. The entire mechanism is operated from the station master's electric clock. In Paris a giant public clock has been erected half-way up the Eiffel Tower, with two dials each twenty metres in diameter. Although it shows the time in the usual way, it is not fitted with moveable hands. Radial rows of electric lamps are switched on one after the other, and thus indicate the time. The markings of the dials at the five minute intervals are composed of illuminated circles of green and red lamps. At the quarter hour intervals the minute hand position is marked by sixty radial rows of red lamps, which start at the centre and run to the edge of the dial. The hours and half-hour intervals are indicated by twenty-four rows of blue-white lamps. In addition to the indication of the time given by the "hands," a powerful light shines for two seconds at each quarter of an hour.

PEKING MAN'S HANDS AND FEET.—Peking man, who lived in China a million years ago, had hands like the modern man, but his feet were like those of an ape. This is the conclusion reached by Prof. G. Elliot Smith from a study of the new discoveries in the cave at Chou Kou Tien. During further exploration, he said, a small bone from the wrist was found which is not appreciably different from that of modern man. This is exceptionally interesting in that it adds most powerful evidence to support the belief that the hundreds of stone implements found in the cave were made and used by Peking man. It now appears that Peking man had hands essentially identical with modern man's, and we are justified in this inference that the tools found with the remains of this man were made by him. They correspond entirely with tools made by other primitive peoples. From the shape of other small bones that have been found it would appear that the feet of Peking man differed from those of modern man. They were not straight, and he must have walked with his toes turned in—in the same way, in fact, as the ape does. There is, however, nothing to show that he was able to grip with his feet, as the apes are able to do.

REINDEER TREK ACROSS ARCTIC WASTES.—The enormous trek of a herd of 3,000 reindeer across the Arctic wastes, from Alaska to the Mackenzie River delta in the north-west territories of Canada, has been practically accomplished, and in the spring of 1934 the herd will travel the last hundred miles to their destination. Their reserve is an area of 25,000 square miles, where, it is hoped, they will increase and multiply, to help in solving the food problem of the native Eskimos. The herd was purchased in 1929, when the Government of Canada agreed to pay a United States company £12 for every animal delivered to the Mackenzie delta. Eskimos and Lapp

herders undertook the task of delivering 3,000 animals. Great hardships were encountered in more than three years of battle with blizzards, ice and wolves. In one great storm 500 reindeer strayed, and it was six months before they were rounded up. Of the original herd of 3,000 animals, 1,000 perished along the way. Three hundred fawns were born *en route*.

ROMAN RICHBOROUGH.—Dr J. P. Bush-Fox, in an account of Roman Richborough given to the Society of Antiquaries, assigned a purpose to the large timbered buildings occupied during the first half century of the Roman conquest of Britain. It is now evident that these buildings, differing in character from barracks and domestic structures, were port store-houses for grain and other material. The outlines of rotted beams, piles and foundation trenches, indicate that they were erected in rectangular blocks or *insule*, each comprising four buildings. One faced the main road and the other three lay behind, with approach roads from the side roads which bounded the *insule*. Each building had a loading platform, while that facing the road had also a space in front in which carts might draw up. This building was erected on a massive beam platform, embedded in the soil, to take heavy weights; but the remaining three were erected on piles to give the ventilation necessary to protect corn against the effects of damp. Another building lies on the other side of the road, a rectangular structure erected around a court. Each side consists of two rows of rooms, ranged in pairs. It is conjectured that these were the quarters of the police guarding the stores.

ROTENONE FOR INSECT PESTS.—According to Science Service, Washington, D.C., rotenone is the latest addition to chemical methods of controlling insect pests. It was first discovered through the use of plants containing it as fish poisons by natives of tropical countries. Its principal commercial source is the denim plant of the East Indies, but it is also present in a South American plant called cubé and in the North American plant popularly termed devil's shoestring. All the plants that are known to yield rotenone are members of the natural order leguminosae. Rotenone is exceedingly toxic to many kinds of insects, but quite harmless to man and all warm-blooded vertebrates. While all insects are not susceptible to its toxic effects, in the form of sprays and other preparations, it is fifteen times as toxic as a nicotine spray when used as a contact poison against aphides, and thirty times as toxic as acid lead arsenate, when used as an internal poison against certain caterpillars.

SALMONSBURY CAMP.—During the summer of 1933 extensive excavations were carried out by Mr. G. C. Dunning of the British Museum, of Salmonsbury Camp, an Iron Age structure of 56 acres in extent at Bourton-on-the-Water, Gloucestershire. An early Iron Age hut-site was first discovered near the centre of the camp and several similar hut-sites were afterwards found in other parts. These belong to the first century B.C. Twelve inches above the central Iron Age hut was the floor, partially cobbled and paved with flat stones, of a Roman hut, which yielded pottery and a third-century coin. Between these two periods of occupation came

evidence of Belgic invasion, in the form of a Belgic hut within the ramparts on the north-west side of the camp. This hut proved rich in finds of pottery, two iron brooches, iron-knives, pins, objects of bone, a stone spindle whorl, and worked flints. Fragments of iron and bronze slag and clay indicated metal and pottery industries. It is thought that the numerous finds belonging to the Belgic period on the site point to an invasion of those people, and to them, too, is attributed one of the less pleasing characteristics of the occupants, namely, the practice of cannibalism, indicated by the presence of the scattered bones of a female child, some of which appear to have been split to obtain the marrow, lying side by side with the bones of a goat and an ox.

SEVERN BARRAGE SCHEME.—A gigantic scheme for utilising the tidal waters of the River Severn for generating electric power by the construction of a barrage is described in the final report of the Severn Barrage Committee, presided over by Lt.-Col J. T. C. Moore-Brabazon, M.P. The proposal is to construct a barrage across the Severn estuary at English Stones, a reef in the river between Gloucestershire and Monmouthshire. A net annual output of 2,207 million units would be available for transmission to the "grid" from a tidal power station at the proposed barrage. The requirements of the whole country in 1941 are estimated to be 21,000 million units, and the proposed scheme would provide one-thirteenth of this total. The contemplated station would have an effective capacity nearly double that of any station operating in 1932 in this country. The average cost of electrical energy sent out to transmission lines would be about 0.12 of a penny per unit. The scheme involves two entirely independent series of works, the main power station and storage station, in the Trelleck Grange area west of the Wye. With the simultaneous outlay of the provision of road, rail and harbour facilities, the total cost of the whole scheme would be slightly over £50,000,000. The report mentions that it would probably not be possible to begin the works before 1937, and the scheme would take about 15 years to complete.

SILICA-GLASS FROM LIBYA.—The British Museum has come into possession of a wind-worn lump of transparent, pale yellowish-green silica-glass from the Libyan Desert. It was found by Mr. P. A. Clayton of the Survey of Egypt, about 480 miles south-west of Cairo. The material was in considerable amount and spread over an area of 20 km. as isolated pieces up to 10 lb. in weight, in the hollows between the sand-dunes. It closely resembles the long known problematical glass from Bohemia and Moravia, which has been cut as a gem-stone under the names of bottle-stone and water-crysolite. The Libyan glass differs from the abundant silica-glass found in 1932 by Mr. Philby around the meteorite craters at Wabar in Arabia. It shows an indication of flow structure and the almost complete absence of bubbles; but it forms a very suggestive link between tektites and the silica-glass that has been definitely proved to have been formed by the fall of large meteorites.

SOUTHAMPTON'S HUGE DRY DOCK.—The largest dry dock in the world was opened by the King

at Southampton on July 26. It consists of a massive quay wall a mile and a quarter long, a graving dock—claimed to be the largest in the world—and about 400 acres of reclaimed land. The quay wall stretches across the now reclaimed bay of the River Test from a point beyond the Royal Pier, and has berths for eight of the largest vessels afloat. Four of the berths have a depth of 45 feet at low water, and four of 40 feet. They are approached by a channel two miles long, dredged to a depth of 35 feet at low water. The graving dock is 1,200 feet long, 135 feet wide at the entrance, and 59 feet deep from cope to floor. It holds 260,000 tons of water, and can accommodate a vessel of 100,000 tons, if one of such a size should ever be built.

SPLITTING AND COUNTING ATOMS.—Lord Rutherford, in a lecture at the Royal Institution, turned a current of 60,000 volts on to a number of atoms, and split them into fragments, and also demonstrated a machine which counted the atoms as they were being split up. The apparatus includes a number of glass tubes in which the actual bombardment of the atom takes place, and can be observed through a microscope. A stream of electric particles bombards a screen, in which are the atoms to be broken up. Only about one in a million of the particles actually manages to hit an atom. The result is an explosion which can be heard through an amplifying apparatus, seen by a glow in an electric bulb, and photographed or watched as tiny flashes through a microscope. The laboratory worker only needs to press a button and the machine counts for him. A new type of electric static generator was being developed, said Lord Rutherford, by which it was hoped to achieve voltages of a million and a million and a half. "Ultimately," he said, "we hope to be able to generate 10,000,000 to 15,000,000 volts. But even with the best will in the world we cannot hope to get more than 10,000,000 to 20,000,000 volts in the laboratory. Yet in the atmosphere we have streaming through us particles animated with energy ranging from 200,000,000 volts to 2,000,000,000 volts."

SPONGES CAN MOVE ABOUT.—Mr. M. Burton, who was asked to investigate some sponges growing on the filter beds of the Zoological Society, which, it was feared, would interfere with the circulation of the water, discovered that even adult sponges were able to move appreciable distances to secure a more favourable area for feeding. Movements in post-larval and young sponges have been recorded on several occasions, but it is now apparent that fully-grown sponges can change their position, and that, so far from being "typical sedentary animals," the victims of chance and circumstance, they can exercise some selection as to habitat. The movement is a direct locomotion, carried out by amoeboid extensions.

STANDARD BAROMETER.—The standard authoritative barometer is kept in the National Laboratory at Teddington. The design is quite different from that of any other existing barometer, being made of stainless steel, with glass windows for observing the surfaces of the mercury. It will give barometric pressures to an accuracy of one twenty-thousandth of an inch. All standard barometers such as those

used by meteorologists, are checked by comparison with it.

STARLIGHT TO START MACHINERY.—Rays of light from Arcturus, one of the three brightest stars in the northern hemisphere, which left that star during the Chicago World Fair of 1893, were used to open the Century of Progress Exhibition at Chicago on May 27, 1933. This spectacular idea was prompted by the fact that the star is forty "light-years" distant from the earth, in other words, that a ray of light, travelling at 186,000 miles per second, takes 40 years to get from Arcturus to the earth. The particular ray was captured by a photo-electric cell, transferred by wire to Chicago, and amplified and released to work a mechanism and light up the Exhibition.

STREAMLINED RAILWAY TRAIN.—The Flying Hamburger, which is claimed to be the fastest train in the world, travelled from Berlin to Hamburg on its trial trip at over 92 miles an hour, covering the distance in 2 hours 19 minutes, or 40 minutes less than the normal Hamburg Berlin expresses. The journey was accomplished 9 minutes under the scheduled time. In comparison with the Cheltenham Flyer and other British expresses, the Flying Hamburger weighs only 77 tons and carries a much lighter load. It consists of two specially constructed carriages, with seating capacity for 102 passengers. It is driven by electricity generated on board from two 420 horse-power Diesel Maybach petrol engines. The two carriages are so closely knit together that from inside they appear to be one. Their external streamlined form is dictated by the primary consideration of wind pressure. The head and tail of the train are sloped and rounded, the roof is kept low, and rubber cushions take the place of buffers.

TECHNOCRACY.—Much discussion has been aroused in the United States by the new economic doctrine of Technocracy, which has been sponsored by a number of engineers and scientific workers. Its underlying thesis is that the tremendous technological advance in industrial processes during the last century, and particularly during the last 25 years, has made all existing social and economic mechanism obsolete and futile. Technocracy claims that scientific discovery and modern engineering skill have now armed mankind with powers that would ensure leisure and plenty for all if only they were properly employed. It asserts that the basic factor in social life is the amount of energy available for productive purposes and that no solution is possible so long as the present price system is retained. Energy, according to the exponents of technocracy, is the real measure of human labour and human wealth and, therefore, real prosperity will only be obtained when individualism is discarded and an entirely new system of distribution based on "energy certificates" instituted.

TELEVISION PROGRESS.—Television experiments were a feature of the British Association meeting. An unusual method of operating the Marconi system of television, in which a beam of light serves as the medium of transmission, was demonstrated daily before the members. Television images were projected on a screen

four feet square to show the possibilities of the Marconi system of television for public entertainment. A directed light beam was the link between the television transmitter and the receiver, instead of the normal radio or wire link. The "Marconi light beam link" apparatus consists of a transmitter which translates the electric impulses corresponding to the television picture signals into light impulses through the operation of a specially designed sodium tube mounted in a searchlight fitting. The receiver, incorporating a new type of photo-cell, reconverts the modulated light impulses into a varying electric current which operates the television receiver in the normal way. Television pictures eight inches square on the screen of a cathode ray tube were demonstrated by the Baird Television Company. The pictures seen were reproductions of films and various cartoons. For the radio transmission of these pictures it is necessary to use wave-lengths of the order of five to seven metres, which come in the ultra-short wave band. In order fully to study the properties of these ultra-short waves for television transmission the Baird Company has acquired the lease of the towers of the Crystal Palace for several years. The wave-length of 6.5 metres will be used for the television and 6.2 metres for the corresponding sound. At first the transmissions will be from films, but later it is intended that the television of living figures shall take place. The first boxing match to be televised was broadcast by the B.B.C. on August 23, the images being reproduced on a screen 16 in. by 8 in.

TEMPLE OF NODENS.—Dr. and Mrs. Mortimer Wheeler have reported on the excavations they have made at Lydney, on the site where the temple of the Romano-Celtic god Nodens was discovered. The shaft of an iron-mine—the first definite Roman iron-working found in England—was revealed, which demonstrated the industrial character of the community. The group of stone buildings includes the temple of the god Nodens—a basilical structure with a triple shrine—a guest-house ranged round a courtyard, a number of small chambers opening on to a verandah, and a large bath-house. On the evidence of the coins found there, the completion of the building has been fixed as subsequent to A.D. 367.

TRAPPING THE TSETSE FLY.—At a meeting of the Zoological Society, Mr. R. W. Harris exhibited and explained the working of a tsetse trap invented by his father, Mr. R. H. T. P. Harris, of Zululand. The inventor of the trap, knowing that the tsetse flies are attracted by the sight of large living animals, conceived the idea of treating the hides of horses and cattle with a fly-poison. He replaced the horse or ox by a canvas framework of a similar shape, suspended to the branch of a tree in the shady edge of a thicket which was a haunt of the flies. He had noticed that the flies, alighting on any part of the body of a living horse or ox, usually crawled down the lower surface of the abdomen, where the skin was more easy to pierce. He therefore left an open slit along the bottom of the trap, which was of opaque canvas. On the middle of the upper surface he made a window, to which was affixed a gauze fly-trap. The device worked admirably. The flies crawled into the dark interior and then, seeing the light above, passed into the trap. September is the month when

the tsetse flies are most numerous, and in September, 1931, no fewer than 2,088,508 were caught in the traps, reckoning at 6,000 flies to a quart measure. The year's total was more than 7,000,000. At the invitation of its Government, Mr. Harris spent three months of the summer of 1933 in the Belgian Congo, where he so reduced the number of flies there that they now attack only wild animals.

WHITE SPOT ON SATURN.—It is only at long intervals that any markings are seen on Saturn of a character suitable for the determination of the rotation period, hence advantage was taken of the opportunity afforded by the appearance of a white spot on the equatorial zone on August 3. It was detected at 22 h. 30 m. by Mr. Will Hay (the music-hall comedian), observing with a 6 in. refractor at Norbury. The spot had just crossed the central meridian. He telephoned to Dr. W. H. Steavenson, at West Norwood, who verified the discovery, and noted that the spot was elliptical, and extended in outline across the whole visible breadth of the zone from the south edge of the north equatorial belt to the projection of the crape ring. It was bright enough to be conspicuous in small telescopes. Towards the end of the month the white spot was found to be disappearing. Starting with a length of about 15,000 miles, said Dr. W. H. Steavenson, it had gradually lengthened, showing a tendency to break up into separate spots, until it occupied more than half of the planet's equatorial belt, and was virtually indistinguishable. Astronomers have, whenever possible, timed the passage of the front, middle, and back of the spot across the middle of the planet, and have thus obtained a figure for the length of a day on Saturn's equator, which is one, or possibly two, minutes longer than the accepted figure of 10 hours 44 minutes, based on a spot which appeared in 1876.

WOOD MADE FROM WEEDS.—The tallest pine tree can only furnish a plank about 250 feet long and a feet wide, but boiled cornstalks and weeds can now be utilised to make a "board" as wide as a city street, and if necessary two miles long. Synthetic lumber, as hard as steel or as soft as cork, is being made in the Iowa State laboratories and by various commercial firms in the United States. Almost every day some new use is found for this artificial wood, and work continues on experiments having to do with the conversion of waste products into useful articles for clothing, shelter and commerce. Cornstalks, oat husks, sugar cane, straw and weeds, millions of tons of which are available annually, can be made into every kind of "lumber," knotless, grainless, and at sizes that trees cannot furnish. The waste matter is cooked under pressure, in steam, into fibres not more than two to three hundredths of an inch long. This is a pulpy, colloidal mass, which becomes a paste, hardening rapidly. The longer it is cooked the harder the wood becomes.

ZUYDER ZEE RECLAMATION.—The official inauguration of the dyke which connects the Provinces of North-Holland and Friesland, and has closed off the Zuider Zee (now the IJssel Lake), took place on Sept. 25, and the dyke is now fully opened for traffic. Crops of all kinds are now growing where recently floated seaweed, in the Wehingermeer Polder, the first section of the Zuider Zee to be reclaimed.

IN quantity, the output of books during the year shows no great variation. In character, there is some indication—as might be expected in difficult and critical times—of a swing of the pendulum from fiction towards more serious and educative work, perhaps particularly in History and Biography. Enforced economy has led to the reduced issue of high-priced books, and to an increasing demand for "Omnibus" volumes, and has doubtless also stimulated the campaigns of certain daily newspapers which are stated to have sold half a million sets of Dickens and other classics. According to Mr. Milne, the "Fifty Best Books" published since the war do not include any one of five "best sellers" in fiction. Mr. H. G. Wells, whose output has of late been largely apart from fiction, now admits to paying about £5,000 a year income tax. The Hendon Library service records a decrease in the issue of fiction of 11,267 volumes, coupled with an increased issue in "non-fiction" of 24,349 books.

"To-day," writes Mr. O'Brien, "there is a dearth of imagination amongst novelists, and we are fobbed off with long drab chronicles that spring up as quickly as forced rhubarb, and have as much imaginative vigour; with extremely competent tales without a spark of life; with novels so realistic that they cease to be art."

Though Great Britain's total of some 15,000 books published this year seems large enough, it is interesting to record that Japan issues as many books annually as we, and Germany twice as many. The average circulation of a book here has been given as 3,950 copies, or a fraction over one book per year per person, which can hardly be considered excessive.

Book societies and clubs pursue their lucrative trade, though perhaps with somewhat less than their initial success. Mr. Cecil Palmer recently declared that "the insidious growth of log-rolling and clique reviewing is a public menace. The spectacle of novelists reviewing each other's novels, or, what is almost equally dangerous, one reviewer appearing in half-a-dozen different journals under as many different names, is neither edifying nor amusing. A good deal of so-called literary criticism in the Press is either thinly veiled back-scratching or backbiting." Mr. Michael Sadleir, in his lecture on Authors and Publishers, added: "The critic can no longer help the author of patient merit, because to-day literary criticism is virtually without effect on the general reading public. So long as book reviewing remains a mixture of publicity-mongering and back-scratching and book advertising a frenzied competition between several megalomaniacs, works of patient merit will continue to be unknown to the general public."

Amongst FEATURES OF THE YEAR under review may be mentioned the large crop of books of "topical" interest which appeared in relation to (1) the Oxford Movement; (2) the work of D. H. Lawrence and of the Brontës; and (3) the Australian Test Matches and Body Line Bowling. Other items of literary interest were:

1. *Honours*.—A peerage for Sir Rennell Rodd, a baronetcy for Owen Seaman, a knighthood for J. C. Squire (to whom a congratulatory Dinner was given), and a K.C.B. for Dr. G. F. Hill, the British Museum Librarian.

2. An interesting Exhibition of Children's

Books at the Victoria and Albert Museum; also exhibitions, at Messrs. Bumpus's, of Scott Centenary and of D. H. Lawrence books and MSS. The George Herbert centenary was also celebrated in the Press and at Bemerton.

3. Presentation to the British Museum by the surviving children of the late George Smith of the MSS. of Charlotte Brontë, "Shirley," "Jane Eyre" and "Villette," Browning's "Ring and the Book," and Mrs. Browning's "Sonnets from the Portuguese."

4. The Book Section of the Exhibition of British Industrial Art at Dorland House, visited by 1,200 people daily, and afterwards sent on tour.

5. Opening by The Friends of the National Libraries of a fund for the acquisition of the originals of the Paston Letters (Vols. 1 and 2).

6. Issue of the Supplement to the New English Dictionary (903 pages) free to holders of the complete set, and of the Shorter O.E.D. (2,500 pages) for £3 3s.

SALES.—Lord Rosebery's Library Sale realised £49,033; Napoleon's love letters to Josephine fetched £4,400; the Chester Beatty Book of Hours, £2,100; Jane Austen's "Susan" MS., £2,100; Kilmarnock Burns (1786), £1,300; Hakluyt's Voyages, £760; and a two-page Burns's MS., "The Vision," £460. Generally speaking, high prices obtained for rare books, modern press issues, and modern first editions, only when in fine state, long sets fetching very small prices.

CENSORSHIP.—Amongst books banned by the Irish Free State were "An Outline for Boys and Girls and their Parents" and "The Delicate Fire" (Mitchison), "Birth Control" (Robinson, M.D.), "The Bulpington of Blup" (H. G. Wells), "Ann Vickers" (Sinclair Lewis), "The Adventures of the Black Girl" (G. Bernard Shaw)—also banned by the Cambridge Public Library, "Numerous Treasure" (R. Keable), "All Men are Enemies" (Aldington), "Psychology of Sex" (Havelock Ellis), "The Two Thieves" (T. F. Powys), and "Cold Comfort Farm" (S. Gibbons). Amongst authors whose works have been definitely banned under the Hitler régime are Emil Ludwig, Arnold Zweig, Remarque, Barbusse and Feuchtwanger.

PRIZES.—*Femina Americana*: "Shadows on the Rock" (Willa Cather); *Hawthornden*: "The Fountain" (Charles Morgan); *James Tait Black*: "Life of Mary Kingsley" (Stephen Gwynn) and "Boomerang" (Helen Simpson); *Northcliffe*: "Heritages" (Andre Chamson); *Hodder & Stoughton* (20,000 dollars): "No Second Spring" (Janet Belth); *Femina Vie Heureuse* and *Northcliffe Recommendations*: "Royal Flush" (M. Irwin), "Midsummer Night's Madness" (Sean O'Faolain), "Small Town" (Braidla Field); awarded *Nobel Prize for Literature*: John Galsworthy.

On the commercial side, leading topics of discussion during the year have been (1) the Book Tokens Scheme; (2) the profits and trading systems of the book clubs, and newspaper book production; (3) the issue of cigarette and other coupons; and (4) the education of booksellers and the improvement of bookshops, including consideration of the "Librairie & Chaises" method.

DEATH has taken heavy toll of literature during the year in the loss of George Moore, G. E. B. Saintsbury and John Galsworthy, whilst others gone from us include Professor J. A. Thomson, Sir Robert Donald, T. Earle Welby, Temple Thurston, Leonard Huxley, Sir Anthony Hope Hawkins, Laurie Magnus and Clotilde Groves (Richard Dehan).

A classified selection of books published during the year, from October, 1932, to September, 1933, follows. With a few exceptions, translations, reprints and scientific manuals are not included. The whole selection only includes about two per cent. of the publications of the year, and must obviously pass over many good and useful books.

ART.

"Sir D. Y. Cameron," by F. Rinder; "The Art of Byam Shaw," by R. Vicat Cole; "The Technique of Early Greek Sculpture," by S. Casson; "The Art of Henri Matisse," by A. C. Barnes and V. de Mazia.

BIOGRAPHY AND MEMOIRS.

"Sir Kenelm Digby and his Venetia," by E. W. Bligh; "Adventures of a Novelist," by Gertrude Atherton; "My Own Way," by Sir E. Paery; "Life of Lord Oxford and Asquith," by J. A. Spender and Cyril Asquith; "Discovery," by John Drinkwater; "Letters from Sir Oliver Lodge," compiled by J. A. Hill; "My World as in My Time," Memoirs of Sir Henry Newbolt; "Lady Louisa Stewart," by Susan Buchanan; "The Brontës," by Living My Life," by Emma Goldman (Bolshevik Russia); "The Life of William Beckford," by J. W. Oliver; "Talleyrand," by Duff Cooper; "Grey Wolf," Mustafa Kemal, by H. C. Armstrong; "Carlyle," by L. Cazamain; "Gordon," by H. E. Wortham; "Napoleon," by H. Belloc; "Things I Have Seen," by Sir C. Oman; "Mark Twain," by Stephen Leacock; "The Life of Joseph Chamberlain," Vol. I., by J. L. Garvin; "Macaulay," by Arthur Bryant; "Cromer," by Lord Zetland; "Samuel Butler," by Clara Stillman; "Mary Baker Eddy. The Truth and the Tradition," by E. S. Bates and J. V. Dittmore; "Richard Wagner," by Ernest Newman; "Metternich," by Algernon Cecil; "Thirty Five Years," by H. S. Wilkinson; "This was my World," by Lady Rhonda; "Sir Joshua Reynolds," by J. Steegmann (as Great Lives); "Rhodes," by S. G. Millin; "Essays in Biography," by J. M. Keynes; "Alfred Mond," by H. Bolitho; "Dickens," by Bernard Darwin; "Birkenhead," The First Phase, by his Son; "Looking Back," by Norman Douglas; "Charles Lamb," by E. Blunden; "Fanny Kemble," by L. S. Driver; "Edward VII," by E. F. Benson; "Elizabeth Queen of England," by M. Waldman; "Henry Fielding," by B. M. Jones; "A Modern Prelude," by H. I. Fausset (autobiographical); "Andrew Carnegie," by B. J. Hendrick; "More Memories," by Margot Oxford; "Looking Back on Life," by George Robey; "John Hampden," by H. K. Williamson; "The Tudor Wench," by E. Thane (Q. Elizabeth as a girl); "The Autobiography of Sir John Martin Harvey," by St. Thomas Aquinas," by G. K. Chesterton.

ESSAYS AND LETTERS.

"Lemon Verbena," by E. V. Lucas; "Views and Reviews," by Havelock Ellis; "Letters of Mrs. Gaskell," edited by Jane Whitehill; "The Common Reader," and Series, by Virginia Woolf; "Jane Austen's Letters," edited by E. W.

Chapman; "At John Murray's," by George Paston (Records of a literary Circle); "Letters and the Second Diary of Samuel Pepys," edited by R. G. Howarth. (A complete retranscribed and unexpurgated edition of Pepys should now be undertaken.) "Letters of Matthew Arnold to Arthur Hugh Clough," edited by H. F. Lowry; "The Lost Leader," A Study of Wordsworth, by H. Fausset; "On Reading Shakespeare," by L. Pearsall Smith; "English Eccentrics," by E. Sitwell; "The Art of Living," by Osbert Burdett.

FICTION.

"Cold Comfort Farm," by Miss Gibbons (good burlesque); "Public Faces," by Harold Nicholson (action in 1930); "The House Under the Water," by F. Brett Young; "A Long Time Ago," by M. Kennedy; "They Were Defeated," by Rose Macaulay; "Light in August," by W. Faulkner; "Black Mischief," by E. Waugh; "Flowering Wilderness," by John Galsworthy; "First Night," by Lorna Rie; "The Men of Ness," by Eric Linklater (a Viking Saga); "Jenny Wren," by E. H. Young; "Violante," by G. Preedy; "The Bulpington of Blup," by H. G. Wells; "The Lovely Lady," by D. H. Lawrence (short stories); "A Day Off," by Storm Jameson; "Nobody Starves," by C. Brody; "Ann Vickers," by Sinclair Lewis; "Auntie Dimp," by Angela Thirkell; "All Men are Enemies," by R. Aldington; "The Gold Falcon, or the Haggard of Love" (Anonymous); "The Lame Dog," by E. H. Mottram; "All Souls' Night," by Hugh Walpole (Short Stories); "Dr. Gion," by Hans Carossa; "Portrait of an Actor," by E. Jenkins; "Glastonbury Romance," by T. S. Powys; "This is My Man," by W. B. Maxwell; "Travail of Gold," by E. F. Benson; "Julian Grant Loses his Way," by C. Houghton; "Peter Abclard," by H. W. Waddell; "A Prince of the Captivity," by J. Buchanan; "We are Spoiled," by P. Paul; "Vanessa," by Hugh Walpole; "Pilgrim Cottage," by Cecil Roberts (Russia); "Mrs. Ritchie," by Willa Muir; "The Flowering Thorn," by M. Sharp; "Men of Good Will," by J. Roman; "Volume the First," Juvenilia, by Jane Austen; "Wonder Hero," by J. B. Priestley; "Trumpeter Sound," by D. L. Murray.

SOME CRIME STORIES.

"The Hanging Captain," by H. Rode; "The Mummy Case," by Dermot Morrah; "The Shakespeare Murders," by Neil Gordon; "Mystery," by F. W. Crofts; "The Body in the Silo," by E. Knox; "My Best Thriller" (chosen by their Authors); "Driven Death," by N. Ord-Powlett; "The Killing Bottle," by L. P. Hartley; "The Arrival at Dusk," by R. C. Ashby; "Mr. Simpson Finds a Body," by D. Prome.

HISTORY.

"An Economic History of Modern Britain," by J. H. Clapham; "The Concise Story of the Dover Patrol," by Admiral Sir R. Bacon; "Kamilities," by G. V. Trevelyan (and Vol. of "England Under Queen Anne"); "The Story of the Borgias," by L. Collinson-Morley; "The Regent and his Daughter," by Dormer Creston; "Bougie Prince Charlie," by C. Wilkinson; "Just the Other Day," by Collier and Lang (post-war Britain); "Egypt Since Cromer," by Lord Lloyd; "Death of a Fleet," 1917-1919, by P. Schubert and L. Gibson; "The Queen and Mr. Gladstone," by P. Guedalla, Vol. I.; "The Red Book of Ormond," edited by M. B. White.

MISCELLANEOUS.

"No Boats on the River," by A. P. Herbert (advocating the Water-Bus); "*The Egypt's Gold*," by David Scott; "The Adventures of the Black Girl in her Search for God," by G. B. Shaw (a provocative little fantasy; clever woodcuts); "Ladies and Gentlemen," by H. Belloc (satirical verse); "For Ever England," by General Seeley (for boys of all ages); "The History of the Bow Street Runners," by G. Arncliffe; "England Their England," by A. G. Macdonell (a young Scot poking fun); "Pink Parade," by J. B. Booth (Bohemian memories); "The Fear of the Dead in Primitive Religion," by Sir J. G. Frazer.

POETRY AND DRAMA

"A Tale of Troy," by John Masefield; "The Pleasures of Poetry. The Victorian Age," by E. Sitwell; "Last Poems," by D. H. Lawrence; "Texts and Pretexts," by Aldous Huxley; "Halfway House," New Poems by Edmund Blunden; "The Doorkeeper," by J. W. Taylor; "The English Dramatic Critics, 1660-1932," by James Agate; "The English Muse," by Oliver Elton; "Dinner at Eight," by Ferber and Kaufman; "Collected Poems" of Herbert Palmer; "The Eaten Heart," by R. Aldington; "Charlotte Bronte," by R. Ferguson; "Wild Decemblers," by Clemence Dane; "The Fleeting, and other Poems," by W. De La Mare; "Poems," by R. Graves; "Discovering Poetry," by E. Drew; "The Silver Scythe," by W. Snaith; "The Winding Stair," by W. B. Yeats.

POLITICS, ECONOMICS, SOCIOLOGY.

"An Outline for Boys and Girls," by Naomi Mitchison; "The Art of Central Banking," by R. G. Hawtrey; "The Road to Ruin in Europe," by Sir R. Beazley; "Memories of a British Agent," by R. H. Bruce Lockhart; "The Coming Struggle for Power," by J. Strachey; "The New Survey of London Life and Labour," Vols. III,

IV. and V.; "Can America Stay at Home?" by F. H. Simonds; "Ways of Escape," by Sir P. Gibbs; "The Professions," by A. M. Carr Saunders and P. A. Wilson; "The Girl through the Ages," by D. M. Stuart; "From Chaos to Control," by Norman Angell; "The American Political System," by D. W. Brogan; "The Shape of Things to Come," by H. G. Wells; "The Intelligent Man's Review of Europe Today," by G. D. H. and M. I. Cole; "Culture and Environment," by F. R. Leavis and D. Thompson.

SCIENCE AND PHILOSOPHY.

"Perception," by H. H. Price; "Six Theories of Mind," by C. W. Morris; "The Expanding Universe," by Sir A. Eddington; "Industrial Psychology," by M. S. Viteles; "Wireless," by Dr. W. H. Eccles. (There are five and a half million receiving sets now licensed by the G.P.O.) "Scientific Theory and Religion," by E. W. Barnes; "The Living Universe," by Sir F. Youngblood; "The Causes of Evolution," by J. B. S. Haldane; "My Philosophy," by Sir O. Lodge; "Problems of Relative Growth," by Julian Huxley; "The Universe of Light," by Sir W. Bragg; "The New Background of Science," by Sir J. Jeans; "Guide to Modern Thought," by C. Joad.

TOPOGRAPHY, TRAVEL AND SPORT.

"Deep Water and Shoal," by W. A. Robinson; "Hounds and Dogs," by A. Croxton Smith; "Argentine Tango," by Philip Guedalla; "Southern Cross to Pole Star," by A. F. Tschiffely (a 20,000 mile ride); "We'll Shift our Ground," by E. Blunden and Sylvia Norman; "Cornwall and the Cornish," by H. K. H. Jenkin; "Elephant," by D. E. Blunt; "Souvenirs of France," by Rudyard Kipling.

THEOLOGY.

"Things New and Old," by W. R. Inge; "The Oxford Groups," by Dr. Hensley Henson; "God and the Astronomers," by W. R. Inge.

Grand Total 15,279

THE year showed little signs of recovery from the depression of 1932, but a slightly more hopeful spirit prevailed towards the end of the season. The financial troubles in the United States were no doubt responsible for the poor sales of works by deceased masters, for American collectors were rarely seen in the auction rooms or in the galleries of the picture dealers. For the artists at large the condition of affairs was if anything worse than in the preceding year, although some of the Bond Street dealers endeavoured to help them by holding exhibitions of small works and sketches at low prices—under ten or under five guineas for each work. This probably suggested to Messrs. Agnew the idea of the exhibition held by them in the middle of the season, at which pictures by Old Masters—some of them very good—were on sale in each case for two hundred guineas or less.

As usual the season commenced early in January, when the Winter Exhibition of the Royal Academy was opened. It was composed of representative works by fourteen recently deceased members of the Royal Academy: Sir Frank Dicksee, Sir George Hampton, Maurice Greiffenhagen, G. W. Lambert, H. II. La Plangue, Sir Bertram Macdonald, David Munford, Sir William Orpen, F. W. Pomeroy, Henry Poole, Charles Rice-Edts, Charles Sims, H. S. Tuke and W. L. Wyllie. The principal feature of the exhibition was a vast collection of work by Sir William Orpen, a hundred and fifty portraits and other works in oil, besides water-colours and drawings, which filled the First, Second and Third Galleries. Orpen was a remarkable draughtsman, but not a great painter, and too much of his work was shown, particularly of his portraiture. The Royal Academy public is not enamoured of portraiture, and the fact that the first three galleries were almost filled with such works was no doubt detrimental to the success of the exhibition, which did not attract so many visitors as it deserved.

The Summer Exhibition of the Royal Academy (the one hundred and sixty-fifth) was opened on May 1 and closed on August 7. The Academicians were more lenient in their dealings with the pictures by non-members than they were in 1932, when not one of the works submitted was accepted outright. This year 29 were accepted, 3,769 rejected, and 1,007 made doubtful. The works submitted—paintings, sculptures, water-colours and drawings, numbered altogether 11,327, compared with 11,706 submitted last year. The Hanging Committee, by which the exhibition was arranged, was composed of Sir Herbert Baker, Mr. Arnesby Brown, Mr. Wilfred De Glehn, Mr. E. L. Griggs, Mr. Algernon Talmage, Mr. Alfred Turner, Mr. George Spencer Watson, Mr. Gilbert Ledward and Mr. Arthur G. Walker.

The principal sales included "Delius," a portrait of the musician (£1,250), by Mr. H. James Gunn; "The Shadow" (£250), by Mr. Arnesby Brown; "June's Lovers" (£200), by Mr. Leonard D. Philpot; "A Man with a Pint" (£183 15s.), by Mr. Frederick W. Elwell; "Collure the Net-Mender" (£150), and "A Little Port: Rough Morning" (£50 10s.), by Mr. Adrian Stokes; Mr. Arthur H. Nowell's portrait of the Queen, purchased from the exhibition by Her Majesty; Sir John Lavery's portrait of Mr. Maxton, M.P. (£500); "The Priest's Walk" (£84), by Mr. Guy Kortwright; "They See an Oread" (£200), by Mr. Walter Hutton; "A Cornish Painter" (£105), by Mr.

Arthur Hayward; "Dorette" (£750), by Mr. Gerald L. Brockhurst; "The Christmas Tree" (£250), by Mr. Harry Bush; "Quality Street" (£125), by Mr. Fred Roe; "Griegalch, winner of the Grand National, 1929—statuette, bronze," by Mr. Martin Alexander; "Spring" (£500), and "Gitana Dancers Resting, Alcala, Granada" (£250), by Mr. W. Russell Flint; "The Parlour Maid" (£200), by Mr. Harold Knight; "Claire" (£200), by Mr. W. G. de Glehn; "A Young Woman" (£268 15s.), by Dame Laura Knight; "Going to Pasture" (£100), by Miss Dorothy Adamson; "The Shocks of Clyde" (£150), by Mr. Robert Houston; and "Evening, Mouschole" (£100), by Mr. Terriek Williams.

No fewer than eleven works were purchased by the Royal Academy Council for the Chantry Collection. They are as follows:—"Shakespeare's Cliff" (£100), by Mr. Henry Bishop, A.R.A.; "A New Arrival at the Zoo" (£200), by Mr. Philip Connard, R.A.; "Bank Holiday, Brighton" (£250), by Mr. Charles Cundall; "The Harvest Moon" (£500), by the late William Tugart; "Portrait of the Painter" (£315), by Professor Fred Brown—purchased from the exhibition of the New English Art Club; "The Jester (W. Somerset Maugham), 1911" (£500), by Mr. G. F. Kelly, R.A.; "The Old Troubadour" (£47 15s.), by Miss Clara Kilgobber; two cartoons, "Suffer little Children to Come unto Me" (£75), and "Pentecost" (£75), by Mrs. Mary Sargaut Florence; "Oriental Portrait" (£31 10s.), by Miss Janet Cree, and "Thought, seated figure, bronze" (£500), by Mrs. Winifred Turner.

Many exhibitions were held in London during the season. The opening of the Royal Academy Winter Exhibition was followed in February by one of "Beautiful Women of the Nineteenth Century," held at Messrs. Knoedler's gallery in aid of the War Service Legion, which contained some striking portraits by Millais, Watts, Sargent, Shannon, Winterhalter, Cabanel and Carolus Duran. Later in the same month Sir Philip Sassoon showed at his house in Park Lane a remarkable collection illustrating French arts and crafts of the reigns of Louis XIV, XV and XVI. The exhibition included some fine pictures, furniture, plate, bronzes and tapestries, but by many eminent collectors, including Her Majesty the Queen, whose contributions included gold and enamelled snuff boxes and musical boxes. At Knoedler's, in addition to the "Beautiful Women" mentioned above, exhibitions were held of sculpture by Mr. John Tweed; and of a large collection of portraits by Mr. Philip A. de Laszio, shown in aid of the Artists' General Benevolent Institution. At the Fine Art Society's the pictures shown included water-colours by Mr. Leonard Squirrell and Mr. S. R. Bulfinch; at Colnaghi's, sketches in Spain by Mr. McEvey, and an interesting collection of lithographs. At the Beaux Arts Gallery, the lithographs included one of the paintings of Mr. William Nicholson, and two or three of those of Mr. Sickert, and one of modern French paintings. Modern French paintings were also shown by Messrs. Reid & Lefevre, and at the French Gallery. The Leicester Gallery shows included one of the work of James Tissot, a French artist who practised in London sixty years ago, and other of paintings by Mr. James Pryde and Mr. Algernon Newton, and sculpture by Mr. Epstein. There were water-colours at Agnew's, Faisers, and the Walker Gallery, and a collection of works by Scarlett Davis at the Cotswold Gallery.

So far as acquisitions or special exhibitions

were concerned, the year was a quiet one at the National Gallery, where, however, Mr. K. McK. Clark, Keeper of the Department of Fine Art at the Ashmolean Museum, was appointed Director, so succeeded Sir Augustus Daniel at the conclusion of his term of office. At the Tate Gallery the centenary of the birth of Burne-Jones was marked by an excellent and well-arranged exhibition of his pictures, which was opened in June. At the National Portrait Gallery the new rooms were opened by the King in the spring, and in the autumn exhibitions were held of a collection of interesting portraits bequeathed to the Gallery by Lord Dillon, a former Trustee of the Gallery. At the Victoria and Albert Museum a small centenary exhibition was held of pictures and drawings executed between 1822 and 1825, including works by Turner, Constable, Leslie, Mulready, Landseer and others.

In the sale room the season was quiet; no great collections were dispersed and no exceptionally high price was paid for any work of art. At Sotheby's, in June, £9,200 was paid for six sketches by Rubens illustrating the life of Achilles, and in July £4,600 for a portrait of the second Lord Baltimore by Soest. At Christie's, at various sales, £3,255 was paid for a Hobbema; £1,575 for a portrait by Tintoretto; and £1,050 for a portrait of a lady by Sir Joshua Reynolds. In a few cases the prices realized showed great depreciation. The large picture by Burne-Jones, "Love and the Pilgrim," for which Mary, Duchess of Sutherland, paid £5,775 in 1898, realized only £220 when it came under the hammer at Christie's in March; and Raeburn's portrait of Colonel Mackenzie, which fetched £3,360 at auction in 1918, was knocked down later in the season for £82a.

THE YEAR'S MUSIC.

OPERA.

Covent Garden's vegetable and fruit market requiring additional space, it was announced that 1933 would see the Royal Opera demolished, though not till after the customary season had taken place. This announcement drew unusually large houses, for those who had never been to Bow Street's historic theatre specially made its acquaintance, while the regular *habitués*, bent on turning occasions to account, were present several evenings a week. Meanwhile, at the time of writing, Covent Garden has not been pulled down; there is even a chance of another season—perhaps more than one. . . .

The programme opened with "Der Rosenkavalier," Beecham conducting a performance which left much to be desired. Kern, for example, was not an ideal Sophie; Hadraboya, as Octavian, frequently "scopped"; Nash's voice emission was marred by a suggestion of "throatiness." Happily, Kipnis' Ochs, as upon former occasions, was masterly, and in every respect, while Lehmann's perfect art enchanted the huge audience. "Das Rheingold" exploited Schorr's Wotan, almost every phrase being sung in a manner which afforded an object lesson to intelligent listeners. Jarrod, the new Erda, a British singer, was equally pleasing, and throughout an important *role*; she has that authority which results from a good technique and understanding of the part. "Die Walküre" had for its exponents Leider, Olzewska, Lehmann, Wolff, Schorr, Bertram and Cole, the last-named possessing a fine voice. "Siegfried" came next, followed by "Götterdämmerung," with Melchior, Janseen (whose breath control is exemplary), Heigers, Leider and de Foras. On the whole, a successful "Ring."

"Aida" commenced the Italian season, and poorly. Turner, in the name-part, certainly displayed a welcome *legato*, and, if her middle notes were thin, each upper tone rang out effectively. But the new Radamès often sang false; Amoruso suffered by comparison with his distinguished predecessors; Il Re was scarcely in the picture; Amneris made little impression, Ramfis following her example. Verdi was also represented by "Don Carlos," an opera of the musical 'sixties, and decidedly worth reviving, for it contains much that

satisfies. As in the "Aida" performance, singers of mixed values were employed; Autori excepted, they proved somewhat disappointing. The Elisabetta had good and bad moments, her tone often being unsatisfactory; Lappas' voice deteriorated in the last act, though in his earlier scenes he was fairly effective; Rimini gave the impression that opera is not his true *milieu*; Cilla, as usual, sang well. "Otello" had been eagerly awaited by those who hoped to find in Melchior the ideal exponent of an exacting *role*. His Italian was generally mispronounced, and there were moments when the music seemed to be rather more than he could tackle with that ease which is part and parcel of good singing. However, Melchior looked an Otello, even if his bearing was sometimes rather meaningless. Pampanini, as Desdemona, sang quite acceptably, though without giving the character much individuality; Rimini, handicapped by music which demanded too much of him, was not the Iago of a critic's dreams; Willis' Emilia afforded pleasure; Cilla, as Cassio, was excellent. "La Bohème" had Pampanini for its Mimi, and to the advantage of the performance, Minghetti (Rodolfo), de Foras (Musetta) and Borgoli (Marcello) also being in the cast. "Tosca" brought forward Raisa, who, all things considered, made the expected impression, while Fornicini's Scarpia had points in common with Scott's unforgettable impersonation. Minghetti was a passable Cavaradossi.

Should another Italian venture be engineered, the management would be well advised to engage singers who are thoroughly capable. If not any too common, there are better performers in Italy than some of those who startled disappointed *habitués* last year: indeed, Southern musical circles were astonished when they learned that certain singers had been engaged for the Royal Opera. Formerly, a Covent Garden engagement was the hall-mark of an Italian artist's standing; nowadays *impresarii* do not attach the slightest importance to London visits. To have pleased the exacting Scala *cognoscenti* is a far better advertisement.

The Vic-Wells management gave "Otello," with Cox, a *tenore robusto* of quality, Cross being an equally gratifying Desdemona, the last-named singer also distinguishing herself in "La

Forza del Destino. Royal Academy of Music students appeared in Pergolesi's "L'ivietta e Tracollo" and Purcell's "Dido and Aeneas," with scenes from "La Fille du Régiment," "Faust" and "Aida" by way of contrast. Each performance was given with the vernacular translation.

LONDON CONCERTS.

Modern English composers found very staunch champions in the audience which gathered at Wigmore Hall to savour the orchestral compositions of Bax, Gornard Williams, Bridge and others. These musicians undoubtedly know their business where scoring is concerned, especially Williams and Bax. It must, however, be confessed that, like most Englishmen who court this particular Muse, they seldom happen on a line of melody which creates a really deep impression. This criticism applies equally to modern French orchestral music, of which one hears more than is welcome, an instance being furnished by the Pierné "Variations et Finale" and d'Indy's "Suite," which the Quintette Instrumentale de Paris introduced to Londoners. D'Indy is always dull, and Pierné, if capable of writing a melody with something to recommend it, does not sustain this effort for long. Tunelessness may be *vieux jeu*; still, it pleases.

The Kutcher Quartet gave a memorable exhibition of perfect art; Brahms' centenary was honoured in a suitable manner, Boulton, Schnabel and others lending their aid; Kussevitzy proved himself to be a gifted conductor. The Philharmonic Orchestra gave a series of concerts; Bruno Walter renewed acquaintance with English audiences, though without doing complete justice to Mozart's "E flat Symphony" or to the "Eroica." Hindemith's "Das Unaufhörliche" had a fine performance; the London Symphony Orchestra thought it necessary to air Berlioz' "Symphonie Fantastique," which many persons considered quite superfluous; Pizzetti's long and boring "Rondo Veneziano" was introduced at the last Philharmonic concert of Spring; Lucille Wallace's programme of Mozart's chamber works delighted music lovers. A Courtauld-Sargent concert exploited Berlioz' "Harold in Egypt"; Walton's "Belshazzar's Feast" was again found somewhat disappointing; Enesco, in a Bach sonata, was immaculate; the Dolmetsch concerts, as usual, were of historical interest; Delius' great admirer,

Beecham, conducted the "Mass of Life" for the Royal Choral Society. The attendance, even upon important occasions, was not always flattering.

There were many vocal recitals, Laelia Finneberg's being amongst the most notable, for she is within distance of the first rank. As to the others, few, whether old-stagers or beginners, pleased the *cognoscenti*; indeed, various *debutants* had been improperly taught, each performer's breath-control being faulty. Rykens, however, made the desired impression, for, if her respiration was not under control, she has much in her favour. Schubert's "Dem Unendlichen" furnished an instance.

THE PROVINCES.

Llandudno's woman conductor, Mrs. Tipping, included the "Euryanthe" overture in her representative programmes, and to Llandudno's joy. Tonypandy, like other Welsh towns and townlets, afforded musical instruction to gratified listeners; Cardiff welcomed Professor Evans, who lectured on the national music; Pwllheli established its Musical Society. Birmingham's Choral and Orchestral Union performed Cowen's "The Sleeping Beauty"; Hereford listened respectfully to Bach's "Mass in B Minor"; Doncaster was afforded the opportunity of hearing all sorts of music; Toniquay again had its festival. Bexhill drew two thousand enthusiasts to a performance of "The Hymn of Trance"; Sheffield appreciated "Hiawatha"; Kilmarnock conducted his "Geronius" in Manchester. Edinburgh favoured Dukas' "L'apprenti sorcier" and Beethoven's "Choral Symphony"; Galashiels made the acquaintance of Harty's "The Mystic Trumpeter"; Glasgow revelled in "The Creation" and other well-established classics. Armstrong Gibb's latest musical venture, "The Highwayman," was given its first performance in Winchester, and successfully. Noyes' poem, however, leaves something to be desired.

Annie Patterson, Ireland's leading composer, whose lectures on musical subjects have drawn enthusiastic audiences, has finished the "Irish Music-Drama Trilogy" upon which she embarked some years ago. It consists of "The Ardriagh's Daughter," "Oislin" and "The Bard of Eire," the music, inspired by Gaelic traditions, depending on pure melodic and rhythmic effects for appeal to one's higher emotions. Annie Patterson's "Trilogy," which is fully scored for orchestra, should indeed appeal to cultured people.

THE LONDON STAGE.—In a year remarkable for its long spell of fine weather and a consequent demand for outdoor recreation, the fact that at least five plays—three of them of a definitely serious character—ran throughout the summer without a break indicated a decided virility in the London stage. Of the quintette the most notable was *Richard of Bordeaux* by a newcomer to the theatrical world, a woman writer from the Highlands who adopted the name of "Gordon Daviot." After a run of nine months this historical drama, written in modern, racy prose around the reign of a little-known monarch, and admirably acted by a company headed by Mr. John Gielgud, was still attracting crowded houses at the New. The second serious play was *The Brontës*, in which Mr. Alfred Sangster placed the three Yorkshire sisters and their family on the stage in convincing manner. A second Brontë play, *Wild Decembers*, by Miss Clemence Dane, suffered in comparison and enjoyed only a short career. *The Late Christopher Bean*, adapted by Mr. Emyln Williams from the French, was the third play that defied the call of the sun. The lighter successes were *Ten Minutes Alibi*, an amusing "thriller" by Mr. Anthony Armstrong, and *Fresh Fields* by Mr. Ivor Novello. The latter was the dramatist of the year, for, in addition to this comedy, his *Proscenium* had a long run, although a third play from his pen, *Flies in the Sun*, did not attract. *A Sleeping Clergyman*, by Mr. James Bridie, was an interesting play, dealing in *Meltemes*-fashion with three generations, and tilting at the doctrine which contends that a man's vices are necessarily inherited by his descendants. Of the established dramatists, Mr. John van Druten was less prolific than in the preceding year, but *The Distaff Side* did nothing to smear his reputation. Mr. Somerset Maugham failed to hit the public taste with *For Services Rendered*, but *Sheppey*, a comedy of mordant satire, was more fortunate. A promising writer, Miss Dorothy Massingham, died in tragic circumstances while a thoughtful play, for which she was partly responsible, *The Lake*, was being played at one theatre, and a second, in which she had collaborated, *The Soldier and the Gentlewoman*, was awaiting production at another. Late in the year, *Nymph Errant*, adapted (and toned down) by Mr. Romney Brent from Mr. James Laver's novel, threatened to become an obstinate success. An interesting innovation, favoured by the fine weather, was a season of open-air Shakespeare in Regent's Park.

The following is a list of productions between Nov. 1, 1932, and Oct. 31, 1933:—

ADELPHI, 411 Strand, W.C.2.—(1933) Oct. 6. *Nymph Errant*, by Romney Brent, from the novel by James Laver, lyrics and music by Cole Porter (Messrs. Austin Trevor, H. Morton Selten and Bruce Winston and Mesdames Gertrude Lawrence, Elizabeth Welch, Helen Kurty, May Agate and Iris Ashley).

ALDWYCH, Aldwych, W.C.2.—(1933) Jan. 30. *A Bit of a Test*, by Ben Travers (Messrs. Ralph Lynn, J. Robertson Hare, Charles Farrell and Frederick Burtwell and Mesdames Mary Brough and Renée Gadd). Sept. 22. *Lilies Time*, new version in German, by Richard Tauber and Sylvia Mossé, music by Franz Schubert (Messrs. Richard Tauber, Willy Vos-Mendes and Fritz Spira and Mesdames Käthe Sijn and Louise Hess).

ATHAMBRA, 23 Charing Cross Road, W.C.2.—(1932) Nov. 28. *A Kiss in Spring*, musical comedy by Julius Brammer and Alfred Grünwald, English by L. du Garde Peach, music by Emmerich Kalman and Herbert Griffiths (Messrs. Eric Bertner, Harold Turner and Billy Milton and Mesdames Alicia Markova and Sylvia Welling).

AMBASSADORS, West Street, Cambridge Circus, W.C.2.—(1932) Nov. 2. *Phiomel*, by J. Jefferson Farjeon, music by Martin Shaw (Messrs. Arthur Wontner and Robert Atkins and Mesdames Phyllis Neilson-Terry and Helene Raye). Dec. 20. *The Streets of London*, Dion Boucicault's drama revised (Messrs. Sullivan and Mesdames Carol Rees and Viola Lyel).

THE FILMS.

THE British-made film took a big step forward during 1933, and for the first time became a serious competitor of Hollywood productions. Among the leading new pictures shown publicly in London, nearly forty came from British studios, and at least four of them attained international fame. They were *The Good Companions*, founded on Mr. J. B. Priestley's novel, *Rome Express*, *I Was a Spy*, and *The Private Life of Henry VIII.*, in which Mr. Charles Laughton established himself as one of the greatest of film artists. Another very successful film was *Cavalcade*, in which Hollywood closely followed the British production of Mr. Noel Coward's deeply moving play.

Following is a list of the principal films shown publicly in London from Nov. 1, 1932, to Oct. 31, 1933:

ACADEMY, 165 Oxford Street, W.C. 1.—(1932)

Nov. 7. *David Golder* (Harry Baur). Nov. 28. *Barbarina* (Lil Dagover). Dec. 26. *Atlantide* (Brigitte Helm). (1933) Jan. 16. *Boys in Uniform*, German. Feb. 13. *Le Quatorze Juillet*, by René Clair (Annabella). April 20. *Der Traumende Mund* (*Dreaming Lips*) (Elisabeth Bergner). May 14. *The Virtuous Isidore*, from a Maupassant story (Fernandel). Oct. 9. *Paris-Méditerranée* (Annabella). Oct. 23. *M.* (Peter Lorre).

Aug. 21. *The Song You Gave Me* (Bébé Daniels). Sept. 4. *The Working Man* (George Arliss). Oct. 2. *Below the Sea* (Ralph Bellamy and Fay Wray). Oct. 9. *Double Harness* (William Powell and Ann Harding). Oct. 23. *Captured* (Leslie Howard and Douglas Fairbanks, junr.).

RIALTO, 3-4 Coventry Street, W. 1.—(1933) Feb. 27. *The White Flame*, by Lenz Kiefenstahl. May. 15. *The Tragedy of Everest*. May 30. *Poil de Carotte* (Robert Lyden).

TIVOLI, Strand, W.C. 2.—(1932) Nov. 21. *Rome Express*, British (Donald Calthrop, Frank Vosper, Cedric Hardwicke, Gordon Harker, Hugh Williams, Conrad Veidt, Esther Ralston and Joan Barry). Dec. 26. *The Midshipmaid*, British (A. W. Baskcomb and Jessie Matthews). (1933) Jan. 9. *Baroud* (Rex Ingram). Jan. 23. *Les, Mr. Brown* (Jack Buchanan, Margot Grahame and Elsie Randolph). Feb. 13. *Hot Pepper* (Victor McLaglen and Edmund Lowe). Feb. 20. *Caracade*, film version of Noel Coward's play (Diana Wynyard, Una O'Connor, Ursula Jeans, Colin Clive and Herbert Mundin). June 12. *Waltz Time*, British (Evelyn Laye and Fritz Schulz). July 10. *Orders is Orders*, British (James Gleason, Cyril Maude, Cedric Hardwicke, Donald Calthrop and Charlotte Greenwood). July 24. *Falling For You*, British (Jack Hulbert and Cecily Courtneidge). Aug. 21. *My Lips Betray* (John Boles and Lilian Harvey). Sept. 5. *I Was a Spy*, British (Herbert Marshall, Conrad Veidt and Madeleine Carroll). Oct. 16. *The Gold-Diggers of 1933* (Warren Williams and Joan Blondell).

L'ACADÉMIE FRANÇAISE.

THE FRENCH ACADEMY is composed of 40 members, elected for life, and is the highest of the five Academies constituting l'Institut de France (Secretary of the Institute, M. Robert Rœnler). The Academy was founded by Cardinal Richelieu in 1635 and re-organized in 1876. The special object of the Academy is the composition of a Historical Dictionary of the French Language, and its members, "The Forty Immortals," are as follows:—

Elected.	Name	Born.	Elected.	Name	Born.
1804	Paul Bourget.....	1852	1923	Henri Robert.....	1863
1807	Gabriel Hanotaux.....	1853	1924	Camille Julian.....	1869
1808	Henri Emile Lavedan.....	1859	1924	Georges Lecomte.....	1867
1907	Maurice Donnay.....	1859	1924	Emile Picard.....	1856
1909	Raymond Poincaré.....	1860	1924	Albert Besson.....	1849
1909	Rene Doumic.....	1860	1925	A. de Caumont (Duc de la Force) ...	1878
1909	Marcel Prevost.....	1862	1925	Louis Bertrand.....	1866
1911	Henri de Regnier.....	1864	1925	Paul Valéry.....	1871
1912	Maréchal Lyautey.....	1864	1927	Abel Hermant.....	1862
1914	Pierre de la Gorce.....	1866	1927	Emile Mâle.....	1862
1914	Henri Bergson.....	1859	1927	Louis Madelin.....	1871
1918	Henri Balthus.....	1865	1928	Maurice Paléologue.....	1859
1918	Alfred Baudrillard.....	1859	1929	Maréchal Pétain.....	1856
1918	Jules Cambon.....	1845	1930	André Champeix.....	1874
1919	Henri Bordenave.....	1870	1931	Pierre Benoit.....	1886
1920	Joseph Bédier.....	1864	1931	General Weyrand.....	1867
1920	Louis Chevilhon.....	1864	1931	Abel Bonnard.....	1883
1922	Pierre de Nolhac.....	1859	1932	Théodore Gosselin Lenotre.....	1865
1922	Georges Goyau.....	1860	1933	François Mauriac.....	1865
1923	Edouard Estauné.....	1862			

The four other Academies are:—

ACADÉMIE DES INSCRIPTIONS ET BELLES-LETTRES, founded 1663, 40 members.

ACADÉMIE DES SCIENCES, founded 1666, divided into 19 sections, each of which comprises 6 members.

ACADÉMIE DES BEAUX-ARTS, 5 sections, comprising 40 members, as follows—painting, 14 members; sculpture, 8; architecture, 8; engraving, 4; musical composition, 6.

ACADÉMIE DES SCIENCES MORALES ET POLITIQUES (for the study of questions of social and political economy), founded in 1832, 40 members, 5 sections.

All the Academies, with the exception of the Académie Française, elect a certain number of honorary members and of national foreign correspondents.

ONE of the chief features of British broadcasting in 1933 was the steady increase in the number of wireless licences. A few years ago only the wildest optimists would have prophesied that Great Britain would ever possess a total of 5,000,000 licensed listeners; but this figure was achieved in the closing months of 1932, and in 1933 the total advanced rapidly towards the sixth million. At the end of 1932 the number of licences issued was 5,262,953, and the increase for the year reached the record figure of 932,228. By August 31, 1933, the number had risen to 5,654,400, and there was every prospect that the final months would show a further substantial increase.

These figures are an indication of the important place which broadcasting has won in British national life. A home without a wireless set is becoming as rare as a house without a bathroom, and the variety of the broadcast programmes enables listeners with widely divergent tastes to find their special points of interest. The inevitable grumbles about the B.B.C. are still heard, but the solid evidence of figures proves conclusively that the broadcasting service is appreciated by the public.

NEW APPOINTMENTS.

In the ordinary way the changes of personnel at Broadcasting House are not of great interest to the general public, but the new appointments in 1933 were exceptionally important. The year began with three changes in the Board of Governors—Mr. R. C. Norman, a former chairman of the London County Council, succeeded Lord Gainford as vice-chairman, and Visct. Bridgman and Mrs. Mary Agnes Hamilton took the place of Mr. Montague Rendall and Lady Snowden. Mr. J. H. Whitley retained the chairmanship of the Board, of which Mr. Harold Brown is the fifth member.

An elaborate staff reorganisation led to another notable appointment in September, when Colonel Alan G. C. Dawney became Controller of Programmes. Colonel Dawney, who was closely associated with Colonel T. E. Lawrence during the later stages of the War, is now responsible for the whole output of the B.B.C., under Sir John Reith as Director-General. The new scheme was intended to secure a better co-ordination of programme material, and also to separate, as far as was found to be practicable, the creative and administrative sides of broadcasting. Sir Charles Carpenter continued to hold the post of Controller of Administration.

Another change was caused by the death of Mr. J. C. Stobart, who had been concerned with educational and religious broadcasting since 1924, and was the originator of the New Year's Eve "Grand Good Night." He was succeeded by the Rev. F. A. Iremonger, who took complete charge of the B.B.C.'s religious work. Several new appointments were also made at the regional stations. The most important was that of the Rev. M. Dinwiddie as Scottish Regional Director, in succession to Mr. D. Cleghorn Thomson. His appointment aroused a good deal of interest, for it was the first time that the B.B.C. had chosen a clergyman to fill such a position.

It must also be placed on record that a woman announcer was first employed by the B.B.C. during 1933.

OUTSTANDING EVENTS.

On the technical side the most important event of the year was the completion of the new West Regional transmitting station at Washford Cross, near the Somerset coast. This is the fourth twin-wave transmitting station of the B.B.C., and it is designed to serve South Wales and the greater part of the West of England. It enables listeners in this area to receive two programmes—a regional programme, containing a good deal of local material, and the ordinary national programme. The West is thus brought into line with the Scottish and North regions, where twin-wave transmitting stations have been built in recent years.

The question of wave-lengths was also considered during the year, and the representatives of 35 European Governments met at Lucerne in May and June, with the object of compiling a new list of wave-lengths for Europe. The *Lucerne Plan*, which comes into operation on January 15, 1934, allots wave-lengths to 32 European Stations. Of these wave-lengths 55 are exclusive and the remainder are shared, but the shared wave-lengths have been chosen in such a way that they are not likely to interfere with each other. The long wave-length of Daventry is still exclusive, and the slight modifications to other British wave-lengths are not expected to affect the efficiency of the service.

The year was also notable for the great development of Empire broadcasting. The first programme from the new Empire transmitter was broadcast on December 19, 1932, and throughout 1933 daily programmes were broadcast at hours which enabled them to be heard at suitable times all over the world. The correspondence which reached Broadcasting House showed that the service was greatly appreciated, and listeners in the lonelier parts of the British Empire have now a new link with home. The arrangement of programmes for Empire listeners is still in its experimental stage, and it will be developed in accordance with the criticism which is received. There is one point, however, on which all Empire listeners seem to agree. They are all anxious to hear the sound of Big Ben, and the B.B.C. is happily able to fulfil their wish.

In the home programmes the two outstanding events of the year were the broadcast of the King's speech at the opening of the World Economic Conference and the relay from Washington of President Roosevelt's inaugural speech. In addition to the broadcast in Great Britain the King's speech was transmitted to all parts of the Empire, and it was relayed by many foreign countries. President Roosevelt's address was clearly heard by British listeners, and his vigorous tones gave them a good insight into his character and personality. Another important broadcast was that of the Vatican ceremony at the opening of the Holy Year, when listeners were able to hear the voice of the Pope.

OVERSEAS BROADCASTS.

In 1933, as in previous years, an attractive feature of the British broadcasting programmes was provided by the relays and special broadcasts from overseas. However good the home programmes may be, they can never quite impress the listener in the same way as a programme which comes from a distant country; and this side of broadcasting deserves

intensive development. Two overseas broadcasts have already been mentioned, and several others are worthy of note.

Early in the year Mr. Alan Kippax's eyewitness accounts of the cricket Test Matches in Australia were transmitted from the actual cricket grounds, and, although atmospheric conditions caused trouble on one or two occasions, their general reception was excellent. The difference in Australian time meant that British listeners were able to hear the result of the day's play before they left for their business in the morning. Another Empire broadcast came from the top of Table Mountain in South Africa, where Lord Clarendon, the Governor-General, made a short speech, and a commentator described the scene which lay before him.

There were several broadcasts from the United States, and Europe also contributed some interesting programmes. Opera had a prominent place in the Continental relays, and the first act of Richard Strauss's new work, *Arabella*, was transmitted from the State Opera House, Dresden. Other operatic relays came from Munich, Bayreuth and Salzburg, and a concert from Copenhagen was the first Danish broadcast to be relayed to Great Britain. Vienna provided a special pot-pourri of Viennese operettas and a concert by the Vienna Philharmonic Orchestra, which was conducted by Dr. Adrian Boult, the B.B.C. Music Director; and an amusing radio entertainment, called *Funk-Karussell*, came from Berlin. There were relays from the Ostend Kursaal, and a delightful programme of Swabian and Alemannic folk music was contributed by the Stuttgart broadcasting station.

MUSIC.

The musical work of the B.B.C. during 1933 was largely on the same lines as in previous years. The Symphony Concerts at the Queen's Hall had a distinguished array of soloists, among whom were Huberman, Harriet Cohen, Lamond, Cottot, Backhaus, Josef Hofmann, Gieseking and Myra Hess, and the high reputation of the B.B.C. Symphony Orchestra was fully maintained. The works which were given their first English performance included Vaughan-Williams's Piano-forte Concerto, Hindemith's *Das Unaufhörliche*, and Bela Bartok's Second Piano Concerto, in which the composer himself played the solo part.

The B.B.C. was also responsible for the London Music Festival at the Queen's Hall in May, when the broadcast performances included three Brahms programmes in honour of the centenary of the composer's birth; and the last three concerts of the festival were conducted by Serge Koussevitzky, the conductor of the Boston Symphony Orchestra. The Promenade concerts had their usual success, and Sir Henry Wood conducted them as brilliantly and untiringly as ever.

The Sunday orchestral concerts were an important feature of the studio musical performances, and the conductors included Sir Henry Wood, Dr. Adrian Boult, Albert Coates and Basil Cameron; and studio recitals were given by Foulshoff, Herbert Samuel, Maggie Teyte, Peter Dawson, Keith Falkner and many others. The concerts of contemporary music were continued, and one of the most striking programmes was provided by Hindemith's "The Lesson," which was given before an audience in the Concert Hall at Broadcasting House. The per-

formance of this piece required a section of the B.B.C. orchestra, a section of the Wireless Military Band, the Wireless Chorus, singers and clowns, and it was rather a shock to find Harry Tate performing as a clown in a concert of contemporary music.

Concerts by provincial orchestras were relayed in the National and Regional programmes, and there were many relays of grand opera from Covent Garden. As a general rule only one act of an opera is broadcast, but the experiment of broadcasting the whole of *The Rhinegold* was tried in 1933. The consensus of opinion showed that the broadcasting of a whole opera in one evening places too much of a strain on even the most musical listener.

The musical resources of the B.B.C. were strengthened by the completion of the new organ in the Concert Hall. It was designed and built by John Compton, and its construction occupied a whole year. One of its features is the luminous method of stop-control, which enables the organist to regulate the stops by a slight touch. The organ was officially opened and dedicated on June 16, when a special programme was given.

There were no important developments in the other parts of the B.B.C.'s musical programme, and Henry Hall continued to direct the B.B.C. dance orchestra. Most of the leading dance band conductors broadcast from the studio or from restaurants, and listeners were able to compare the styles of Jack Hylton, Debroby Somers, Jack Payne, Harry Roy, Lew Stone, Roy Fox and many others. Duke Ellington, the American dance band conductor, gave an interesting programme of what is generally called "hot" music.

TALKS AND EDUCATION.

The talks which were given in 1933 covered a wide field of subjects, ranging from philosophical and religious discussions to talks on sport and gardening. One of the most important series was that on *God and the World Through Christian Eyes*, which was given on alternate Sunday evenings. Twenty-four speakers, including the Archbishop of York, took part in this symposium. Among other talks which aroused keen discussion were those on unemployment and housing. The unemployment series was introduced by the Prince of Wales, and in subsequent talks Mr. S. P. B. Mais described some successful voluntary schemes for helping the unemployed, with the object of persuading others to start similar schemes. In the housing series, which was given the title of *Other People's Houses*, Mr. Howard Marshall described housing conditions in various parts of the country, and the possibilities of housing improvement were also discussed by leading authorities.

The talks on housing and unemployment inaugurated a new kind of B.P.C. talk, for they were based on immediate personal investigation of existing social conditions. The experiment was so successful that several other series on the same lines were arranged for the later part of the year. In the series on *Fansharing England*, Mr. Howard Marshall gave his impressions of the present state of the English countryside, and Mr. S. P. B. Mais made a tour of the United States, speaking from various cities on what he had seen and heard. Professor J. A. Scott Watson gave an interesting series on *Rural Britain To-Day and To-Morrow*, in which he described, from the agricultural and sociological

standpoints, what he had seen in a tour of villages in England, Scotland and Wales; and Mr. Julian Huxley gave an account of the important research work which is being conducted in scientific institutions.

The note of personal investigation was also struck in Mr. Vernon Bartlett's talks on foreign affairs. Mr. Bartlett's reviews of international politics have been a popular feature of the broadcasting programmes for several years, and in 1933 he travelled widely in Europe on behalf of the B.B.C. In the course of his journeys he interviewed most of the outstanding personalities in European politics, including Herr Hitler, Dr. Dollfuss, Signor Mussolini, and King Alexander of Yugoslavia; and he was thus able to give a valuable series of talks on the "strong men of Europe." He also continued his brilliant surveys of foreign affairs.

The B.B.C. has been much criticised for its attitude towards political controversy, and opponents have complained that only the Government of the day was able to use the microphone. In the autumn of 1933 a new departure was made by the introduction of talks by prominent politicians, who were allowed to choose their own subjects and to give uncensored speeches. The speakers were chosen by the political parties, and they consisted of Mr. Stanley Baldwin, Mr. George Lansbury, Mr. J. H. Thomas, Mr. Arthur Greenwood, Major Oliver Stanley, Sir Herbert Samuel, Mr. Walter Runciman, Sir Stafford Cripps and Mr. Ramsay MacDonald. Even this arrangement was not free from criticism, and it was complained that the selection of speakers by party leaders involved the omission of important "free-lances" like Mr. Churchill and Mr. Lloyd George.

Other talks dealt with design in modern life, the struggle against disease, political ideas of the day, slavery, makers of the modern spirit, music, sport, and gardening, and Mr. Stanley Baldwin introduced an excellent series on *The National Character*, by Mr. Arthur Bryant. A series of debates, with the general title of *Should They be Scrapped?* dealt with blood sports, the Press, alcohol, the public schools and other topics, and among the debaters were the Countess of Oxford, Mr. Tom Clarke, Miss Margaret Bondfield, Dr. Cyril Alington and Earl Russell.

Some entertaining material was contained in the series called *Anywhere for a News Story*, in which well-known journalists described some of their greatest experiences; and in *Stars in Their Courses* Mr. James Agate contributed some charming studies of actors and actresses of to-day and yesterday. Mr. J. B. Priestley, whose talks were entitled *I'll Tell You Everything*, discussed general topics and showed that he has an excellent microphone manner.

Though the majority of the B.B.C. talks are given in series, some of the isolated talks should be specially mentioned. Among them were a talk by Mr. Lloyd George on the first anniversary of National Health Insurance, an appreciation of the late Lord Grey by Mr. J. H. Whitley, and two National Lectures—*The League of Nations*, by Sir Eric Drummond, and *The Transmutation of the Atom*, by Lord Rutherford. Another important broadcast consisted of two statements on the Manchurian situation, made by Mr. Matsukata, who had been the Japanese delegate to the League of Nations, and Mr. Quo Tai-chi, the Chinese Minister in London. Mr. Hugh Rutt-

ledge gave an interesting talk on the latest attempt to climb Mount Everest, and Sir Malcolm Campbell described his successful attack on his own motoring record.

Reviews of new books, plays and films were given as usual, and among the critics of the year were Mr. Desmond MacCarthy and Mr. G. K. Chesterton (literature), Mr. Archibald Haddon (drama) and Mr. Oliver Baldwin (films). The poetry readings and the topical talks at the end of the second news bulletin were continued, and in the autumn the experiment of producing a "News Reel" on Saturday nights was given a trial. This was a programme which consisted of a brief summary of the news of the day, followed by a more elaborate presentation of the news in the form of eye-witness accounts, topical talks and relays from abroad.

The Central Council for School Broadcasting again arranged an interesting programme of talks for schools. The familiar names of Sir Walford Davies, Mr. A. Lloyd James, Mr. S. P. B. Mais and Mr. Frank Roscoe appeared in the list of speakers, together with others who were having their first experience of school broadcasting. Commander Stephen King-Hall and Mr. K. C. Boswell dealt with the subject of *Tracing History Backwards*, and Professor Winifred Cullis and Professor Doris Mackinnon gave a valuable series on elementary biology. The programmes for the whole year covered a wide range, and a German course was an interesting addition to the autumn syllabus.

DRAMA AND LIGHT ENTERTAINMENT.

There was plenty of variety in the B.B.C.'s dramatic productions during 1933. They included Shakespeare and Edgar Wallace, *The Wild Duck* and *Chu Chin Chow*, and every listener was able to find something which suited his individual taste. Shakespeare was the most popular dramatist of the year, and performances of *Macbeth* (with Ralph Richardson and Martita Hunt), *Coriolanus* (with Sybil Thorndike and Leon Quartermaine) and *Much Ado About Nothing* (with Henry Ainley) were given in the early months. In the autumn there was a special series of Sunday Shakespeare broadcasts, which began with Peter Creswell's production of *Othello*. The cast included Godfrey Tearle, Gwen Ffrangcon-Davies, Malcolm Keen and Mary Clare.

Other stage plays which were adapted for broadcasting were *The Wild Duck* (with the brilliant German actress, Elizabeth Bernger), *The School for Scandal* (with Cyril Maude), *Isaiah* (with Henry Ainley), *Chu Chin Chow* (with Oscar Asche), *Escape* (with Leon Quartermaine), *Quinneys* (with Cyril Maude), and *The Avenger*, in which Dorothy Dickson played her original part. Among novels and plays which turned into radio drama were *The Country of the Blind* (adapted by E. J. King-Bull), *The Bottle Imp* (adapted by James Macgregor) and *Mr. Petre* (adapted by Lance Skevington). A radio version of the film, *Watts Time*, was also broadcast.

It was noticeable, however, that the B.B.C. is still having difficulty in finding a good supply of original radio plays, and apart from a series of revivals in the autumn, there were comparatively few plays which had been specially written for broadcasting. Two of the best were Miss E. M. Delafield's *The Mulberry Bush* and Lord Dunsany's *The Uses of Man*, and others were

Philip Wade's *The Game*, L. Du Garde Peach's *Three Soldiers*, Adrian Thomas's *Yours to You*, and Louis Goodrich's continuation of the *Ann and Harold* saga. The programme of twelve revivals, which included Richard Hughes' *Danger* and Reginald Berkeley's *The White Chateau*, showed that radio drama at its best can be extremely good, but at present it is not a medium in which many writers can work well.

Revue and vaudeville again occupied an important place in the broadcasting programmes, and they maintained a fairly high level of entertainment. Revues were contributed by Archie De Bear, Henrik Ege, Ashley Sterne and A. A. Thomson, Max Kester, Ernest Longstaff and others, and perhaps the most successful of all the light entertainments were John Watt's *Songs from the Shows*, a series in which he neatly recalled the song successes of different London Theatres. John Macdonell's *There's More Magic in the Air*, in which Nina Boucicault and Jerry Verno broadcast for the first time, was also an excellent production.

There were times when the vaudeville programmes showed signs of becoming stale, but the appointment of Eric Maschwitz as Director of Variety did much to enliven them. Such well-known broadcasters as Gillie Potter, Stainless Stephen, Ronald Frankau, Anona Winn, and Clapham and Dwyer appeared in the programmes during the year, and among those who were less familiar to broadcast audiences were Eric Bertner, Laurie Devine, Phyllis Monkman, Ivy Tresmand and Margaret Rannerman. Apart from the ordinary vaudeville programmes special performances were given by Nina Mae McKinney, Marion Harris, and Josephine Baker.

MISCELLANEOUS.

The programmes for 1933 enabled listeners to receive a first-hand impression of many important events, and among the ceremonies which were relayed were the opening of the Southampton Graving Dock by His Majesty the King, the memorial service for Lord Grey at Westminster Abbey, the services at Canterbury Cathedral and the Oxford University Church in honour of the centenary of the Oxford Movement, the laying of the foundation stone of the Liverpool Metropolitan Cathedral, and the opening of the Royal National Eisteddfod of Wales. There were special broadcasts from the Aldershot and Tidworth Tattoos and the Greenwich Naval

Pageant, and the running commentaries on the Boat Race, the Derby, the Cup Final, and other sporting events were as much appreciated as usual.

The S.O.S. service continued its kindly task of summoning relatives to sick-beds in hours of need, but during the autumn there was a slight change of policy. Until September the B.B.C. had been willing to broadcast descriptions of missing persons, if it was thought that they might be in some danger; but it was found that these messages had a very small percentage of success, and they were discontinued. The S.O.S. service also came into prominence in the early part of the year in connection with what was known as "the blazing shed" mystery. At the request of the police two messages were broadcast about a wanted man, and the second message stated that the man was wanted for wilful murder. It was the first time that the police had used broadcasting for making such an announcement.

The death of Mr. F. G. Kellaway on April 13 robbed the B.B.C. of one who had always taken a keen interest in its work. Mr. Kellaway was Postmaster-General in 1921, when the first discussions about British broadcasting took place, and he played a considerable part in the establishment of the original British Broadcasting Company. After retiring from politics he served on the Board of the Company until 1926, when the Company was abolished and the British Broadcasting Corporation was established. He had justly been called "the father of British Broadcasting."

Regular programmes of television were again given in 1933, but the number of "lookers-in" is still extremely small. It is probable that some years will have to pass before this side of broadcasting is fully developed. Many artists and prominent personalities were televised during the year, and an amusing programme was given by animals, birds and reptiles from the London Zoo. As each creature came in front of the televising apparatus, Mr. Seth Smith, the curator of the Zoo, described its characteristics and habits.

An extension in the hours of Sunday broadcasting came into force in September, when the period between six and eight o'clock, which was previously silent, was devoted to suitable programmes. This development did not involve a change in the B.B.C.'s general policy of keeping the Sunday programmes in harmony with the character of the day.

GLIDING PROGRESS IN 1933.

DURING the past two years there has been a steady concentration on what may be described as research work by the British gliding movement. Such work is of the greatest possible value, for new discoveries on the technical side in one aspect of aeronautical science are generally of considerable value in their application to other aspects. That gliding enthusiasm should have taken this more serious channel as its outlet is all to the good, for the "boom" of two or three years ago, although it served a useful purpose in drawing public attention to the possibilities of motorless flight and Britain's neglect of them, could have done little good by continuing simply on "popular" lines. The movement may now be regarded as having got

down definitely to "brass tacks," and the work it is doing on these lines is undoubtedly a valuable contribution to world progress in gliding and sailplaning.

The movement is now much more efficiently organised than it was a mere matter of two years ago which is another indication that those who are prominent in the gliding world mean business and are determined that the movement shall go forward on a solid basis. During the 1930 boom all sorts of extravagant prophecies were made. Many people were encouraged to visualise an almost immediate development which would place a glider in every back garden and which would give, in the same short space of time, every enthusiast, young and old, the

ability to soar aloft whenever he wished, free from the restrictions of time and space, and, what was more attractive, free from the expense of a petrol bill. It was a wonderful dream, and when they found that it had little real contact with reality, those "fair weather" enthusiasts who are always ready to jump at the attractions of a new craze suddenly found that gliding was not for them. Most of them are probably now playing "Yo-yo" or "bif-bat"!

As soon as the British gliding movement got rid of its "passengers"—and for a time there was a surprisingly large number of them—it was able to put its hangars and gliding grounds in order and settle down in real earnest. It has every reason to be proud of what it has accomplished. Although the latest gliding developments and achievements in Britain have not received the Press attention which the movement had during the height of the boom, they are far more worthy of publicity than the spectacular "flips" of those early days, when everybody seemed to want to be photographed at the controls of a glider.

Gliding has come to mean something very much more important since those days, and for this thanks are due to the really serious workers in the movement, who, through the activities of the British Gliding Association and the leading gliding clubs, have kept the movement alive and progressive in a thoroughly vital and worthwhile way.

During the past year or so great interest has been stimulated on the competitive side. International competitions are held every year under the auspices of the International Commission which was formed about two years ago. It is the intention that these competitions shall be held in turn in the various countries most keenly interested in gliding, and competitors from all countries take part in them on each occasion. In addition, the national organisations also organise similar events, at which new records are constantly being set up.

The annual gliding and soaring competitions of the British Gliding Association were held at Sutton Bank, near Thirsk, in Yorkshire, in October this year, and attracted many thousands of spectators. Mr. P. A. Wills qualified for the Wakefield Trophy for the longest distance with a flight of 15 miles in a Scud glider. The Manby Cup for a journey of not less than five miles in two directions was won by Mr. Wills, who flew five and a half miles in each direction. The longest duration flight, for which the Volk Cup was offered, was that of Mr. G. M. Buxton, of the London Gliding Club, who was in the air for 2 hrs. 30 mins. In this event the minimum duration to qualify for the trophy was five hours, and it thus went to Flying-Officer Mole, who at that time held the British duration record of 6 hrs. 55 mins., which he established at Dunstable this year. Flying-Officer Mole is a member of the London Gliding Club, and one of the most skilled of the British glider pilots.

In the competitions just referred to a new British duration record was set up by a member of the Dorset Club, Mr. John Laver, who, also at Thirsk, made a flight of 7 hrs. 22 mins., thus beating Flying-Officer Mole's feat by 27 mins.

Mr. Laver took off at 11.40 a.m. and landed in heavy rain at 7 p.m. When Mr. Laver landed he was unable to see the hill tops and was guided only by two rows of lamps. The flight was officially observed by Mr. J. L. P. Waplington, the secretary of the British Gliding Association, and is subject to official confirmation.

Several highly spectacular flights have been made during the year. A new German duration record was set up on June 23 by E. Lorenz, who soared for 16 hrs. 30 mins. on an Alexander sailplane over the well-known soaring grounds of the Rhon-Rosestein. The previous German record was of 15 hrs. 13 mins., set up by Hentschel last year. The Germans have, of course, a fine gliding record, and their new pilots are showing something of that ultra-advanced technique for which Herr Kronfeld is famous. He is undoubtedly the finest glider pilot in the world to-day.

Glider has been towed over the Alps. So far, however, no pilot has achieved the fine feat of crossing the Alps without a plane to tow him. The world's distance record for a passenger-carrying glider has been claimed by the German pilot, Einzler, for a flight with a passenger from Duisburg in the Ruhr, Germany, to Eindhoven in Holland, a distance of 48 miles.

An American pilot claims to have looped the loop 40 times, and another to have performed a spin of 2,300 feet! Herr Kronfeld carried out a sailplane flight of 77 miles in July, after being towed in his sailplane to a height of 2,000 feet. This is claimed to be the longest motorless flight yet made in France.

Many other European countries have commenced to take a serious interest in gliding and sailplane. Clubs have been formed in Poland, Hungary, and in Russia, and in each of these countries highly creditable records have been set up. There is little doubt that the high performance sailplanes have now advanced to a state of technical efficiency which enables a skilled pilot to perform flights which would have been considered absolutely impossible a few years ago.

The British gliding movement suffered a severe loss in May by the death of Mr. C. H. Lowe-Wilde, who was killed at Maidstone Airport, West Malling, while demonstrating a new motor glider which he had himself invented. It was fitted with an 8 h.p. engine and was of the type which was to become known as the "motor cycle of the air," not only because of its small power, but because of its low running cost. Mr. Lowe-Wilde had given many successful demonstrations with his interesting machine, which he was optimistic would have an interesting future. He was an air pioneer of great experience, whose loss has been greatly felt. The well-known Austrian gliding pioneer, Erwin Rieger, was also killed this year, when a glider which had been built by himself and his brother came into collision with a tree in Carinthia and crashed.

Several new gliding clubs have been formed in Britain during the year, and most of the leading clubs have organised their own competitions from time to time in various parts of the country.

HIKING CAMPING AND CARAVANNING.

1933 will long linger in the memory of open-air enthusiasts as a wonderful year. Remarkable for its sunshine record and absence of rain over lengthy periods, it provided the ideal weather background for the hiking, camping and caravanning interests, which reached their peak year as far as popularity is concerned. Such a gloriously fine summer comes all too rarely in Britain, and hiker-campers particularly were able to revel in their health-giving pastime, without sampling any of those drawbacks which bad weather inevitably introduces. Bad-weather seasons may follow, but the effect of the lovely summer of 1933 will make the popularity of the open-air holiday secure for some seasons to come.

When hiking—or rambling, as some people still prefer to call it—had a sudden boom two or three years ago, there were those who were inclined to scoff at the “bores and shorts” army which suddenly descended on the roads. It was just an ephemeral craze, they said, and could not possibly last. One summer at least would see it replaced by some other holiday “boom.” They were inclined to overlook certain facts, however, which ensure for walking holidays a long popularity. One is the economic situation, which has deprived hundreds of thousands of young people of the means of indulging in any other form of holiday, even if they wished to do so. Hiking is not only healthy, but it is cheap; and while there are so many unemployed young people it will continue to attract innumerable “fans.”

This year has seen the formation of a large number of new hiking clubs, and the movement is now much more effectively organised. Most of the Clubs are now affiliated to District Federations, which are in turn under the control of a central organisation. An increasingly important and useful work is being done by the British Youth Hostels' Association, which has opened many new hostels in Great Britain during the year. Great use is made of these resting places, which had their prototypes in Germany, where long walking tours are a very popular form of holiday. It is not possible to state accurately the number of hikers who are members of recognised clubs, but it undoubtedly runs into several hundreds of thousands.

The organisations have recently turned their attention to securing more freedom for hikers in places where restrictions have been imposed by land-owners, and at the same time they have impressed on their members the necessity of taking every precaution against damaging land-

marks and property. Several large land-owners have recently complained of such damage, and have also protested against the conduct of some hikers who have forced their way through gates and fences, and shown every determination to treat the law of trespass as non-existent. Obviously rambling and similar associations are anxious to open up as much land as possible for the enjoyment of their members, but complaints of this kind are a definite complication which scarcely opens up the way to friendly negotiations. In some instances during the past year, meetings have been held to protest against the closing of footpaths and beauty-spots to the public.

All over the country rambling clubs are keeping a watchful eye on obstructed footpaths, and in some cases, no doubt, they are doing useful work in safeguarding public rights of way, many of which may have tended to become obscured owing to lack of use until hikers have re-asserted the public rights. In some parts of the country important rambling clubs have organised what they call “right of way rambles” in places where complaints of closure have been made.

This year there have been several new developments of the hiking movement. Some of the largest clubs have introduced an educational interest, by organising “literary” hikes to parts of the country made famous by British authors, and by organising series of lectures dealing with various sections of hiking country. Many of the clubs now announce courses of winter lectures of wide appeal.

Another development has been the coming of the “mass” hike, in some of which 200 and 300 people have taken part. Several such hikes have been organised by certain railway companies, who have made a speciality of “hikers' expresses,” conveying a trainload of people to popular country some 50 or 60 miles away, where they have enjoyed a long hike under an experienced guide, picking up their return train at a station where the tour has ended. Some of these affairs have been announced as “mystery hikes,” the place not being revealed until the train has reached its destination.

Camping and caravanning also increased greatly in popularity during the year. Caravanning particularly has stimulated the growth of a considerable industry, there now being a large number of firms engaged in the manufacture of caravans and trailers. The extent of this interest was shown at the recent Motor Show, where this section was the largest on record.

Buchan's Weather Periods.—It will be gathered from the fourth column of the meteorological tables on the second page of each month, that a mean temperature for each day of the year has been formed by taking the average of the observed temperatures on that day during 65 years. These mean temperatures follow in fairly uniform sequence, upwards or downwards as would appear readily if the figures were used to form a graph or curve. But the uniformity is not precise; there are occasional depressions and elevations. Dr. Buchan formed such a curve of mean temperatures for a station in Scotland, and these periods of non-uniformity have been handed down as his weather records. It is to be noted that these refer to the mean of many years, and are not to be regarded as indicating the probable weather for every year. The figures giving the mean temperature at Greenwich 1841-1905 show similar depressions and elevations which, on comparison, will be seen in some cases to agree with Buchan's periods.

ELCHO CHALLENGE SHIELD.

The Elcho Challenge Shield was instituted in 1862. It is open to one team of 8 from England, Scotland and Ireland respectively. 15 shots each at 900, 1,000 and 1,200 yards. Highest possible score 1,800.

THE ASHBURTON SHIELD, BISLEY.

THE Ashburton Challenge Shield Competition was instituted in 1861 for teams of 8 from the Public Schools (teams of 11 from 1861-1876; teams of 8 since 1877). In 1861 and 1862 the Hay M.L. rifle was used; in 1863 the long Enfield M.L.; 1864 70 the Navy 5 groove M.L.; 1871-1884 Snider; 1885-1896 Martini-Henry; since 1897 the .303 Magazine. The present regulations are 7 shots at 200 and 500 yards; one team of 8 pupils from each of such schools as have a contingent of the Junior Division of the Officers' Training Corps. The Highest Possible score is 560.

THE Nobel Prizes are awarded from the income of a fund bequeathed to trustees by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died December 10, 1896, leaving a fortune of about £1,750,000. The first awards were distributed on the fifth anniversary of Nobel's death, Dec. 10, 1901. The awarding authorities are the Swedish Academy of Science—(a) Physics (b) Chemistry; the Stockholm Faculty of Medicine—(c) Medicine or Physiology; the

Swedish Academy of Literature—(d) Literature; and a committee of five persons elected by the Norwegian Storting—(e) Peace. The fund is managed by a Board of Directors elected by fifteen deputies appointed by the authorities above named. The Swedish Government appoints a President of the Board of Directors. Particulars concerning conditions, &c., can be obtained from Nobelstiftelsens Styrelse, Sturegatan 14, Stockholm, Sweden.

COMPLETE LIST OF AWARDS (Value, 1931, Kr. 173,206; 1932, Kr. 171,752; 1933, Kr. 170,331).

Year	(a) PHYSICS.	(b) CHEMISTRY.	(c) MEDICINE OR PHYSIOLOGY	(d) LITERATURE.	(e) PEACE.

1929	Duc de Broglie	Prof. H. Fischer	{ Dr. Karl Landsteiner }	Sinclair Lewis	F. B. Kellogg.
1930	Sir C. V. Raman	{ Prof. Bosch (Prof. Bergius) }	{ Prof. Otto Warburg }	{ Eric Axel Karl- feldt }	{ Archbishop N. Soderblom. }
1931	No award	Irving Lang- muir	{ Sir Charles Sherrington Prof. E. D. Adrian }	J. Galsworthy	{ Jane Addams. N. M. Butler. }
1932	{ Prof. W. Heisen- berg }	Not yet awarded	{ Prof. Thomas H. Morgan }	Ivan Bunin	No award
1933	{ Pt. P. II M. Dirac Prof. Erwin Schrödinger }				Not yet awarded.

COST OF THE CIVIL AND SOCIAL SERVICES.

The cost of the Civil Service forms only a small part of the expenditure of £348,000,000 under the Civil Estimates, and extends to the Admiralty, War Office, Air and Revenue Department votes. Adding these services, the estimates for 1933 (i.e. financial year ended March 31, 1934) amount for some 345,000 civil servants in receipt of salaries, wages and allowances of about £70,000,000. The corresponding figures for 1909 were £15,000 and £24,000,000. The number employed has thus increased by 60 per cent., while the average remuneration (making some allowance for employees not enumerated) has risen from about 40s. to 75s. weekly. It should be understood that these averages cover the whole range of employees, from office cleaners to heads of departments with cabinet rank, but exclude judges of the Supreme and County Courts and Metropolitan police magistrates, whose remuneration is charged on the Consolidated Fund.

The following table gives a detailed comparison for the several services:—

Class	Expenditure. (net.)		Number Employed.		*Salaries, Wages and Allowances.	
	1909.	1933.	1909.	1933.	1909.	1933.
	£'000	£'000.			£'000.	£'000.
Civil—						
Great Britain	35,035	†335,128	17,570	73,970	4,870	21,110
Ireland	5,035	6,645	15,030	320	1,640	130
Revenue—						
Post Office	18,978	59,439	166,950	231,230	13,530	35,110
Inland Revenue	1,243	7,105	3,380	20,140	1,050	6,790
Customs and Excise	2,130	5,364	8,160	13,450	1,640	4,600
†Defence—						
Admiralty	378	1,090	1,500	2,750	376	1,090
War Office	593	803	2,640	1,870	590	850
Air Ministry	645	...	1,730	...	680
Total	63,398	†416,219	215,230	345,460	23,700	70,360

* Including amounts (mainly in Civil and Inland Revenue Offices) for which employees are not enumerated—1909, £1,850,000; 1933, £3,000,000; approximately.

† Includes £24,500,000 Supplementary Estimate voted in June, 1932, to provide for continuance of Unemployment Transitional Payments for remaining nine months of financial year.

‡ Civil Administrative Departments only.

The period reviewed covers the introduction of many costly social and post-war services, and the following principal items of increased expenditure in respect of government grants and benefits under such services account for no less than £284,000,000, or 95 per cent. of the total increase of £300,000,000 in the Civil Estimates of Great Britain. As to the Revenue and Defence Estimates, the bulk of the increase of £50,000,000 in expenditure during the period occurs in the Post Office vote, where the cost is not borne by taxation but is recovered by service charges to the public.

Grants to Local Revenues—

"Derating"	£45,300,000
Education and Teachers' Pensions	34,500,000
Police	11,300,000
Housing Grants	15,800,000
Unemployment—Insurance payments and grants	81,100,000
Health Insurance—Payments to Fund	6,000,000
Old Age Pensions	31,600,000
Widows, Orphans and Old Age Contributory Pensions	12,000,000
War Pensions	43,500,000
Sugar Beet Subsidy	2,900,000
Total	£284,000,000

In considering the increase of £47,000,000 in Civil Service salaries and wages during the period under review, due regard should be taken of the general rise in wage rates, and the enormous expansion in social schemes and post-war services which benefit large sections of the public, and which necessitate substantial staffs for administration. Of the total increase, it will be noted that almost one-half occurs in the Post Office, while one-third is attributable to the Civil Estimates.

Cost-of-Living Bonus.

The bonus system in operation in the Civil Service arose out of war-time conditions, and now virtually applies to all permanent non-industrial and to some industrial grades. During the past few years, bonuses have been very substantially reduced concurrently with the fall in the official "cost-of-living" figure. The present remuneration of civil servants includes a bonus addition equivalent to a cost-of-living figure of 50 per cent. on the first £91 15s. of annual basic salary (i.e. 35s. weekly); 23½ per cent. on the next £108 5s.; and 17½ per cent. on the next £300, with a special supercut in respect of salaries exceeding £500 per annum.

BRITAIN'S RECOVERY.

On November 17, 1933, the Speaker of the House of Commons read the King's Speech on the Prorogation of Parliament. With regard to Trade and Employment the King in his Speech said:—

"I rejoice to observe the steady improvement in trade and employment among my people.

Trade agreements which will, I trust, be found mutually advantageous have been concluded with a number of foreign countries. Negotiations with other countries for the conclusion of similar agreements will shortly be begun.

The continued willingness of my people to bear heavy sacrifices has made it possible for this country, almost alone among the great countries of the world, to maintain a satisfactory balance between its national income and expenditure.

Confidence has been restored by the pursuit of a sound financial policy, accompanied by the establishment of a reasonable measure of protection for the industry of the United Kingdom.

The steps taken to promote the reorganisation of various sections of agriculture and the sea-fishing industry have not yet had time to show their full results, but I am pleased to note that there are already definite signs of improvement.

The numbers of the unemployed, though still unhappily far too large, have fallen substantially and continuously in recent months, despite the usual seasonal trend in the opposite direction."

OVERSEAS TRADE.

(October 1932-1933.)

The *Trade Returns* for October, 1933, show an encouraging increase over those for October, 1932, as may be seen from the subjoined figures.—

IMPORTS.

Classes and Groups	Oct. 1932.	Oct. 1933

* BOYS' CLUBS.

The National Association of Boys' Clubs (President, H R.H. The Duke of Gloucester, K.G.) is responsible for the development and co-ordination of Boys' Club work throughout the country, and has affiliated to it, either directly or through local organisations, over 900 clubs. These clubs are mainly for working boys between 14 and 18; they provide recreational and educational activities designed to promote the mental, physical and spiritual fitness of their members. Information concerning existing clubs, and advice as to the best methods of starting new clubs, may be obtained from the Secretary, National Association of Boys' Clubs, 27, Bedford Square, London, W.C. 1.

* See also LONDON FEDERATION OF BOYS' CLUBS, p. 995.

Regnal Years.—The years of a king's reign are the regnal years, and each begins on the anniversary of his accession: e.g., Regnal year 24 of the present King began on May 6, 1933; regnal year 25 begins on May 6, 1934. The system is used for dating Acts of Parliament. The Summer Time Act of 1925, for example, is quoted as 15 and 16 Geo. V. ch. 64, because it became law in the session which extended over part of these two regnal years. The regnal years of Edward VII. began on January 22, so that Acts passed in that reign are, in general, quoted with only one year number, but year 10 of this series ended on May 6, 1910, and Acts of the Parliamentary Session 1910 are headed 10 Edw. VII. and 1 Geo. V.

CLOSE TIMES FOR GAME.

In each case the dates are inclusive :—

Black Game—Dec. 11 to Aug. 19 (Aug. 31 in Somerset, Devon, and New Forest).

***Grouse**—Dec. 11 (Dec. 10, Scotland) to Aug. 11.

***Partridge**—Feb. 1 to Aug. 31.

***Pheasant**—Feb. 1 to Sept. 30.

***Ptarmigan** (Scotland only) Dec. 11 to Aug. 11.

It is also unlawful (in *England and Wales*) to kill the game marked * on a Sunday or Christmas Day.

In *England and Wales*, hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In *Scotland* the same remarks apply to deer and hares, to the first four birds, and to wild duck. The close-time for all these birds

is, under the Wild Birds Protection Acts, 1880 to 1908, from March 1 to July 31 both inclusive. Otherwise this close-time applies to all wild birds throughout Great Britain.

HUNTING AND GROUND GAME.

There is no statutory close-time for fox-hunting or rabbit-shooting, nor for deer or hares; but by an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March 1 to July 31 inclusive under a penalty of a pound. The first Monday in November is the recognised date for the opening of the fox-hunting season, which continues till the following April. Otter-hunting lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about August 12 to October 12 for stags, and from November 12 to the end of March for hinds.

SEASONABLE AND UNSEASONABLE FISH.

THE following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The letter *p* signifies that the fish are then

in their prime or most plentiful; the letter *x* signifies that the fish may be obtained, but are not at their best; the letter *c* signifies that it is "close-time" as fixed by statute.

(a) This is for sea crayfish (or crawfish). River crayfish can be obtained in the summer and autumn. It is illegal to take fresh-water crayfish from March to June.

(b) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for temporary storage.

(d) In the close season, salmon from the Netherlands, and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(e) For the first six months the bulk of our London supply of shrimps comes from the Netherlands, but Dutch shrimps are far inferior to the English, which are plentiful from July to Dec.

The Auctioneers' and Estate Agents' Institute

29, LINCOLN'S INN FIELDS, LONDON, W.C. 2

(FOUNDED 1880 MEMBERSHIP OVER 6,500)

THE profession of the Auctioneer, Estate Agent, and Valuer is essentially one for a boy of good education. Good education, however, is not in itself sufficient, since the profession offers no prospects to one who is not prepared to work hard, and who is not blessed with a fairly good personality. Every boy whose object is Membership of the Institute must begin by passing the Preliminary Examination, or one of the exempting Examinations, either before or soon after he enters upon his practical training.

Further particulars of the Institute, and a small brochure on entry into the profession, may be obtained on application. If, after reading these, a boy or his parents should require any further information or advice, application should be made to the Secretary, who will be pleased to deal with the matter either by letter or in an interview.

THE COLLEGE OF ESTATE MANAGEMENT

(Incorporated by Royal Charter)

35 Lincoln's Inn Fields,
London, W.C. 2.

Complete Courses of Preparation for
the Examinations of

**CHARTERED SURVEYORS'
INSTITUTION

Dumpton House**Broadstairs, Kent**

FOR PUBLIC SCHOOLS AND ROYAL
NAVAL COLLEGE (Boarders only).

A. S. ATHAWES, B.A.

(Late Parker Exhibitioner, Corpus Christi
College, Cambridge),

and

R. F. F. TENDALL, B.A. (Honours)
(Clare College, Cambridge).

Usual Course. Special provision for young and delicate boys. Suitable premises in own grounds. Large Playing Field, Gymnasium, Miniature Rifle Range, Tennis Court, Daily Physical Drill. Domestic arrangements under the personal supervision of Mrs. and Miss ATHAWES.

Rickerby House**Carlisle, Cumberland****PREPARATORY SCHOOL FOR THE PUBLIC
SCHOOLS AND ROYAL NAVY***Head Master—***R. A. SHEPHEARD-WALWYN,
M.B.E., M.A. (T.C.D.)**

(Late House-Master of the "Prothonetors"
House at Glenside)

*In partnership with***M. B. RICHARDSON, B.A.
(Cantab.)**

(Late of Mill Hill School).

Rickerby House is a solidly-built family mansion in some ten acres of its own grounds on the north side of the River Eden, just outside the city boundary.

The district possesses what is probably the most equable climate in the kingdom. The house has electric light and central heating throughout. The rooms are all high and light, and the majority face west. The drainage system is modern, and has been approved by the Rural District Sanitary Inspector.

The usual subjects are taught, and the method employed aims at making it possible for each boy to progress at his own best speed, neither "cramming" the intelligent boy nor neglecting the slow one.

The use of out-of-school hours is as varied as possible, the usual games being played and creative hobbies being encouraged. The aim is to make games and athletics a real recreation and not a business. Hiding lessons are available for boys whose parents wish it.

Entire charge of pupils if desired.

*Prospectus and Fees on application to the
Head Master.*

Seafield Park**Near Fareham, Hants.***Principal—***E. W. WEBB, B.A.**

Seafield Park, standing in its own grounds of **80 acres**, is a School for boys between the ages of **7 and 14**, preparatory for the Public Schools and Royal Navy. It has a large staff, and the most careful individual attention is given in every way. A large number of Scholarships and other successes gained.

The climate is ideal for boys, and is particularly suitable for those coming from India and abroad. Entire charge can be taken of such boys, and there is a class under a Governess for quite small boys.

The buildings are spacious and ample, and include Private Chapel, Carpentry Shop, Play-rooms, etc., etc., and the house is lit with electricity from its own plant.

The School has its own Farm for the supply of milk, eggs and butter, and a large Kitchen Garden.

Fees—40 guineas a term for boys joining under 12 years of age; 50 guineas a term for boys joining above 12 years of age.

Telegrams: "Webb, Stubbington."
Telephone: 6 Stubbington.

Station:
FAREHAM

Chichester School

Chichester, Sussex

BATH, SOMERSET. Episcopal city. Pop. 65,202. 207 miles from London. 22 miles from Bristol. Means of Access—G.W. Railway, London Midland and Scottish Railway, and Somerset and Dorset Railway. Elevation—60 to 750 ft. above sea-level. Neighbourhood—Woodland, hills and diversified country. Climate—Mild, equable, varies according to elevation and aspect. Water Supply—Constant. Drainage—Modern. Soil—Oolitic limestones, clays and sands. Baths—Luxuriously appointed with every scientific application known to modern balneology. Mineral Waters—Thermal springs. Temp. 120° F.

Bath, situated in a valley, and at various levels on slopes of surrounding hills, possesses an unrivalled combination of archaeological, historical, social and scenic attractions, besides the famous waters to which it owes its origin.

"HOUSES AND ESTATES." FORTT, HATT, & BILLINGS, F.A.I., Auctioneers and Estate Agents. Special list on application. Offices, 3, Burton Street. Telephone, 4268 (2 lines).

BEDFORD. C.B. Pop. 40,573. 50 miles from London. L.M. & S. Railway. A noted educational centre on the banks of the Great Ouse, with charming riverside promenade. Golf Links (28 holes).

THE PRINCIPAL HOUSE AGENTS FOR BEDFORD AND COUNTY. W. and H. PEACOCK, 6, Dame Alice Street (close to G.P.O.), Bedford. (Telephone, 2333.) The Bedford Illustrated Property Register contains Map, school fees, views and photos of Town and Schools. Post free. Weekly Sales. Auction Rooms, Lime Street. Auction Mart, Horne Lane.

BEXHILL, SUSSEX. M.B. Pop. 21,229. Southern Railway. 72 miles from London, 5 miles from Hastings, 12 miles from Eastbourne. Aspect—South. Climate—Dry, invigorating. Water Supply—Constant. Soil—Sandy. A modern select seaside resort, with good educational facilities. 2 Golf Links. Public Park, 12½ acres. Excursions—Battle Abbey, 8 miles; Pevensey Castle, 7 miles; Hurstmonceux Castle, 10 miles.

The rapid growth of Bexhill is to be attributed to its bracing air and sunny climate, and it has been found that the air possesses recuperative and stimulating qualities in a remarkable degree. It is one of the sunniest spots on the South Coast; fogs are practically unknown, while the soil is for the most part sandy, and dries quickly after rain.

HOUSE AND ESTATE AGENTS, STAINES & CO., 28, Devonshire Road, and Sea Road, Cooden Beach. Agents for all available Furnished and Unfurnished Houses to be Let or Sold. Special Lists, Map, and Guide gratis. Telegrams, "Property, Bexhill." Telephones, 349, and Cooden 15.

ERNEST W. PARSONS, Proprietor.

WORTHING

is noted for the equability of its climate, which is largely due to its geographical situation. The proximity of the sea and the shelter afforded by the South Downs combine to modify the climate and avoid extremes. The absence of hills enables convalescents to take exercise without exertion, and so derive the greatest benefit from the high percentage of ozone in the air and the large

amount of sunshine. A palatial Pavilion at the Pier entrance and a commodious Bandstand Enclosure on the Parade have been added to the town's many attractions. An all-the-year orchestra plays in the Pavilion. There are facilities for sports of all kinds. Horse-riding on the South Downs is a popular pastime.

53 minutes from London by the luxurious corridor trains of the Southern Electric Railway.

SIX TRAINS PER HOUR.

**The Ideal Residential Town 'twixt Sea and Downs.
Unsurpassed for Sunshine and Equability of Climate.**

NATIONAL FIXED TRUST CERTIFICATES

SECURITY OF CAPITAL WITH STABILITY OF INCOME

The Security of Capital and Stability of Income provided by National Fixed Trust Certificates have created a continuous and increasing demand for the Certificates originally introduced in June, 1932.

The Certificates represent a holding in a group of first-class industrial British Companies and are known as:—

UNIT 'A' OR UNIT 'B'

Sums from approximately £25 upwards may be invested in either Unit, and a mixed investment in both Unit 'A' and Unit 'B' secures an interest in forty-seven leading British Companies, with dividends payable quarterly on fixed dates.

TRUSTEE FOR THE CERTIFICATE HOLDERS:

MIDLAND BANK EXECUTOR & TRUSTEE CO. LTD.

Full particulars of Unit 'A' and Unit 'B' can be obtained through any Branch of the MIDLAND BANK, from any STOCKBROKER, or from the

NATIONAL FIXED INVESTMENT TRUST LTD.

WHITAKER'S PEERAGE

“Whitaker's Peerage, Baronetage, Knightage and Companionage” is a companion volume to, and not less authoritative than, the ALMANACK. Introduced in 1895, it is now firmly established, and serves its public almost equally as well as its more expensive contemporaries.

Royal Blue, Cloth Demy 8vo, **25/-** net

From all Booksellers.

J. Whitaker & Sons, Ltd., 12, Warwick Lane, London, E.C. 4.

Insurance Advice

MR. T. G. ROSE (Author of *Cost Price Assurance* and Hon. Lecturer to University Economic Dept.) is at all times willing to give intending ASSURANTS assistance on Assurance matters, without any charge falling upon the applicant. All proposals and premiums may be sent direct to the Company concerned.

THE TABLES PRESENTED below indicate the advisability of writing to or seeing the author *before* investment. Letters, giving the fullest possible information as to date of birth, etc., should be addressed :

14, THE GREEN, RICHMOND, SURREY

EXAMPLE OF RESULTS :

Whole Life Assurance (with profits) £10 Annual Premium. †

Age at Entry	25	30	35	40
Assumed age at death	70	70	70	75
Yield	£1,175.	£933	£740	£635

"Whole-Life." Twenty Limited Payments of £10. †

Age	20	25	30	35	40	45
Result at age 70 } (Death assumed) }	£982	£820	£677	£552	£450	£363

WHITAKER'S ALMANACK : PP. 469, 1932, and 539, 1933.

"The selection of the office best suited to requirements and likely to produce the best results should be carefully made, but the study of any tables or suggestions is not sufficient to enable persons without technical knowledge to gauge the respective merits of the various companies . . . and large sums may be saved or earned by intending proposers through obtaining reliable advice before a proposal is made."

£10 Annual Endowment Premium.	Age at		Yield †
	Entry	Maturity	
	20	60	£873
	30	60	£516
	40	65	£370

† World-wide policies.

COST PRICE ASSURANCE, Price One Shilling. A Guide to Policies yielding 4 to 5 per cent. (compound), according to age at entry. By T. G. Rose. From all booksellers, the Publisher, J. Whitaker & Sons, 12, Warwick Lane, E.C. 4, or the Author (POST FREE.)

"The subject is treated in a masterly way. The science of assurance from the standpoint of the Policy-holder could scarcely have been illustrated and explained with greater ability."—City Press.

HOUSE PURCHASE BY ASSURANCE

One of the first Insurance Companies to popularise House Purchase in conjunction with Life Assurance was the **BRITANNIC ASSURANCE CO., LTD.**, who have over 11,000 contented householders on their books.

Each of these householders not only secured his house for himself, and abolished rent, but, owing to the protective Life Assurance feature in his contract, his family is assured of a home without further payment in the event of his death.

Advances up to 80% of approved value

Yearly inclusive outlay little (if at all) more than rent.

Explanatory leaflet forwarded free on application.

BRITANNIC ASSURANCE CO. LTD.

Chief Offices: Broad Street Corner, BIRMINGHAM

All Classes of Insurances Effected.

ANNUITIES

The Canada Life Assurance Company specialises in Life Annuities and offers the very best value and service to its clients. Its rates are exceptionally attractive and the contracts are protected by

ASSETS over £44,000,000

invested in absolutely first-class Securities. The Company is one of the strongest in the British Empire, with

**Surplus Funds and Special Reserves of
£1,692,690**

at December 31, 1932.

THE POLICY WHICH PROTECTS

A New Idea in
FAMILY PROTECTION POLICIES
 now issued by the
CLERICAL, MEDICAL and GENERAL
Life Assurance Society

An illustration of this really cheap Policy will be sent on request.

MONTHLY PREMIUMS AVAILABLE

Apply to the Chief Office—

15, ST. JAMES'S SQUARE, LONDON, S.W. 1
 or to any of the Society's Branches.

THE POLICY WHICH PROTECTS

BEFORE buying an Annuity Consider

Will you

- (1) be secure?
- (2) be sure you are secure?
- (3) obtain the best value for your money?

THE CONFEDERATION LIFE ASSOCIATION, the old-established Annuity Office, grants annuity rates which rank among the very best obtainable; allowance is made for each month of age actually completed; contracts may be obtained under which the full return of the purchase money is guaranteed; and it possesses funds

exceeding £19,000,000 under direct Government supervision.

A man aged 65, for example, can obtain a guaranteed return on capital exceeding 10 per cent. per annum for life. The return at other ages to both male and female investors is equally generous.

Even more favourable terms are granted to those in Impaired Health.

Write to-day—stating sex and exact date of birth—for a personal quotation, which will be sent you without obligation.

**YOU CAN SECURE A GUARANTEED 7%,
10% OR EVEN MORE, ACCORDING TO AGE**

If your private income has been, or is to be, reduced, consider the advantages of an Annuity. Instead of 3½%, you could receive 7%, 10% or even more, according to your age. The increased income would be guaranteed to you for life, however long you live. All your plans for the future could be made with that in mind.

The Sun Life of Canada is the leading Annuity Company. It specialises in Annuities, and its contracts meet the most widely divergent needs. You, for instance, can take the benefits of a larger income, guaranteed for life, and yet take care of the future of your dependants. This is a new phase of Annuity business, another example of Sun Life of Canada leadership.

There are now over 12,000 Sun Life of Canada annuitants in the British Isles. Retired men, widows and others who have suffered serious reduction in income are finding the best solution to their difficulties in Sun Life of Canada Annuities.

*The Assets of the Sun Life of Canada exceed £120,000,000.
The Company operates in 40 different Countries and serves
over 1,000,000 Policy-holders. Government Audit and
Supervision complete the security, the Canadian Insurance
laws being among the most stringent in the world.*

Write, stating exact age and approximate Capital at disposal, to—

for £30

Look what it means!

For a saving out of income representing a weekly deposit of 11/6 (after allowing for the Government's contribution by means of a rebate of Income Tax), a young man during the period when **EARNING POWER** is greatest can make certain of receiving an income during the years of **RETIREMENT**, and provide an immediate sum of money available for **FAMILY PROTECTION**.

ABSOLUTE SECURITY

£1,000

IMMEDIATE
FAMILY
PROTECTION

£1,550

guaranteed in
cash for you, paid
free of tax in
middle life, or

£120

A YEAR
FOR LIFE

*Post
Now*

The creation, immediately, of a **GUARANTEED ESTATE** of £1,000. This gives Protection to the family from the moment the first deposit is made, at a time when protection is needed most.

Deposits will cease at age 55 (*the age taken in this example*), and then the assured may draw £1,550, with which to do so many things hitherto only dreamed of. On the other hand, if a private income for life is preferred, the sum may be left with the Company to provide an income guaranteed for life of £120 a year. This is absolutely guaranteed. The amounts receivable under this plan far exceed the total deposits made, and represent an investment at a substantial rate of interest, which always appreciates, and **NEVER DEPRECIATES**.

The deposits are in proportion to the size of policy and age of applicant; they can be large or small, to suit all circumstances, and benefits vary accordingly. The cash or income may be arranged to commence at age 50, 55, 60 or 65. Send for figures.

This **CONTRACT** is guaranteed by
the **Empire's largest purely Life
Assurance Company** :—

13. Collecting Agency, under Agreements, for many local Societies, throughout the country.
14. Selling Depot for Goods made by the Blind.
15. Gifts of Apparatus and Books and Periodicals to Blind Individuals, Schools, Societies, etc.
16. Grants to Institutions for the Blind.
17. Provision of Christmas Parcels.
18. Provision of Summer Holidays for Blind Children

FUNDS ARE URGENTLY NEEDED

All Donations should be addressed to the Hon. Treasurers—

National Institute for the Blind, 224-8, Great Portland Street, W.1

Balance Sheet, Annual Report, Forms of Bequest, etc., will gladly be forwarded on application.

Principal Charitable Bequests of the Year.

lxiii

APPENDED is a list of the principal bequests for charitable purposes recorded during the year. The amount for charitable purposes is, in a considerable proportion of the cases, approximate, owing to the bequests including a share of the residuary estate or consisting wholly, or in part, of business interests or of blocks of shares, for which a definite value cannot be given.

Reversionary bequests, where these are absolute (usually on the cesser of life-interests or of a period of years) are included, but contingent reversions (dependent upon failure of issue, the failure of prior trusts, or the failure to observe certain conditions, &c.) are not included, unless it is known that the reversion, though nominally contingent, is, in the events which have happened, absolute.

The amounts of residuary bequests are subject to variation on the final winding-up of the estate, owing possibly to variations in the amount of duty payable (as the final figures may place an estate for duty purposes in a different category (either higher or lower) as compared with the original value submitted on obtaining the grant of probate).

The list records the principal bequests published during the year, not necessarily those becoming payable during the year.

The flow of charity still shows no signs of serious abatement in volume, despite the shrinkage in values due to the general depression and very high taxation, the loss on the very large estates being somewhat compensated for by an increasing flow from estates in the medium categories.

The proportion of bequests for hospitals, for "social purposes," and educational trusts, continues to show marked increase at the expense of those for religious and sectarian purposes.

Name.	Gross Value of Estate	Approx Amount	Objects
Mills, Henry Trneman, of Leicester	£ 2,820,890	£ 1,500,000	Requests include £100,000 to Leicester Royal Infirmary, £5,000 each to Royal Agricultural Benevolent Inst., Bilt's and Foreign Bible Society, Royal Midland Counties Home for Incurables, Leamington, and residue to Leicester Royal Infirmary, Norfolk and Norwich Hospital, London Hospital, St. Thomas's Hospital and Middlesex Hospital.
Seaforth, Baroness, of London, Hayward's Heath and Scotland (personal estate)	£87,038	800,000	Left sums amounting to £645,000 from property over which she had power of disposal under her late father's will as to £257,000 to the German Red Cross, £60,000 to the Seaforth Sanatorium, Braham, £20,000 to London Hospital, £10,000 each to 12 other hospitals and other charitable institutions, and other large sums for hospitals and other institutions, principally for the care of women, children and animals, in London and Scotland, and from her own estate, among other bequests, £10,000 to the Pit Ponies Protection Society, £2,500 to the Foundling Hospital, and the residue of her property for such charitable institutions in Scotland and England as the trustees may select.
Stern, Sir Edward, of London and Chertsey (exclusive of interests under his late father's will)	£60,964	300,000	Bequests include £60,000 to Jews' Dumb Home, Clapham, S.W., £10,000 Jews' Orphan Asylum, Norwood, £10,000 Jewish Board of Guardians, and residue to London University to be applied, in the discretion of the Senate, for the advancement of the study of modern languages, especially modern French, German and Spanish, and commercial subjects, for advancement of science and chemistry, for benefit of the medical school of the said University so that any scholarships in connection therewith be held only by British-born subjects.
Henderson, James Stewart, of Hampstead, N.W. (un-settled)	£11,956	300,000	Subject to life-interest, residence Abbot'sford, Hastings, and £150,000 for a convalescent home, and the residue of the property to 23 hospitals and charitable institutions in London and Sydney, Australia, and such other institutions as the trustees may determine.
Barber, Dame Martha, of Remenham, Berks	£12,889	260,000	Residue for the benefit of Birmingham University for promotion of fine arts, of law and of music, and to give facilities for social life of the University.

Principal Charitable Bequests of the Year.

Name	gross Value of Estate.	Approx. Amount.	Objects.
	£	£	
Wilson, Charles, of Hampstead, N.W.	202,847	170,700	Bequests include £7,000 to National Lifeboat Inst., £500 Paddington Children's Hospital, and residue of estate St. Thomas's Hospital, London Hospital, Charing Cross Hospital, Hospital for Sick Children, Great Ormond Street, Royal Free Hospital, Cancer Hospital, London Fever Hospital, Temperance Hospital, London and Hampstead General Hospital.

The Hospitals and Institutions given in the following Section deserve the heartiest and most generous support it is possible to give.

The Proprietors of "Whitaker."

£10,000 IN DEBT

THE NEW "ARETHUSA" TRAINING SHIP

Urgently needs this sum of money to pay for balance of cost of fitting out the ship.

This magnificent work of training poor boys for the Royal Navy and Mercantile Marine deserves your hearty support.

Donations and Legacies are earnestly solicited

The old "Arethusa" Training Ship has trained 12,650 boys for the Sea Services. Help the new "Arethusa" to beat this fine record.

THE SHAFTESBURY HOMES AND "ARETHUSA" TRAINING SHIP,
164 SHAFTESBURY AVENUE, LONDON, W.C.2.

ALEXANDRA ORPHANAGE

Haverstock Hill, LONDON, N.W. 3.

Founded 1758.

Patrons: Their Majesties The King and Queen.

President: H.R.H. The Prince of Wales, K.G.

Treasurer (since 1897): The Rt. Hon. Lord Marshall, P.C., K.C.V.O.

The Orphanage is unsectarian, and helps fatherless and other necessitous children from all parts of the country and the Dominions, without restriction as to class or creed. Boys and girls are admitted at all ages between infancy and 11 years of age, and are cared for until 15. Their education fits them for useful positions in after-life. Opportunities occur for suitable children to have a secondary education. During the past 175 years 7,500 have been received; 870 are now resident, and others await vacancies.

More annual subscribers are needed. £10,900 required (by voluntary donations) each year above the assured income. Legacies are a useful means of helping. Please include the School in your Will. Annual Report sent on request, and the School may be visited by interested friends.

Forms of application for the admission of children and all needful information may be had of the SECRETARY, FRED. J. ROBINSON, F.C.I.S., 34-40, LUDGATE HILL, LONDON, E.C. 4.

MISS SMALLWOOD'S SOCIETY for the ASSISTANCE of LADIES in REDUCED CIRCUMSTANCES

Under Royal Patronage.

AN URGENT APPEAL **LEGACIES**

"Their works do follow them."

There are many people who, alas, cannot give to this Society during their lifetime, but we shall be glad if they will remember that a LEGACY, large or small, will be very useful and gratefully received. The need of help is greater than ever. Will lawyers kindly advise their clients to help this very human cause? also

Donations and New Annual Subscriptions will be thankfully received.

Please make cheques payable to Miss Smallwood's Society—

LANCASTER HOUSE, MALVERN

Reports on Application.

The most tragic figure of all

Throughout the centuries the most tragic figures are the victims of leprosy, condemned to a living death through no fault of their own.

It should be a matter of concern to all that there are more than a million sufferers in the British Empire, of whom many are children.

This ancient scourge could be brought under control by the application of modern methods and treatment.

Will you not help by sending a subscription or donation to the Hon. Treasurer,
SIR FRANK CARTER, C.I.E.

The British Empire Leprosy Relief Association
29, DORSET SQUARE, LONDON, N.W.1.

Latest figures show that 60,000 Officers and Men are unemployed. This Society is affording relief to needy Sailors and Dependants.

During 1932, 43,087 Cases of Special Need were helped, and 108,178 Free Meals and 27,031 Free Beds provided. Seamen's Widows and Orphans cared for.

BRITISH SAILORS' SOCIETY

(Founded 1818) 680, Commercial Road, London, E. 14.

The Cancer Hospital

(FREE)

(INCORPORATED UNDER ROYAL CHARTER)

FULHAM ROAD, LONDON, S.W. 3.

The first Special Hospital in London for the treatment of Cancer, Tumours, and Allied Diseases.

A special refuge for poor persons afflicted with this disease, who are admitted free and without letters of recommendation. A number of beds are provided for the use of Patients who may remain for Life. Out-patients are seen on their own application each week-day, except Saturday, at 2 p.m.

**THERE IS A BANK OVERDRAFT OF £40,000
WILL YOU HELP?**

Please send Cheques, crossed COUTTS & Co., to the Secretary.

FORM OF BEQUEST.

"I give and bequeath unto the Treasurer for the time being of THE CANCER HOSPITAL (FREE) situate in the Fulham Road, London, the sum of (£ free of Legacy Duty), to be applied towards carrying on the charitable designs of the said Institution."

[328]

WILL YOU HELP in THIS WORK FOR Suffering Children?

WE appeal to you to remember the suffering little boys and girls whose outlook would be blank indeed but for the generosity of people like yourself.

CHILDREN IN PAIN—An Earnest Appeal

The Children's Hospital of Birmingham admits every year over 6,500 in-patients and 16,000 out-patients—all helpless children whose pain you can help to alleviate with very little effort. It has 248 cots at

the hospital in Birmingham, and 37 at its new branch at Davos, Switzerland. A quick response on your part may be the means of one child at least being brought back to normal health. Won't you help us?

The

CHILDREN'S HOSPITAL BIRMINGHAM

HAROLD F. SHRIMPTON,
House Governor.

THE ELDER LAD FOR THE CHURCH

THE CHURCH LADS' BRIGADE

THE BEST AND OLDEST CHURCH ORGANISATION

for the elder lads, 14 to 21 years of age.

"I consider the Church Lads' Brigade to be the very finest organisation for the elder lad."—

HIS GRACE THE ARCHBISHOP OF YORK.

**FUNDS ARE URGENTLY NEEDED FOR THE
FURTHER DEVELOPMENT OF OUR WORK.**

Subscriptions may be sent to the Secretary, Church Lads' Brigade, Aldwych House, Catherine Street, London, W.C. 2, and all information on "How to Start a Company" will be gladly given.

Will YOU help

the varied works of the

CHURCH ARMY ?

All sorts and conditions of Suffering Humanity
are helped according to their varying needs.

Gifts welcomed by **Preb. Carlile, C.H., D.D., Hon. Chief Secretary,**
C.A. Headquarters, 55, Bryanston Street, London, W. 1.

Why we need LEGACIES and BEQUESTS

THE need of ex-Servicemen, including the disabled, and their dependants, and the care of those left behind by men who fell in action, are an ever-present and recurring charge on the Legion. Its work in these directions is dependent upon the sale of Poppies—a slender support for so great a work that must go on indefinitely. Every year since the inception of the Fund the expenditure has increased, and it is vitally necessary that the Fund should be strengthened and fortified against any possible diminution of income in the future by means of Legacies and Bequests.

EARL HAIG'S BRITISH LEGION APPEAL FUND

Full particulars and Forms of Request can be obtained from the Organising Secretary,
Capt. W. G. WILLCOX, M.B.E., Haig House, 26, Eccleston Square, London, S.W. 1.

GENERAL LYING-IN HOSPITAL,

York Road, Lambeth, S.E. 1. **ESTABLISHED 1765.**

Patron—H.M. The Queen.

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women in indigent circumstances, especially the wives of Soldiers and Sailors, and certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom, but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable. Over 2,000 Mothers and Babies attended annually.

Subscriptions and Donations thankfully received by the Treasurer, or Miss LILY HEARN, the Secretary, at the Hospital. [146]

THE GORDON BOYS' HOME

(THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—THE KING.

Vice-Patron—H.M. THE QUEEN

Chairman Executive Committee—H.R.H. THE DUKE OF YORK K.G.

THE HOME IS SITUATED AT WEST END, WOKING, between a BAGSHOT and BISLEY.

The Home is constructed to accommodate 200 Boys, chosen from the necessitous classes between the ages of about 14 and 18, and give them a training, up to the age of 17 or thereabouts, which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy, Air Force or Mercantile Marine.

Conditions of Admission.—1. The age for admission is from about 14 to 18 years. 2. A boy must, in the opinion of the Committee, be really necessitous. 3. He must be free from such physical or mental infirmity as would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which would require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the Home. A guaranteed payment of 25 annually during his stay at the Home will give a right of remuneration for all fulfilling the conditions of admission. *Subscriptions and Donations are urgently needed in order that the above number of boys may be maintained.*

Subscriptions are received by THE WESTMINSTER BANK, LIMITED, 1, St. James's Square, S.W., and by the Commandant at the Home, from whom any further information can be obtained. For financial reasons the London Office has been abolished.

COMMANDANT:—LIEUT.-COLONEL H. C. HERBERT, O.B.E.

GUY'S HOSPITAL

LONDON BRIDGE, S.E. 1,
URGENTLY NEEDS HELP.

President: H.R.H. THE PRINCE OF WALES, K.G.

Founded in 1725 by Thomas Guy, a Bookseller and Publisher in the City of London, Incorporated and Governed by Acts of Parliament, 11th George 1st, ch. xii., and 61st Victoria, ch. vi., as "The President and Governors of the Hospital founded at the sole costs and charges of Thomas Guy, Esquire."

The Hospital is empowered to receive gifts of, and to hold, land up to an aggregate yearly value of Sixty Thousand Pounds (exclusive of the site of the Hospital), notwithstanding the provisions of the Mortmain Acts.

BEDS
647

IN-PATIENTS (1932)
11,857

OUT-PATIENTS (1932)
112,273

Expenditure: £191,205 :: Income from Endowments: £69,858

The Governors earnestly appeal for further Subscriptions and Donations. The present Subscription List is only about £8,000 a year, although the Charity is dependent upon support from sources other than its endowments to the extent of over **£120,000 per annum.**

To form a permanent Memorial, if desired, a Donation or Bequest should be allocated to the Re-endowment Fund, which is permanently invested and the income only applied for the general purposes of the Hospital.

A Gift of £1,000 to this Fund, or an Annual Subscription of £50, will respectively endow or support a Bed, over which a brass tablet, inscribed in accordance with the wishes of the Benefactor, can be placed.

A copy of the Annual Report of the Hospital can be obtained on application to Mr. W. J. Curry, Clerk to the Governors, Guy's Hospital, E. 1. Telephone: Hop 1086.

Bankers: THE BANK OF ENGLAND.

THE HOSPITAL FOR DISEASES OF THE SKIN

Telephone. Hop. 1021.

70-71, BLACKFRIARS ROAD, S.E.

ESTABLISHED 1841.

Treasurer—THE RT. HON. THE LORD MORRIS, P.C., K.O.M.G.

This Hospital, established in 1841, was the first and for many years the only one of its kind established in the United Kingdom. Donations and Subscriptions are urgently desired in order to re-open its beds for In-patients. Since its foundation no less than 614,000 patients have been treated, and the scientific equipment of the Institution has always been kept thoroughly abreast of modern developments in research and treatment. The Light Department is provided with X-rays, radium and ultra-violet light apparatus. It is a centre both of dermatological therapeutics and education, and welcomes at its clinics medical practitioners and students. Patients should attend daily at 1.30 p.m., except Saturdays, or on Fridays at 6 p.m. They are expected to contribute to the funds of the hospital according to their means and position.

FREDERICK HAYTER, Secretary

[108]

Imperial Cancer Research Fund.

Patron—HIS MOST GRACIOUS MAJESTY THE KING.

President—His Grace the Duke of Bedford.

Hon. Treasurer—Sir Holburt Waring, C.B.E., P.R.C.S.

Director—Dr. J. A. Murray, F.R.S.

The object of the Research is for the good, not only of the whole British Empire but of the whole world. The scope of the work embraces detailed investigation of Cancer in every part of the Empire as it occurs in the human race and in the vertebrate animal kingdom. Our recent researches have undoubtedly advanced our knowledge of Cancer, and it is not too much to hope that the further prosecution of the investigations will ultimately yield results of the greatest importance on the nature and treatment of the disease.

Donations and Subscriptions may be sent to the Hon. Treasurer, Imperial Cancer Research Fund, 8, Queen Square, London, W.C. 1, or may be paid to the Westminster Bank, Marylebone Branch, 1, Stratford Place, London, W. 1, A/c, Imperial Cancer Research Fund.

FORM OF BEQUEST.

I hereby bequeath the sum of £ to the Treasurer of the Imperial Cancer Research Fund under the direction of the Royal College of Physicians of London and the Royal College of Surgeons of England, 8/11, Queen Square, London, W.C. 1, for the purpose of Scientific Research, and I direct that his receipt shall be a good discharge for such legacy.

SUPPORTED BY VOLUNTARY CONTRIBUTIONS.

Patron—HER MAJESTY THE QUEEN.

OBJECTS OF THE H SPITAL.

- (1) The Delivery of Married Women, both in the Hospital and at their own homes.
- (2) The Delivery of deserving Single Women, in the Hospital, *with their first child only.*
- (3) The training of Medical Pupils, Midwives and Maternity Nurses.
- (4) The treatment of and research into the causes of puerperal fever.

Over 2500 poor women are admitted annually to the Main Hospital, and over 250 cases of puerperal fever are treated at the new Isolation Hospital. In addition, over 1750 Out-patients are delivered in their own homes in the Hospital Districts. There are also over 25,000 attendances at the Ante-Natal and Child Welfare Departments.

The Isolation Hospital and Research Laboratories are unique, being the only combined centre for specialised treatment of puerperal fever, the chief single cause of maternal mortality.

Help is urgently required for maintenance and for Endowment, also for Rebuilding the Hospital on the site at Hammersmith, approved by the Ministry of Health and King Edward's Hospital Fund.

A gift or legacy of £1000 will endow a bed in perpetuity.

CONTRIBUTIONS will be gratefully received by the Hospital Bankers, Martin's Bank, Ltd., Whitehall, S.W., or at the Hospital by H. B. STOKES, *Secretary-Superintendent.*

The Association grants Annuities to Gentlemen of both sexes, such as Clergymen, Officers of the Navy and Army, Barristers, Solicitors, Landowners and Gentlemen Farmers, Doctors, and their families, and others of similar social standing. Applicants must be over 40, of sound mind, unable, through age or bodily infirmity, to earn a livelihood, and not in receipt of an income exceeding £60 a year. Since its foundation in 1861, the Association has granted annuities to 4,106 persons, of whom 2,680 are now living. The list of accepted Candidates for an annuity contained the names of over 430 persons, many of whom were certified to be without any income at all. Permanent Memorial Annuities can be founded, to which, under certain conditions, the Founders can retain for life the right of nomination. The cost can be ascertained from the Secretary.

ANNUAL SUBSCRIPTIONS, DONATIONS and LEGACIES are Earnestly Solicited to provide annuities for the waiting Candidates, and to augment the Annuities.

Brig.-Gen. R. L. ANLEY, C.B., C.M.G., D.S.O. Secretary

THE DESTITUTE SAILORS' FUND

(Founded 1837).

President: **H.R.H. THE PRINCE GEORGE, K.G.**

The vast majority of stranded merchant seamen do not seek charity—they seek work. So often they seek it in vain and sink into destitution. Many men with Masters' Certificates are unable to get employment even as A.B.s.

For 106 years The Destitute Sailors' Fund has given such workless men food, shelter, clothing, and, best of all, has helped them to find employment. The work of the Fund is threefold: Temporal, Moral, and Spiritual.

Funds urgently needed for The Beresford Memorial Seamen's Rest, Welclose Square, London, E. 1.

Donations should be sent to the Chairman, Admiral H. L. P. Heard, C.B., D.S.O., or Hon. Secretary, c/o The Sailors' Home, Dock Street, London, E. 1.

DEVOTED SERVICE

THERE are few human needs, from the cradle to the grave, to which the Salvation Army does not minister.

Every kind of Social institution has come into existence in The Army. All represent devoted and skilled service, and the workers realise that mere social amelioration is not enough. A new heart, by Divine grace, is needed to help in the struggle against a lapse into old ways. All this work is entirely dependent upon voluntary gifts.

Balance Sheets, Reports, etc., gladly sent on application to the
